Poway, CA 92064

Re: Dual-Fuel Conversion System Assessment
Tracking No. **DF-2015-002**

Dear Mr. Campbell:

The Texas Commission on Environmental Quality (TCEQ) has reviewed your request for a determination of the percentage reduction in nitrogen oxides (NO_x) emissions that may be considered for a grant under the Emissions Reduction Incentive Grants (ERIG) Program to retrofit a heavy-duty on-road engine with the dual-fuel conversion system listed below.

Manufacturer	Engine Family	System Approval	Fuel
Clean Air Power, Inc.	CCLAHo893E6J	EPA Heavy-Duty On-Road Engine Outside Useful Life	Diesel/CNG

This assessment is conducted under authority of Texas Health and Safety Code, §386.104(f-1), and the *Texas Emissions Reduction Plan: Guidelines for Emissions Reduction Incentive Grants (RG-388)*. Based on the information provided, the TCEQ has determined that a **16%** reduction in NO_x emissions may be used in an application to the ERIG Program.

This determination only applies to a project to retrofit an engine included under the U.S. Environmental Protection Agency's (EPA) acceptance of the conversion system, as listed on the EPA's website at <<http://www.epa.gov/otaq/consumer/fuels/altfuels/altfuels.htm>>. The installation of the system must comply with all applicable EPA requirements.

This letter is provided solely to establish a percentage emissions reduction factor for use under the ERIG Program. The TCEQ has made no other determinations and provides no other approvals regarding the system.

Mr. Kevin Campbell
