Where is the Area of Concern Located?
* North of McGowan Street
* South of the Trinity River
* East of Cedar Crest
* West of Sargent Road and the Union Pacific Railroad as it extends north to the Trinity River

Why Remove this Location and Pollutant(s) from the APWL?
At the former CAMS Dallas - Morrell air monitoring site, which was located at 3049 Morrell St, the annual average nickel concentrations, measured as total suspended particulate (TSP), exceeded the long-term nickel air monitoring comparison value (AMCV) as highlighted in the 2004 - 2008 annual ambient air evaluations for Region 4. However, TSP includes fractions of particulate matter (PM) which are not inhalable. The TSP monitor was replaced with a PM$_{10}$ monitor to more appropriately address the inhalable nickel fractions. The annual nickel PM$_{10}$ concentrations from 2012 to 2015 were below the long-term AMCV, and the primary nickel source closed in November, 2013, supporting removal of this site from the APWL.

Annual evaluations may be accessed here:
http://www.tceq.state.tx.us/implementation/tox/regnemio/AirMain.html
Information on AMCVs may be accessed here:
http://www.tceq.state.tx.us/implementation/tox/AirToxics.html#amcv
