Subject: Electric School Buses

Please allocate a large portion of the VW settlement to helping schools procure electric school buses.

Electric powered buses are safer, simpler, more reliable, more efficient, cleaner and cheaper to maintain than than fossil fueled combustion engines — especially for the stop-and-go patterns of school buses.

In addition, electric buses model environmental responsibility for the children who ride them and show Texans, the nation, and world that you folks comprehend the perils of climate change.

Please do all you can to encourage the use of electric vehicles.
