Emissions Reduction Requirements, Credits, and Allowances

By signing the Project Application Form 10430, the applicant certifies that the NOx emissions reductions achieved by this activity are not already required under the conditions of a permit or rule for this site or facility or to ensure that the site or facility remains under an emissions limit.

The applicant also understands that any emissions reduction measure that would otherwise generate a marketable credit under a state or federal emissions averaging, banking, or trading program is not eligible unless the credits are transferred to the TCEQ for the state implementation plan and permanently retired. This includes emissions allowances assigned to the applicant under the Mass Emission Cap and Trade Program in the Houston-Galveston-Brazoria Area established under TCEQ rules (30 TAC Chapter 101, Subchapter H, Division 3). If a grant is awarded, the applicant must transfer and permanently retire any applicable credits or allowances.
