The annual average benzene concentration at the CAMS 131 City Service Center air monitoring site located at 201 H.O. Mills Blvd. exceeded the air monitoring comparison value (AMCV) in 2001-2005, but not in 2006-2007. However, in 2008, the annual benzene concentrations exceeded the AMCV again and CAMS 131 recorded the highest benzene concentration in Texas for 2008. Benzene has also been monitored since July 2004 as part of a Supplemental Environmental Project at the Flint Hills (formerly Huntsman Petrochemical Corporation Aromatics and Olefins) Plant.

Annual evaluations may be accessed here:
http://www.tceq.state.tx.us/implementation/tox/regmemo/AirMain.html

Information on AMCVs may be accessed here:
http://www.tceq.state.tx.us/implementation/tox/AirToxics.html#amcv
