Subject: Funds Allocation

Afternoon,

I urge you to please consider allocating majority if not all funds to the School Bus Market. many district have old and outdated fleets. Majority of us simply can not afford to buy enough new buses to get the old engines off the road.

Many district including mine are growing at such a fast rate that when we do buy new buses they go to added routes for growth. This is making it impossible for us to get old buses off the road. If we had grant money that could double or triple our number of buses bought within the same amount of district funds we could accomplish so much more!

Highest Regards,

Gody Cox
