

## Emissions Reduction Incentive Grant (ERIG) Application

### Supplemental Form 4: Non-Road Heavy-Duty Equipment Used for Gas Recovery Purposes

For non-road equipment used primarily for natural gas recovery purposes, the TCEQ may exempt the applicant from the requirement that 75% of the annual operation of the grant-funded equipment must occur in the eligible counties listed in the application and contract documents.

**Note:** If the applicant is exempt from using the equipment less than 75% of the annual use in the designated areas, the applicant must agree to install a GPS tracking device through a designated TGMS Contractor to track and report usage and location of the use of the non-road equipment. Refer to section 2.7(c) of the RFGA for an explanation of the percent of use commitment.

Explain below in detail how the equipment being upgraded has been used and how the upgraded equipment will be used in natural gas recovery. For example, a generator used on a natural gas drill rig may qualify, but a tracked dozer used to build a road to a drill site would not.
