

The Texas Commission on Environmental Quality (TCEQ, agency, or commission) adopts the amendments to §§335.1, 335.2, 335.10 - 335.13, 335.19, 335.24, 335.61, 335.62, 335.69, 335.76, 335.78, 335.111, 335.112, 335.151, 335.152, 335.155, 335.168, 335.170, 335.213, 335.222, 335.251, 335.431, and 335.504; and new §335.79.

Amended §§335.1, 335.2, 335.10 - 335.13, 335.19, 335.24, 335.61, 335.62, 335.69, 335.76, 335.78, 335.111, 335.112, 335.151, 335.152, 335.155, 335.168, 335.170, 335.213, 335.222, 335.251, 335.431, and 335.504; and new §335.79 are adopted *without changes* to the proposed text as published in the October 5, 2012 issue of the *Texas Register* (37 TexReg 7895) and therefore will not be republished.

### **Background and Summary of the Factual Basis for the Adopted Rules**

The federal hazardous waste program is authorized under the Resource Conservation and Recovery Act of 1976 (RCRA), §3006. States may obtain authorization from the United States Environmental Protection Agency (EPA) to administer the hazardous waste program. State authorization is a rulemaking process through which EPA delegates the primary responsibility of implementing the RCRA hazardous waste program to individual states in lieu of EPA. This process ensures national consistency and minimum standards while providing flexibility to states in implementing rules. State RCRA programs must always be at least as stringent as the federal requirements.

Since the beginning of the federal hazardous waste program, the State of Texas has continuously participated in the EPA's authorization program. To maintain RCRA authorization, the commission must adopt regulations to meet the minimum standards of federal programs administered by EPA. Because the federal regulations undergo regular revision, the commission adopts new regulations regularly to meet the changing federal regulations.

Texas received authorization of its hazardous waste "base program" under the RCRA on December 26, 1984. Texas received authorization for revisions to its base hazardous waste program on February 17, 1987 (Clusters I and II). Texas submitted further revisions to its hazardous waste program and received final authorization of those revisions on March 15, 1990, July 23, 1990, October 21, 1991, December 4, 1992, June 27, 1994, November 26, 1997, October 18, 1999, September 11, 2000, June 14, 2005 (Clusters III - X), March 5, 2009 (Clusters XI - XV), and May 7, 2012 (Clusters IX and XV - XVIII).

The commission adopts in this rulemaking parts of RCRA Rule Clusters XIX - XXI that implement revisions to the federal hazardous waste program which were made by EPA between July 1, 2008 and June 30, 2011. Both mandatory and optional federal rule changes in these clusters are adopted. Adoption of one of the federal rule changes is mandatory in order to maintain RCRA authorization. Although not necessary in order

to maintain authorization, EPA also recommends that the optional federal rule changes be incorporated into the state rules. In addition, the commission adopts revisions to parts of previously adopted Clusters XIV - XVII that implement revisions requested by EPA that are needed to maintain authorization. Establishing equivalency with federal regulations will enable the State of Texas to operate all aspects of the federal hazardous waste program in lieu of the EPA.

All adopted rule changes are discussed further in the Section by Section Discussion portion of this preamble. Two corresponding rulemakings are published in this issue of the *Texas Register* and include changes to 30 TAC Chapter 305, Consolidated Permits and 30 TAC Chapter 324, Used Oil Standards.

### **Section by Section Discussion**

The commission adopts administrative changes throughout the rulemaking to reflect the agency's current practices and to conform to *Texas Register* and agency guidelines. These changes include updating references to Texas State Agencies, updating cross-references, and correcting typographical, spelling, and grammatical errors.

#### *§335.1, Definitions*

The commission adopts §335.1(39) to conform to federal regulations previously promulgated in the March 4, 2005, issue of the *Federal Register* (70 FR 10776).

Specifically, this amendment will revise the definition of "Designated facility" so that it is consistent with the EPA definition in 40 Code of Federal Regulations (CFR) §260.10. Also, the definition is reorganized to separate the definition of a Texas Class 1 waste designated facility from the definition of a hazardous waste designated facility.

The commission adopts §335.1(59)(B) to conform to federal regulations previously promulgated in the September 8, 2005, issue of the *Federal Register* (70 FR 53420).

This amendment will clarify the definition of "Facility" for the purpose of implementing corrective action under the authority of a standard permit. Specifically, this amendment will incorporate by reference corrective action authorized by 40 CFR Part 267, Subpart F (Releases from Solid Waste Management Units) to address corrective action under the authority of a standard permit.

The commission adopts §335.1(95) to conform to federal regulations previously promulgated in the March 4, 2005, issue of the *Federal Register* (70 FR 10776).

Specifically, this amendment will revise the definition of "Manifest" so that it is consistent with the EPA definition in 40 CFR §260.10.

The commission adopts §335.1(96) to conform to federal regulations previously promulgated in the March 4, 2005, issue of the *Federal Register* (70 FR 10776).

Specifically, this amendment will revise the definition of "Manifest tracking number" so

that it is consistent with the EPA definition in 40 CFR §260.10.

The commission adopts §335.1(138)(A)(iv) to conform to federal regulations previously promulgated in the July 28, 2006, issue of the *Federal Register* (71 FR 42928). This amendment will add requirements for notification and recordkeeping to exclude cathode ray tubes (CRTs) that meet the requirements in 40 CFR §261.39 and §261.40 for reuse and recycling from classification as a solid waste. This exclusion is also found in 40 CFR §261.4 which was adopted in a previous rulemaking. This amendment will add additional language from 40 CFR Part 261, Subpart E concerning conditional exclusions and notification and recordkeeping requirements for CRTs. In addition, technical corrections are incorporated by reference to conform to federal regulations previously promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989).

The commission also adopts §335.1(142) to conform to federal regulations previously promulgated in the September 8, 2005, issue of the *Federal Register* (70 FR 53420). Specifically, this amendment will revise the definition of "Standard permit" so that it is consistent with the EPA definition in 40 CFR §124.2(a).

#### *§335.2, Permit Required*

The commission adopts §335.2(g) to conform to federal regulations previously

promulgated in the April 4, 2006, issue of the *Federal Register* (71 FR 16862).

Specifically, this amendment will revise the reporting requirements for treatability studies by reducing the amount of information required to be submitted.

*§335.10, Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste*

The commission adopts §335.10 by restructuring to separate Texas Class 1 waste from hazardous waste manifest requirements thereby eliminating confusion between the two programs. The commission incorporates by reference EPA manifest requirements to ensure consistency. Current Class 1 waste manifest requirements are the same as EPA hazardous waste manifest requirements with some minor differences. This rulemaking does not change any of those requirements. The Uniform Hazardous Waste Manifest requirements are incorporated by reference as published in the March 4, 2005, issue of the *Federal Register* (70 FR 10776) and amended through the March 18, 2010, issue of the *Federal Register* (75 FR 12989). These changes will allow generators of hazardous and industrial waste to more readily identify applicable manifest requirements. This adopted amendment will help ensure compliance with manifest requirements including proper completion of the manifest form. Additionally, references to the EPA are changed to the TCEQ and references to the regional director are changed to the executive director.

*§335.11, Shipping Requirements for Transporters of Hazardous Waste or Class 1*

*Waste*

The commission adopts §335.11 by restructuring to separate Texas Class 1 waste from hazardous waste manifest requirements thereby eliminating confusion between the two programs. The commission incorporates by reference EPA manifest requirements to ensure consistency. Current Class 1 waste manifest requirements are the same as EPA hazardous waste manifest requirements with some minor differences. This adopted rulemaking will not change any of the manifest requirements. The Uniform Hazardous Waste Manifest requirements are incorporated by reference as published in the March 4, 2005, issue of the *Federal Register* (70 FR 10776) and amended through June 16, 2005, issue of the *Federal Register* (70 FR 35034).

*§335.12, Shipping Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities*

The commission adopts §335.12 by restructuring to separate Texas Class 1 waste from hazardous waste manifest requirements thereby eliminating confusion between the two programs. Manifest requirements for hazardous waste are adopted by reference from EPA rules to ensure consistency. The Uniform Hazardous Waste Manifest requirements are incorporated by reference as published in the March 4, 2005, issue of the *Federal Register* (70 FR 10776) and amended through March 18, 2010, issue of the *Federal Register* (75 FR 12989).

*§335.13, Recordkeeping and Reporting Procedures Applicable to Generators Shipping Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste*

The commission adopts §335.13(n) to conform to federal regulations previously promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989).

Specifically, this amendment will make corrections to typographical errors in the CFR.

The commission adopts §335.13(o) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). Specifically, this amendment will implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the Organization for Economic Cooperation and Development (OECD), establish notice and consent requirements for spent lead-acid batteries intended for reclamation in a foreign country, specify that all exception reports concerning hazardous waste exports be sent to the International Compliance and Assurance Division in the Office of Enforcement and Compliance Assurance's Office of Federal Activities in Washington, D.C., and require United States receiving facilities to match EPA-provided import consent documentation to incoming hazardous waste import shipments and to submit to EPA a copy of the matched import consent documentation and RCRA hazardous waste manifest for each import shipment. Because of the federal government's special role in matters of foreign policy, EPA does not authorize states to administer federal import/export functions in any section of the RCRA hazardous waste regulations. Although states do not receive

authorization to administer the federal government's export functions in 40 CFR Part 262, Subpart E, import functions in 40 CFR Part 262, Subpart F, import/export functions in 40 CFR Part 262, Subpart H, or the import/export related functions in any other section of the RCRA hazardous waste regulations, state programs are required to adopt those federal provisions that are more stringent than existing state requirements to maintain their equivalency with the federal program. This amendment is more stringent than the current state rules. Therefore, this amendment is required by EPA to be adopted into state rules, in order to maintain authorization.

*§335.19, Standards and Criteria for Variances from Classification as a Solid Waste*

The commission adopts §335.19(b) to conform to federal regulations previously promulgated in the April 4, 2006, issue of the *Federal Register* (71 FR 16862).

Specifically, this amendment will reduce the requirements for requests for a variance from classifying as a solid waste those materials that are reclaimed and then reused as feedstock within the original production process in which the materials were generated if the reclamation operation is an essential part of the production process.

*§335.24, Requirements for Recyclable Materials and Nonhazardous Recyclable Materials*

The commission adopts §335.24(c)(1)(A) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). Specifically, this

amendment will implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the OECD, establish notice and consent requirements for spent lead-acid batteries intended for reclamation in a foreign country, specify that all exception reports concerning hazardous waste exports be sent to the International Compliance and Assurance Division in the Office of Enforcement and Compliance Assurance's Office of Federal Activities in Washington, D.C., and require United States receiving facilities to match EPA-provided import consent documentation to incoming hazardous waste import shipments and to submit to EPA a copy of the matched import consent documentation and RCRA hazardous waste manifest for each import shipment. Because of the federal government's special role in matters of foreign policy, EPA does not authorize states to administer federal import/export functions in any section of the RCRA hazardous waste regulations. Although states do not receive authorization to administer the federal government's export functions in 40 CFR Part 262, Subpart E, import functions in 40 CFR Part 262, Subpart F, import/export functions in 40 CFR Part 262, Subpart H, or the import/export related functions in any other section of the RCRA hazardous waste regulations, state programs are required to adopt those federal provisions that are more stringent than existing state requirements to maintain their equivalency with the federal program. This amendment is more stringent than the current state rules. Therefore, this amendment is required by EPA to be adopted into state rules to maintain authorization.

*§335.61, Purpose, Scope and Applicability*

The commission adopts §335.61(i) to conform to federal regulations promulgated in the December 1, 2008, issue of the *Federal Register* (73 FR 72912). This amendment adopts exemptions for a specific generator status (i.e., large and small quantity generators and conditionally exempt small quantity generators (CESQGs)) for those eligible academic entities that choose to comply with 40 CFR Part 262, Subpart K (known as the "Academic Laboratories rule"). The Academic Laboratories rule is incorporated by reference in §335.79. The Academic Laboratories rule establishes an alternative set of generator requirements applicable to laboratories owned by eligible academic entities. The alternative requirements are flexible but protective and address the specific nature of hazardous waste generation and accumulation in these laboratories. Further detailed discussion of the Academic Laboratories rule can be found in the Section by Section Discussion in §335.79.

In particular, the amendment to §335.61 will set out exemptions for eligible academic laboratories under different hazardous waste generator statuses. Specifically, this amendment will exempt large and small quantity generators from certain requirements of hazardous waste determination (set out in §335.504) and from the satellite accumulation area rule (set out in §335.69). In addition, this amendment will eliminate exemptions (set out in §335.78) for CESQGs, such as the exemption from regulations

under 40 CFR Parts 124, 262 - 266, and 268, and the notification requirements of RCRA, §3010. However, academic laboratories under CESQG status will be able to take advantage of the benefits of the Academic Laboratories rule. Those benefits include the flexibility to decide when and where on-site hazardous waste determinations are made and the incentive to remove old and expired chemicals from the laboratories.

*§335.62, Hazardous Waste Determination and Waste Classification*

The commission adopts §335.62 to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). The amendment will add a reference to 40 CFR Part 267 which EPA inadvertently omitted after the rule was promulgated in September 8, 2005 (70 FR 53420). The amendment will add 40 CFR Part 267 to a list of Parts (261, 264 - 266, 268, and 273) to which a hazardous waste generator must refer for possible exclusions or restrictions pertaining to managing specific waste.

*§335.69, Accumulation Time*

The commission adopts §335.69(a)(4)(B) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). This amendment will correct a limited reference to 40 CFR §268.7(a)(5) which only addresses waste analysis plans. The amendment will apply all applicable requirements under 40 CFR

Part 268 (pertaining to Land Disposal Restrictions) to large and small quantity generators.

The commission adopts §335.69(b) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). The amendment will clarify that the requirements in §335.69(b), pertaining to hazardous waste accumulation time, apply only to large quantity generators.

The commission adopts §335.69(d) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). The amendment will clarify that the satellite accumulation provisions for large quantity generators are also applicable to small quantity generators. The amendment will also add the citation of 40 CFR §261.31 to clarify that this provision applies to acutely hazardous wastes.

The commission adopts §335.69(e) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). The amendment will add the citation of 40 CFR §261.31, which was inadvertently omitted after the dioxin listings for acutely hazardous wastes listed under 40 CFR §261.31 were promulgated on April 23, 1985 (50 FR 16044).

The commission adopts §335.69(f)(4)(B) to delete "and" to allow the addition of a new subparagraph.

The commission also renumbers §335.69(f)(4)(C) to §335.69(f)(4)(D) to add a new subparagraph, and also adopts an amendment to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). This amendment will correct a limited reference to 40 CFR §268.7(a)(5) which only addresses waste analysis plans. The amendment will apply all applicable requirements under 40 CFR Part 268 (pertaining to Land Disposal Restrictions) to large and small quantity generators.

The commission adopts §335.69(f)(4)(C) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). Subparagraph (C) will add 40 CFR Part 267 to the list of other requirements hazardous waste generators must follow. EPA inadvertently did not include 40 CFR Part 267 in the list after the rule was promulgated in September, 2005.

The commission adopts changes to §335.69(m) by adding paragraphs (1) and (2) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). Specifically, the amendment will incorporate requirements for completion of the manifest regarding rejected loads.

The commission adopts §335.69(n) to separate requirements for rejected loads of hazardous waste from Class 1 waste. The commission adopts §335.69(n) with new language addressing Class 1 waste generators. Specifically, this amendment will add requirements for Class 1 waste to alleviate confusion for requirements for each type of rejected waste.

*§335.76, Additional Requirements Applicable to International Shipments*

The commission adopts §335.76(a) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). This amendment will implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the OECD. Specifically, this amendment will clarify that countries belonging to the OECD must comply with the requirements of 40 CFR Part 262, Subpart H (Transfrontier Shipments of Hazardous Waste for Recovery within the OECD).

The commission adopts §335.76(d) to conform to federal requirements promulgated in the March 4, 2005, issue of the *Federal Register* (70 FR 10776) and amended through the March 18, 2010, issue of the *Federal Register* (75 FR 12989). Specifically, the amendment will incorporate requirements for completion of the manifest regarding imports of hazardous waste.

The commission adopts §335.76(f) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). This amendment will implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the OECD. Specifically, this amendment will clarify that any person who exports hazardous waste to a foreign country or imports hazardous waste from a foreign country into the state must comply with the requirements contained in 40 CFR §262.58 (International Agreements).

The commission adopts §335.76(h) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). This amendment will implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the OECD. Specifically, this amendment will clarify that transfrontier shipments of hazardous waste for recovery within the countries belonging to the OECD must comply with the requirements of 40 CFR Part 262, Subpart H.

*§335.78, Special Requirements for Hazardous Waste Generated by Conditionally Exempt Small Quantity Generators*

The commission adopts §335.78(c)(6) to conform to federal regulations promulgated in the December 1, 2008, issue of the *Federal Register* (73 FR 72912). The amendment

will remove a period at the end of the paragraph and add the word "or" to allow for an additional paragraph.

The commission adopts §335.78(c)(7) to conform to federal regulations promulgated in the December 1, 2008, issue of the *Federal Register* (73 FR 72912). This amendment will allow an eligible academic entity to exclude the amount of unused commercial chemical product (listed in 40 CFR Part 261, Subpart D or exhibiting one or more characteristics in 40 CFR Part 261, Subpart C) generated solely during a laboratory clean-out from being counted toward its hazardous waste generator status.

The commission adopts §335.78(j) to conform to federal regulations promulgated in the July 30, 2003, issue of the *Federal Register* (68 FR 44659). The amendment will remove the phrase "if it is destined to be burned for energy recovery." This amendment will clarify recycled used oil management standards for CESQGs.

*§335.79, Alternative Requirements for Hazardous Waste Determination and Accumulation of Unwanted Material for Laboratories Owned by Eligible Academic Entities*

The commission adopts new §335.79 to conform to federal regulations promulgated in the December 1, 2008, issue of the *Federal Register* (73 FR 72912), as amended through the December 20, 2010, issue of the *Federal Register* (75 FR 79304). This new section

will incorporate by reference an alternative set of generator requirements applicable to laboratories owned by eligible academic entities promulgated under 40 CFR Part 262, Subpart K. Eligible academic entities are colleges and universities, as well as teaching hospitals and nonprofit research institutes that are either owned by or formally affiliated with a college or university. The Academic Laboratories rule does not apply to non-laboratory generated hazardous wastes from other operations of a university or college nor commercial laboratories.

The Academic Laboratories rule will provide a flexible but protective set of regulations that address the specific nature of hazardous waste generation and accumulation in the laboratories owned or operated by academic entities. Specifically, this rule will allow eligible academic entities the flexibility to make hazardous waste determinations in the laboratory; at an on-site central accumulation area; or at an on-site treatment, storage, or disposal facility. Also, this rule will provide incentives for eligible academic entities to clean-out old and expired chemicals that may pose unnecessary risk. Further, this rule will require the development of a Laboratory Management Plan (LMP) which is expected to result in safer laboratory practices and increased awareness of hazardous waste management.

The adopted rule will be optional for eligible academic entities. That is, eligible academic laboratories could choose to comply with 40 CFR Part 262, Subpart K in lieu

of the existing generator regulations. In states authorized to implement the RCRA program, such as Texas, 40 CFR Part 262, Subpart K will only be available as an option once it has been adopted by the state in which the eligible academic entity is located.

The commission incorporates by reference six technical corrections to the Academic Laboratories rule published in the December 20, 2010, issue of the *Federal Register* (75 FR 79304). These changes include correction of errors such as omissions and redundancies as well as removal of an obsolete reference to the now-terminated Performance Track program. These technical corrections will improve the clarity of the state's Academic Laboratories rule. The Academic Laboratories rule and the corrections are recommended by EPA to be adopted into state rules, but are not required to maintain RCRA authorization.

#### *§335.111, Purpose, Scope, and Applicability*

The commission adopts §335.111 to make technical corrections.

#### *§335.112, Standards*

The commission adopts §335.112(a)(1) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). This amendment will implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the OECD. Specifically,

this amendment will specify that all exception reports concerning hazardous waste exports be sent to the International Compliance and Assurance Division in the Office of Enforcement and Compliance Assurance's Office of Federal Activities in Washington, D.C., and will require United States receiving facilities to match EPA-provided import consent documentation to incoming hazardous waste import shipments and to submit to EPA a copy of the matched import consent documentation and RCRA hazardous waste manifest for each import shipment.

The commission adopts §335.112(a)(3), (4), and (13) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989).

Revisions to interim standards for owners and operators of hazardous waste treatment, storage, or disposal facilities in 40 CFR Part 265 are adopted by reference under this section. This amendment will correct citations, clarify regulatory requirements, and incorporate conforming changes that were inadvertently omitted by EPA under the interim standards for owners and operators of hazardous waste treatment, storage, or disposal facilities in 40 CFR Part 265. This amendment is as stringent as the current state rules. EPA recommends that this amendment be adopted into state rules, but it is not required to maintain RCRA authorization.

The commission also adopts §335.112(a)(4), to add language that was inadvertently omitted in a previous rule adoption. Specifically, the new language reinstates the

exception to 40 CFR §§265.71, 265.72, 265.75, 265.76, and 265.77 because these requirements are found elsewhere.

The commission also adopts §335.112(a)(14) to conform to federal regulations previously promulgated in the October 12, 2005, issue of the *Federal Register* (70 FR 59402). This amendment was previously adopted into §335.221 which incorporated final National Emission Standards for Hazardous Air Pollutants for hazardous waste combustors. These standards implemented Federal Clean Air Act, §112(d) by requiring hazardous waste combustors to meet hazardous air pollutants emission standards reflecting the performance of the maximum available control technology. In addition, the commission adopts an amendment to §335.112(a)(14) to include this incorporation by reference.

The commission adopts §335.112(b)(7) to update a cross-reference.

#### *§335.151, Purpose, Scope, and Applicability*

The commission adopts §335.151 to make technical corrections.

#### *§335.152, Standards*

The commission adopts §335.152(a)(1) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). This amendment will

implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the OECD. Specifically, this amendment will specify that all exception reports concerning hazardous waste exports be sent to the International Compliance and Assurance Division in the Office of Enforcement and Compliance Assurance's Office of Federal Activities in Washington, D.C., and will require United States receiving facilities to match EPA-provided import consent documentation to incoming hazardous waste import shipments and to submit to EPA a copy of the matched import consent documentation and RCRA hazardous waste manifest for each import shipment.

The commission also adopts §335.152(a)(4) to add language that was inadvertently omitted in a previous rule adoption. Specifically, the new language reinstates the exception to 40 CFR §§264.71, 264.72, 264.76, and 264.77 because these requirements are found elsewhere.

The commission also adopts §335.152(a)(9) to conform to federal regulations previously promulgated in the July 14, 2006, issue of the *Federal Register* (71 FR 40254).

Specifically, this amendment will make corrections to typographical errors in the CFR.

Additionally, the commission adopts §335.152(a)(3), (4), (12), and (14) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register*

(75 FR 12989). This amendment will correct citations, clarify regulatory requirements, and incorporate conforming changes that were inadvertently omitted by EPA under the permitting standards for owners and operators of hazardous waste treatment, storage, or disposal facilities in 40 CFR Part 264. This amendment is as stringent as the current state rules. EPA recommends that this amendment be adopted into state rules, but it is not required to maintain RCRA authorization.

The commission adopts §335.152(c)(7) to update a cross-reference.

*§335.155, Additional Reports*

The commission adopts §335.155 to make technical corrections.

*§335.168, Design and Operating Requirements (Surface Impoundments)*

The commission adopts §335.168(c) to conform to federal regulations previously promulgated in the July 14, 2006, issue of the *Federal Register* (71 FR 40254).

Specifically, this amendment will make corrections to typographical errors in the CFR.

*§335.170, Design and Operating Requirements (Waste Piles)*

The commission adopts §335.170(c) to conform to federal regulations previously promulgated in the April 4, 2006, issue of the *Federal Register* (71 FR 16862). This amendment adopts by reference requirements that reduce the recordkeeping and

reporting burden imposed on the regulated community by ensuring that only the information needed and used to implement the hazardous waste program is collected from facilities. In addition, outdated language that references a construction time period will be deleted. This amendment is less stringent than the current state rules, but the reduction in recordkeeping poses minimal risk to human health or the environment. EPA recommends that this amendment be adopted into state rules, but it is not required to maintain RCRA authorization.

*§335.213, Standards Applicable to Storers of Materials That Are To Be Used in a Manner That Constitutes Disposal Who Are Not the Ultimate Users*

The commission adopts §335.213 to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). The amendment will add a reference to Chapter 335, Subchapter U, Standards for Owners and Operators of Hazardous Waste Facilities Operating under a Standard Permit, to include applicable requirements in 40 CFR Part 267, which EPA inadvertently omitted after the rule was promulgated in September, 2005.

*§335.222, Management Prior to Burning*

The commission adopts §335.222(c)(1)(E) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). Specifically, subparagraph (E) will add a reference to Chapter 335, Subchapter U to

include applicable requirements in 40 CFR Part 267, which EPA inadvertently omitted after the rule was promulgated in September, 2005. Subsequent subparagraph (E) has been relettered accordingly.

*§335.251, Applicability and Requirements*

The commission adopts §335.251(a) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). This amendment will implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the OECD. Specifically, this amendment will clarify that entities who transport spent lead-acid batteries in the United States to export them for reclamation in a foreign country or who export spent lead-acid batteries for reclamation in a foreign country are not subject to the requirements of §335.251.

The commission adopts §335.251(b)(1) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). The amendment will add a reference to Chapter 335, Subchapter U to include applicable requirements in 40 CFR Part 267, which EPA inadvertently omitted after the rule was promulgated in September, 2005.

The commission adopts §335.251(c) to conform to federal regulations promulgated in the January 8, 2010, issue of the *Federal Register* (75 FR 1236). This amendment will implement recent changes to the federal agreements concerning the transboundary movement of hazardous waste among countries belonging to the OECD. Specifically, this amendment will clarify that entities who transport spent lead-acid batteries in the United States to export them for reclamation in a foreign country or who export spent lead-acid batteries for reclamation in a foreign country are subject to the requirements of §335.13 and §335.76(h).

*§335.431, Purpose, Scope, and Applicability*

The commission adopts §335.431(c)(1) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). This amendment will correct errors in two tables: Treatment Standards for Hazardous Wastes (40 CFR §268.40) and Universal Treatment Standards (40 CFR §268.48). This amendment is as stringent as current state rules. EPA recommends that this amendment be adopted into state rules, but it is not required to maintain RCRA authorization.

*§335.504, Hazardous Waste Determination*

The commission adopts §335.504(1) to conform to federal regulations previously promulgated in the July 28, 2006, issue of the *Federal Register* (71 FR 42928). This amendment was inadvertently left out of the last RCRA rulemaking and will exclude

CRTs that meet the requirements in 40 CFR §261.4(a)(22) for reuse and recycling from classification as a solid waste. This exclusion is currently found in 40 CFR §261.4. This amendment is less stringent than current state rules and encourages recycling of CRTs. EPA recommends that this amendment be adopted into state rules, but it is not required to maintain RCRA authorization.

The commission also adopts §335.504(1) - (3) to conform to federal regulations promulgated in the March 18, 2010, issue of the *Federal Register* (75 FR 12989). This amendment will correct typographical errors and citations, and incorporate omissions. This amendment is as stringent as the current state rules. EPA recommends that this amendment be adopted into state rules, but it is not required to maintain RCRA authorization.

### **Final Regulatory Impact Determination**

The commission reviewed the adopted rulemaking in light of the regulatory analysis requirements of Texas Government Code, §2001.0225, and determined that the rulemaking is not subject to Texas Government Code, §2001.0225 because it does not meet the definition of a "major environmental rule" as defined in that statute. Although the intent of the rulemaking is to protect the environment and reduce the risk to human health from environmental exposure, the rulemaking is not a major environmental rule because it will not adversely affect in a material way the economy, a sector of the

economy, productivity, competition, jobs, the environment, or the public health and safety of the state or a sector of the state. There is no adverse effect in a material way on the economy, a sector of the economy, productivity, competition, or jobs of the state or a sector of the state from those revisions under 42 United States Code (USC), §6926(g), which already imposes the more stringent federal requirements on the regulated community under the Hazardous and Solid Waste Amendments of 1984. Likewise, there will be no adverse effect in a material way on the economy, a sector of the economy, productivity, competition, or jobs of the state or a sector of the state from those revisions outside 42 USC, §6926(g), because either the changes are not substantive, or the regulated community will benefit from the greater flexibility and reduced compliance burden. The regulated community must comply with the more stringent federal requirements beginning on the effective date of the federal regulations. Because the regulated community is already required to comply with the more stringent federal rules, equivalent state rules will not cause any adverse effects. There is no adverse effect in a material way on the environment, or the public health and safety of the state or a sector of the state because the rulemaking is designed to protect the environment, the public health, and the public safety of the state and all sectors of the state. Because the adopted rulemaking does not have an adverse material impact on the economy, the rulemaking does not meet the definition of a major environmental rule. Furthermore, the rulemaking does not meet any of the four applicability requirements listed in Texas Government Code, §2001.0225(a). First, the adopted rulemaking does

not exceed a standard set by federal law because the commission adopts this rulemaking to implement revisions to the federal hazardous waste program. The commission must meet the minimum standards and mandatory requirements of the federal program to maintain authorization of the state hazardous waste program. The other adopted changes do not alter substantive requirements although various changes may increase flexibility for the regulated community. Second, although the rulemaking adopts some requirements that are more stringent than existing state rules, federal law requires the commission to promulgate rules that are as stringent as federal law for the commission to maintain authorization of the state hazardous waste program. Third, the rulemaking does not exceed a requirement of a delegation agreement or contract between the state and an agency or representative of the federal government, where the delegation agreement or contract is to implement a state and federal program. On the contrary, the commission must undertake the waste program. And fourth, the rulemaking does not seek to adopt a rule solely under the general powers of the agency instead of under a specific state law. The commission adopts this rulemaking under Texas Water Code, §5.103 and §5.105 and under Texas Health and Safety Code, §361.017 and §361.024.

The commission invited public comment regarding the draft regulatory impact analysis determination during the public comment period, but received no comments relating to this subject.

### **Takings Impact Assessment**

The commission evaluated the rulemaking and performed an assessment of whether Texas Government Code, Chapter 2007 applies. The commission's assessment indicates that Texas Government Code, Chapter 2007 does not apply to the adopted rulemaking because this action is reasonably taken to fulfill an obligation mandated by federal law; therefore, this action is exempt under Texas Government Code, §2007.003(b)(4). The specific purpose of the rulemaking is to maintain state RCRA authorization by adopting state hazardous waste rules that are equivalent to the federal regulations. The rulemaking substantially advances this purpose by adopting rules that incorporate and refer to the federal regulations. Promulgation and enforcement of the rules is not a statutory or constitutional taking of private real property. Specifically, the adopted rulemaking does not affect a landowner's rights in private real property because this rulemaking does not constitutionally burden the owner's right to property, does not restrict or limit the owner's right to property, and does not reduce the value of property by 25% or more beyond that which would otherwise exist in the absence of the regulations. The rulemaking seeks to meet the minimum standards of federal RCRA regulations that are already in place. 42 USC, §6926(g) imposes on the regulated community any federal requirements that are more stringent than current state rules. The regulated community must already have complied with the more stringent federal requirements as of the effective date of the federal regulations. Because the regulated community is already required to comply with the more stringent federal regulations,

promulgating equivalent state rules does not burden, restrict, or limit the owner's right to property and does not reduce the value of property by 25% or more. Likewise, the regulated community is not unduly burdened by those revisions providing greater flexibility, reduced recordkeeping, reporting, inspection, and sampling requirements.

### **Consistency with the Coastal Management Program**

The commission reviewed the adopted rulemaking and found that the adoption is subject to the Texas Coastal Management Program (CMP) in accordance with the Coastal Coordination Act, Texas Natural Resources Code, §§33.201 *et seq.*, and therefore must be consistent with all applicable CMP goals and policies. The commission conducted a consistency determination for the adopted rules in accordance with Coastal Coordination Act Implementation Rules, 31 TAC §505.22 and found the adopted rulemaking is consistent with the applicable CMP goals and policies. The CMP goal applicable to the rulemaking is to protect, preserve, restore and enhance the diversity, quality, quantity, functions and values of coastal natural resource areas (CNRAs). Applicable policies are construction and operation of solid waste treatment, storage, and disposal facilities, such that new solid waste facilities and areal expansions of existing solid waste facilities shall be sited, designed, constructed, and operated to prevent releases of pollutants that may adversely affect CNRAs and, at a minimum, comply with standards established under the Solid Waste Disposal Act, 42 USC, §§6901 *et seq.* Promulgation and enforcement of these rules are consistent with the applicable CMP

goals and policies because the rulemaking will update and enhance the commission's rules concerning hazardous waste facilities. In addition, the rules will not violate any applicable provisions of the CMP's stated goals and policies.

The commission invited public comment regarding the consistency of this rulemaking with the CMP during the public comment period, but received no comments relating to this subject.

#### **Public Comment**

The comment period closed on November 5, 2012. No comments were received.

**SUBCHAPTER A: INDUSTRIAL SOLID WASTE AND  
MUNICIPAL HAZARDOUS WASTE IN GENERAL  
§§335.1, 335.2, 335.10 - 335.13, 335.19, 335.24**

**Statutory Authority**

The amendments are adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC), §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024 (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendments implement THSC, Chapter 361.

**§335.1. Definitions.**

In addition to the terms defined in Chapter 3 of this title (relating to Definitions), the following words and terms, when used in this chapter, have the following meanings.

(1) Aboveground tank--A device meeting the definition of tank in this section and that is situated in such a way that the entire surface area of the tank is completely above the plane of the adjacent surrounding surface and the entire surface area of the tank (including the tank bottom) is able to be visually inspected.

(2) Act--Texas Health and Safety Code, Chapter 361.

(3) Active life--The period from the initial receipt of hazardous waste at the facility until the executive director receives certification of final closure.

(4) Active portion--That portion of a facility where processing, storage, or disposal operations are being or have been conducted after November 19, 1980, and which is not a closed portion. (See also "closed portion" and "inactive portion.")

(5) Activities associated with the exploration, development, and production of oil or gas or geothermal resources--Activities associated with:

(A) the drilling of exploratory wells, oil wells, gas wells, or geothermal resource wells;

(B) the production of oil or gas or geothermal resources, including:

(i) activities associated with the drilling of injection water source wells that penetrate the base of usable quality water;

(ii) activities associated with the drilling of cathodic protection holes associated with the cathodic protection of wells and pipelines subject to the jurisdiction of the commission to regulate the production of oil or gas or geothermal resources;

(iii) activities associated with gasoline plants, natural gas or natural gas liquids processing plants, pressure maintenance plants, or repressurizing plants;

(iv) activities associated with any underground natural gas storage facility, provided the terms "natural gas" and "storage facility" shall have the meanings set out in the Texas Natural Resources Code, §1.173;

(v) activities associated with any underground hydrocarbon storage facility, provided the terms "hydrocarbons" and "underground hydrocarbon storage facility" shall have the meanings set out in the Texas Natural Resources Code, §91.201; and

(vi) activities associated with the storage, handling, reclamation, gathering, transportation, or distribution of oil or gas prior to the refining of such oil or prior to the use of such gas in any manufacturing process or as a residential or industrial fuel;

(C) the operation, abandonment, and proper plugging of wells subject to the jurisdiction of the commission to regulate the exploration, development, and production of oil or gas or geothermal resources; and

(D) the discharge, storage, handling, transportation, reclamation, or disposal of waste or any other substance or material associated with any activity listed in subparagraphs (A) - (C) of this paragraph, except for waste generated in connection with activities associated with gasoline plants, natural gas or natural gas liquids processing plants, pressure maintenance plants, or repressurizing plants if that waste is a hazardous waste as defined by the administrator of the United States Environmental Protection Agency in accordance with the Federal Solid Waste Disposal Act, as amended (42 United States Code, §§6901 *et seq.*).

(6) Administrator--The administrator of the United States Environmental Protection Agency or his designee.

(7) Ancillary equipment--Any device that is used to distribute, meter, or control the flow of solid waste or hazardous waste from its point of generation to a storage or processing tank(s), between solid waste or hazardous waste storage and processing tanks to a point of disposal on site, or to a point of shipment for disposal off site. Such devices include, but are not limited to, piping, fittings, flanges, valves, and pumps.

(8) Aquifer--A geologic formation, group of formations, or part of a formation capable of yielding a significant amount of groundwater to wells or springs.

(9) Area of concern--Any area of a facility under the control or ownership of an owner or operator where a release to the environment of hazardous wastes or hazardous constituents has occurred, is suspected to have occurred, or may occur, regardless of the frequency or duration.

(10) Authorized representative--The person responsible for the overall operation of a facility or an operation unit (i.e., part of a facility), e.g., the plant manager, superintendent, or person of equivalent responsibility.

(11) Battery--As defined in §335.261 of this title (relating to Universal Waste Rule).

(12) Boiler--An enclosed device using controlled flame combustion and having the following characteristics:

(A) the unit must have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases;

(B) the unit's combustion chamber and primary energy recovery section(s) must be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section(s) (such as waterwalls and superheaters) must be physically formed into one manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section(s) are joined only by ducts or connections carrying flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not of integral design:

(i) process heaters (units that transfer energy directly to a process stream); and

(ii) fluidized bed combustion units;

(C) while in operation, the unit must maintain a thermal energy recovery efficiency of at least 60%, calculated in terms of the recovered energy compared with the thermal value of the fuel; and

(D) the unit must export and utilize at least 75% of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or

(E) the unit is one which the executive director has determined, on a case-by-case basis, to be a boiler, after considering the standards in §335.20 of this title (relating to Variance To Be Classified as a Boiler).

(13) Captive facility--A facility that accepts wastes from only related (within the same corporation) off-site generators.

(14) Captured facility--A manufacturing or production facility that generates an industrial solid waste or hazardous waste that is routinely stored,

processed, or disposed of on a shared basis in an integrated waste management unit owned, operated by, and located within a contiguous manufacturing complex.

(15) Captured receiver--A receiver that is located within the property boundaries of the generators from which it receives waste.

(16) Carbon regeneration unit--Any enclosed thermal treatment device used to regenerate spent activated carbon.

(17) Cathode ray tube or CRT--A vacuum tube, composed primarily of glass, which is the visual or video display component of an electronic device. A used, intact CRT means a CRT whose vacuum has not been released. A used, broken CRT means its glass has been removed from its housing, or casing whose vacuum has been released.

(18) Certification--A statement of professional opinion based upon knowledge and belief.

(19) Class 1 wastes--Any industrial solid waste or mixture of industrial solid wastes which because of its concentration, or physical or chemical characteristics, is toxic, corrosive, flammable, a strong sensitizer or irritant, a generator of sudden

pressure by decomposition, heat, or other means, or may pose a substantial present or potential danger to human health or the environment when improperly processed, stored, transported, or disposed of or otherwise managed, as further defined in §335.505 of this title (relating to Class 1 Waste Determination).

(20) Class 2 wastes--Any individual solid waste or combination of industrial solid waste which cannot be described as hazardous, Class 1, or Class 3 as defined in §335.506 of this title (relating to Class 2 Waste Determination).

(21) Class 3 wastes--Inert and essentially insoluble industrial solid waste, usually including, but not limited to, materials such as rock, brick, glass, dirt, and certain plastics and rubber, etc., that are not readily decomposable, as further defined in §335.507 of this title (relating to Class 3 Waste Determination).

(22) Closed portion--That portion of a facility which an owner or operator has closed in accordance with the approved facility closure plan and all applicable closure requirements. (See also "active portion" and "inactive portion.")

(23) Closure--The act of permanently taking a waste management unit or facility out of service.

(24) Commercial hazardous waste management facility--Any hazardous waste management facility that accepts hazardous waste or polychlorinated biphenyl compounds for a charge, except a captured facility or a facility that accepts waste only from other facilities owned or effectively controlled by the same person.

(25) Component--Either the tank or ancillary equipment of a tank system.

(26) Confined aquifer--An aquifer bounded above and below by impermeable beds or by beds of distinctly lower permeability than that of the aquifer itself; an aquifer containing confined groundwater.

(27) Consignee--The ultimate treatment, storage, or disposal facility in a receiving country to which the hazardous waste will be sent.

(28) Container--Any portable device in which a material is stored, transported, processed, or disposed of, or otherwise handled.

(29) Containment building--A hazardous waste management unit that is used to store or treat hazardous waste under the provisions of §335.152(a)(19) or §335.112(a)(21) of this title (relating to Standards).

(30) Contaminant--Includes, but is not limited to, "solid waste," "hazardous waste," and "hazardous waste constituent" as defined in this subchapter; "pollutant" as defined in Texas Water Code (TWC), §26.001, and Texas Health and Safety Code (THSC), §361.401; "hazardous substance" as defined in THSC, §361.003; and other substances that are subject to the Texas Hazardous Substances Spill Prevention and Control Act, TWC, §§26.261 - 26.267.

(31) Contaminated medium/media--A portion or portions of the physical environment to include soil, sediment, surface water, groundwater or air, that contain contaminants at levels that pose a substantial present or future threat to human health and the environment.

(32) Contingency plan--A document setting out an organized, planned, and coordinated course of action to be followed in case of a fire, explosion, or release of hazardous waste or hazardous waste constituents which could threaten human health or the environment.

(33) Control--To apply engineering measures such as capping or reversible treatment methods and/or institutional measures such as deed restrictions to facilities or areas with wastes or contaminated media which result in remedies that are protective

of human health and the environment when combined with appropriate maintenance, monitoring, and any necessary further corrective action.

(34) Corrosion expert--A person who, by reason of his knowledge of the physical sciences and the principles of engineering and mathematics, acquired by a professional education and related practical experience, is qualified to engage in the practice of corrosion control on buried or submerged metal piping systems and metal tanks. Such a person must be certified as being qualified by the National Association of Corrosion Engineers or be a registered professional engineer who has certification or licensing that includes education and experience in corrosion control on buried or submerged metal piping systems and metal tanks.

(35) Cathode Ray Tube collector--A person who receives used, intact Cathode Ray Tubes for recycling, repair, resale, or donation.

(36) Cathode Ray Tube glass manufacturer--An operation or part of an operation that uses a furnace to manufacture Cathode Ray Tube glass.

(37) Cathode Ray Tube processing--Conducting all of the following activities:

(A) Receiving broken or intact Cathode Ray Tubes (CRTs);

(B) Intentionally breaking intact CRTs or further breaking or separating broken CRTs; and

(C) Sorting or otherwise managing glass removed from CRT monitors.

(38) Decontaminate--To apply a treatment process(es) to wastes or contaminated media whereby the substantial present or future threat to human health and the environment is eliminated.

(39) Designated facility--A hazardous waste treatment, storage, or disposal facility which: has received a permit (or interim status) in accordance with the requirements of 40 Code of Federal Regulations (CFR) Parts 270 and 124; has received a permit (or interim status) from a state authorized in accordance with 40 CFR Part 271; or is regulated under 40 CFR §261.6(c)(2) or 40 CFR Part 266, Subpart F and has been designated on the manifest by the generator pursuant to 40 CFR §262.20. For hazardous wastes, if a waste is destined to a facility in an authorized state which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility must be a facility allowed by the receiving state to accept such waste. For Class 1 wastes, a designated facility is any treatment, storage, or disposal facility authorized to receive the Class 1 waste that has been designated on the manifest by the

generator. Designated facility also means a generator site designated on the manifest to receive its waste as a return shipment from a facility that has rejected the waste in accordance with §335.12 of this title (relating to Shipping Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities).

(40) Destination facility--Has the definition adopted under §335.261 of this title (relating to Universal Waste Rule).

(41) Dike--An embankment or ridge of either natural or man-made materials used to prevent the movement of liquids, sludges, solids, or other materials.

(42) Dioxins and furans (D/F)--Tetra, penta, hexa, hepta, and octa-chlorinated dibenzo dioxins and furans.

(43) Discharge or hazardous waste discharge--The accidental or intentional spilling, leaking, pumping, pouring, emitting, emptying, or dumping of waste into or on any land or water.

(44) Disposal--The discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste (whether containerized or uncontainerized) into or on any land or water so that such solid waste or hazardous

waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including groundwaters.

(45) Disposal facility--A facility or part of a facility at which solid waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term "disposal facility" does not include a corrective action management unit into which remediation wastes are placed.

(46) Drip pad--An engineered structure consisting of a curbed, free-draining base, constructed of non-earthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

(47) Elementary neutralization unit--A device which:

(A) is used for neutralizing wastes which are hazardous only because they exhibit the corrosivity characteristic defined in 40 Code of Federal Regulations (CFR) §261.22, or are listed in 40 CFR Part 261, Subpart D, only for this reason; or is used for neutralizing the pH of non-hazardous industrial solid waste; and

(B) meets the definition of tank, tank system, container, transport vehicle, or vessel as defined in this section.

(48) United States Environmental Protection Agency (EPA)

acknowledgment of consent--The cable sent to EPA from the United States Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

(49) United States Environmental Protection Agency (EPA) hazardous

waste number--The number assigned by the EPA to each hazardous waste listed in 40 Code of Federal Regulations (CFR) Part 261, Subpart D and to each characteristic identified in 40 CFR Part 261, Subpart C.

(50) United States Environmental Protection Agency (EPA) identification

number--The number assigned by the EPA or the commission to each generator, transporter, and processing, storage, or disposal facility.

(51) Essentially insoluble--Any material, which if representatively sampled

and placed in static or dynamic contact with deionized water at ambient temperature for seven days, will not leach any quantity of any constituent of the material into the water

in excess of current United States Public Health Service or United States Environmental Protection Agency limits for drinking water as published in the *Federal Register*.

(52) Equivalent method--Any testing or analytical method approved by the administrator under 40 Code of Federal Regulations §260.20 and §260.21.

(53) Existing portion--That land surface area of an existing waste management unit, included in the original Part A permit application, on which wastes have been placed prior to the issuance of a permit.

(54) Existing tank system or existing component--A tank system or component that is used for the storage or processing of hazardous waste and that is in operation, or for which installation has commenced on or prior to July 14, 1986. Installation will be considered to have commenced if the owner or operator has obtained all federal, state, and local approvals or permits necessary to begin physical construction of the site or installation of the tank system and if either:

(A) a continuous on-site physical construction or installation program has begun; or

(B) the owner or operator has entered into contractual obligations-- which cannot be canceled or modified without substantial loss--for physical construction of the site or installation of the tank system to be completed within a reasonable time.

(55) Explosives or munitions emergency--A situation involving the suspected or detected presence of unexploded ordnance, damaged or deteriorated explosives or munitions, an improvised explosive device, other potentially explosive material or device, or other potentially harmful military chemical munitions or device, that creates an actual or potential imminent threat to human health, including safety, or the environment, including property, as determined by an explosives or munitions emergency response specialist. These situations may require immediate and expeditious action by an explosives or munitions emergency response specialist to control, mitigate, or eliminate the threat.

(56) Explosives or munitions emergency response--All immediate response activities by an explosives and munitions emergency response specialist to control, mitigate, or eliminate the actual or potential threat encountered during an explosives or munitions emergency, subject to the following:

(A) an explosives or munitions emergency response includes in-place render-safe procedures, treatment or destruction of the explosives or munitions and/or transporting those items to another location to be rendered safe, treated, or destroyed;

(B) any reasonable delay in the completion of an explosives or munitions emergency response caused by a necessary, unforeseen, or uncontrollable circumstance will not terminate the explosives or munitions emergency; and

(C) explosives and munitions emergency responses can occur on either public or private lands and are not limited to responses at hazardous waste facilities.

(57) Explosives or munitions emergency response specialist--An individual trained in chemical or conventional munitions or explosives handling, transportation, render-safe procedures, or destruction techniques, including United States Department of Defense (DOD) emergency explosive ordnance disposal, technical escort unit, and DOD-certified civilian or contractor personnel; and, other federal, state, or local government, or civilian personnel similarly trained in explosives or munitions emergency responses.

(58) Extrusion--A process using pressure to force ground poultry carcasses through a decreasing-diameter barrel or nozzle, causing the generation of heat sufficient to kill pathogens, and resulting in an extruded product acceptable as a feed ingredient.

(59) Facility--Includes:

(A) all contiguous land, and structures, other appurtenances, and improvements on the land, used for storing, processing, or disposing of municipal hazardous waste or industrial solid waste. A facility may consist of several treatment, storage, or disposal operational units (e.g., one or more landfills, surface impoundments, or combinations of them);

(B) for the purpose of implementing corrective action under §335.167 of this title (relating to Corrective Action for Solid Waste Management Units) or §335.602(a)(5) of this title (relating to Standards), all contiguous property under the control of the owner or operator seeking a permit for the treatment, storage, and/or disposal of hazardous waste. This definition also applies to facilities implementing corrective action under Texas Water Code, §7.031 (Corrective Action Relating to Hazardous Waste).

(60) Final closure--The closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under Subchapter E of this chapter (relating to Interim Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities) and Subchapter F of this chapter (relating to Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities) are no longer conducted at the facility unless subject to the provisions in §335.69 of this title (relating to Accumulation Time).

(61) Food-chain crops--Tobacco, crops grown for human consumption, and crops grown for feed for animals whose products are consumed by humans.

(62) Freeboard--The vertical distance between the top of a tank or surface impoundment dike, and the surface of the waste contained therein.

(63) Free liquids--Liquids which readily separate from the solid portion of a waste under ambient temperature and pressure.

(64) Gasification--For the purpose of complying with 40 Code of Federal Regulations §261.4(a)(12)(i), gasification is a process, conducted in an enclosed device or system, designed and operated to process petroleum feedstock, including oil-bearing

hazardous secondary materials through a series of highly controlled steps utilizing thermal decomposition, limited oxidation, and gas cleaning to yield a synthesis gas composed primarily of hydrogen and carbon monoxide gas.

(65) Generator--Any person, by site, who produces municipal hazardous waste or industrial solid waste; any person who possesses municipal hazardous waste or industrial solid waste to be shipped to any other person; or any person whose act first causes the solid waste to become subject to regulation under this chapter. For the purposes of this regulation, a person who generates or possesses Class 3 wastes only shall not be considered a generator.

(66) Groundwater--Water below the land surface in a zone of saturation.

(67) Hazardous industrial waste--Any industrial solid waste or combination of industrial solid wastes identified or listed as a hazardous waste by the administrator of the United States Environmental Protection Agency in accordance with the Resource Conservation and Recovery Act of 1976, §3001 (42 United States Code, §6921). The administrator has identified the characteristics of hazardous wastes and listed certain wastes as hazardous in 40 Code of Federal Regulations Part 261. The executive director will maintain in the offices of the commission a current list of

hazardous wastes, a current set of characteristics of hazardous waste, and applicable appendices, as promulgated by the administrator.

(68) Hazardous substance--Any substance designated as a hazardous substance under 40 Code of Federal Regulations Part 302.

(69) Hazardous waste--Any solid waste identified or listed as a hazardous waste by the administrator of the United States Environmental Protection Agency in accordance with the federal Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, 42 United States Code, §§6901 *et seq.*

(70) Hazardous waste constituent--A constituent that caused the administrator to list the hazardous waste in 40 Code of Federal Regulations (CFR) Part 261, Subpart D or a constituent listed in Table 1 of 40 CFR §261.24.

(71) Hazardous waste management facility--All contiguous land, including structures, appurtenances, and other improvements on the land, used for processing, storing, or disposing of hazardous waste. The term includes a publicly- or privately-owned hazardous waste management facility consisting of processing, storage, or disposal operational hazardous waste management units such as one or more landfills, surface impoundments, waste piles, incinerators, boilers, and industrial furnaces,

including cement kilns, injection wells, salt dome waste containment caverns, land treatment facilities, or a combination of units.

(72) Hazardous waste management unit--A landfill, surface impoundment, waste pile, industrial furnace, incinerator, cement kiln, injection well, container, drum, salt dome waste containment cavern, or land treatment unit, or any other structure, vessel, appurtenance, or other improvement on land used to manage hazardous waste.

(73) In operation--Refers to a facility which is processing, storing, or disposing of solid waste or hazardous waste.

(74) Inactive portion--That portion of a facility which is not operated after November 19, 1980. (See also "active portion" and "closed portion.")

(75) Incinerator--Any enclosed device that:

(A) uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or

(B) meets the definition of infrared incinerator or plasma arc incinerator.

(76) Incompatible waste--A hazardous waste which is unsuitable for:

(A) placement in a particular device or facility because it may cause corrosion or decay of containment materials (e.g., container inner liners or tank walls);  
or

(B) commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(77) Individual generation site--The contiguous site at or on which one or more solid waste or hazardous wastes are generated. An individual generation site, such as a large manufacturing plant, may have one or more sources of solid waste or hazardous waste, but is considered a single or individual generation site if the site or property is contiguous.

(78) Industrial furnace--Includes any of the following enclosed devices that use thermal treatment to accomplish recovery of materials or energy:

(A) cement kilns;

(B) lime kilns;

(C) aggregate kilns;

(D) phosphate kilns;

(E) coke ovens;

(F) blast furnaces;

(G) smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces);

(H) titanium dioxide chloride process oxidation reactors;

(I) methane reforming furnaces;

(J) pulping liquor recovery furnaces;

(K) combustion devices used in the recovery of sulfur values from spent sulfuric acid;

(L) halogen acid furnaces for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least 3.0%, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of 20% as generated; and

(M) other devices the commission may list, after the opportunity for notice and comment is afforded to the public.

(79) Industrial solid waste--Solid waste resulting from or incidental to any process of industry or manufacturing, or mining or agricultural operation, which may include hazardous waste as defined in this section.

(80) Infrared incinerator--Any enclosed device that uses electric powered resistance heaters as a source of radiant heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(81) Inground tank--A device meeting the definition of tank in this section whereby a portion of the tank wall is situated to any degree within the ground, thereby preventing visual inspection of that external surface area of the tank that is in the ground.

(82) Injection well--A well into which fluids are injected. (See also "underground injection.")

(83) Inner liner--A continuous layer of material placed inside a tank or container which protects the construction materials of the tank or container from the contained waste or reagents used to treat the waste.

(84) Installation inspector--A person who, by reason of his knowledge of the physical sciences and the principles of engineering, acquired by a professional education and related practical experience, is qualified to supervise the installation of tank systems.

(85) International shipment--The transportation of hazardous waste into or out of the jurisdiction of the United States.

(86) Lamp--Has the definition adopted under §335.261 of this title (relating to Universal Waste Rule).

(87) Land treatment facility--A facility or part of a facility at which solid waste or hazardous waste is applied onto or incorporated into the soil surface and that is not a corrective action management unit; such facilities are disposal facilities if the waste will remain after closure.

(88) Landfill--A disposal facility or part of a facility where solid waste or hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, an injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

(89) Landfill cell--A discrete volume of a solid waste or hazardous waste landfill which uses a liner to provide isolation of wastes from adjacent cells or wastes. Examples of landfill cells are trenches and pits.

(90) Leachate--Any liquid, including any suspended components in the liquid, that has percolated through or drained from solid waste or hazardous waste.

(91) Leak-detection system--A system capable of detecting the failure of either the primary or secondary containment structure or the presence of a release of solid waste or hazardous waste or accumulated liquid in the secondary containment structure. Such a system must employ operational controls (e.g., daily visual inspections for releases into the secondary containment system of aboveground tanks) or consist of an interstitial monitoring device designed to detect continuously and automatically the failure of the primary or secondary containment structure or the presence of a release of solid waste or hazardous waste into the secondary containment structure.

(92) Licensed professional geoscientist--A geoscientist who maintains a current license through the Texas Board of Professional Geoscientists in accordance with its requirements for professional practice.

(93) Liner--A continuous layer of natural or man-made materials, beneath or on the sides of a surface impoundment, landfill, or landfill cell, which restricts the downward or lateral escape of solid waste or hazardous waste, hazardous waste constituents, or leachate.

(94) Management or hazardous waste management--The systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of solid waste or hazardous waste.

(95) Manifest--The waste shipping document, United States Environmental Protection Agency (EPA) Form 8700-22 (including, if necessary, EPA Form 8700-22A), originated and signed by the generator or offeror in accordance with the instructions in §335.10 of this title and the applicable requirements of 40 CFR Parts 262 - 265.

(96) Manifest tracking number--The alphanumeric identification number (i.e., a unique three-letter suffix preceded by nine numerical digits), which is pre-printed in Item 4 of the manifest by a registered source.

(97) Military munitions--All ammunition products and components produced or used by or for the Department of Defense (DOD) or the United States Armed Services for national defense and security, including military munitions under the control of the DOD, the United States Coast Guard, the United States Department of Energy (DOE), and National Guard personnel. The term "military munitions":

(A) includes confined gaseous, liquid, and solid propellants, explosives, pyrotechnics, chemical and riot control agents, smokes, and incendiaries

used by DOD components, including bulk explosives and chemical warfare agents, chemical munitions, rockets, guided and ballistic missiles, bombs, warheads, mortar rounds, artillery ammunition, small arms ammunition, grenades, mines, torpedoes, depth charges, cluster munitions and dispensers, demolition charges, and devices and components thereof; and

(B) includes non-nuclear components of nuclear devices, managed under DOE's nuclear weapons program after all required sanitization operations under the Atomic Energy Act of 1954, as amended, have been completed; but

(C) does not include wholly inert items, improvised explosive devices, and nuclear weapons, nuclear devices, and nuclear components thereof.

(98) Miscellaneous unit--A hazardous waste management unit where hazardous waste is stored, processed, or disposed of and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under Chapter 331 of this title (relating to Underground Injection Control), corrective action management unit, containment building, staging pile, or unit eligible for a research, development, and demonstration permit or under Chapter 305, Subchapter K of this title (relating to Research, Development, and Demonstration Permits).

(99) Movement--That solid waste or hazardous waste transported to a facility in an individual vehicle.

(100) Municipal hazardous waste--A municipal solid waste or mixture of municipal solid wastes which has been identified or listed as a hazardous waste by the administrator of the United States Environmental Protection Agency.

(101) Municipal solid waste--Solid waste resulting from or incidental to municipal, community, commercial, institutional, and recreational activities; including garbage, rubbish, ashes, street cleanings, dead animals, abandoned automobiles, and all other solid waste other than industrial waste.

(102) New tank system or new tank component--A tank system or component that will be used for the storage or processing of hazardous waste and for which installation has commenced after July 14, 1986; except, however, for purposes of 40 Code of Federal Regulations (CFR) §264.193(g)(2) (incorporated by reference at §335.152(a)(8) of this title (relating to Standards)) and 40 CFR §265.193(g)(2) (incorporated by reference at §335.112(a)(9) of this title (relating to Standards)), a new tank system is one for which construction commences after July 14, 1986. (See also "existing tank system.")

(103) Off-site--Property which cannot be characterized as on-site.

(104) Onground tank--A device meeting the definition of tank in this section and that is situated in such a way that the bottom of the tank is on the same level as the adjacent surrounding surface so that the external tank bottom cannot be visually inspected.

(105) On-Site--The same or geographically contiguous property which may be divided by public or private rights-of-way, provided the entrance and exit between the properties is at a cross-roads intersection, and access is by crossing, as opposed to going along, the right-of-way. Noncontiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access, is also considered on-site property.

(106) Open burning--The combustion of any material without the following characteristics:

(A) control of combustion air to maintain adequate temperature for efficient combustion;

(B) containment of the combustion-reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(C) control of emission of the gaseous combustion products. (See also "incineration" and "thermal treatment.")

(107) Operator--The person responsible for the overall operation of a facility.

(108) Owner--The person who owns a facility or part of a facility.

(109) Partial closure--The closure of a hazardous waste management unit in accordance with the applicable closure requirements of Subchapters E and F of this chapter (relating to Interim Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities; and Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities) at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

(110) PCBs or polychlorinated biphenyl compounds--Compounds subject to 40 Code of Federal Regulations Part 761.

(111) Permit--A written permit issued by the commission which, by its conditions, may authorize the permittee to construct, install, modify, or operate a specified municipal hazardous waste or industrial solid waste treatment, storage, or disposal facility in accordance with specified limitations.

(112) Personnel or facility personnel--All persons who work at, or oversee the operations of, a solid waste or hazardous waste facility, and whose actions or failure to act may result in noncompliance with the requirements of this chapter.

(113) Pesticide--Has the definition adopted under §335.261 of this title (relating to Universal Waste Rule).

(114) Petroleum substance--A crude oil or any refined or unrefined fraction or derivative of crude oil which is a liquid at standard conditions of temperature and pressure.

(A) Except as provided in subparagraph (C) of this paragraph for the purposes of this chapter, a "petroleum substance" shall be limited to a substance in

or a combination or mixture of substances within the following list (except for any listed substance regulated as a hazardous waste under the federal Solid Waste Disposal Act, Subtitle C (42 United States Code (USC), §§6921, *et seq.*) and which is liquid at standard conditions of temperature (20 degrees Centigrade) and pressure (1 atmosphere):

(i) basic petroleum substances--i.e., crude oils, crude oil fractions, petroleum feedstocks, and petroleum fractions;

(ii) motor fuels--a petroleum substance which is typically used for the operation of internal combustion engines and/or motors (which includes, but is not limited to, stationary engines and engines used in transportation vehicles and marine vessels);

(iii) aviation gasolines--i.e., Grade 80, Grade 100, and Grade 100-LL;

(iv) aviation jet fuels--i.e., Jet A, Jet A-1, Jet B, JP-4, JP-5, and JP-8;

(v) distillate fuel oils--i.e., Number 1-D, Number 1, Number 2-D, and Number 2;

(vi) residual fuel oils--i.e., Number 4-D, Number 4-light, Number 4, Number 5-light, Number 5-heavy, and Number 6;

(vii) gas-turbine fuel oils--i.e., Grade O-GT, Grade 1-GT, Grade 2-GT, Grade 3-GT, and Grade 4-GT;

(viii) illuminating oils--i.e., kerosene, mineral seal oil, long-time burning oils, 300 oil, and mineral colza oil;

(ix) lubricants--i.e., automotive and industrial lubricants;

(x) building materials--i.e., liquid asphalt and dust-laying oils;

(xi) insulating and waterproofing materials--i.e., transformer oils and cable oils; and

(xii) used oils--See definition for "used oil" in this section.

(B) For the purposes of this chapter, a "petroleum substance" shall include solvents or a combination or mixture of solvents (except for any listed substance regulated as a hazardous waste under the federal Solid Waste Disposal Act, Subtitle C (42 USC, §§6921, *et seq.*) and which is liquid at standard conditions of temperature (20 degrees Centigrade) and pressure (1 atmosphere) i.e., Stoddard solvent, petroleum spirits, mineral spirits, petroleum ether, varnish makers' and painters' naphthas, petroleum extender oils, and commercial hexane.

(C) The following materials are not considered petroleum substances:

(i) polymerized materials, i.e., plastics, synthetic rubber, polystyrene, high and low density polyethylene;

(ii) animal, microbial, and vegetable fats;

(iii) food grade oils;

(iv) hardened asphalt and solid asphaltic materials--i.e., roofing shingles, roofing felt, hot mix (and cold mix); and

(v) cosmetics.

(115) Pile--Any noncontainerized accumulation of solid, nonflowing solid waste or hazardous waste that is used for processing or storage, and that is not a corrective action management unit or a containment building.

(116) Plasma arc incinerator--Any enclosed device using a high intensity electrical discharge or arc as a source of heat followed by an afterburner using controlled flame combustion and which is not listed as an industrial furnace.

(117) Post-closure order--An order issued by the commission for post-closure care of interim status units, a corrective action management unit unless authorized by permit, or alternative corrective action requirements for contamination commingled from Resource Conservation and Recovery Act and solid waste management units.

(118) Poultry--Chickens or ducks being raised or kept on any premises in the state for profit.

(119) Poultry carcass--The carcass, or part of a carcass, of poultry that died as a result of a cause other than intentional slaughter for use for human consumption.

(120) Poultry facility--A facility that:

(A) is used to raise, grow, feed, or otherwise produce poultry for commercial purposes; or

(B) is a commercial poultry hatchery that is used to produce chicks or ducklings.

(121) Primary exporter--Any person who is required to originate the manifest for a shipment of hazardous waste in accordance with the regulations contained in 40 Code of Federal Regulations Part 262, Subpart B, which are in effect as of November 8, 1986, or equivalent state provision, which specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

(122) Processing--The extraction of materials, transfer, volume reduction, conversion to energy, or other separation and preparation of solid waste for reuse or disposal, including the treatment or neutralization of solid waste or hazardous waste, designed to change the physical, chemical, or biological character or composition of any solid waste or hazardous waste so as to neutralize such waste, or so as to recover energy

or material from the waste or so as to render such waste nonhazardous, or less hazardous; safer to transport, store or dispose of; or amenable for recovery, amenable for storage, or reduced in volume. The transfer of solid waste for reuse or disposal as used in this definition does not include the actions of a transporter in conveying or transporting solid waste by truck, ship, pipeline, or other means. Unless the executive director determines that regulation of such activity is necessary to protect human health or the environment, the definition of processing does not include activities relating to those materials exempted by the administrator of the United States Environmental Protection Agency in accordance with the federal Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, 42 United States Code, §§6901 *et seq.*, as amended.

(123) Publicly-owned treatment works (POTW)--Any device or system used in the treatment (including recycling and reclamation) of municipal sewage or industrial wastes of a liquid nature which is owned by a state or municipality (as defined by the Clean Water Act, §502(4)). The definition includes sewers, pipes, or other conveyances only if they convey wastewater to a POTW providing treatment.

(124) Qualified groundwater scientist--A scientist or engineer who has received a baccalaureate or post-graduate degree in the natural sciences or engineering, and has sufficient training and experience in groundwater hydrology and related fields

as may be demonstrated by state registration, professional certifications, or completion of accredited university courses that enable that individual to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport.

(125) Receiving country--A foreign country to which a hazardous waste is sent for the purpose of treatment, storage, or disposal (except short-term storage incidental to transportation).

(126) Regional administrator--The regional administrator for the United States Environmental Protection Agency region in which the facility is located, or his designee.

(127) Remediation--The act of eliminating or reducing the concentration of contaminants in contaminated media.

(128) Remediation waste--All solid and hazardous wastes, and all media (including groundwater, surface water, soils, and sediments) and debris, which contain listed hazardous wastes or which themselves exhibit a hazardous waste characteristic, that are managed for the purpose of implementing corrective action requirements under §335.167 of this title (relating to Corrective Action for Solid Waste Management Units) and Texas Water Code, §7.031 (Corrective Action Relating to Hazardous Waste). For a

given facility, remediation wastes may originate only from within the facility boundary, but may include waste managed in implementing corrective action for releases beyond the facility boundary under §335.166(5) of this title (relating to Corrective Action Program) or §335.167(c) of this title.

(129) ~~Remove--~~To take waste, contaminated design or operating system components, or contaminated media away from a waste management unit, facility, or area to another location for treatment, storage, or disposal.

(130) ~~Replacement unit--~~A landfill, surface impoundment, or waste pile unit:

(A) from which all or substantially all the waste is removed; and

(B) that is subsequently reused to treat, store, or dispose of hazardous waste. "Replacement unit" does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or United States Environmental Protection Agency or state approved corrective action.

(131) Representative sample--A sample of a universe or whole (e.g., waste pile, lagoon, groundwater) which can be expected to exhibit the average properties of the universe or whole.

(132) Run-off--Any rainwater, leachate, or other liquid that drains over land from any part of a facility.

(133) Run-on--Any rainwater, leachate, or other liquid that drains over land onto any part of a facility.

(134) Saturated zone or zone of saturation--That part of the earth's crust in which all voids are filled with water.

(135) Shipment--Any action involving the conveyance of municipal hazardous waste or industrial solid waste by any means off-site.

(136) Sludge dryer--Any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 British thermal units per pound of sludge treated on a wet-weight basis.

(137) Small quantity generator--A generator who generates less than 1,000 kilograms of hazardous waste in a calendar month.

(138) Solid waste--

(A) Any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant or air pollution control facility, and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, municipal, commercial, mining, and agricultural operations, and from community and institutional activities, but does not include:

(i) solid or dissolved material in domestic sewage, or solid or dissolved material in irrigation return flows, or industrial discharges subject to regulation by permit issued in accordance with Texas Water Code, Chapter 26 (an exclusion applicable only to the actual point source discharge that does not exclude industrial wastewaters while they are being collected, stored, or processed before discharge, nor does it exclude sludges that are generated by industrial wastewater treatment);

(ii) uncontaminated soil, dirt, rock, sand, and other natural or man-made inert solid materials used to fill land if the object of the fill is to make the land suitable for the construction of surface improvements. The material serving as fill

may also serve as a surface improvement such as a structure foundation, a road, soil erosion control, and flood protection. Man-made materials exempted under this provision shall only be deposited at sites where the construction is in progress or imminent such that rights to the land are secured and engineering, architectural, or other necessary planning have been initiated. Waste disposal shall be considered to have occurred on any land which has been filled with man-made inert materials under this provision if the land is sold, leased, or otherwise conveyed prior to the completion of construction of the surface improvement. Under such conditions, deed recordation shall be required. The deed recordation shall include the information required under §335.5(a) of this title (relating to Deed Recordation of Waste Disposal), prior to sale or other conveyance of the property;

(iii) waste materials which result from activities associated with the exploration, development, or production of oil or gas or geothermal resources, as those activities are defined in this section, and any other substance or material regulated by the Railroad Commission of Texas in accordance with the Natural Resources Code, §91.101, unless such waste, substance, or material results from activities associated with gasoline plants, natural gas, or natural gas liquids processing plants, pressure maintenance plants, or repressurizing plants and is a hazardous waste as defined by the administrator of the United States Environmental Protection Agency

in accordance with the federal Solid Waste Disposal Act, 42 United States Code, §§6901 *et seq.*, as amended; or

(iv) a material excluded by 40 Code of Federal Regulations (CFR) §§261.4(a)(1) - (22), 261.39, and 261.40, as amended through March 18, 2010 (75 FR 12989), subject to the changes in this clause, or by variance granted under §335.18 of this title (relating to Variances from Classification as a Solid Waste) and §335.19 of this title (relating to Standards and Criteria for Variances from Classification as a Solid Waste). For the purposes of the exclusions under 40 CFR §261.39 and §261.40, 40 CFR §261.41 is adopted by reference as amended through July 28, 2006 (71 FR 42928). For the purposes of the exclusion under 40 CFR §261.4(a)(16), 40 CFR §261.38 is adopted by reference as amended through July 10, 2000 (65 FR 42292), and is revised as follows, with "subparagraph (A)(iv) under the definition of 'solid Waste' in 30 TAC §335.1" meaning "subparagraph (A)(iv) under the definition of 'solid Waste' in §335.1 of this title (relating to Definitions)":

(I) in the certification statement under 40 CFR §261.38(c)(1)(i)(C)(4), the reference to "40 CFR §261.38" is changed to "40 CFR §261.38, as revised under subparagraph (A)(iv) under the definition of 'solid Waste' in 30 TAC §335.1," and the reference to "40 CFR §261.28(c)(10)" is changed to "40 CFR §261.38(c)(10)";

(II) in 40 CFR §261.38(c)(2), the references to "§260.10 of this chapter" are changed to "§335.1 of this title (relating to Definitions)," and the reference to "parts 264 or 265 of this chapter" is changed to "Chapter 335, Subchapter E of this title (relating to Interim Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities) or Chapter 335, Subchapter F of this title (relating to Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities)";

(III) in 40 CFR §261.38(c)(3) - (5), the references to "parts 264 and 265, or §262.34 of this chapter" are changed to "Chapter 335, Subchapter E of this title (relating to Interim Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities) and Chapter 335, Subchapter F of this title (relating to Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities), or §335.69 of this title (relating to Accumulation Time)";

(IV) in 40 CFR §261.38(c)(5), the reference to "§261.6(c) of this chapter" is changed to "§335.24(e) and (f) of this title (relating to Requirements for Recyclable Materials and Nonhazardous Recyclable Materials)";

(V) in 40 CFR §261.38(c)(7), the references to "appropriate regulatory authority" and "regulatory authority" are changed to "executive director";

(VI) in 40 CFR §261.38(c)(8), the reference to "§262.11 of this chapter" is changed to "§335.62 of this title (relating to Hazardous Waste Determination and Waste Classification)";

(VII) in 40 CFR §261.38(c)(9), the reference to "§261.2(c)(4) of this chapter" is changed to "§335.1(138)(D)(iv) " of this title (relating to Definitions)"; and

(VIII) in 40 CFR §261.38(c)(10), the reference to "implementing authority" is changed to "executive director."

(B) A discarded material is any material which is:

(i) abandoned, as explained in subparagraph (C) of this paragraph;

(ii) recycled, as explained in subparagraph (D) of this paragraph;

(iii) considered inherently waste-like, as explained in subparagraph (E) of this paragraph; or

(iv) a military munition identified as a solid waste in 40 CFR §266.202.

(C) Materials are solid wastes if they are abandoned by being:

(i) disposed of;

(ii) burned or incinerated; or

(iii) accumulated, stored, or processed (but not recycled) before or in lieu of being abandoned by being disposed of, burned, or incinerated.

(D) Except for materials described in subparagraph (H) of this paragraph, materials are solid wastes if they are "recycled" or accumulated, stored, or processed before recycling as specified in this subparagraph. The chart referred to as Table 1 indicates only which materials are considered to be solid wastes when they are

recycled and is not intended to supersede the definition of solid waste provided in subparagraph (A) of this paragraph.

(i) Used in a manner constituting disposal. Materials noted with an asterisk in Column 1 of Table 1 are solid wastes when they are:

(I) applied to or placed on the land in a manner that constitutes disposal; or

(II) used to produce products that are applied to or placed on the land or are otherwise contained in products that are applied to or placed on the land (in which cases the product itself remains a solid waste). However, commercial chemical products listed in 40 CFR §261.33 are not solid wastes if they are applied to the land and that is their ordinary manner of use.

(ii) Burning for energy recovery. Materials noted with an asterisk in Column 2 of Table 1 are solid wastes when they are:

(I) burned to recover energy; or

(II) used to produce a fuel or are otherwise contained in fuels (in which cases the fuel itself remains a solid waste). However, commercial

chemical products, which are listed in 40 CFR §261.33, not listed in §261.33, but that exhibit one or more of the hazardous waste characteristics, or will be considered nonhazardous waste if disposed, are not solid wastes if they are fuels themselves and burned for energy recovery.

(iii) Reclaimed. Materials noted with an asterisk in Column 3 of Table 1 are solid wastes when reclaimed (except as provided under 40 CFR §261.4(a)(17)). Materials without an asterisk in Column 3 of Table 1 are not solid wastes when reclaimed.

(iv) Accumulated speculatively. Materials noted with an asterisk in Column 4 of Table 1 are solid wastes when accumulated speculatively.

scrap metal (see §335.17(9)) (nonhazardous) <sup>1</sup>				
--	--	--	--	--

NOTE: The terms "spent materials," "sludges," "by-products," "scrap metal," and "excluded scrap metal" are defined in §335.17 of this title (relating to Special Definitions for Recyclable Materials and Nonhazardous Recyclable Materials).

<sup>1</sup> These materials are governed by the provisions of §335.24(h) only.

<sup>2</sup> Except as provided in 40 CFR §261.4(a)(17) for mineral processing secondary materials.

(E) Materials that are identified by the administrator of the EPA as inherently waste-like materials under 40 CFR §261.2(d) are solid wastes when they are recycled in any manner.

(F) Materials are not solid wastes when they can be shown to be recycled by being:

(i) used or reused as ingredients in an industrial process to make a product, provided the materials are not being reclaimed;

(ii) used or reused as effective substitutes for commercial products;

(iii) returned to the original process from which they were generated, without first being reclaimed or land disposed. The material must be

returned as a substitute for feedstock materials. In cases where the original process to which the material is returned is a secondary process, the materials must be managed such that there is no placement on the land. In cases where the materials are generated and reclaimed within the primary mineral processing industry, the conditions of the exclusion found at 40 CFR §261.4(a)(17) apply rather than this provision; or

(iv) secondary materials that are reclaimed and returned to the original process or processes in which they were generated where they are reused in the production process provided:

(I) only tank storage is involved, and the entire process through completion of reclamation is closed by being entirely connected with pipes or other comparable enclosed means of conveyance;

(II) reclamation does not involve controlled flame combustion (such as occurs in boilers, industrial furnaces, or incinerators);

(III) the secondary materials are never accumulated in such tanks for over 12 months without being reclaimed; and

(IV) the reclaimed material is not used to produce a fuel, or used to produce products that are used in a manner constituting disposal.

(G) Except for materials described in subparagraph (H) of this paragraph, the following materials are solid wastes, even if the recycling involves use, reuse, or return to the original process, as described in subparagraph (F) of this paragraph:

(i) materials used in a manner constituting disposal, or used to produce products that are applied to the land;

(ii) materials burned for energy recovery, used to produce a fuel, or contained in fuels;

(iii) materials accumulated speculatively; or

(iv) materials deemed to be inherently waste-like by the administrator of the EPA, as described in 40 CFR §261.2(d)(1) and (2).

(H) With the exception of contaminated soils which are being relocated for use under §350.36 of this title (relating to Relocation of Soils Containing Chemicals of Concern for Reuse Purposes) and other contaminated media, materials that will otherwise be identified as nonhazardous solid wastes if disposed of are not considered solid wastes when recycled by being applied to the land or used as

ingredients in products that are applied to the land, provided these materials can be shown to meet all of the following criteria:

(i) a legitimate market exists for the recycling material as well as its products;

(ii) the recycling material is managed and protected from loss as will be raw materials or ingredients or products;

(iii) the quality of the product is not degraded by substitution of raw material/product with the recycling material;

(iv) the use of the recycling material is an ordinary use and it meets or exceeds the specifications of the product it is replacing without treatment or reclamation, or if the recycling material is not replacing a product, the recycling material is a legitimate ingredient in a production process and meets or exceeds raw material specifications without treatment or reclamation;

(v) the recycling material is not burned for energy recovery, used to produce a fuel, or contained in a fuel;

(vi) the recycling material can be used as a product itself or to produce products as it is generated without treatment or reclamation;

(vii) the recycling material must not present an increased risk to human health, the environment, or waters in the state when applied to the land or used in products which are applied to the land and the material, as generated:

(I) is a Class 3 waste under Subchapter R of this chapter (relating to Waste Classification), except for arsenic, cadmium, chromium, lead, mercury, nickel, selenium, and total dissolved solids; and

(II) for the metals listed in subclause (I) of this clause:

(-a-) is a Class 2 or Class 3 waste under Subchapter R of this chapter; and

(-b-) does not exceed a concentration limit under §312.43(b)(3), Table 3 of this title (relating to Metal Limits); and

(viii) with the exception of the requirements under §335.17(a)(8) of this title (relating to Special Definitions for Recyclable Materials and Nonhazardous Recyclable Materials):

(I) at least 75% (by weight or volume) of the annual production of the recycling material must be recycled or transferred to a different site and recycled on an annual basis; and

(II) if the recycling material is placed in protective storage, such as a silo or other protective enclosure, at least 75% (by weight or volume) of the annual production of the recycling material must be recycled or transferred to a different site and recycled on a biennial basis.

(I) Respondents in actions to enforce the industrial solid waste regulations who raise a claim that a certain material is not a solid waste, or is conditionally exempt from regulation, must demonstrate that there is a known market or disposition for the material, and that they meet the terms of the exclusion or exemption. In doing so, they must provide appropriate documentation (such as contracts showing that a second person uses the material as an ingredient in a production process) to demonstrate that the material is not a waste, or is exempt from regulation. In addition, owners or operators of facilities claiming that they actually are

recycling materials must show that they have the necessary equipment to do so and that the recycling activity is legitimate and beneficial.

(J) Materials that are reclaimed from solid wastes and that are used beneficially are not solid wastes and hence are not hazardous wastes under 40 CFR §261.3(c) unless the reclaimed material is burned for energy recovery or used in a manner constituting disposal.

(K) Other portions of this chapter that relate to solid wastes that are recycled include §335.6 of this title (relating to Notification Requirements), §§335.17 - 335.19 of this title, §335.24 of this title (relating to Requirements for Recyclable Materials and Nonhazardous Recyclable Materials), and Subchapter H of this chapter (relating to Standards for the Management of Specific Wastes and Specific Types of Facilities).

(139) Sorbent--A material that is used to soak up free liquids by either adsorption or absorption, or both. Sorb means to either adsorb or absorb, or both.

(140) Spill--The accidental spilling, leaking, pumping, emitting, emptying, or dumping of solid waste or hazardous wastes or materials which, when spilled, become solid waste or hazardous wastes into or on any land or water.

(141) Staging pile--An accumulation of solid, non-flowing remediation waste, as defined in this section, that is not a containment building and that is used only during remedial operations for temporary storage at a facility. Staging piles must be designated by the executive director according to the requirements of 40 Code of Federal Regulations §264.554, as adopted by reference under §335.152(a) of this title (relating to Standards).

(142) Standard permit--A Resource Conservation and Recovery Act (RCRA) permit authorizing management of hazardous waste issued under Chapter 305, Subchapter R of this title (relating to Resource Conservation and Recovery Act Standard Permits for Storage and Treatment Units) and Subchapter U of this chapter (relating to Standards for Owners and Operators of Hazardous Waste Facilities Operating Under a Standard Permit). The standard permit may have two parts, a uniform portion issued in all cases and a supplemental portion issued at the executive director's discretion.

(143) Storage--The holding of solid waste for a temporary period, at the end of which the waste is processed, disposed of, recycled, or stored elsewhere.

(144) Sump--Any pit or reservoir that meets the definition of tank in this section and those troughs/trenches connected to it that serve to collect solid waste or

hazardous waste for transport to solid waste or hazardous waste treatment, storage, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile rules, "sump" means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

(145) Surface impoundment or impoundment--A facility or part of a facility which is a natural topographic depression, man-made excavation, or diked area formed primarily of earthen materials (although it may be lined with man-made materials), which is designed to hold an accumulation of liquid wastes or wastes containing free liquids, and which is not an injection well or a corrective action management unit. Examples of surface impoundments are holding, storage, settling, and aeration pits, ponds, and lagoons.

(146) Tank--A stationary device, designed to contain an accumulation of solid waste which is constructed primarily of non-earthen materials (e.g., wood, concrete, steel, plastic) which provide structural support.

(147) Tank system--A solid waste or hazardous waste storage or processing tank and its associated ancillary equipment and containment system.

(148) TEQ--Toxicity equivalence, the international method of relating the toxicity of various dioxin/furan congeners to the toxicity of 2,3,7,8-tetrachlorodibenzo-p-dioxin.

(149) Thermal processing--The processing of solid waste or hazardous waste in a device which uses elevated temperatures as the primary means to change the chemical, physical, or biological character or composition of the solid waste or hazardous waste. Examples of thermal processing are incineration, molten salt, pyrolysis, calcination, wet air oxidation, and microwave discharge. (See also "incinerator" and "open burning.")

(150) Thermostat--Has the definition adopted under §335.261 of this title (relating to Universal Waste Rule).

(151) Totally enclosed treatment facility--A facility for the processing of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of any hazardous waste or any constituent thereof into the environment during processing. An example is a pipe in which acid waste is neutralized.

(152) Transfer facility--Any transportation-related facility including loading docks, parking areas, storage areas, and other similar areas where shipments of hazardous or industrial solid waste are held during the normal course of transportation.

(153) Transit country--Any foreign country, other than a receiving country, through which a hazardous waste is transported.

(154) Transport vehicle--A motor vehicle or rail car used for the transportation of cargo by any mode. Each cargo-carrying body (trailer, railroad freight car, etc.) is a separate transport vehicle. Vessel includes every description of watercraft, used or capable of being used as a means of transportation on the water.

(155) Transporter--Any person who conveys or transports municipal hazardous waste or industrial solid waste by truck, ship, pipeline, or other means.

(156) Treatability study--A study in which a hazardous or industrial solid waste is subjected to a treatment process to determine:

(A) whether the waste is amenable to the treatment process;

(B) what pretreatment (if any) is required;

(C) the optimal process conditions needed to achieve the desired treatment;

(D) the efficiency of a treatment process for a specific waste or wastes; or

(E) the characteristics and volumes of residuals from a particular treatment process. Also included in this definition for the purpose of 40 Code of Federal Regulations §261.4(e) and (f) (§§335.2, 335.69, and 335.78 of this title (relating to Permit Required; Accumulation Time; and Special Requirements for Hazardous Waste Generated by Conditionally Exempt Small Quantity Generators)) exemptions are liner compatibility, corrosion, and other material compatibility studies and toxicological and health effects studies. A treatability study is not a means to commercially treat or dispose of hazardous or industrial solid waste.

(157) Treatment--To apply a physical, biological, or chemical process(es) to wastes and contaminated media which significantly reduces the toxicity, volume, or mobility of contaminants and which, depending on the process(es) used, achieves varying degrees of long-term effectiveness.

(158) Treatment zone--A soil area of the unsaturated zone of a land treatment unit within which hazardous constituents are degraded, transferred, or immobilized.

(159) Underground injection--The subsurface emplacement of fluids through a bored, drilled, or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension. (See also "injection well.")

(160) Underground tank--A device meeting the definition of tank in this section whose entire surface area is totally below the surface of and covered by the ground.

(161) Unfit-for-use tank system--A tank system that has been determined through an integrity assessment or other inspection to be no longer capable of storing or processing solid waste or hazardous waste without posing a threat of release of solid waste or hazardous waste to the environment.

(162) Universal waste--Any of the hazardous wastes defined as universal waste under §335.261(b)(13)(F) of this title (relating to Universal Waste Rule) that are managed under the universal waste requirements of Subchapter H, Division 5 of this chapter (relating to Universal Waste Rule).

(163) Universal waste handler--Has the definition adopted under §335.261 of this title (relating to Universal Waste Rule).

(164) Universal waste transporter--Has the definition adopted under §335.261 of this title (relating to Universal Waste Rule).

(165) Unsaturated zone or zone of aeration--The zone between the land surface and the water table.

(166) Uppermost aquifer--The geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected within the facility's property boundary.

(167) Used oil--Any oil that has been refined from crude oil, or any synthetic oil, that has been used, and, as a result of such use, is contaminated by physical or chemical impurities. Used oil fuel includes any fuel produced from used oil by processing, blending, or other treatment. Rules applicable to nonhazardous used oil, oil characteristically hazardous from use versus mixing, conditionally exempt small quantity generator hazardous used oil, and household used oil after collection that will

be recycled are found in Chapter 324 of this title (relating to Used Oil Standards) and 40 Code of Federal Regulations Part 279 (Standards for Management of Used Oil).

(168) Wastewater treatment unit--A device which:

(A) is part of a wastewater treatment facility subject to regulation under either the Federal Water Pollution Control Act (Clean Water Act), 33 United States Code, §§466 *et seq.*, §402 or §307(b), as amended;

(B) receives and processes or stores an influent wastewater which is a hazardous or industrial solid waste, or generates and accumulates a wastewater treatment sludge which is a hazardous or industrial solid waste, or processes or stores a wastewater treatment sludge which is a hazardous or industrial solid waste; and

(C) meets the definition of tank or tank system as defined in this section.

(169) Water (bulk shipment)--The bulk transportation of municipal hazardous waste or Class 1 industrial solid waste which is loaded or carried on board a vessel without containers or labels.

(170) Well--Any shaft or pit dug or bored into the earth, generally of a cylindrical form, and often walled with bricks or tubing to prevent the earth from caving in.

(171) Zone of engineering control--An area under the control of the owner/operator that, upon detection of a solid waste or hazardous waste release, can be readily cleaned up prior to the release of solid waste or hazardous waste or hazardous constituents to groundwater or surface water.

### **§335.2. Permit Required.**

(a) Except with regard to storage, processing, or disposal to which subsections (c) - (h) of this section apply, and as provided in §335.45(b) of this title (relating to Effect on Existing Facilities), and in accordance with the requirements of §335.24 of this title (relating to Requirements for Recyclable Materials and Nonhazardous Recyclable Materials) and §335.25 of this title (relating to Handling, Storing, Processing, Transporting, and Disposing of Poultry Carcasses), and as provided in §332.4 of this title (relating to General Requirements), no person may cause, suffer, allow, or permit any activity of storage, processing, or disposal of any industrial solid waste or municipal hazardous waste unless such activity is authorized by a permit, amended permit, or other authorization from the Texas Commission on Environmental Quality

(commission) or its predecessor agencies, the Department of State Health Services (DSHS), or other valid authorization from a Texas state agency. No person may commence physical construction of a new hazardous waste management facility without first having submitted Part A and Part B of the permit application and received a finally effective permit.

(b) In accordance with the requirements of subsection (a) of this section, no generator, transporter, owner or operator of a facility, or any other person may cause, suffer, allow, or permit its wastes to be stored, processed, or disposed of at an unauthorized facility or in violation of a permit. In the event this requirement is violated, the executive director will seek recourse against not only the person who stored, processed, or disposed of the waste, but also against the generator, transporter, owner or operator, or other person who caused, suffered, allowed, or permitted its waste to be stored, processed, or disposed.

(c) Any owner or operator of a solid waste management facility that is in existence on the effective date of a statutory or regulatory change that subjects the owner or operator to a requirement to obtain a hazardous waste permit who has filed a hazardous waste permit application with the commission in accordance with the rules and regulations of the commission, may continue the storage, processing, or disposal of hazardous waste until such time as the commission approves or denies the application,

or, if the owner or operator becomes subject to a requirement to obtain a hazardous waste permit after November 8, 1984, except as provided by the United States Environmental Protection Agency (EPA) or commission rules relative to termination of interim status. If a solid waste facility which has become a commercial hazardous waste management facility as a result of the federal toxicity characteristic rule effective September 25, 1990, and is required to obtain a hazardous waste permit, such facility that qualifies for interim status is limited to those activities that qualify it for interim status until the facility obtains the hazardous waste permit. Owners or operators of municipal hazardous waste facilities that satisfied this requirement by filing an application on or before November 19, 1980, with the EPA are not required to submit a separate application with the DSHS. Applications filed under this section shall meet the requirements of §335.44 of this title (relating to Application for Existing On-Site Facilities). Owners and operators of solid waste management facilities that are in existence on the effective date of statutory or regulatory amendments under the Texas Solid Waste Disposal Act (Vernon's Supplement 1991), Texas Civil Statutes, Article 4477-7, or the Resource Conservation and Recovery Act (RCRA), 42 United States Code, §§6901 *et seq.*, that render the facilities subject to the requirement to obtain a hazardous waste permit, may continue to operate if Part A of their permit application is submitted no later than six months after the date of publication of regulations by the EPA under RCRA, which first require them to comply with the standards in Subchapter E of this chapter (relating to Interim Standards for Owners and Operators of Hazardous Waste

Treatment, Storage, or Disposal Facilities), or Subchapter H of this chapter (relating to Standards for the Management of Specific Wastes and Specific Types of Facilities); or 30 days after the date they first become subject to the standards in these subchapters, whichever first occur; or for generators who generate greater than 100 kilograms but less than 1,000 kilograms of hazardous waste in a calendar month and who process, store, or dispose of these wastes on-site, a Part A permit application shall be submitted to the EPA by March 24, 1987, as required by 40 Code of Federal Regulations (CFR) §270.10(e)(1)(iii). This subsection shall not apply to a facility if it has been previously denied a hazardous waste permit or if authority to operate the facility has been previously terminated. Applications filed under this section shall meet the requirements of §335.44 of this title. For purposes of this subsection, a solid waste management facility is in existence if the owner or operator has obtained all necessary federal, state, and local preconstruction approvals or permits, as required by applicable federal, state, and local hazardous waste control statutes, regulations, or ordinances; and either:

(1) a continuous physical, on-site construction program has begun; or

(2) the owner or operator has entered into contractual obligations, which cannot be cancelled or modified without substantial loss, for construction of the facility to be completed within a reasonable time.

(d) No permit shall be required for:

(1) the processing or disposal of nonhazardous industrial solid waste, if the waste is processed or disposed on property owned or otherwise effectively controlled by the owner or operator of the industrial plant, manufacturing plant, mining operation, or agricultural operation from which the waste results or is produced; the property is within 50 miles of the plant or operation; and the waste is not commingled with waste from any other source or sources (An industrial plant, manufacturing plant, mining operation, or agricultural operation owned by one person shall not be considered an "other source" with respect to other plants and operations owned by the same person.);

(2) the storage of nonhazardous industrial solid waste, if the waste is stored on property owned or otherwise effectively controlled by the owner or operator of the industrial plant, manufacturing plant, mining operation, or agricultural operation from which the waste results or is produced, and the waste is not commingled with waste from any other source or sources (An industrial plant, manufacturing plant, mining operation, or agricultural operation owned by one person shall not be considered an "other source" with respect to other plants and operations owned by the same person.);

(3) the storage or processing of nonhazardous industrial solid waste, if the waste is processed in an elementary neutralization unit;

(4) the collection, storage, or processing of nonhazardous industrial solid waste, if the waste is collected, stored, or processed as part of a treatability study;

(5) the storage of nonhazardous industrial solid waste, if the waste is stored in a transfer facility in containers for a period of ten days or less, unless the executive director determines that a permit should be required in order to protect human health and the environment;

(6) the storage or processing of nonhazardous industrial solid waste, if the waste is processed in a publicly owned treatment works with discharges subject to regulation under the Clean Water Act, §402, as amended through October 4, 1996, if the owner or operator has a National Pollutant Discharge Elimination System permit and complies with the conditions of the permit;

(7) the storage or processing of nonhazardous industrial solid waste, if the waste is stored or processed in a wastewater unit and is discharged in accordance with a Texas Pollutant Discharge Elimination System authorization issued under Texas Water Code, Chapter 26;

(8) the storage or processing of nonhazardous industrial solid waste, if the waste is stored or processed in a wastewater treatment unit that discharges to a publicly owned treatment works and the units are located at a noncommercial solid waste management facility; or

(9) the storage or processing of nonhazardous industrial solid waste, if the waste is processed in a wastewater treatment unit that discharges to a publicly owned treatment works liquid wastes that are incidental to the handling, processing, storage, or disposal of solid wastes at municipal solid waste facilities or commercial industrial solid waste landfill facilities.

(e) No permit shall be required for the on-site storage of hazardous waste by a person who is a conditionally exempt small quantity generator as described in §335.78 of this title (relating to Special Requirements for Hazardous Waste Generated by Conditionally Exempt Small Quantity Generators).

(f) No permit under this chapter shall be required for the storage, processing, or disposal of hazardous waste by a person described in §335.41(b) - (d) of this title (relating to Purpose, Scope, and Applicability) or for the storage of hazardous waste under the provisions of 40 CFR §261.4(c) and (d).

(g) No permit under this chapter shall be required for the storage, processing, or disposal of hazardous industrial waste or municipal hazardous waste that is generated or collected for the purpose of conducting treatability studies. Such samples are subject to the requirements in 40 CFR §261.4(e) and (f), as amended and adopted in the CFR through April 4, 2006, as published in the *Federal Register* (71 FR 16862), which are adopted by reference.

(h) A person may obtain authorization from the executive director for the storage, processing, or disposal of nonhazardous industrial solid waste in an interim status landfill that has qualified for interim status in accordance with 40 CFR Part 270, Subpart G, and that has complied with the standards in Subchapter E of this chapter, by complying with the notification and information requirements in §335.6 of this title (relating to Notification Requirements). The executive director may approve or deny the request for authorization or grant the request for authorization subject to conditions, which may include, without limitation, public notice and technical requirements. A request for authorization for the disposal of nonhazardous industrial solid waste under this subsection shall not be approved unless the executive director determines that the subject facility is suitable for disposal of such waste at the facility as requested. At a minimum, a determination of suitability by the executive director must include approval by the executive director of construction of a hazardous waste landfill meeting the

design requirements of 40 CFR §265.301(a). In accordance with §335.6 of this title, such person shall not engage in the requested activities if denied by the executive director or unless 90 days' notice has been provided and the executive director approves the request except where express executive director approval has been obtained prior to the expiration of the 90 days. Authorization may not be obtained under this subsection for:

(1) nonhazardous industrial solid waste, the storage, processing, or disposal of which is expressly prohibited under an existing permit or site development plan applicable to the facility or a portion of the facility;

(2) polychlorinated biphenyl compounds wastes subject to regulation by 40 CFR Part 761;

(3) explosives and shock-sensitive materials;

(4) pyrophorics;

(5) infectious materials;

(6) liquid organic peroxides;

(7) radioactive or nuclear waste materials, receipt of which will require a license from the DSHS or the commission or any other successor agency; and

(8) friable asbestos waste unless authorization is obtained in compliance with the procedures established under §330.171(c)(3)(B) - (E) of this title (relating to Disposal of Special Wastes). Authorizations obtained under this subsection shall be effective during the pendency of the interim status and shall cease upon the termination of interim status, final administrative disposition of the subject permit application, failure of the facility to operate the facility in compliance with the standards set forth in Subchapter E of this chapter, or as otherwise provided by law.

(i) Owners or operators of hazardous waste management units must have permits during the active life (including the closure period) of the unit. Owners or operators of surface impoundments, landfills, land treatment units, and waste pile units that received wastes after July 26, 1982, or that certified closure (according to 40 CFR §265.115) after January 26, 1983, must have post-closure permits, unless they demonstrate closure by removal or decontamination as provided under 40 CFR §270.1(c)(5) and (6), or obtain an order in lieu of a post-closure permit, as provided in subsection (m) of this section. If a post-closure permit is required, the permit must address applicable provisions of 40 CFR Part 264, and Subchapter F of this chapter (relating to Permitting Standards for Owners and Operators of Hazardous Waste

Treatment, Storage, or Disposal Facilities) provisions concerning groundwater monitoring, unsaturated zone monitoring, corrective action, and post-closure care requirements. The denial of a permit for the active life of a hazardous waste management facility or unit does not affect the requirement to obtain a post-closure permit under this section.

(j) Upon receipt of the federal Hazardous and Solid Waste Act (HSWA) authorization for the commission's Hazardous Waste Program, the commission shall be authorized to enforce the provisions that the EPA imposed in hazardous waste permits that were issued before the HSWA authorization was granted.

(k) Any person who intends to conduct an activity under subsection (d) of this section shall comply with the notification requirements of §335.6 of this title.

(l) No permit shall be required for the management of universal wastes by universal waste handlers or universal waste transporters, in accordance with the definitions and requirements of Subchapter H, Division 5 of this chapter (relating to Universal Waste Rule).

(m) At the discretion of the commission, an owner or operator may obtain a post-closure order in lieu of a post-closure permit for interim status units, a corrective action

management unit unless authorized by a permit, or alternative corrective action requirements for contamination commingled from RCRA and solid waste management units. The post-closure order must address the facility-wide corrective action requirements of §335.167 of this title (relating to Corrective Action for Solid Waste Management Units) and groundwater monitoring requirements of §335.156 of this title (relating to Applicability of Groundwater Monitoring and Response).

(n) Except as provided in subsection (d)(9) of this section, owners or operators of commercial industrial solid waste facilities that receive industrial solid waste for discharge to a publicly owned treatment works are required to obtain a permit under this subchapter. By June 1, 2006, owners or operators of existing commercial industrial solid waste facilities that receive industrial solid waste for discharge to a publicly owned treatment works must have a permit issued under this subchapter or obtain a general permit issued under Chapter 205 of this title (relating to General Permits for Waste Discharges) to continue operating. A general permit issued under Chapter 205 of this title will authorize operations until a final decision is made on the application for an individual permit or 15 months, whichever is earlier. The general permit shall authorize operations for a maximum period of 15 months except that authorization may be extended on an individual basis in one-year increments at the discretion of the executive director. Should an application for a general permit issued under Chapter 205 of this title be submitted, the applicant shall also submit to the commission, by June 1, 2006,

the appropriate information to demonstrate compliance with financial assurance requirements for closure of industrial solid waste facilities in accordance with Chapter 37, Subchapter P of this title (relating to Financial Assurance for Hazardous and Nonhazardous Industrial Solid Waste Facilities). Owners or operators of commercial industrial solid waste facilities that receive industrial solid waste for discharge to a publicly owned treatment works operating under a general permit issued under Chapter 205 of this title shall submit an application for a permit issued under this subchapter prior to September 1, 2006.

(o) Treatment, storage, and disposal facilities that are otherwise subject to permitting under RCRA and that meet the criteria in paragraphs (1) or paragraph (2) of this subsection, may be eligible for a standard permit under Subchapter U of this chapter (relating to Standards for Owners and Operators of Hazardous Waste Facilities Operating Under a Standard Permit) if they satisfy one of the two following criteria:

(1) facility generates hazardous waste and then non-thermally treats and/or stores hazardous waste on-site; or

(2) facility receives hazardous waste generated off-site by a generator under the same ownership as the receiving facility.

**§335.10. Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste.**

(a) Except as provided in paragraph (2) of this subsection, no person who generates, transports, processes, stores, or disposes of hazardous waste shall cause, suffer, allow, or permit the shipment of hazardous waste unless he complies with the requirements of paragraph (1) of this subsection, and the manifest requirements in 40 Code of Federal Regulations (CFR) §§262.20 - 262.23, 262.27, 262.42, 262.54, 262.55, and 262.60 and the Appendix to 40 CFR Part 262, as these sections are amended through March 18, 2010 (75 FR 12989).

(1) In addition, generators, owners or operators of treatment, storage, or disposal facilities, and primary exporters shall include a Texas waste code for each hazardous waste itemized on the manifest.

(2) No manifest is required for a hazardous waste generated by a generator that generates less than the quantity limits of hazardous waste specified in §335.78 (relating to Special Requirements for Hazardous Waste Generated by Conditionally Exempt Small Quantity Generators) of this title or a municipal generator that generates less than the quantity limit of hazardous waste specified in §335.78 of this title.

(3) For the purposes of the federal hazardous waste manifest requirements incorporated by reference the term, "regional administrator" is changed to the "executive director" of the Texas Commission on Environmental Quality or to the commission, consistent with the organization of the commission as set out in Texas Water Code, Chapter 5, Subchapter B.

(4) For the purposes of the federal hazardous waste manifest requirements incorporated by reference, reference to the United States Environmental Protection Agency (EPA) is changed to the Texas Commission on Environmental Quality.

(b) No manifest and no marking in accordance with §335.67(b) of this title (relating to Marking) is required for hazardous waste transported on a public or private right-of-way within or along the border of contiguous property under the control of the same person, even if such contiguous property is divided by a public or private right-of-way. However, in the event of a hazardous waste discharge on a public or private right-of-way, the generator or transporter must comply with the requirements of §335.93 of this title (relating to Hazardous Waste Discharges).

(c) Except as provided in subsections (d) and (e) of this section, persons who generate, transport, process, store, or dispose of Class 1 waste shall not cause, suffer,

allow, or permit the shipment of Class 1 waste unless the person complies with the manifest requirements listed in subsection (a) of this section except for 40 CFR §262.54 and §262.55 with the following changes:

(1) When Class 1 waste is itemized on the manifest, use the Texas Commission on Environmental Quality solid waste registration (SWR) number in place of the EPA identification number and the Texas waste code in place of the EPA waste code;

(2) When both hazardous and Class 1 waste are itemized on the same manifest, use EPA identification numbers to identify the generator, transporter, and receiver;

(3) Use Texas waste codes for each waste itemized on the manifest;

(4) The term, "regional administrator" is changed to the "executive director" of the Texas Commission on Environmental Quality or to the commission, consistent with the organization of the commission as set out in Texas Water Code, Chapter 5, Subchapter B; and

(5) Reference to the EPA is changed to the Texas Commission on Environmental Quality.

(d) No manifest is required for the shipment of Class 1 waste where the generator is an industrial generator that generates less than the quantity limits of Class 1 waste specified in §335.78 of this title or is a municipal generator that generates less than the quantity limit of Class 1 waste specified in §335.78 of this title.

(e) No manifest is required for the shipment of Class 1 waste to property owned or otherwise effectively controlled by the owner or operator of an industrial plant, manufacturing plant, mining operation, or agricultural operation from which the waste results or is produced, provided that the property is within 50 miles of the plant or operation and the waste is not commingled with waste from any other source or sources. An industrial plant, manufacturing plant, mining operation, or agricultural operation owned by one person shall not be considered another source with respect to other plants or operations owned by the same person.

**§335.11. Shipping Requirements for Transporters of Hazardous Waste or Class 1 Waste.**

(a) Except as provided by §335.10(a)(2), (d), and (e) of this title (relating to Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste), persons who transport hazardous waste must comply with the manifest requirements in 40 Code of Federal Regulations (CFR) §263.20, §263.21, and the Appendix to 40 CFR Part 262, as these sections are amended through June 16, 2005 (70 FR 35034) as well as the following:

(1) the person must comply with §335.10 of this title; and

(2) in the case of hazardous waste exports, the person must ensure that the shipment conforms to the requirements set forth in the regulations contained in 40CFR §263.20.

(b) Except as provided by §335.10(d) and (e) of this title, a person who transports Class 1 waste must comply with the requirements of subsection (a) of this section, except those requirements in 40 CFR §263.20(a)(2).

**§335.12. Shipping Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities.**

(a) Except as provided by §335.10(a)(2) of this title (relating to Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste), persons who generate, process, store, or dispose of hazardous waste must comply with 40 Code of Federal Regulations (CFR) §265.71 and §265.72, or 40 CFR §264.71 and §264.72, depending on the status of the person, and with the Appendix to 40 CFR Part 262, as these sections are amended through March 18, 2010 (75 FR 12989).

(b) Except as provided by §335.10(d) and (e) of this title, persons who generate, transport, process, store, or dispose of Class 1 waste must comply with 40 CFR §§264.71, 264.72, and 264.76, and the Appendix to 40 CFR Part 262, as amended through March 18, 2010 (75 FR 12989), and a manifest must accompany the shipment which designates that facility to receive the waste.

**§335.13. Recordkeeping and Reporting Procedures Applicable to  
Generators Shipping Hazardous Waste or Class 1 Waste and Primary  
Exporters of Hazardous Waste.**

(a) Unregistered generators who ship hazardous waste or Class 1 waste shall prepare a complete and correct Waste Shipment Summary (S1) from the manifests.

(b) Unregistered generators or out-of-state primary exporters who export hazardous waste from or through Texas to a foreign country, shall prepare a complete and correct Waste Shipment Summary (S1) from the manifests.

(c) Registered generators or out-of-state primary exporters who import hazardous or Class 1 waste from a foreign country through Texas to another state shall prepare a complete and correct Foreign Waste Shipment Summary (F1) from the manifests.

(d) The Waste Shipment Summary (S1) and the Foreign Waste Shipment Summary (F1) shall be prepared in a form provided or approved by the executive director and submitted to the executive director on or before the 25th of each month for shipments originating during the previous month. The unregistered generator or in-state/out-of-state primary exporter must keep a copy of each summary for a period of at least three years from the due date of the summary. These generators are required to prepare and submit a Waste Shipment Summary (S1) and/or Foreign Waste Shipment Summary (F1) only for those months in which shipments are actually made. Conditionally exempt small quantity generators shipping municipal hazardous waste are not subject to the requirements of this subsection.

(e) The following figure is a graphic representation illustrating generator, waste type, shipment type, and report method.

Figure: 30 TAC §335.13(e) (No change to the figure as it currently exists in TAC.)

(f) A registered generator is defined as an in-state generator who has complied with §335.6 of this title (relating to Notification Requirements), and is assigned a solid waste registration number.

(g) An unregistered generator is defined as an in-state generator who is not a conditionally exempt small quantity generator, as defined in §335.78 of this title (relating to Special Requirements for Hazardous Waste Generated by Conditionally Exempt Small Quantity Generators), that ships hazardous waste and/or Class 1 waste using a temporary solid waste registration number and a temporary Texas waste code number assigned by the executive director.

(h) A primary exporter/importer is defined as:

(1) an in-state generator who imports hazardous waste or Class 1 waste from a foreign country into or through Texas to another state and/or exports hazardous waste to a foreign country; or

(2) an out-of-state generator/importer of record who imports hazardous waste or Class 1 waste from a foreign country into or through Texas to another state and/or exports hazardous waste through Texas to a foreign country.

(i) The registered/unregistered generator or primary exporter shall retain a copy of each manifest required by §335.10 of this title (relating to Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste) for a minimum of three years from the date of shipment by the registered/unregistered generator or primary exporter.

(j) A registered/unregistered generator who does not receive a copy of the manifest with the handwritten signature of the owner or operator of the designated facility within 35 days of the date the waste was accepted by the initial transporter must contact the transporter and/or the owner or operator of the designated facility to determine the status of the hazardous waste or Class 1 waste.

(k) A registered/unregistered generator or primary exporter of hazardous waste subject to §335.76(c) of this title (relating to Additional Requirements Applicable to International Shipments) must submit an exception report to the executive director if he has not received a copy of the manifest with the handwritten signatures of the owner or

operator of the designated facility within 45 days of the date that the waste was accepted by the initial transporter. The exception report must be retained by the registered/unregistered generator or primary exporter for at least three years from the date the waste was accepted by the initial transporter and must include:

(1) a legible copy of the manifest for which the generator does not have confirmation of delivery; and

(2) a copy of a letter signed by the generator or his authorized representative explaining the efforts taken to locate the hazardous waste or Class 1 waste and the results of those efforts.

(l) The periods of record retention required by this section are automatically extended during the course of any unresolved enforcement action regarding the regulated activity.

(m) The requirements of subsections (j) and (k) of this section do not apply to generators who generate hazardous waste or Class 1 waste in quantities less than 100 kilograms in a calendar month, or acute hazardous waste in quantities specified in §335.78 of this title.

(n) Primary exporters of hazardous waste as defined in 40 Code of Federal Regulations (CFR) §262.51 must submit an annual report in accordance with the requirements set out in the regulations contained in 40 CFR §262.56, as amended and adopted through March 18, 2010 (75 FR 12989).

(o) Primary exporters of hazardous waste as defined in 40 CFR §262.51, or importers of hazardous waste, to or from countries listed in 40 CFR §262.58(a)(1) for recovery, must comply with 40 CFR Part 262, Subparts A and H.

**§335.19. Standards and Criteria for Variances from Classification as a Solid Waste.**

(a) The executive director may grant requests for a variance from classifying as a solid waste those materials that are accumulated speculatively without sufficient amounts being recycled if the applicant demonstrates that sufficient amounts of the material will be recycled or transferred for recycling in the following year. If a variance is granted, it is valid only for the following year, but can be renewed, on an annual basis, by filing a new application. The executive director's decision will be based on the following criteria:

(1) the manner in which the material is expected to be recycled, when the material is expected to be recycled, and whether this expected disposition is likely to occur (for example, because of past practice, market factors, the nature of the material, or contractual arrangements for recycling);

(2) the reason that the applicant has accumulated the material for one or more years without recycling 75% of the weight or volume accumulated at the beginning of the year;

(3) the quantity of material already accumulated and the quantity expected to be generated and accumulated before the material is recycled;

(4) the extent to which the material is handled to minimize loss; and

(5) other relevant factors.

(b) The executive director may grant requests for a variance from classifying as a solid waste those materials that are reclaimed and then reused as feedstock within the original production process in which the materials were generated if the reclamation operation is an essential part of the production process. This determination will be based on the following criteria:

(1) how economically viable the production process would be if it were to use virgin materials, rather than reclaimed materials;

(2) the extent to which the material is handled before reclamation to minimize loss;

(3) the time periods between generating the material and its reclamation, and between reclamation and return to the original primary production process;

(4) the location of the reclamation operation in relation to the production process;

(5) whether the reclaimed material is used for the purpose for which it was originally produced when it is returned to the original process, and whether it is returned to the process in substantially its original form;

(6) whether the person who generates the material also reclaims it; and

(7) other relevant factors.

(c) The executive director may grant requests for a variance from classifying as a solid waste those materials that have been reclaimed but must be reclaimed further before recovery is completed if, after initial reclamation, the resulting material is commodity-like (even though it is not yet a commercial product, and has to be reclaimed further). This determination will be based on the following factors:

(1) the degree of processing the material has undergone and the degree of further processing that is required;

(2) the value of the material after it has been reclaimed;

(3) the degree to which the reclaimed material is like an analogous raw material;

(4) the extent to which an end market for the reclaimed material is guaranteed;

(5) the extent to which the reclaimed material is handled to minimize loss;  
and

(6) other relevant factors.

(d) Other portions of this chapter that relate to solid wastes that are recycled include §335.1 of this title (relating to Definitions), under the definition of "Solid Waste," §335.6 of this title (relating to Notification Requirements), §335.17 of this title (relating to Special Definitions for Recyclable Materials and Nonhazardous Recyclable Materials), §335.18 of this title (relating to Variances from Classification as a Solid Waste), §335.24 of this title (relating to Requirements for Recyclable Materials and Nonhazardous Recyclable Materials), and Subchapter H of this chapter (relating to Standards for the Management of Specific Wastes and Specific Types of Facilities).

**§335.24. Requirements for Recyclable Materials and Nonhazardous Recyclable Materials.**

(a) Hazardous wastes that are recycled are subject to the requirements for generators, transporters, and storage facilities of subsections (d) - (f) of this section, except for the materials listed in subsections (b) and (c) of this section. Hazardous wastes that are recycled will be known as recyclable materials. Nonhazardous industrial wastes that are recycled will be known as nonhazardous recyclable materials. Nonhazardous recyclable materials are subject to the requirements of subsections (h) - (l) of this section.

(b) The following recyclable materials are not subject to the requirements of this section, except as provided in subsections (g) and (h) of this section, but are regulated under the applicable provisions of Subchapter H of this chapter (relating to Standards for the Management of Specific Wastes and Specific Types of Facilities) and all applicable provisions in Chapter 305 of this title (relating to Consolidated Permits); Chapter 1 of this title (relating to Purpose of Rules, General Provisions); Chapter 3 of this title (relating to Definitions); Chapter 10 of this title (relating to Commission Meetings); Chapter 17 of this title (relating to Tax Relief for Property Used for Environmental Protection); Chapter 20 of this title (relating to Rulemaking); Chapter 37 of this title (relating to Financial Assurance); Chapter 39 of this title (relating to Public Notice); Chapter 40 of this title (relating to Alternative Dispute Resolution Procedure); Chapter 50 of this title (relating to Action on Applications and Other Authorizations); Chapter 55 of this title (relating to Requests for Reconsideration and Contested Case Hearings; Public Comment); Chapter 70 of this title (relating to Enforcement); Chapter 80 of this title (relating to Contested Case Hearings); and Chapter 86 of this title (relating to Special Provisions for Contested Case Hearings).

(1) recyclable materials used in a manner constituting disposal;

(2) hazardous wastes burned for energy recovery in boilers and industrial furnaces that are not regulated under Subchapter E of this chapter (relating to Interim

Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities) or Subchapter F of this chapter (relating to Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities);

(3) recyclable materials from which precious metals are reclaimed;

(4) spent lead-acid batteries that are being reclaimed.

(c) The following recyclable materials are not subject to regulation under Subchapters B - I or O of this chapter (relating to Hazardous Waste Management General Provisions; Standards Applicable to Generators of Hazardous Waste; Standards Applicable to Transporters of Hazardous Waste; Interim Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities; Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities; Location Standards for Hazardous Waste Storage, Processing, or Disposal; Standards for the Management of Specific Wastes and Specific Types of Facilities; Prohibition on Open Dumps; and Land Disposal Restrictions); Chapter 1 of this title; Chapter 3 of this title; Chapter 10 of this title; Chapter 17 of this title; Chapter 20 of this title; Chapter 37 of this title; Chapter 39 of this title ; Chapter 40 of this title; Chapter 50 of this title; Chapter 55 of this title; Chapter 70 of this title; Chapter 80 of

this title; Chapter 86 of this title; or Chapter 305 of this title, except as provided in subsections (g) and (h) of this section:

(1) industrial ethyl alcohol that is reclaimed except that, unless provided otherwise in an international agreement as specified in the regulations contained in 40 Code of Federal Regulations (CFR) §262.58, which are in effect as of November 8, 1986:

(A) a person initiating a shipment for reclamation in a foreign country, and any intermediary arranging for the shipment, must comply with the requirements applicable to a primary exporter in the regulations contained in 40 CFR §§262.53, 262.55, 262.56(a)(1) - (4) and (6) and (b), and 262.57, as amended through January 8, 2010 (75 FR 1236), export such materials only upon such consent of the receiving country and in conformance with the United States Environmental Protection Agency (EPA) acknowledgment of consent as defined in the regulations contained in 40 CFR Part 262, Subpart E, as amended through January 8, 2010 (75 FR 1236), and provide a copy of the EPA acknowledgment of consent to the shipment to the transporter transporting the shipment for export;

(B) transporters transporting a shipment for export may not accept a shipment if he knows the shipment does not conform to the EPA acknowledgment of consent, must ensure that a copy of the EPA acknowledgment of consent accompanies

the shipment and must ensure that it is delivered to the facility designated by the person initiating the shipment;

(2) scrap metal that is not already excluded under 40 CFR §261.4(a)(13);

(3) fuels produced from the refining of oil-bearing hazardous waste along with normal process streams at a petroleum refining facility if such wastes result from normal petroleum refining, production, and transportation practices (this exemption does not apply to fuels produced from oil recovered from oil-bearing hazardous waste, where such recovered oil is already excluded under 40 CFR §261.4(a)(12)); and

(4) the following hazardous waste fuels:

(A) Hazardous waste fuel produced from oil-bearing hazardous wastes from petroleum refining, production or transportation practices, or produced from oil reclaimed from such hazardous wastes where such hazardous wastes are reintroduced into a process that does not use distillation or does not produce products from crude oil so long as the resulting fuel meets the used oil specification under 40 CFR §279.11 and so long as no other hazardous wastes are used to produce the hazardous waste fuel;

(B) Hazardous waste fuel produced from oil-bearing hazardous waste from petroleum refining production, and transportation practices, where such hazardous wastes are reintroduced into a refining process after a point at which contaminants are removed, so long as the fuel meets the used oil fuel specification under 40 CFR §279.11;

(C) Oil reclaimed from oil-bearing hazardous wastes from petroleum refining, production, and transportation practices, which reclaimed oil is burned as fuel without reintroduction to a refining process, so long as the reclaimed oil meets the used oil fuel specification under 40 CFR §279.11.

(d) Generators and transporters of recyclable materials are subject to the applicable requirements of Subchapter C of this chapter and Subchapter D of this chapter, and the notification requirements of §335.6 of this title (relating to Notification Requirements), except as provided in subsections (a) - (c) of this section.

(e) Owners or operators of facilities that store recyclable materials before they are recycled are regulated under all applicable provisions of this chapter, and Chapter 305 of this title; Chapter 1 of this title; Chapter 3 of this title; Chapter 10 of this title; Chapter 17 of this title; Chapter 20 of this title; Chapter 37 of this title; Chapter 39 of this title; Chapter 40 of this title; Chapter 50 of this title ; Chapter 55 of this title; Chapter 70 of

this title; Chapter 80 of this title; and the notification requirements under §335.6 of this title, except as provided in subsections (a) - (c) of this section. The recycling process itself is exempt from regulation.

(f) Owners or operators of facilities that recycle recyclable materials without storing them before they are recycled are subject to the following requirements, except as provided in subsections (a) - (c) of this section:

(1) notification requirements under §335.6 of this title; and

(2) Section 335.12 of this title (relating to Shipping Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities).

(g) Recyclable materials (excluding those listed in subsections (b)(4), and (c)(1) - (5) of this section) remain subject to the requirements of §§335.4, 335.6, and 335.9 - 335.15 of this title (relating to General Prohibitions; Notification Requirements; Recordkeeping and Annual Reporting Procedures Applicable to Generators; Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste; Shipping Requirements for Transporters of Hazardous Waste or Class 1 Waste; Shipping Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities; Recordkeeping

and Reporting Procedures Applicable to Generators Shipping Hazardous Waste or Class 1 Waste; Recordkeeping Requirements Applicable to Transporters of Hazardous Waste or Class 1 Waste; and Recordkeeping and Reporting Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities, respectively), as applicable. Recyclable materials listed in subsections (b)(4) and (c)(2) of this section remain subject to the requirements of subsection (h) of this section.

(h) Industrial solid wastes that are nonhazardous recyclable materials and recyclable materials listed in subsections (b)(4) and (c)(2) of this section remain subject to the requirements of §335.4 of this title. In addition, industrial solid wastes that are nonhazardous recyclable materials and recyclable materials listed in subsection (c)(2) of this section remain subject to the requirements of §335.6 of this title. Industrial solid wastes that are nonhazardous recyclable materials and recyclable materials listed in subsections (b)(4) and (c)(2) of this section may also be subject to the requirements of §§335.10 - 335.15 of this title, as applicable, if the executive director determines that such requirements are necessary to protect human health and the environment. In making the determination, the executive director shall consider the following criteria:

(1) the waste's toxicity, corrosivity, flammability, ability to sensitize or irritate, or propensity for decomposition and creation of sudden pressure;

(2) the potential for the objectionable constituent to migrate from the waste into the environment if improperly managed;

(3) the persistence of any objectionable constituent or any objectionable degradation product in the waste;

(4) the potential for the objectionable constituent to degrade into nonharmful constituents;

(5) the degree to which the objectionable constituent bioaccumulates in ecosystems;

(6) the plausible types of improper management to which the waste could be subjected;

(7) the nature and severity of potential damage to the public health and environment;

(8) whether subjecting the waste to additional regulation will provide additional protection for human health and the environment; and

(9) other relevant factors.

(i) Except as provided in Texas Health and Safety Code, §361.090, facilities managing recyclable materials that are required to obtain a permit under this section may also be permitted to manage nonhazardous recyclable materials at the same facility if the executive director determines that such regulation is necessary to protect human health and the environment. In making this determination, the executive director shall consider the following criteria:

(1) whether managing nonhazardous recyclable materials will create an additional risk of release of the hazardous recyclable materials into the environment;

(2) whether hazardous and nonhazardous wastes that are incompatible are stored and/or processed in the same or connected units;

(3) whether the management of recyclable materials and nonhazardous recyclable materials is segregated within the facility;

(4) the waste's toxicity, corrosivity, flammability, ability to sensitize or irritate, or propensity for decomposition and creation of sudden pressure;

(5) the potential for the objectionable constituent to migrate from the waste into the environment if improperly managed;

(6) the persistence of any objectionable constituent or any objectionable degradation product in the waste;

(7) the potential for the objectionable constituent to degrade into harmful constituents;

(8) the degree to which the objectionable constituent bioaccumulates in ecosystems;

(9) the plausible types of improper management to which the waste could be subjected;

(10) the nature and severity of potential damage to the public health and environment;

(11) whether subjecting the waste to additional regulation will provide additional protection for human health and the environment; and

(12) other relevant factors.

(j) Closure cost estimates.

(1) Except as otherwise approved by the executive director, an owner or operator of a recycling facility that stores combustible nonhazardous materials outdoors, or that poses a significant risk to public health and safety as determined by the executive director, shall provide a written cost estimate, in current dollars, showing the cost of hiring a third party to close the facility by disposition of all processed and unprocessed materials in accordance with all applicable regulations. The closure cost estimate for financial assurance must be submitted with any new notification in accordance with §335.6 within 60 days of the effective date of this rule for existing facilities or as otherwise requested by the executive director.

(2) The estimate must:

(A) equal the costs of closure of the facility, including disposition of the maximum inventories of all processed and unprocessed combustible materials stored outdoors on site during the life of the facility, in accordance with all applicable regulations;

(B) be based on the costs of hiring a third party that is not affiliated (as defined in §328.2 of this title (relating to Definitions)) with the owner or operator; and

(C) be based on a per cubic yard and/or short ton measure for collection and disposition costs.

(k) Financial assurance. An owner or operator of a recycling facility that stores nonhazardous combustible recyclable materials outdoors, or that poses a significant risk to public health and safety as determined by the executive director, shall establish and maintain financial assurance for closure of the facility in accordance with Chapter 37, Subchapter J of this title (relating to Financial Assurance for Recycling Facilities).

(l) Closure requirements.

(1) Closure must include collecting processed and unprocessed materials, and transporting the materials to an authorized facility for disposition unless otherwise approved or directed in writing by the executive director.

(2) Closure of the facility must be completed within 180 days following the most recent acceptance of processed or unprocessed materials unless otherwise approved or directed in writing by the executive director.

(m) Used oil that is recycled and is also a hazardous waste solely because it exhibits a hazardous characteristic is not subject to the requirements of Subchapters A - I or O of this chapter, but is regulated under Chapter 324 of this title (relating to Used Oil Standards). Used oil that is recycled includes any used oil which is reused, following its original use, for any purpose (including the purpose for which the oil was originally used). Such term includes, but is not limited to, oil which is re-refined, reclaimed, burned for energy recovery, or reprocessed.

(n) Owners or operators of facilities subject to hazardous waste permitting requirements with hazardous waste management units that recycle hazardous wastes are subject to the requirements of 40 CFR Part 264 or Part 265, Subparts AA and BB, as adopted by reference under §335.152(a)(17) and (18) and §335.112(a)(19) and (20) of this title (relating to Standards).

(o) Hazardous waste that is exported to or imported from designated member countries of the Organization for Economic Cooperation and Development (OECD), as defined in 40 CFR §262.58(a)(1), for purpose of recovery, and any person who exports

or imports such hazardous waste, is subject to the requirements of 40 CFR Part 262, Subpart H (both federal regulation references as amended and adopted through April 12, 1996 at 61 FedReg 16290), if the hazardous waste is subject to the federal manifesting requirements of 40 CFR Part 262, or subject to the universal waste management standards of 40 CFR Part 273, or subject to Subchapter H, Division 5 of this chapter (relating to Universal Waste Rule).

(p) Other portions of this chapter that relate to solid wastes that are recycled include §335.1 of this title (relating to Definitions), under the definition of "Solid waste," §335.6 of this title, §335.17 of this title (relating to Special Definitions for Recyclable Materials and Nonhazardous Recyclable Materials), §335.18 of this title (relating to Variances from Classification as a Solid Waste), §335.19 of this title (relating to Standards and Criteria for Variances from Classification as a Solid Waste), and Subchapter H of this chapter.

**SUBCHAPTER C: STANDARDS APPLICABLE TO GENERATORS OF  
HAZARDOUS WASTE**

**§§335.61, 335.62, 335.69, 335.76, 335.78, 335.79**

**Statutory Authority**

The amendments and new section are adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC), §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024, (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendments and new section implement THSC, Chapter 361.

**§335.61. Purpose, Scope and Applicability.**

(a) Except as provided in subsection (b) of this section, this subchapter establishes standards for generators of hazardous waste. These standards are in addition

to any applicable provisions contained in Subchapter A of this chapter (relating to Industrial Solid Waste and Municipal Hazardous Waste in General).

(b) The provisions of this subchapter with which a generator who stores, processes or disposes of hazardous waste on-site must comply are §335.62 of this title (relating to Hazardous Waste Determination and Waste Classification), §335.63 of this title (relating to EPA Identification Numbers), §335.70 of this title (relating to Recordkeeping), §335.73 of this title (relating to Additional Reporting), and, if applicable, §335.77 of this title (relating to Farmers), and §335.69 of this title (relating to Accumulation Time).

(c) Any person who imports hazardous waste into the state from a foreign country shall comply with standards applicable to generators.

(d) An owner or operator who initiates a shipment of hazardous waste from a processing, storage or disposal facility must comply with the generator standards contained in §335.10 of this title (relating to Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste) and §335.13 of this title (relating to Recordkeeping and Reporting Procedures Applicable to Generators Shipping Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste), and this subchapter. The provisions of §335.69

of this title are applicable to on-site accumulation of hazardous wastes by generators.

Therefore, the provisions of §335.69 of this title only apply to owners or operators who are shipping hazardous waste which they generate at that facility.

(e) A farmer who generates waste pesticides which are hazardous waste and who complies with §335.77 of this title is not required to comply with this chapter with respect to those pesticides.

(f) A generator who treats, stores, or disposes of hazardous waste on-site must comply with the applicable standards and permit requirements set forth in Subchapters E, F, H, and O of this chapter (relating to Industrial Solid Waste and Municipal Hazardous Waste) and with Chapter 305 of this title (relating to Consolidated Permits).

(g) Section 335.78(c) and (d) of this title (relating to Special Requirements for Hazardous Waste Generated By Conditionally Exempt Small Quantity Generators) must be used to determine the applicability of provisions of this subchapter that are dependent on calculations of the quantity of hazardous waste generated per month.

(h) The requirements of this subchapter do not apply to persons responding to an explosives or munitions emergency in accordance with §335.41(d)(2) of this title (relating to Purpose, Scope and Applicability).

(i) For purposes of this subsection, the terms "laboratory" and "eligible academic entity" shall have the meaning as defined in 40 Code of Federal Regulations §262.200. The laboratories owned by an eligible academic entity that chooses to be subject to the requirements of §335.79 of this title (relating to Alternative Requirements for Hazardous Waste Determination and Accumulation of Unwanted Material for Laboratories Owned by Eligible Academic Entities) are not subject to:

(1) for large and small quantity generators, the requirements of §335.504 of this title (relating to Hazardous Waste Determination) and §335.69 of this title, except as provided in §335.79 of this title; and

(2) for conditionally exempt small quantity generators, the conditions of §335.78 of this title, except as provided in §335.79 of this title.

**§335.62. Hazardous Waste Determination and Waste Classification.**

A person who generates a solid waste must determine if that waste is hazardous pursuant to §335.504 of this title (relating to Hazardous Waste Determination) and must classify any nonhazardous waste under the provisions of Subchapter R of this chapter (relating to Waste Classification). If the waste is determined to be hazardous,

the generator must refer to this chapter and to 40 Code of Federal Regulations Parts 261, 264, 265, 266, 267, 268, and 273 for any possible applicable exclusions or restrictions pertaining to management of the specific waste.

**§335.69. Accumulation Time.**

(a) Generators that comply with the requirements of paragraph (1) of this subsection are exempt from all requirements adopted by reference in §335.112(a)(6) and (7) of this title (relating to Standards), except 40 Code of Federal Regulations (CFR) §265.111 and §265.114. Except as provided in subsections (f) - (h) and (n) of this section, a generator may accumulate hazardous waste on-site for 90 days without a permit or interim status provided that:

(1) the waste is placed:

(A) in containers and the generator complies with the applicable requirements of 40 CFR Part 265, Subparts I, AA, BB, and CC, as adopted by reference under §335.112(a) of this title; and/or

(B) in tanks and the generator complies with the applicable requirements of 40 CFR Part 265, Subparts J, AA, BB, and CC, except 40 CFR

§265.197(c) and §265.200, as adopted by reference under §335.112(a) of this title;  
and/or

(C) on drip pads and the generator complies with §335.112(a)(18) of this title and maintains the following records at the facility: a description of procedures that will be followed to ensure that all wastes are removed from the drip pad and associated collection system at least once every 90 days; and documentation of each waste removal, including the quantity of waste removed from the drip pad and the sump or collection system and the date and time of removal; and/or

(D) in containment buildings and the generator complies with 40 CFR Part 265, Subpart DD, as adopted by reference under §335.112(a) of this title and has placed its professional engineer certification that the building complies with the design standards specified in 40 CFR §265.1101 in the facility's operating record prior to operation of the unit. The owner or operator shall maintain the following records at the facility:

(i) a written description of procedures to ensure that each waste volume remains in the unit for no more than 90 days, a written description of the waste generation and management practices for the facility showing that they are

consistent with respecting the 90-day limit, and documentation that the procedures are complied with; or

(ii) documentation that the unit is emptied at least once every 90 days;

(2) the date upon which each period of accumulation begins is clearly marked and visible for inspection on each container; and

(3) while being accumulated on-site, each container and tank is labeled or marked clearly with the words, "Hazardous Waste"; and

(4) the generator complies with the following:

(A) the requirements for owners or operators in 40 CFR Part 265, Subparts C and D and with 40 CFR §265.16, as adopted by reference in §335.112(a) of this title;

(B) all applicable requirements under 40 CFR Part 268, as adopted by reference under §335.431 of this title (relating to Purpose, Scope, and Applicability); and

(C) Section 335.113 of this title (relating to Reporting of Emergency Situations by Emergency Coordinator).

(b) A generator of 1,000 kilograms or greater of hazardous waste in a calendar month, or greater than 1 kilogram of acute hazardous waste listed in 40 CFR §261.31 or §261.33(e) in a calendar month, who accumulates hazardous waste or acute hazardous waste for more than 90 days is an operator of a storage facility and is subject to the requirements of 40 CFR Parts 264, 265, and 267 and the permit requirements of 40 CFR Part 270 unless he has been granted an extension to the 90-day period. Such extension may be granted by the executive director if hazardous wastes must remain on-site for longer than 90 days due to unforeseen, temporary, and uncontrollable circumstances. An extension of up to 30 days may be granted at the discretion of the executive director on a case-by-case basis.

(c) Persons exempted under this provision, who generate hazardous waste, are still subject to the requirements in Subchapter A of this chapter (relating to Industrial Solid Waste and Municipal Hazardous Waste in General) applicable to generators of Class 1 waste.

(d) A generator, other than a conditionally exempt small quantity generator regulated under §335.78 of this title (relating to Special Requirements for Hazardous Waste Generated by Conditionally Exempt Small Quantity Generators), may accumulate as much as 55 gallons of hazardous waste or one quart of acutely hazardous waste listed in 40 CFR §261.31 or §261.33(e) in containers at or near any point of generation where wastes initially accumulate, which is under the control of the operator of the process generating the waste, without a permit or interim status and without complying with subsection (a) or (f) of this section provided he:

(1) complies with 40 CFR §§265.171, 265.172, and 265.173(a), as adopted by reference under §335.112(a) of this title; and

(2) marks his containers either with the words "Hazardous Waste" or with other words that identify the contents of the containers.

(e) A generator who accumulates either hazardous waste or acutely hazardous waste listed in 40 CFR §261.31 or §261.33(e) in excess of the amounts listed in subsection (d) of this section at or near any point of generation must, with respect to that amount of excess waste, comply within three days with subsection (a) of this section or other applicable provisions of this chapter. During the three-day period, the generator must continue to comply with subsection (d) of this section. The generator

must mark the container holding the excess accumulation of hazardous waste with the date the excess amount began accumulating.

(f) A generator who generates greater than 100 kilograms but less than 1,000 kilograms of hazardous waste in a calendar month may accumulate hazardous waste on-site for 180 days or less without a permit or without having interim status provided that:

(1) the quantity of waste accumulated on-site never exceeds 6,000 kilograms;

(2) the generator complies with the requirements of 40 CFR Part 265, Subpart I, as adopted by reference under §335.112(a) of this title, except 40 CFR §265.176 and §265.178;

(3) the generator complies with the requirements of 40 CFR §265.201, as adopted by reference under §335.112(a) of this title;

(4) the generator complies with the requirements of:

(A) subsection (a)(2) and (3) of this section;

(B) 40 CFR Part 265, Subpart C, as adopted by reference under §335.112(a) of this title;

(C) all applicable requirements under 40 CFR Part 267, as adopted by reference under §335.601 and §335.602 of this title (relating to Purpose, Scope, and Applicability; and Standards); and

(D) all applicable requirements under 40 CFR Part 268, as adopted by reference under §335.431 of this title; and

(5) the generator complies with the following requirements.

(A) At all times there must be at least one employee either on the premises or on call (i.e., available to respond to an emergency by reaching the facility within a short period of time) with the responsibility for coordinating all emergency response measures specified in subparagraph (D) of this paragraph. This employee is the emergency coordinator.

(B) The generator must post the following information next to telephones that may be used to summon emergency assistance:

(i) the name and telephone number of the emergency coordinator;

(ii) location of fire extinguishers and spill control material, and, if present, fire alarm; and

(iii) the telephone number of the fire department, unless the facility has a direct alarm.

(C) The generator must ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies;

(D) The emergency coordinator or his designee must respond to any emergencies that arise. The applicable responses are as follows.

(i) In the event of a fire, call the fire department or attempt to extinguish it using a fire extinguisher.

(ii) In the event of a spill, contain the flow of hazardous waste to the extent possible, and as soon as is practicable, clean up the hazardous waste and any contaminated materials or soil.

(iii) In the event of a fire, explosion, or other release which could threaten human health outside the facility or when the generator has knowledge that a spill has reached surface water, the generator must immediately notify the National Response Center (using its 24-hour toll free number (800) 424-8802) and the commission according to the procedures set out in the State of Texas oil and hazardous substances spill contingency plan. The reports must include the following information:

(I) the name, address, and United States Environmental Protection Agency (EPA) identification number of the generator;

(II) date, time, and type of incident (e.g., spill or fire);

(III) quantity and type of hazardous waste involved in the incident;

(IV) extent of injuries, if any; and

(V) estimated quantity and disposition of recovered materials, if any.

(g) A generator who generates greater than 100 kilograms but less than 1,000 kilograms of hazardous waste in a calendar month and who must transport his waste, or offer his waste for transportation, over a distance of 200 miles or more for off-site processing, storage, or disposal may accumulate hazardous waste on-site for 270 days or less without a permit or without having interim status, provided that he complies with the requirements of subsection (f) of this section.

(h) A generator who generates greater than 100 kilograms but less than 1,000 kilograms of hazardous waste in a calendar month and who accumulates hazardous waste in quantities exceeding 6,000 kilograms or accumulates hazardous waste for more than 180 days (or for more than 270 days if he must transport his waste, or offer his waste for transportation, over a distance of 200 miles or more) is an operator of a storage facility and is subject to the requirements of this chapter (relating to Industrial Solid Waste and Municipal Hazardous Waste), and Subchapters E and F of this chapter (relating to Interim Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities; and Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities) and the permit requirements of Chapter 305 of this title (relating to Consolidated Permits),

unless he has been granted an extension to the 180-day (or 270-day, if applicable) period. Such extension may be granted by the executive director if hazardous wastes must remain on-site for longer than 180 days (or 270 days, if applicable) due to unforeseen, temporary, and uncontrollable circumstances. An extension of up to 30 days may be granted at the discretion of the executive director on a case-by-case basis.

(i) A generator who generates or collects hazardous waste for the purpose of treatability studies is not subject to this section.

(j) A generator of 1,000 kilograms or greater of hazardous waste per calendar month who also generates wastewater treatment sludges from electroplating operations that meet the listing description for EPA hazardous waste number F006, may accumulate F006 waste on-site for more than 90 days, but not more than 180 days without a permit or without having interim status provided that:

(1) the generator has implemented pollution prevention practices that reduce the amount of any hazardous substances, pollutants, or contaminants entering the F006 waste or otherwise released to the environment prior to its recycling;

(2) the F006 waste is legitimately recycled through metals recovery;

(3) no more than 20,000 kilograms of F006 waste is accumulated on-site at any one time; and

(4) the F006 waste is managed in accordance with the following:

(A) the F006 waste is placed:

(i) in containers and the generator complies with the applicable requirements of 40 CFR Part 265, Subparts I, AA, and BB, as adopted by reference under §335.112(a) of this title, and 40 CFR Part 265, Subpart CC; and/or

(ii) in tanks and the generator complies with the applicable requirements of 40 CFR Part 265, Subparts J, AA, BB, as adopted by reference under §335.112(a) of this title, and 40 CFR Part 265, Subpart CC, except 40 CFR §265.197(c) and §265.200; and/or

(iii) in containment buildings and the generator complies with 40 CFR Part 265, Subpart DD, as adopted by reference under §335.112(a) of this title, and has placed its professional engineer certification that the building complies with the design standards specified in 40 CFR §265.1101 in the facility's operating

record prior to operation of the unit. The owner or operator shall maintain the following records at the facility:

(I) a written description of procedures to ensure that the F006 waste remains in the unit for no more than 180 days, a written description of the waste generation and management practices for the facility showing that they are consistent with the 180-day limit, and documentation that the generator is complying with the procedures; or

(II) documentation that the unit is emptied at least once every 180 days;

(B) the generator complies with 40 CFR §265.111 and §265.114, as adopted by reference under §335.112(a)(6) of this title;

(C) the date upon which each period of accumulation begins is clearly marked and visible for inspection on each container;

(D) while being accumulated on-site, each container and tank is labeled or marked clearly with the words "Hazardous Waste"; and

(E) the generator complies with the following:

(i) the requirements for owners or operators in 40 CFR Part 265, Subparts C and D, and 40 CFR §265.16, as adopted by reference under §335.112(a) of this title;

(ii) 40 CFR §268.7(a)(5), as adopted by reference under §335.431(c) of this title; and

(iii) Section 335.113 of this title.

(k) A generator of 1,000 kilograms or greater of hazardous waste per calendar month who also generates wastewater treatment sludges from electroplating operations that meet the listing description for EPA hazardous waste number F006, and who must transport this waste, or offer this waste for transportation, over a distance of 200 miles or more for off-site metals recovery, may accumulate F006 waste on-site for more than 90 days, but not more than 270 days without a permit or without having interim status if the generator complies with the requirements of subsection (j)(1) - (4) of this section.

(l) A generator accumulating F006 waste in accordance with subsection (j) or (k) of this section who accumulates F006 waste on-site for more than 180 days (or for more

than 270 days if the generator must transport this waste, or offer this waste for transportation, over a distance of 200 miles or more), or who accumulates more than 20,000 kilograms of F006 waste on-site is an operator of a hazardous waste storage facility and is subject to the requirements of this chapter and Chapter 305 of this title applicable to such owners and operators, unless the generator has been granted an extension to the 180-day (or 270-day if applicable) period or an exception to the 20,000 kilogram accumulation limit. Such extensions and exceptions may be granted by the executive director if F006 waste must remain on-site for longer than 180 days (or 270 days if applicable) or if more than 20,000 kilograms of F006 waste must remain on-site due to unforeseen, temporary, and uncontrollable circumstances. An extension of up to 30 days or an exception to the accumulation limit may be granted at the discretion of the executive director on a case-by-case basis.

(m) A generator who sends a shipment of hazardous waste to a designated facility with the understanding that the designated facility can accept and manage the waste and later receives that shipment back as a rejected load or residue in accordance with the manifest discrepancy provisions of §335.10 of this title (relating to Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste) may accumulate the returned waste on-site in accordance with subsections (a) and (b) or (f) - (h) of this section depending on the

amount of hazardous waste on-site in that calendar month. Upon receipt of the returned shipment, the generator must:

(1) Sign Item 18c of the manifest, if the transporter returned the shipment using the original manifest; or

(2) Sign Item 20 of the manifest, if the transporter returned the shipment using a new manifest.

(n) A generator who sends a shipment of Class 1 waste to a designated facility with the understanding that the designated facility can accept and manage the waste and later receives that shipment back as a rejected load or residue in accordance with the manifest discrepancy provisions of §335.10 of this title may accumulate the returned waste on-site. Upon receipt of the returned shipment, the generator must:

(1) Sign Item 18c of the manifest, if the transporter returned the shipment using the original manifest; or

(2) Sign Item 20 of the manifest, if the transporter returned the shipment using a new manifest.

**§335.76. Additional Requirements Applicable to International Shipments.**

(a) Any person who exports hazardous waste to a foreign country or imports hazardous waste from a foreign country into the state must comply with the requirements of this title and with the special requirements of this section. Except to the extent the regulations contained in 40 Code of Federal Regulations (CFR) §262.58 as amended through January 8, 2010 (75 FR 1236), a primary exporter of hazardous waste must comply with the special requirements of this section as they apply to primary exporters, and a transporter transporting hazardous waste for export must comply with applicable requirements of §335.11 of this title (relating to Shipping Requirements for Transporters of Hazardous Waste or Class 1 Waste) and §335.14 of this title (relating to Recordkeeping Requirements Applicable to Transporters of Hazardous Waste or Class 1 Waste) and Subchapter D of this chapter (relating to Standards Applicable to Transporters of Hazardous Waste). 40 CFR §262.58 sets forth the requirements of international agreements between the United States and receiving countries which establish different notice, export, and enforcement procedures for the transportation, processing, storage, and disposal of hazardous waste for shipments between the United States and those countries.

(b) Exports of hazardous waste are prohibited except in compliance with the applicable requirements of this subchapter, the special requirements of this section, and

§335.11 of this title and §335.14 of this title and Subchapter D of this chapter. Exports of hazardous waste are prohibited unless:

(1) notification in accordance with the regulations contained in 40 CFR §262.53, as amended and adopted through April 12, 1996 (61 FR 16290) has been provided;

(2) the receiving country has consented to accept the hazardous waste;

(3) a copy of the United States Environmental Protection Agency (EPA) acknowledgment of consent to the shipment accompanies the hazardous waste shipment and, unless exported by rail, is attached to the manifest (or shipping paper for exports by water (bulk shipment));

(4) the hazardous waste shipment conforms to the terms of the receiving country's written consent as reflected in the EPA acknowledgment of consent; and

(5) the primary exporter complies with the manifest requirements of §335.10 of this title (relating to Shipping and Reporting Procedures Applicable to Generators of Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste) except that:

(A) the primary exporter must attach a copy of the EPA acknowledgment of consent to the shipment to the manifest which must accompany the hazardous waste shipment. For exports by rail or water (bulk shipment), the primary exporter must provide the transporter with an EPA acknowledgment of consent which must accompany the hazardous waste but which need not be attached to the manifest except that for exports by water (bulk shipment) the primary exporter must attach the copy of the EPA acknowledgment of consent to the shipping paper; and

(B) the primary exporter may obtain the manifest from any source that is registered with the EPA as a supplier of manifests.

(c) A primary exporter must submit an exception report to the executive director if:

(1) he has not received a copy of the manifest signed by the transporter stating the date and place of departure from the United States within 45 days from the date it was accepted by the initial transporter;

(2) within 90 days from the date the waste was accepted by the initial transporter, the primary exporter has not received written confirmation from the foreign consignee that the hazardous waste was received; or

(3) the waste was returned to the United States.

(d) When importing hazardous waste into the state from a foreign country, a person must prepare a manifest in accordance with the requirements of §335.10 of this title and 40 CFR §262.60.

(e) Any person exporting hazardous waste shall file an annual report with the executive director as required in §335.9 of this title (relating to Recordkeeping and Annual Reporting Procedures Applicable to Generators) summarizing the types, quantities, frequency, and ultimate destination of all such hazardous waste exported during the previous calendar year.

(f) Any person who exports hazardous waste to a foreign country or imports hazardous waste from a foreign country into the state must comply with the requirements of the regulations contained in 40 CFR §262.58 (International Agreements), as amended and adopted through January 8, 2010 (75 FR 1236).

(g) Except to the extent that they are clearly inconsistent with Texas Health and Safety Code, Chapter 361, or the rules of the commission, primary exporters must comply with the regulations contained in 40 CFR §262.57, which are in effect as of November 8, 1986.

(h) Transfrontier shipments of hazardous waste for recovery within countries belonging to the Organization for Economic Cooperation and Development are subject to 40 CFR Part 262, Subpart H, which is adopted by reference as amended and adopted in the CFR through January 8, 2010 (75 FR 1236).

**§335.78. Special Requirements for Hazardous Waste Generated by Conditionally Exempt Small Quantity Generators.**

(a) A generator is a conditionally exempt small quantity generator in a calendar month if he generates no more than 100 kilograms of hazardous waste in that month.

(b) Except for those wastes identified in subsections (e) - (g) and (j) of this section, a conditionally exempt small quantity generator's hazardous wastes are not subject to regulation under Subchapters C - H and O of this chapter (relating to Standards Applicable to Generators of Hazardous Waste; Standards Applicable to Transporters of Hazardous Waste; Interim Standards for Owners and Operators of

Hazardous Waste Treatment, Storage, or Disposal Facilities; Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities; Location Standards for Hazardous Waste Storage, Processing, or Disposal; Standards for the Management of Specific Wastes and Specific Types of Facilities; and Land Disposal Restrictions); Chapter 1 of this title (relating to Purpose of Rules, General Provisions); Chapter 3 of this title (relating to Definitions); Chapter 10 of this title (relating to Commission Meetings); Chapter 20 of this title (relating to Rulemaking); Chapter 37 of this title (relating to Financial Assurance); Chapter 39 of this title (relating to Public Notice); Chapter 40 of this title (relating to Alternative Dispute Resolution Procedure); Chapter 50 of this title (relating to Action on Applications and Other Authorizations); Chapter 55 of this title (relating to Requests for Reconsideration and Contested Case Hearings; Public Comment); Chapter 70 of this title (relating to Enforcement); Chapter 80 of this title (relating to Contested Case Hearings); Chapter 86 of this title (relating to Special Provisions for Contested Case Hearings; Chapter 305 of this title (relating to Consolidated Permits); or the notification requirements of the Resource Conservation and Recovery Act, §3010, provided the generator complies with the requirements of subsections (f), (g), and (j) of this section.

(c) When making the quantity determinations of Subchapters A - C of this chapter (relating to Industrial Solid Waste and Municipal Hazardous Waste in General; Hazardous Waste Management General Provisions; and Standards Applicable to

Generators of Hazardous Waste), the generator must include all hazardous waste it generates, except hazardous waste that:

(1) is exempt from regulation under 40 Code of Federal Regulations (CFR) §261.4(c) - (f), §335.24(c) of this title (relating to Requirements For Recyclable Materials and Nonhazardous Recyclable Materials), §335.41(f)(1) of this title (relating to Purpose, Scope and Applicability), or 40 CFR §261.8;

(2) is managed immediately upon generation only in on-site elementary neutralization units, wastewater treatment units, or totally enclosed treatment facilities as defined in §335.1 of this title (relating to Definitions);

(3) is recycled, without prior storage or accumulation, only in an on-site process subject to regulation under §335.24(f) of this title;

(4) is used oil managed under the requirements of §335.24(j) of this title and Chapter 324 of this title (relating to Used Oil);

(5) are spent lead-acid batteries managed under the requirements of §335.251 of this title (relating to Applicability and Requirements);

(6) is universal waste managed under §335.41(j) of this title and Subchapter H, Division 5 of this chapter (relating to Universal Waste Rule); or

(7) is an unused commercial chemical product (listed in 40 CFR Part 261, Subpart D or exhibiting one or more characteristics in 40 CFR Part 261, Subpart C) that is generated solely as a result of a laboratory clean-out conducted at an eligible academic entity consistent with 40 CFR §262.213. For purposes of this provision, the phrase "eligible academic entity" shall have the meaning as defined in 40 CFR §262.200.

(d) In determining the quantity of hazardous waste generated, a generator need not include:

(1) hazardous waste when it is removed from on-site storage provided that the waste was counted at the time it was generated;

(2) hazardous waste which is generated or collected for the purpose of treatability studies;

(3) hazardous waste produced by on-site processing (including reclamation) of his hazardous waste, so long as the hazardous waste that is processed was counted once; or

(4) spent materials that are generated, reclaimed, and subsequently reused on-site, so long as such spent materials have been counted once.

(e) If a generator generates acute hazardous waste in a calendar month in quantities greater than set forth in paragraphs (1) or (2) of this subsection, all quantities of that acute hazardous waste are subject to full regulation under Subchapters C - H and O of this chapter; Chapter 1 of this title; Chapter 3 of this title; Chapter 10 of this title; Chapter 20 of this title; Chapter 37 of this title; Chapter 39 of this title; Chapter 40 of this title; Chapter 50 of this title; Chapter 55 of this title; Chapter 70 of this title; Chapter 80 of this title; Chapter 86 of this title; Chapter 305 of this title; and the notification requirements of the Resource Conservation and Recovery Act, §3010:

(1) a total of one kilogram of acute hazardous waste listed in 40 CFR §§261.31, 261.32, or 261.33(e); or

(2) a total of 100 kilograms of any residue or contaminated soil, waste, or other debris resulting from the clean-up of a spill, into or on any land or water, of any acute hazardous wastes listed in 40 CFR §§261.31, 261.32, or 261.33(e).

(f) In order for acute hazardous wastes generated by a generator of acute hazardous wastes in quantities equal to or less than those set forth in subsection (e)(1) or (2) of this section to be excluded from full regulation under this section, the generator must comply with the following requirements:

(1) The generator must comply with the requirements in §335.62 of this title (relating to Hazardous Waste Determination and Waste Classification).

(2) The generator may accumulate acute hazardous waste on-site. If the generator accumulates at any time acute hazardous wastes in quantities greater than those set forth in subsection (e)(1) or (2) of this section, all of those accumulated wastes are subject to regulation under Subchapters C - H and O of this chapter; Chapter 1 of this title; Chapter 3 of this title; Chapter 10 of this title; Chapter 20 of this title; Chapter 37 of this title; Chapter 39 of this title; Chapter 40 of this title; Chapter 50 of this title; Chapter 55 of this title; Chapter 70 of this title; Chapter 80 of this title; Chapter 86 of this title; Chapter 305 of this title; and the notification requirements of the Resource Conservation and Recovery Act, §3010. The time period of §335.69(f) of this title (relating to Accumulation Time) for accumulation of wastes on-site begins when the accumulated wastes exceed the applicable exclusion limit.

(3) A conditionally exempt small quantity generator may either process or dispose of its acute hazardous waste in an on-site facility, or ensure delivery to an off-site storage, processing or disposal facility, either of which, if located in the United States, is:

(A) permitted by the United States Environmental Protection Agency (EPA) under 40 CFR Part 270;

(B) in interim status under 40 CFR Parts 270 and 265;

(C) authorized to manage hazardous waste by a state with a hazardous waste management program approved under 40 CFR Part 271;

(D) permitted, licensed, or registered by a state to manage municipal solid waste and, if managed in a municipal solid waste landfill, is subject to 40 CFR Part 258;

(E) permitted, licensed, or registered by a state to manage non-municipal non-hazardous waste and, if managed in a non-municipal non-hazardous waste disposal unit after January 1, 1998, is subject to the requirements in 40 CFR §§257.5 - 257.30;

(F) a facility which:

(i) beneficially uses or reuses, or legitimately recycles or reclaims its waste; or

(ii) processes its waste prior to beneficial use or reuse, or legitimate recycling or reclamation; or

(G) for universal waste managed under Subchapter H, Division 5 of this chapter, a universal waste handler or destination facility subject to the requirements of Subchapter H, Division 5 of this chapter.

(g) In order for hazardous waste generated by a conditionally exempt small quantity generator in quantities of less than 100 kilograms of hazardous waste during a calendar month to be excluded from full regulation under this section, the generator must comply with the following requirements:

(1) The conditionally exempt small quantity generator must comply with §335.62 of this title.

(2) The conditionally exempt small quantity generator may accumulate hazardous waste on-site. If such generator accumulates at any time more than a total of 1000 kilograms of its hazardous wastes, all of those accumulated wastes are subject to regulation under the special provisions of this subchapter applicable to generators of between 100 kilograms and 1000 kilograms of hazardous waste in a calendar month as well as the requirements of Subchapters D - H and O of this chapter; Chapter 1 of this title; Chapter 3 of this title; Chapter 10 of this title; Chapter 20 of this title; Chapter 37 of this title; Chapter 39 of this title; Chapter 40 of this title; Chapter 50 of this title; Chapter 55 of this title; Chapter 70 of this title; Chapter 80 of this title; Chapter 86 of this title; Chapter 305 of this title; and the notification requirements of the Resource Conservation and Recovery Act, §3010. The time period of §335.69(f) of this title for accumulation of wastes on-site begins for a conditionally exempt small quantity generator when the accumulated wastes exceed 1,000 kilograms;

(3) A conditionally exempt small quantity generator may either process or dispose of its hazardous waste in an on-site facility, or ensure delivery to an off-site storage, processing or disposal facility, either of which, if located in the United States, is:

(A) permitted by the EPA under 40 CFR Part 270;

(B) in interim status under 40 CFR Parts 270 and 265;

(C) authorized to manage hazardous waste by a state with a hazardous waste management program approved under 40 CFR Part 271;

(D) permitted, licensed, or registered by a state to manage municipal solid waste and, if managed in a municipal solid waste landfill, is subject to 40 CFR Part 258 or equivalent or more stringent rules under Chapter 330 of this title (relating to Municipal Solid Waste);

(E) permitted, licensed, or registered by a state to manage non-municipal or industrial non-hazardous waste and, if managed in a non-municipal or industrial non-hazardous waste disposal unit after January 1, 1998, is subject to the requirements in 40 CFR §§257.5 - 257.30 or equivalent or more stringent counterpart rules that may be adopted by the commission relating to additional requirements for industrial non-hazardous waste disposal units that may receive hazardous waste from conditionally exempt small quantity generators;

(F) a facility which:

(i) beneficially uses or reuses, or legitimately recycles or reclaims its waste; or

(ii) processes its waste prior to beneficial use or reuse, or legitimate recycling or reclamation; or

(G) for universal waste managed under Subchapter H, Division 5 of this chapter, a universal waste handler or destination facility subject to the requirements of Subchapter H, Division 5 of this chapter.

(h) Hazardous waste subject to the reduced requirements of this section may be mixed with non-hazardous waste and remain subject to these reduced requirements even though the resultant mixture exceeds the quantity limitations identified in this section, unless the mixture meets any of the characteristics of hazardous waste identified in 40 CFR Part 261, Subpart C.

(i) If any person mixes a solid waste with a hazardous waste that exceeds a quantity exclusion level of this section, the mixture is subject to full regulation under this chapter.

(j) If a conditionally exempt small quantity generator's wastes are mixed with used oil, the mixture is subject to Chapter 324 of this title (relating to Used Oil

Standards) and 40 CFR Part 279. Any material produced from such a mixture by processing, blending, or other treatment is also so regulated.

**§335.79. Alternative Requirements for Hazardous Waste Determination and Accumulation of Unwanted Material for Laboratories Owned by Eligible Academic Entities.**

This section incorporates by reference the federal Alternative Requirements for Hazardous Waste Determination and Accumulation of Unwanted Material for Laboratories Owned by Eligible Academic Entities in 40 Code of Federal Regulations Part 262, Subpart K, §§262.200 - 262.216 (known as the "Academic Laboratories rule"), as amended through December 20, 2010 (75 FR 79304).

**SUBCHAPTER E: INTERIM STANDARDS FOR OWNERS AND  
OPERATORS OF HAZARDOUS WASTE  
TREATMENT, STORAGE, OR DISPOSAL FACILITIES  
§335.111, §335.112**

**Statutory Authority**

The amendments are adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC), §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024 (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendments implement THSC, Chapter 361.

**§335.111. Purpose, Scope, and Applicability.**

(a) The purpose of this subchapter is to establish minimum requirements that define the acceptable management of hazardous waste prior to the issuance or denial of a hazardous waste permit and until certification of final closure or, if the facility is subject to post-closure requirements, until post-closure responsibilities are fulfilled. Except as provided in 40 Code of Federal Regulations (CFR) §265.1080(b), this subchapter and the standards of 40 CFR §§264.552, 264.553, and 264.554 apply to owners and operators of hazardous waste storage, processing, or disposal facilities who have fully complied with the requirements for interim status under the Resource Conservation and Recovery Act (RCRA), §3005(e), except as specifically provided for in §335.41 of this title (relating to Purpose, Scope and Applicability).

(b) United States Environmental Protection Agency (EPA) Hazardous Waste Numbers F020, F021, F022, F023, F026, or F027 must not be managed at facilities subject to regulation under this subchapter, unless:

(1) the wastewater treatment sludge is generated in a surface impoundment as part of the plant's wastewater treatment system;

(2) the waste is stored in tanks or containers;

(3) the waste is stored or processed in waste piles that meet the requirements of 40 CFR §264.250(c) as well as all other applicable requirements of 40 CFR Part 265, Subpart L, and §335.120 of this title (relating to Containment for Waste Piles);

(4) the waste is burned in incinerators that are certified pursuant to the standards and procedures in 40 CFR §265.352; or

(5) the waste is burned in facilities that thermally process the waste in a device other than an incinerator and that are certified pursuant to the standards and procedures in 40 CFR §265.383.

(c) The requirements of this section apply to owners or operators of all facilities which process, store or dispose of hazardous waste referred to in 40 CFR Part 268, and the 40 CFR Part 268 standards are considered material conditions or requirements of the Part 265 interim status standards incorporated by reference in §335.112 of this title (relating to Standards).

(d) Owners and operators who are subject to the requirements to obtain a post-closure permit under §335.2 and §335.43 of this title (relating to Permit Required), but

who obtain a post-closure order in lieu of a post-closure permit as provided in §335.2(m) of this title, must:

(1) submit information about the facility listed in §305.50(b) of this title (relating to Additional Requirements for an Application for a Hazardous or Industrial Solid Waste Permit and for a Post-Closure Order);

(2) comply with facility-wide corrective action requirements of §335.167 of this title (relating to Corrective Action for Solid Waste Management Units);

(3) comply with the groundwater monitoring requirements of §§335.156 - 335.166 of this title (relating to Applicability of Groundwater Monitoring and Response; Required Programs; Groundwater Protection Standard; Hazardous Constituents; Concentration Limits; Point of Compliance; Compliance Period; General Groundwater Monitoring Requirements; Detection Monitoring Program; Compliance Monitoring Program; and Corrective Action Program); and

(4) comply with the financial assurance requirements of Chapter 37, Subchapter P of this title (relating to Financial Assurance for Hazardous and Nonhazardous Industrial Solid Waste Facilities).

(e) The commission may replace all or part of the closure requirements of 40 CFR Part 265, Subpart G (relating to Closure and Post-Closure), as amended and adopted in §335.112(a)(6) of this title and the unit specific standards in §335.123 of this title (relating to Closure and Post-Closure (Land Treatment Facilities)) applying to a regulated unit with alternative requirements for closure set out in a permit or a post-closure order where the commission determines that:

(1) a regulated unit is situated among solid waste management units or area of concern, a release has occurred, and both the regulated unit and one or more solid waste management unit(s) or area of concern are likely to have contributed to the release; and

(2) it is not necessary to apply the closure requirement of this subchapter because the alternative requirements will be protective of human health and the environment and will satisfy the closure performance standards of §335.8 of this title (relating to Closure and Remediation) and §335.167 of this title.

**§335.112. Standards.**

(a) The following regulations contained in 40 Code of Federal Regulations (CFR) Part 265 (including all appendices to Part 265) (except as otherwise specified herein) are

adopted by reference as amended and adopted in the CFR through June 1, 1990 (55 FR 22685) and as further amended as indicated in each paragraph of this subsection:

(1) Subpart B - General Facility Standards (as amended through January 8, 2010 (75 FR 1236));

(2) Subpart C - Preparedness and Prevention;

(3) Subpart D - Contingency Plan and Emergency Procedures (as amended through March 18, 2010 (75 FR 12989)), except 40 CFR §265.56(d);

(4) Subpart E - Manifest System, Recordkeeping and Reporting (as amended through March 18, 2010 (75 FR 12989)), except 40 CFR §§265.71, 265.72, 265.75, 265.76, and 265.77;

(5) Subpart F - Groundwater Monitoring (as amended through April 4, 2006 (71 FR 16862)), except 40 CFR §265.90 and §265.94;

(6) Subpart G - Closure and Post-Closure (as amended through July 14, 2006 (71 FR 40254)); except 40 CFR §265.112(d)(3) and (4) and §265.118(e) and (f);

(7) Subpart H - Financial Requirements (as amended through September 16, 1992 (57 FR 42832)); except 40 CFR §§265.140, 265.141, 265.142(a)(2), 265.142(b) and (c), 265.143(a) - (g), 265.144(b) and (c), 265.145(a) - (g), 264.146, 265.147(a) - (d), 265.147(f) - (k), and 265.148 - 265.150;

(8) Subpart I - Use and Management of Containers (as amended through July 14, 2006 (71 FR 40254));

(9) Subpart J - Tank Systems (as amended through July 14, 2006 (71 FR 40254));

(10) Subpart K - Surface Impoundments (as amended through July 14, 2006 (71 FR 40254));

(11) Subpart L - Waste Piles (as amended through July 14, 2006 (71 FR 40254)), except 40 CFR §265.253;

(12) Subpart M - Land Treatment (as amended through July 14, 2006 (71 FR 40254)) except, 40 CFR §§265.272, 265.279, and 265.280;

(13) Subpart N - Landfills (as amended through March 18, 2010 (75 FR 12989)), except 40 CFR §§265.301(f) - (i), 265.314, and 265.315;

(14) Subpart O - Incinerators (as amended through October 12, 2005 (70 FR 59402));

(15) Subpart P - Thermal Treatment (as amended through July 17, 1991 (56 FR 32692));

(16) Subpart Q - Chemical, Physical, and Biological Treatment (as amended through July 14, 2006 (71 FR 40254));

(17) Subpart R - Underground Injection;

(18) Subpart W - Drip Pads (as amended through July 14, 2006 (71 FR 40254));

(19) Subpart AA - Air Emission Standards for Process Vents (as amended through July 14, 2006 (71 FR 40254));

(20) Subpart BB - Air Emission Standards for Equipment Leaks (as amended through April 4, 2006 (71 FR 16862));

(21) Subpart CC - Air Emission Standards for Tanks, Surface Impoundments, and Containers (as amended through July 14, 2006 (71 FR 40254));

(22) Subpart DD - Containment Buildings (as amended through July 14, 2006 (71 FR 40254));

(23) Subpart EE - Hazardous Waste Munitions and Explosives Storage (as amended through February 12, 1997 (62 FR 6622)); and

(24) the following appendices contained in 40 CFR Part 265:

(A) Appendix I - Recordkeeping Instructions (as amended through March 24, 1994 (59 FR 13891));

(B) Appendix III - EPA Interim Primary Drinking Water Standards;

(C) Appendix IV - Tests for Significance;

(D) Appendix V - Examples of Potentially Incompatible Waste; and

(E) Appendix VI - Compounds With Henry's Law Constant Less Than 0.1 Y/X.

(b) The regulations of the United States Environmental Protection Agency (EPA) that are adopted by reference in this section are adopted subject to the following changes.

(1) The term "regional administrator" is changed to the "executive director" of the Texas Commission on Environmental Quality or to the commission, consistent with the organization of the commission as set out in Texas Water Code, Chapter 5, Subchapter B.

(2) The term "treatment" is changed to "processing."

(3) Reference to Resource Conservation and Recovery Act, §3008(h) is changed to Texas Water Code, §7.031(c) - (e) (Corrective Action Relating to Hazardous Waste).

(4) Reference to:

(A) 40 CFR §260.10 is changed to §335.1 of this title (relating to Definitions);

(B) 40 CFR §264.90 is changed to §335.156 of this title (relating to Applicability of Groundwater Monitoring and Response);

(C) 40 CFR §264.101 is changed to §335.167 of this title (relating to Corrective Action for Solid Waste Management Units);

(D) 40 CFR §264.310 is changed to §335.174 of this title (relating to Closure and Post-Closure Care (Landfills));

(E) 40 CFR §265.1 is changed to §335.111 of this title (relating to Purpose, Scope, and Applicability);

(F) 40 CFR §265.90 is changed to §335.116 of this title (relating to Applicability of Groundwater Monitoring Requirements);

(G) 40 CFR §265.94 is changed to §335.117 of this title (relating to Recordkeeping and Reporting);

(H) 40 CFR §265.314 is changed to §335.125 of this title (relating to Special Requirements for Bulk and Containerized Waste);

(I) 40 CFR §270.1 is changed to §335.2 of this title (relating to Permit Required);

(J) 40 CFR §270.28 is changed to §305.50 of this title (relating to Additional Requirements for an Application for a Hazardous or Industrial Solid Waste Permit and for a Post-Closure Order);

(K) 40 CFR §270.41 is changed to §305.62 of this title (relating to Amendments);

(L) 40 CFR §270.42 is changed to §305.69 of this title (relating to Solid Waste Permit Modification at the Request of the Permittee); and

(M) Qualified professional engineer is changed to Texas licensed professional engineer.

(5) 40 CFR Parts 260 - 270 means the commission's rules including, but not limited to, Chapters 50, 305, and 335 of this title (relating to Action on Applications and Other Authorizations; Consolidated Permits; and Industrial Solid Waste and Municipal Hazardous Waste), as applicable.

(6) Reference to 40 CFR Part 265, Subpart D (Contingency Plan and Emergency Procedures) is changed to §335.112(a)(3) of this title (relating to Standards) and §335.113 of this title (relating to Reporting of Emergency Situations by Emergency Coordinator).

(7) Reference to 40 CFR §§265.71, 265.72, 265.76, and 265.77 is changed to §335.12 of this title (relating to Shipping Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities), §335.12(a) of this title, §335.15(3) of this title (relating to Recordkeeping and Reporting Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities), and §335.115 of this title (relating to Additional Reports), respectively.

(8) Reference to 40 CFR Part 264, Subpart F is changed to §335.156 of this title, §335.157 of this title (relating to Required Programs), §335.158 of this title (relating to Groundwater Protection Standard), §335.159 of this title (relating to Hazardous Constituents), §335.160 of this title (relating to Concentration Limits),

§335.161 of this title (relating to Point of Compliance), §335.162 of this title (relating to Compliance Period), §335.163 of this title (relating to General Groundwater Monitoring Requirements), §335.164 of this title (relating to Detection Monitoring Program), §335.165 of this title (relating to Compliance Monitoring Program), §335.166 of this title (relating to Corrective Action Program), and §335.167 of this title.

(9) Reference to 40 CFR Part 265, Subpart F is changed to include §335.116 and §335.117 of this title, in addition to the reference to 40 CFR Part 265, Subpart F, except §265.90 and §265.94.

(10) Reference to the EPA is changed to the Texas Commission on Environmental Quality.

(c) A copy of 40 CFR Part 265 is available for inspection at the library of the Texas Commission on Environmental Quality, located on the first floor of Building A at 12100 Park 35 Circle, Austin, Texas.

**SUBCHAPTER F: PERMITTING STANDARDS FOR  
OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT,  
STORAGE, OR DISPOSAL FACILITIES  
§§335.151, 335.152, 335.155, 335.168, 335.170**

**Statutory Authority**

The amendments are adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC), §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024 (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendments implement THSC, Chapter 361.

**§335.151. Purpose, Scope, and Applicability.**

(a) The purpose of this subchapter is to establish minimum standards to define the acceptable management of hazardous waste. These standards are to be applied in the evaluation of an application for a permit to manage hazardous waste, in accordance with Texas Solid Waste Disposal Act, and in the evaluation of an investigation report to implement groundwater protection requirements relating to compliance monitoring and corrective action; and in the evaluation of corrective action measures to be instituted in accordance with §335.167 of this title (relating to Corrective Action for Solid Waste Management Units). For facilities that store, process, or dispose of industrial solid waste, in addition to hazardous waste, nothing herein shall be construed to restrict or abridge the commission's authority to implement the provisions of Texas Water Code, Chapter 26, and §335.4 of this title (relating to General Prohibitions), with respect to those activities.

(b) The standards in this subchapter apply to owners and operators of all facilities which process, store, or dispose of hazardous waste, except as specifically provided for in §335.41 of this title (relating to Purpose, Scope, and Applicability).

(c) A facility owner or operator who has fully complied with the requirements for interim status, as defined in the Resource Conservation and Recovery Act (RCRA), §3005(e), and §335.2 and §335.43 of this title (relating to Permit Required), must comply with the requirements of Subchapter E of this chapter (relating to Interim

Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities) in lieu of the requirements of this subchapter, until final administrative disposition of his permit application is made, except as provided under 40 Code of Federal Regulations (CFR) Part 264, Subpart S.

(d) The regulations of this subchapter apply to all owners and operators subject to the requirements of §335.2(m) of this title when the commission issues either a post-closure permit or a post-closure order at the facility. When the commission issues a post-closure order, references in this subchapter to "in the permit" also mean "in the order."

(e) The commission may replace all or part of the requirements of 40 CFR Part 264 Subpart G (relating to Closure and Post-Closure), as amended and adopted in §335.152(a)(5) of this title (relating to Standards) and the unit specific standards in §§335.169, 335.172, and 335.174 of this title (relating to Closure and Post-Closure Care (Surface Impoundments); Closure and Post-Closure Care (Land Treatment Units), and Closure and Post-Closure Care (Landfills)) applying to regulated units, with alternative requirements as set out in a permit or order where the commission determines that:

(1) a regulated unit is situated among solid waste management units or area of concern, a release has occurred, and both the regulated unit and one or more

solid waste management unit(s) or area of concern are likely to have contributed to the release; and

(2) it is not necessary to apply the closure requirements of this subchapter (and those referenced herein) because the alternative requirements will be protective of human health and the environment and will satisfy the performance standards of §335.8 of this title (relating to Closure and Remediation) and §335.167 of this title.

(f) If a permitted facility obtains an order setting out alternative requirements provided in subsection (e) of this section, then the alternative requirements shall also be referenced in the facility's permit.

**§335.152. Standards.**

(a) The following regulations contained in 40 Code of Federal Regulations (CFR) Part 264 (including all appendices to Part 264) are adopted by reference as amended and adopted in the CFR through June 1, 1990 (55 FR 22685) and as further amended and adopted as indicated in each paragraph of this subsection:

(1) Subpart B--General Facility Standards (as amended through January 8, 2010 (75 FR 1236)); in addition, the facilities which are subject to 40 CFR Part 264, Subpart X, are subject to regulation under 40 CFR §264.15(b)(4) and §264.18(b)(1)(ii);

(2) Subpart C--Preparedness and Prevention;

(3) Subpart D--Contingency Plan and Emergency Procedures (as amended through March 18, 2010 (75 FR 12989)), except 40 CFR §264.56(d);

(4) Subpart E--Manifest System, Recordkeeping and Reporting (as amended through March 18, 2010 (75 FR 12989)), except 40 CFR §§264.71, 264.72, 264.76, and 264.77; facilities which are subject to 40 CFR Part 264, Subpart X, are subject to 40 CFR §264.73(b)(6);

(5) Subpart G--Closure and Post-Closure (as amended through July 14, 2006 (71 FR 40254)); facilities which are subject to 40 CFR Part 264, Subpart X, are subject to 40 CFR §§264.90(d), 264.111(c), 264.112(a)(2), 264.114, 264.117(a)(1)(i) and (ii), and 264.118(b)(1) and (2)(i) and (ii);

(6) Subpart H--Financial Requirements (as amended through April 4, 2006 (71 FR 16862)); except 40 CFR §§264.140, 264.141, 264.142(a)(2), 264.142(b) and

(c), 264.143(a) - (h), 264.144(b) and (c), 264.145(a) - (h), 264.146, 264.147(a) - (d), 264.147(f) - (k), and 264.148 - 264.151; and subject to the following limitations: facilities which are subject to 40 CFR Part 264, Subpart X, are subject to 40 CFR §§264.142(a), 264.144(a), and §37.6031(c) of this title (relating to Financial Assurance Requirements for Liability);

(7) Subpart I--Use and Management of Containers (as amended through July 14, 2006 (71 FR 40254));

(8) Subpart J--Tank Systems (as amended through July 14, 2006 (71 FR 40254));

(9) Subpart K--Surface Impoundments (as amended through July 14, 2006 (71 FR 40254)), except 40 CFR §264.221 and §264.228:

(A) reference to 40 CFR §264.221 is changed to §335.168 of this title (relating to Design and Operating Requirements (Surface Impoundments));

(B) reference to 40 CFR §264.228 is changed to §335.169 of this title (relating to Closure and Post-Closure Care (Surface Impoundments));

(10) Subpart L--Waste Piles (as amended and adopted through July 14, 2006 (71 FR 40254)), except 40 CFR §264.251;

(11) Subpart M--Land Treatment (as amended and adopted through July 14, 2006 (71 FR 40254)), except 40 CFR §264.273 and §264.280;

(12) Subpart N--Landfills (as amended through March 18, 2010 (75 FR 12989)), except 40 CFR §§264.301, 264.310, 264.314, and 264.315;

(13) Subpart O--Incinerators (as amended through April 8, 2008 (73 FR 18970));

(14) Subpart S--Special Provisions for Cleanup (as amended through March 18, 2010 (75 FR 12989));

(15) Subpart W--Drip Pads (as amended through July 14, 2006 (71 FR 40254));

(16) Subpart X--Miscellaneous Units (as amended through July 14, 2006 (71 FR 40254));

(17) Subpart AA--Air Emission Standards for Process Vents (as amended through July 14, 2006 (71 FR 40254));

(18) Subpart BB--Air Emission Standards for Equipment Leaks (as amended through July 14, 2006 (71 FR 40254));

(19) Subpart CC--Air Emission Standards for Tanks, Surface Impoundments, and Containers (as amended through July 14, 2006 (71 FR 40254));

(20) Subpart DD--Containment Buildings (as amended through July 14, 2006 (71 FR 40254));

(21) Subpart EE--Hazardous Waste Munitions and Explosives Storage (as amended through August 1, 2005 (70 FR 44150)); and

(22) the following appendices contained in 40 CFR Part 264:

(A) Appendix I--Recordkeeping Instructions (as amended through March 24, 1994 (59 FR 13891));

(B) Appendix IV--Cochron's Approximation to the Behrens-Fisher Students' T-Test;

(C) Appendix V--Examples of Potentially Incompatible Waste;

(D) Appendix VI--Political Jurisdictions in Which Compliance With §264.18(a) Must Be Demonstrated; and

(E) Appendix IX--Ground-Water Monitoring List (as amended through June 13, 1997 (62 FR 32451)).

(b) The provisions of 40 CFR §264.18(b) are applicable to owners and operators of hazardous waste management facilities, for which a permit is being sought, which are not subject to the requirements of §§335.201 - 335.206 of this title (relating to Purpose, Scope, and Applicability; Definitions; Site Selection to Protect Groundwater or Surface Water; Unsuitable Site Characteristics; Prohibition of Permit Issuance; and Petitions for Rulemaking). A copy of 40 CFR §264.18(b) is available for inspection at the library of the Texas Commission on Environmental Quality, located on the first floor of Building A at 12100 Park 35 Circle, Austin, Texas.

(c) The regulations of the United States Environmental Protection Agency (EPA) that are adopted by reference in this section are adopted subject to the following changes.

(1) The term "regional administrator" is changed to the "executive director" of the Texas Commission on Environmental Quality or to the commission, consistent with the organization of the commission as set out in Texas Water Code, Chapter 5, Subchapter B.

(2) The term "treatment" is changed to "processing."

(3) Reference to Resource Conservation and Recovery Act, §3008(h) is changed to Texas Water Code, §7.031(c) - (e) (relating to Corrective Action Relating to Hazardous Waste).

(4) Reference to:

(A) 40 CFR §260.10 is changed to §335.1 of this title (relating to Definitions);

(B) 40 CFR §264.1 is changed to §335.151 of this title (relating to Purpose, Scope, and Applicability);

(C) 40 CFR §264.280 is changed to §335.172 of this title (relating to Closure and Post-Closure Care (Land Treatment Units));

(D) 40 CFR §264.90 is changed to §335.156 of this title (relating to Applicability of Groundwater Monitoring and Response);

(E) 40 CFR §264.101 is changed to §335.167 of this title (relating to Corrective Action for Solid Waste Management Units);

(F) 40 CFR §264.310 is changed to §335.174 of this title (relating to Closure and Post-Closure Care (Landfills));

(G) 40 CFR §270.41 is changed to §305.62 of this title (relating to Amendments); and

(H) 40 CFR §270.42 is changed to §305.69 of this title (relating to Solid Waste Permit Modification at the Request of the Permittee).

(5) 40 CFR Parts 260 - 270 means the commission's rules including, but not limited to, Chapters 50, 305, and 335 of this title (relating to Action on Applications and Other Authorizations; Consolidated Permits; and Industrial Solid Waste and Municipal Hazardous Waste), as applicable.

(6) Reference to 40 CFR Part 264, Subpart D is changed to §335.152(a)(3) of this title (relating to Standards) and §335.153 of this title (relating to Reporting of Emergency Situations by Emergency Coordinator).

(7) Reference to 40 CFR §§264.71, 264.72, 264.76, and 264.77 is changed to §335.12 of this title (relating to Shipping Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities), §335.12(a) of this title, §335.15(3) of this title (relating to Recordkeeping and Reporting Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities), and §335.155 of this title (relating to Additional Reports), respectively.

(8) Reference to 40 CFR Part 264, Subpart F is changed to §335.156 of this title, §335.157 of this title (relating to Required Programs), §335.158 of this title (relating to Groundwater Protection Standard), §335.159 of this title (relating to Hazardous Constituents), §335.160 of this title (relating to Concentration Limits), §335.161 of this title (relating to Point of Compliance), §335.162 of this title (relating to

Compliance Period), §335.163 of this title (relating to General Groundwater Monitoring Requirements), §335.164 of this title (relating to Detection Monitoring Program), §335.165 of this title (relating to Compliance Monitoring Program), §335.166 of this title (relating to Corrective Action Program), and §335.167 of this title.

(9) Reference to 40 CFR Part 265, Subpart F is changed to include §335.116 of this title (relating to Applicability of Groundwater Monitoring Requirements) and §335.117 of this title (relating to Recordkeeping and Reporting), in addition to the reference to 40 CFR Part 265, Subpart F, except §265.90 and §265.94.

(10) Reference to the EPA is changed to the Texas Commission on Environmental Quality.

(11) Reference to qualified professional engineer is changed to Texas licensed professional engineer.

(d) A copy of 40 CFR Part 264 is available for inspection at the library of the Texas Commission on Environmental Quality, located on the first floor of Building A at 12100 Park 35 Circle, Austin, Texas.

**§335.155. Additional Reports.**

In addition to submitting the waste reports described in §335.15 of this title (relating to Recordkeeping and Reporting Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities), the owner or operator must also report to the executive director:

(1) releases, fires, and explosions as specified in 40 Code of Federal Regulations (CFR) §264.56(j);

(2) facility closure as specified in 40 CFR §264.115;

(3) as otherwise required by 40 CFR Part 264, Subparts F, K - N, X, AA, BB, and CC.

**§335.168. Design and Operating Requirements (Surface Impoundments).**

(a) Any surface impoundment that is not covered by subsection (c) of this section or 40 Code of Federal Regulations (CFR) §265.221 must have a liner for all portions of the impoundment (except for existing portions of such impoundments). The liner must be designed, constructed, and installed to prevent any migration of wastes out of the impoundment to the adjacent subsurface soil or groundwater or surface water at any

time during the active life (including the closure period) of the impoundment. The liner may be constructed of materials that may allow wastes to migrate into the liner (but not into the adjacent subsurface soil or groundwater or surface water) during the active life of the facility, provided that the impoundment is closed in accordance with §335.169(a)(1) of this title (relating to Closure and Post-Closure Care (Surface Impoundments)). For impoundments that will be closed in accordance with §335.169(a)(2) of this title, the liner must be constructed of materials that can prevent wastes from migrating into the liner during the active life of the facility. The liner must be:

(1) constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrogeologic forces), physical contact with the waste or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(2) placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(3) installed to cover all surrounding earth likely to be in contact with the waste or leachate.

(b) The owner or operator will be exempted from the requirements of subsections (a) and (j) of this section if the commission finds, based on a demonstration by the owner or operator, that alternate design and operating practices, together with location characteristics, will prevent the migration of any hazardous constituents (see §335.159 of this title (relating to Hazardous Constituents)) into the groundwater or surface water at any future time. In deciding whether to grant an exemption, the commission will consider:

(1) the nature and quantity of the wastes;

(2) the adopted alternate design and operation;

(3) the hydrogeologic setting of the facility, including the attenuative capacity and thickness of the liners and soils present between the impoundment and groundwater or surface water; and

(4) all other factors which would influence the quality and mobility of the leachate produced and the potential for it to migrate to groundwater or surface water.

(c) The owner or operator of each new surface impoundment unit on which construction commences after January 29, 1992, each lateral expansion of a surface impoundment unit on which construction commences after July 29, 1992, and each replacement of an existing surface impoundment unit that is to commence reuse after July 29, 1992, must meet the requirements of 40 CFR §264.221(c), as amended through July 14, 2006 (71 FR 40254).

(d) The executive director may approve alternative design or operating practices to those specified in subsection (c) of this section if the owner or operator demonstrates to the executive director that he meets the requirements of 40 CFR §264.221(d), as amended through January 29, 1992 (57 FR 3462).

(e) The double liner requirement set forth in subsection (c) of this section may be waived by the commission for any monofill which contains only hazardous wastes from foundry furnace emission controls or metal casting molding sand, and such wastes do not contain constituents which would render the wastes hazardous for reasons other than the toxicity characteristics in 40 CFR §261.24, and is in compliance with either of the following requirements:

(1) the monofill:

(A) has at least one liner for which there is no evidence that such liner is leaking. For the purposes of this subsection, the term "liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, groundwater, or surface water at any time during the active life of the facility. In the case of any surface impoundment which has been exempted from the requirements of subsection (c) of this section on the basis of a liner designed, constructed, installed, and operated to prevent hazardous waste from passing beyond the liner, at the closure of such impoundment, the owner or operator must remove or decontaminate all waste residues, all contaminated liner material, and contaminated soil to the extent practicable. If all contaminated soil is not removed or decontaminated, the owner or operator of such impoundment will comply with appropriate post-closure requirements, including, but not limited to, groundwater monitoring and corrective action;

(B) is located more than 1/4 mile from an underground source of drinking water (as that term is defined in §331.2 of this title (relating to Definitions));  
and

(C) is in compliance with groundwater monitoring requirements of this subchapter; or

(2) the owner or operator demonstrates that the monofill is located, designed, and operated so as to assure that there will be no migration of any hazardous constituent into groundwater or surface water at any future time.

(f) The owner or operator of any replacement surface impoundment unit is exempt from subsection (c) of this section if:

(1) The existing unit was constructed in compliance with the design standards of Resource Conservation and Recovery Act, §3004(o)(1)(A)(i) and (o)(5); and

(2) There is no reason to believe that the liner is not functioning as designed.

(g) A surface impoundment must be designed, constructed, maintained, and operated to prevent overtopping resulting from normal or abnormal operations, overfilling, wind, and wave action; rainfall; run-off, malfunctions of level controllers, alarms, and other equipment; and human error.

(h) A surface impoundment must have dikes that are designed, constructed, and maintained with sufficient structural integrity to prevent massive failure of the dikes. In ensuring structural integrity, it must not be presumed that the liner system will function without leakage during the active life of the unit.

(i) The commission will specify in the permit all design and operating practices that are necessary to ensure that the requirements of this section are satisfied.

(j) A surface impoundment (except for an existing portion of a surface impoundment) that will be closed in accordance with §335.169(a)(2) of this title must have an additional liner to that required in subsection (a) of this section which:

(1) prevents any migration of wastes out of the impoundment to the adjacent subsurface soil or groundwater or surface water at any time prior to the end of the post-closure care period; and

(2) minimizes the rate of migration of wastes out of the impoundment to the adjacent subsurface soil or groundwater or surface water so as not to pose a substantial present or potential hazard to human health and the environment.

**§335.170. Design and Operating Requirements (Waste Piles).**

(a) A waste pile (except for an existing portion of a waste pile) must have:

(1) a liner that is designed, constructed, and installed to prevent any migration of wastes out of the pile into the adjacent subsurface soil or groundwater or surface water at any time during the active life (including the closure period) of the waste pile. The liner may be constructed of materials that may allow waste to migrate into the liner itself (but not into the adjacent subsurface soil or groundwater or surface water) during the active life of the facility. The liner must be:

(A) constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrogeologic forces), physical contact with the waste or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(B) placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(C) installed to cover all surrounding earth likely to be in contact with the waste or leachate; and

(2) a leachate collection and removal system immediately above the liner that is designed, constructed, maintained, and operated to collect and remove leachate from the pile. The commission will specify design and operating conditions in the permit to ensure that the leachate depth over the liner does not exceed 30 centimeters (one foot). The leachate collection and removal system must be:

(A) constructed of materials that are:

(i) chemically resistant to the waste managed in the pile and the leachate expected to be generated; and

(ii) of sufficient strength and thickness to prevent collapse under the pressures exerted by overlying wastes, waste cover materials, and by any equipment used at the pile; and

(B) designed and operated to function without clogging through the scheduled closure of the waste pile.

(b) The owner or operator will be exempted from the requirements of subsection (a) of this section if the commission finds, based on a demonstration by the owner or operator, the alternate design and operating practices, together with location characteristics, will prevent the migration of any hazardous constituents into the groundwater or surface water at any future time. In deciding whether to grant an exemption, the commission will consider:

(1) the nature and quantity of the wastes;

(2) the proposed alternate design and operation;

(3) the hydrogeologic setting of the facility, including attenuative capacity and thickness of the liners and soils present between the pile and groundwater or surface water; and

(4) all other factors which would influence the quality and mobility of the leachate produced and the potential for it to migrate to groundwater or surface water.

(c) The owner and operator of each new waste pile unit, each lateral expansion of a waste pile unit, and each replacement of an existing waste pile unit, must comply with

the requirements of 40 CFR §264.251(c), as amended through April 4, 2006 (71 FR 16862).

(d) The executive director may approve alternative design or operating practices to those specified in subsection (c) of this section if the owner or operator demonstrates to the executive director that such design and operating practices, together with location characteristics:

(1) will prevent the migration of any hazardous constituent into the groundwater or surface water at least as effectively as the liners and leachate collection and removal systems specified in subsection (c) of this section; and

(2) will allow detection of leaks of hazardous constituents through the top liner at least as effectively.

(e) Subsection (c) of this section does not apply to monofills that are granted a waiver by the Commission in accordance with §335.168(e) of this title (relating to Design and Operating Requirements (Surface Impoundments)).

(f) The owner or operator of any replacement waste pile unit is exempt from subsection (c) of this section if:

(1) The existing unit was constructed in compliance with the design standards of §3004(o)(1)(A)(i) and (o)(5) of the Resource Conservation and Recovery Act; and

(2) There is no reason to believe that the liner is not functioning as designed.

(g) The owner or operator must design, construct, operate, and maintain a run-on control system capable of preventing flow onto the active portion of the pile during peak discharge from at least a 100-year storm.

(h) The owner or operator must design, construct, operate, and maintain a run-off management system to collect and control at least the water volume from active portions resulting from a 24-hour, 100-year storm.

(i) Collection and holding facilities (e.g., tanks or basins) associated with run-on and run-off control systems must be emptied or otherwise managed expeditiously after storms to maintain design capacity of the system.

(j) If the pile contains any particulate matter which may be subject to wind dispersal, the owner or operator must cover or otherwise manage the pile to control wind dispersal.

(k) The commission will specify in the permit all design and operating practices that are necessary to ensure that the requirements of this section are satisfied.

**SUBCHAPTER H: STANDARDS FOR THE MANAGEMENT OF SPECIFIC  
WASTES AND SPECIFIC TYPES OF FACILITIES**

**DIVISION 1: RECYCLABLE MATERIALS USED IN A MANNER  
CONSTITUTING DISPOSAL**

**§335.213**

**Statutory Authority**

The amendment is adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC), §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024 (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendment implements THSC, Chapter 361.

**§335.213. Standards Applicable to Storers of Materials That Are To Be Used  
in a Manner That Constitutes Disposal Who Are Not the Ultimate Users.**

Owners or operators of facilities that store recyclable materials that are to be used in a manner that constitutes disposal, but who are not the ultimate users of the materials, are regulated under all applicable provisions of Subchapter A of this chapter (relating to Industrial Solid Waste and Municipal Hazardous Waste in General), Subchapter B of this chapter (relating to Hazardous Waste Management-General Provisions), Subchapter E of this chapter (relating to Interim Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities), Subchapter F of this chapter (relating to Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities), Subchapter U of this chapter (relating to Standards for Owners and Operators of Hazardous Waste Facilities Operating under a Standard Permit); Chapter 1 of this title (relating to Purpose of Rules, General Provisions); Chapter 3 of this title (relating to Definitions); Chapter 10 of this title (relating to Commission Meetings); Chapter 20 of this title (relating to Rulemaking); Chapter 37 of this title (relating to Financial Assurance); Chapter 39 of this title (relating to Public Notice); Chapter 40 of this title (relating to Alternative Dispute Resolution Procedure); Chapter 50 of this title (relating to Action on Applications and Other Authorizations); Chapter 55 of this title (relating to Requests for Reconsideration and Contested Case Hearings; Public Comment); Chapter 70 of this title (relating to Enforcement); Chapter 80 of this title (relating to Contested Case Hearings); Chapter 86 of this title (relating to Special Provisions for Contested Case Hearings);; Chapter 305 of this title (relating to Consolidated Permits), and the

notification requirement under §335.6 of this title (relating to Notification Requirements).

**SUBCHAPTER H: STANDARDS FOR THE MANAGEMENT OF SPECIFIC  
WASTES AND SPECIFIC TYPES OF FACILITIES  
DIVISION 2: HAZARDOUS WASTE BURNED FOR ENERGY RECOVERY  
§335.222**

**Statutory Authority**

The amendment is adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC), §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024 (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendment implements THSC, Chapter 361.

**§335.222. Management Prior to Burning.**

(a) Generators. Generators of hazardous waste that is burned in a boiler or industrial furnace are subject to the requirements of Subchapter C of this chapter (relating to Standards Applicable to Generators of Hazardous Waste).

(b) Transporters. Transporters of hazardous waste that is burned in a boiler or industrial furnace are subject to the requirements of Subchapter D of this chapter (relating to Standards Applicable to Transporters of Hazardous Waste).

(c) Storage and processing facilities. The provisions listed under paragraph (1) of this subsection apply to storage or processing by burners and by intermediaries such as processors, blenders, and distributors between the generator and the burner.

(1) Owners and operators of facilities that store or process hazardous waste that is burned in a boiler or industrial furnace are subject to the applicable provisions of the following, except as provided by paragraph (2) of this subsection:

(A) Subchapter A of this chapter (relating to Industrial Solid Waste and Municipal Hazardous Waste in General);

(B) Subchapter B of this chapter (relating to Hazardous Waste Management General Provisions);

(C) Subchapter E of this chapter (relating to Interim Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities), except §335.112(a)(12) - (19) of this title (relating to Standards);

(D) Subchapter F of this chapter (relating to Permitting Standards for Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities), except §335.152(11) - (16) of this title (relating to Standards);

(E) Subchapter U of this chapter (relating to Standards for Owners and Operators of Hazardous Waste Facilities Operating under a Standard Permit); and

(F) Chapter 305 of this title (relating to Consolidated Permits).

(2) Owners and operators of facilities that burn, in an on-site boiler or industrial furnace exempt from regulations under the small quantity burner provisions of 40 Code of Federal Regulations §266.108, only hazardous waste that they generate are exempt from regulation under the provisions listed above in paragraph (1) of this subsection applicable to storage units for those units that store mixtures of hazardous waste and the primary fuel to the boiler or industrial furnace in tanks that feed the fuel mixture directly to the burner. Storage or processing of hazardous waste by such owners

and operators prior to mixing with the primary fuel is subject to regulation as prescribed in paragraph (1) of this subsection.

**SUBCHAPTER H: STANDARDS FOR THE MANAGEMENT OF SPECIFIC  
WASTES AND SPECIFIC TYPES OF FACILITIES  
DIVISION 4: SPENT LEAD-ACID BATTERIES BEING RECLAIMED  
§335.251**

**Statutory Authority**

The amendment is adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC), §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024 (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendment implements THSC, Chapter 361.

**§335.251. Applicability and Requirements.**

(a) The regulations of this section adopt by reference 40 Code of Federal Regulations (CFR) Part 266, Subpart G as amended through January 8, 2010 (75 FR

1236). This section applies to persons who reclaim (including regeneration) spent lead-acid batteries that are recyclable materials (spent batteries). Persons who generate, transport, or collect spent batteries, who regenerate spent batteries, who store spent batteries that are to be regenerated, who store spent batteries but do not reclaim them (other than spent batteries that are to be regenerated), who transport spent batteries in the United States to export them for reclamation in a foreign country or who export spent batteries for reclamation in a foreign country are not subject to regulation under this chapter, except that §335.24(h) of this title (relating to Requirements for Recyclable Materials and Nonhazardous Recyclable Materials) applies; and are not subject to regulation under Chapter 1 of this title (relating to Purpose of Rules, General Provisions); Chapter 3 of this title (relating to Definitions); Chapter 10 of this title (relating to Commission Meetings); Chapter 20 of this title (relating to Rulemaking); Chapter 37 of this title (relating to Financial Assurance); Chapter 39 of this title (relating to Public Notice); Chapter 40 of this title (relating to Alternative Dispute Resolution Procedure); Chapter 50 of this title (relating to Action on Applications and Other Authorizations); Chapter 55 of this title (relating to Requests for Contested Case Hearings; Public Comment); Chapter 70 of this title (relating to Enforcement); Chapter 80 of this title (relating to Contested Case Hearings); Chapter 86 of this title (relating to Special Provisions for Contested Case Hearings); or Chapter 305 of this title (relating to Consolidated Permits). Such persons, however, remain subject to the requirements of the Texas Water Code, Chapter 26.

(b) Owners or operators of facilities that store spent lead-acid batteries before reclaiming them (other than spent batteries that are to be regenerated) are subject to the following requirements:

(1) all applicable provisions in Subchapter A of this chapter (relating to Industrial Solid Waste and Municipal Hazardous Waste in General), Subchapter B of this chapter (relating to Hazardous Waste Management-General Provisions), Subchapter E of this chapter (relating to Interim Standards of Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities), Subchapter F of this chapter (relating to Permitting Standards of Owners and Operators of Hazardous Waste Treatment, Storage, or Disposal Facilities), and Subchapter U of this chapter (relating to Standards for Owners and Operators of Hazardous Waste Facilities Operating under a Standard Permit), except for the requirements in §335.12 of this title (relating to Shipping Requirements Applicable to Owners or Operators of Treatment, Storage, or Disposal Facilities) and 40 CFR §265.13; and

(2) all applicable provisions in Chapter 1 of this title; Chapter 3 of this title; Chapter 10 of this title; Chapter 20 of this title; Chapter 37 of this title; Chapter 39 of this title; Chapter 40 of this title; Chapter 50 of this title; Chapter 55 of this title;

Chapter 70 of this title; Chapter 80 of this title; Chapter 86 of this title; and Chapter 305 of this title.

(c) In addition to the regulations in this section, persons who transport spent batteries in the United States to export them for reclamation in a foreign country or who export spent batteries for reclamation in a foreign country are subject to the requirements of §335.13 and §335.76(h) of this title (relating to Recordkeeping and Reporting Procedures Applicable to Generators Shipping Hazardous Waste or Class 1 Waste and Primary Exporters of Hazardous Waste; and Additional Requirements Applicable to International Shipments, respectively).

## **SUBCHAPTER O: LAND DISPOSAL RESTRICTIONS**

### **§335.431**

#### **Statutory Authority**

The amendment is adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC) §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024 (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendment implements THSC, Chapter 361.

#### **§335.431. Purpose, Scope, and Applicability.**

(a) Purpose. The purpose of this subchapter is to identify hazardous wastes that are restricted from land disposal and define those limited circumstances under which an otherwise prohibited waste may continue to be land disposed.

(b) Scope and Applicability.

(1) Except as provided in paragraph (2) of this subsection, the requirements of this subchapter apply to persons who generate or transport hazardous waste and owners and operators of hazardous waste treatment, storage, and disposal facilities.

(2) The requirements of this subchapter do not apply to any entity that is either specifically excluded from coverage by this subchapter or would be excluded from the coverage of 40 Code of Federal Regulations (CFR) Part 268 by 40 CFR Part 261, if those parts applied.

(3) Universal waste handlers and universal waste transporters, as defined in and subject to regulation under Subchapter H, Division 5 of this chapter (relating to Universal Waste Rule) are exempt from 40 CFR §268.7 and §268.50.

(c) Adoption by Reference.

(1) except as provided in paragraph (2) of this subsection, and subject to the changes indicated in subsection (d) of this section, the regulations contained in 40

CFR Part 268, as amended through March 18, 2010 (75 FR 12989) are adopted by reference.

(2) The following sections of 40 CFR Part 268 are excluded from the sections adopted in paragraph (1) of this subsection: §§268.1(f), 268.5, 268.6, 268.7(a)(10), 268.13, 268.42(b), and 268.44.

(3) Appendices IV, VI - IX, and XI of 40 CFR Part 268 are adopted by reference as amended through July 14, 2006 (71 FR 40254).

(d) Changes to Adopted Parts. The parts of the CFR that are adopted by reference in subsection (c) of this section are changed as follows:

(1) The words "Administrator" or "Regional Administrator" are changed to "Executive Director;"

(2) The word "treatment" is changed to "processing;"

(3) The words "Federal Register," when they appear in the text of the regulation, are changed to "Texas Register;"

(4) In 40 CFR §268.7(a)(6) and (a)(7), the applicable definition of hazardous waste and solid waste is the one that is set out in this chapter rather than the definition of hazardous waste and solid waste that is set out in 40 CFR Part 261.

(5) In 40 CFR §268.50(a)(1), the citation to "§262.34" is changed to "§335.69."

## **SUBCHAPTER R: WASTE CLASSIFICATION**

### **§335.504**

#### **Statutory Authority**

The amendment is adopted under Texas Water Code (TWC), §5.103 (relating to Rules) and TWC, §5.105 (relating to General Policy) which provide the commission with the authority to adopt any rules necessary to carry out its powers and duties under the provisions of the TWC or other laws of this state; and under Texas Health and Safety Code (THSC), §361.017 (relating to Commission's Jurisdiction: Industrial Solid Waste and Hazardous Municipal Waste); THSC, §361.024 (relating to Rules and Standards); and THSC, §361.036 (relating to Records and Manifests Required: Class I Industrial Solid Waste or Hazardous Waste) which authorize the commission to regulate industrial solid waste and hazardous waste and to adopt rules consistent with the general intent and purposes of the THSC.

The adopted amendment implements THSC, Chapter 361.

#### **§335.504. Hazardous Waste Determination.**

A person who generates a solid waste must determine if that waste is hazardous using the following method:

(1) Determine if the material is excluded or exempted from being a solid waste or hazardous waste per §335.1 of this title (relating to Definitions) or identified in 40 Code of Federal Regulations (CFR) Part 261, Subpart A, as amended through March 18, 2010 (75 FR 12989), or identified in 40 CFR Part 261, Subpart E, as amended through July 28, 2006 (71 FR 42928).

(2) If the material is a solid waste, determine if the waste is listed as, or mixed with, or derived from a listed hazardous waste identified in 40 CFR Part 261, Subpart D, as amended through March 18, 2010 (75 FR 12989).

(3) If the material is a solid waste, determine whether the waste exhibits any characteristics of a hazardous waste as identified in 40 CFR Part 261, Subpart C, as amended through March 18, 2010 (75 FR 12989).
