Discussion on proper rule citation for certain items on the Equipment and Categories List (ECL) including recycling equipment, property installed to meet a best management practice (BMP), and hazardous material storage areas.

During the December 6, 2010 meeting, staff requested assistance in determining the appropriate rule citations for several items listed on what was then called the ECL (now the Tier I Table). The primary issue is how specific does a rule need to be in order to qualify as an appropriate citation.
