RE: Certification of Goodyear Coaxial Hoses

Dear Ms. Russell:

The Texas Commission on Environmental Quality has reviewed the *Final Report for Goodyear Coaxial Hose for use with Vapor Recovery Systems*, dated July 21, 2010. A Stage II recovery system or component must be independently evaluated by a third-party to be certified for use in Texas as required by Title 30 Texas Administrative Code (TAC) §115.243(2). Bob McKinney of Ken Wilcox Associates, Inc. conducted the third-party evaluation.

The Goodyear coaxial hose was tested for approval with a combination of a certified nozzle and vapor recovery system. In accordance with 30 TAC §115.243(2), the Goodyear coaxial hose and components, as applicable to existing or new installations, is hereby certified for use with Stage II systems in Texas when installed and operated in accordance with manufacturer recommendations.

For further assistance, please contact Ms. Lisa Shuvalov of my staff at lshuvalo@tceq.state.tx.us or (512) 239-4484.

Sincerely,

A handwritten signature in black ink, appearing to read "Susana M. Hildebrand".

Susana M. Hildebrand, P.E.
