Concrete Batch Plants with Enhanced Controls  
Registration Checklist for Air Quality Standard Permits**

**This checklist is not required if using the PI-1S-CBP workbook to submit your application. We strongly encourage you to start using this new Excel version to improve your permitting timeline. It will be required starting on September 1, 2020. At that time, the PDF version of the PI-1S and this checklist will no longer be accepted for concrete batch plant with enhanced controls standard permit registrations.**

The following checklist has been developed so the Texas Commission on Environmental Quality (TCEQ), Air Permits Division (APD) can confirm the concrete batch plant meets the standard permit requirements. Please read all questions and check "YES," "NO," or "N/A" or give specific information for the facility. If the concrete batch plant does not meet all conditions of this standard permit, it will not be allowed to operate under this standard permit and must apply for other authorization.
