What is automated TERP monitoring?

A GPS monitoring service offered by Precision Tracking Solutions, Inc. (PTS) through an agreement with the Texas Commission on Environmental Quality. The service reports your mileage or engine hours directly to the TCEQ.

Why might I be interested?

- You will not have to submit semiannual usage reports for grant activities.
- PTS will send your reports to the TCEQ.
- Reports are specifically designed for TERP Grantees, by county.
- While subscribed to the Precision Tracking Solutions service, Grantees will receive a yearly usage report for accuracy tracking.
- Grantee can utilize all features of system in managing their assets/fleet. Real-time management and visibility into vehicle operations, dispatch, alerts, mapping, driver, real-time activity.

What is the Cost of the TERP GPS Monitoring Service?

Hardware and Installation	\$557.33
Service Fee	\$29.58/month

TERP includes the cost of the hardware and installation in the eligible grant amount. Depending on application grant and or equipment type, additional charges for installation and other fees may apply. Please check with Precision Tracking Solutions for precise application guidelines.
