

Texas Commission on Environmental Quality
Table 9
Particle Size Distribution^{1,2}

Contaminant and Emission Point Number ^{3,4}	0.0-0.5 (Microns)	0.5-1.0 (Microns)	1.0-5.0 (Microns)	5-10 (Microns)	10-20 (Microns)	20 (Microns)	Average Size (Microns)	Average Density (g/cc)
(Example) Silica Dust - Point	10%	20%	15%	20%	20%	15%	8.1	2.6

¹ Distribution entering control device.

² Enter particle size distribution in percent by weight of total contaminant.

³ Identify contaminant by name and emission point number from flow diagram.

⁴ Total for each contaminant listed should equal at least 100%
