Dear Mr. Linke:

The effective federal operating permit (FOP) for LANXESS Corporation, LiBR Flex Unit is enclosed. On February 5, 2010, the Texas Commission on Environmental Quality (TCEQ) received an objection on this permit project from the Environmental Protection Agency (EPA). The TCEQ responded on December 6, 2010. The EPA authorized the issuance of this project on August 17, 2011. This FOP constitutes authority to operate the emission units identified in the FOP application.

It should be noted that from the date of this letter LANXESS Corporation, LiBR Flex Unit must operate in accordance with the requirements of Title 30 Texas Administrative Code Chapter 122 (30 TAC Chapter 122) and the FOP. Some of the terms and conditions contained in the FOP include recordkeeping conditions, reporting conditions (which includes deviation reporting), and compliance certification conditions. All reports, along with any questions regarding the reports, shall be forwarded to the Texas Commission on Environmental Quality, Beaumont Regional Office, 3870 Eastex Fwy, Beaumont, Texas 77703-1830.

Consistent with 30 TAC Chapter 122, Subchapter C, the permit holder shall submit an application to the Air Permits Division (APD) for a revision to an FOP for those activities at a site which change, add, or remove one or more FOP terms or conditions. The permit holder shall also submit an application to the APD for a revision to a permit to address the following: the adoption of an applicable requirement previously designated as federally enforceable only; the promulgation of a new applicable requirement; the adoption of a new state-only requirement; or a change in a state-only designation.

Thank you again for your cooperation in this matter. If you have questions concerning the review or this notice, please contact Mr. Chuck Lowary, P.E. at (512) 239-1263.

Mr. Markus Linke
