Introduction

The primary purpose of the Form PI-7 is to provide all administrative and technical information needed by the Air Permit Division (APD) to evaluate Permit by Rule (PBR) claims. These instructions are intended for use by applicants and consultants to help you prepare a complete PBR request. The review of your project will go faster if you provide all necessary documents and information requested in the Form PI-7 and in the Core Data Form (TCEQ No. 10400).

This form should only be used if certification and federally enforceable emission limits are not needed. If the facility is registering under a PBR and needs to establish federally enforceable emission limits, use the Form PI-7-CERT. If a facility meets a historical Standard Exemption, meets a Standard Permit, or is otherwise authorized by a permit action, but needs to establish a federally enforceable limit, the Form APD-CERT entitled Certification of Emission Limits (**not** Form PI-7-CERT) should be used.

For more information about certification versus registration see our Certification Fact Sheet on our Fact Sheets for Permits by Rule web page at www.tceq.texas.gov/permitting/air/guidance/pbr/pbr_factsheets.html.

Overview

Texas Commission on Environmental Quality (TCEQ) regulates facilities that release air contaminants, even in small amounts, under its air permit rules. Facilities with emissions that do not meet de minimis criteria but will not make a significant contribution of air contaminants to the atmosphere may be permitted by rule. Facilities authorized by PBR must be constructed and operated with certain restrictions.

A PBR claim must meet both the general and specific requirements in Title 30 Texas Administrative Code (30 TAC) Chapter 106, but does not require an extensive technical review. See the Fact Sheet - Air Quality Permitting at www.tceq.texas.gov/assets/public/permitting/air/factsheets/permit_factsheet.pdf for a list of all potential air permit authorizations. Refer to the Decision Support System at www.tceq.texas.gov/permitting/air/nav/air_supportsys.html for additional information to assist you in determining some of the other state or federal requirements you may need to know.

Note: As of June 1, 2014, all PBR registration responses will be sent via e-mail within one business day of TCEQ's decision.

ePermits: As of February 1, 2018, the TCEQ requires the use of the online TCEQ e-Services system. (<https://www.tceq.texas.gov/assets/public/permitting/air/memos/pbr-sp-epermitsmemo.pdf>) To register your PBR, pay PBR registration fees, and receive PBR registrations please use the TCEQ e-Services system at www.tceq.texas.gov/e-services.

- All PBRs, except portable facilities, are required to use the ePermits system. Hard copies of applications, other than those for portable facilities, will not be accepted.
- To use the online system you need to have an active State of Texas Environmental Electronic Reporting System (STEERS) account. Access STEERS at www3.tceq.texas.gov/steers/. For help with ePermits refer to the TCEQ STEERS ePermits Help web page at www3.tceq.texas.gov/steers/help/epr/eprmain.html.

A PBR may be claimed when both the following conditions are met:

1. the facility meets **all** applicable requirements of **30 TAC § 106.4**. These requirements limit the amount of annual emissions to less than federal permit major source levels, and require compliance with all state and federal regulations; and
2. the facility meets **all** applicable conditions of one or more individual PBRs contained in **30 TAC Chapter 106**. These requirements may specify design requirements for certain facilities, production or material use limits, and operational restrictions.

To claim a PBR, you may:

1. begin construction immediately if the PBR does not require registration;
2. begin construction when the Form PI-7 and attachments are submitted to the TCEQ if the PBR requires registration, but does not require site approval; or
3. not begin construction until you are notified by the TCEQ if the PBR requires registration and written site approval. If you are already operating and still need an air authorization, you should begin steps to seek an authorization.

Keeping Records

Once a PBR is claimed and/or registered, you should:

1. maintain sufficient records to demonstrate compliance with the annual emissions limits; and
2. maintain sufficient records to demonstrate compliance with the emission limits and specific conditions of the PBR. Refer to the applicable PBR checklist for records retention guidance.

Tips for a Speedy Administrative Review

The administrative review process will be more efficient and streamlined if you follow the suggestions outlined in the Fact Sheet – Tips for a Speedy Administrative Review at www.tceq.texas.gov/permitting/air/guidance/permit-factsheets.html.

Small Business Information and Agency Contacts

For agency contacts, see Contact Information for Air Permit Applications (including Environmental Assistance Division) at www.tceq.texas.gov/assets/public/permitting/air/airapp-contacts.pdf.

Instructions for Form PI-7

These instructions are provided to assist the regulated community to accurately complete a registration request to claim a PBR.

I. Registrant Information

- A. Company or Other Legal Customer Name:** Registrations are claimed by either the facility owner or operator, commonly referred to as the “registrant.” List the legal name of the company, corporation, partnership, or person who is claiming the PBR. Applicants can verify the legal name with the Texas Secretary of State at (512) 463-5555 or at www.sos.state.tx.us. The TCEQ will also verify the legal name with the Texas Secretary of State. You may be asked to correct the name provided on the Form PI-7, if found to be different. In some cases, we may request a copy of the legal document forming the entity to verify the legal name; for example: general partnership filed with the county.
- B. Company Official Contact Information:** Provide the name, title, mailing address, telephone number, fax number, and e-mail address of the company official contact. The company official must not be a consultant. It is important to provide the e-mail address since copies of registrations will be **e-mailed**. All PBR registration responses will be sent via e-mail within one business day of TCEQ’s decision.

- C. Technical Contact Information:** Provide the name, title, company, mailing address, telephone number, fax number, and e-mail address of the person TCEQ should contact for technical questions. This person must have the authority to make binding agreements and representations on behalf of the registrant. The technical contact may be a consultant.

II. Facility and Site Information

- A. Name and Type of Facility:** Enter the name of the facility for which the PBR is being claimed. The name should be descriptive and indicate the general type of operation, manufacturing process, equipment, or facility which would be authorized under the PBR (include any numerical designation, if appropriate). The name must be descriptive and specific. Examples of acceptable names are "Sulfuric Acid Plant", "No. 5 Steam Boiler," "Electric Arc Furnace No. 2," and "Fiberglass Boat Manufacturing Facility." Vague names such as "Chemical Plant" and "North Process Area" are not acceptable names. Also, check the appropriate box indicating the type of facility as either permanent or temporary. Hot mix asphalt plants and trench burners are typical temporary facilities; a petroleum storage tank would be considered permanent. For portable units, please provide the serial number(s) of the equipment being authorized.
- B. Facility Location Information:** Provide the street address of the facility, if available. If there is no street address, describe the physical location with specific written directions. Identify the location by distance and direction from well-known landmarks, such as highway intersections. It is very important to also include the city and county where the facility will be located. If the address is not located in a city, then enter the city or town closest to the facility even if it is not in the same county as the facility. The county indicated must be the county where the facility is physically located. Please include the ZIP Code of the physical facility site, not the ZIP Code of the applicant's mailing address. In some cases, the TCEQ may request a map showing the location of the facility during the review of the PBR registration.
- C. TCEQ Core Data Form:** We require that you submit a Core Data Form (TCEQ Form Number 10400) on all incoming applications unless the following are met:
1. Regulated Entity and Customer Reference Numbers have been issued by the TCEQ and;
 2. No core data information has changed.

Information required on the Core Data Form includes the following:

- Customer Reference Number (CN): This is a unique number given to each business, governmental body, association, individual, or other entity that owns, operates, is responsible for, or is affiliated with a regulated entity. We assign the CN when a Core Data Form is initially submitted.
- Regulated Entity Number (RN): This is a unique agency assigned number given to each person, organization, place, or thing that is of environmental interest to us and where regulated activities will occur. The RN is assigned when a Core Data Form is initially submitted, if the agency has conducted an investigation, or if the agency has issued an enforcement action. The RN replaces existing air account numbers. The RN for portable units is assigned to the unit itself, and that same RN should be used when applying for authorization at a different location.

Note: *The company and facility site information provided on the Core Data Form must be the same as provided on the Form PI-7.*

- D. TCEQ Account Identification Number:** This number was assigned by the TCEQ to the entire property owned or controlled by the applicant at a specific location. A typical example of an air quality account number is JB-1234-R. Portable facilities are assigned account identification numbers which begin with a number, such as 92-1234-K. Provide your TCEQ account identification number if known.

E. Type of Action: Indicate the type of action being requested by checking the appropriate box. Check:

- *Initial Application* – if the facility has not previously been authorized by a permit by rule.
- *Change to Registration* – if the facility has been previously registered, but changes or additions have occurred.

Provide the existing registration number if Change to Registration is checked.

F. Permit by Rule Number(s) Claimed under 30 TAC Chapter 106: Provide the individual rule number(s) that are being claimed. The Form PI-7 can be used to register more than one PBR at a time.

G. Historical Standard Exemption or PBR: Indicate if you are claiming a historical standard exemption or PBR. If “YES,” enter the rule number(s) and the associated effective date.

H. Previous Standard Exemption or PBR Registration Number: If this registration is for a change to an existing facility previously authorized under a standard exemption or PBR, list the previous standard exemption number(s) or PBR registration number(s), and the associated effective date. Also attach additional information on whether the facility still meets the previous standard exemption or PBR, or whether a new registration is required and the previous standard exemption or PBR should be voided.

I. Other Facilities at this Site Authorized by Standard Exemption, PBR, or Standard Permit: To properly track how this registration may relate to other authorizations or compliance with TCEQ PBR regulations, it is important to list all standard exemption number(s), PBR registration number(s), or Standard Permit registration number(s), and the associated effective date.

J. Other Air Preconstruction Permits: If the registration is located at a site that has any other minor or federal NSR air preconstruction permits, list all permit numbers.

K. Affected Air Preconstruction Permits: If the PBR being claimed directly affects any permitted facility, list the affected preconstruction permit numbers.

L. Federal Operating Permit (FOP) Requirements (30 TAC Chapter 122 Applicability): Information and guidance on applicability of 30 TAC Chapter 122 can be accessed on our Program Applicability web page at www.tceq.texas.gov/permitting/air/titlev/pro_applicability.html.

1. If this PBR results in an increase in the site’s potential-to-emit and renders the site a major source as defined in 30 TAC Chapter 122, an FOP application is required. Check the appropriate box if you are submitting a GOP or SOP application or revision application. Guidance on submitting these applications is available on the Guidance for Title V Operating Permits web page at www.tceq.texas.gov/permitting/air/nav/air_titlevopperm.html.
2. Identify the type(s) of FOP(s) issued for the site by checking the appropriate box. In addition, check the appropriate box if any General Operating Permit (GOP) or Site Operating Permit (SOP) application(s) for the site, including revision applications, is currently under review.

If you have questions about the applicability of 30 TAC Chapter 122 or impact of this Form PI-7 on your existing FOP, please contact the TCEQ APD at (512) 239-1250, and ask to speak with someone in the Operating Permits Section.

III. Fee Information

The TCEQ has a fee for all air quality PBR registrations (30 TAC§ 106.50). If a new facility, or changes to an existing facility, meets the conditions of a PBR that does *not* require registration, but the owner/operator wishes to have the TCEQ review and confirm that the facility meets the conditions of the PBR, a fee is required. The fee requirements do not allow for PBR fee refunds.

All fees must be paid prior to processing any PBR registration. All fees, except those associated with a portable facility, must be paid through the TCEQ online payment application (ePay) located at www3.tceq.texas.gov/epay/. If an application is being submitted as a hardcopy for a portable facility, we recommend that ePay is used but the company can elect to send in a check or money order with the projects.

See the PBR Registration Fees Fact

Sheet at www.tceq.texas.gov/assets/public/permitting/air/Guidance/NewSourceReview/PermitsByRule/feefact.pdf for a summary of requirements and exceptions for fees in 30 TAC § 106.50.

A. Fee Requirements: There are three exceptions to paying a PBR fee, as described below.

1. A facility applying for a PBR does not have to pay a fee if the registration is *solely* to establish a federally enforceable emission limit. If a registration is for construction or modification of a facility, which has not been previously reviewed by the TCEQ, a fee is required.
2. If any administrative or subsequent changes occur at the site or the company is addressing any deficiencies that were requested in the initial review the company has 6 months to resubmit without paying an additional fee.
3. A facility applying for a PBR does not have to pay a fee if the registration is for a remediation project (30 TAC § 106.533). For more information about remediation projects see our Checklist for Water and Soil Remediation, 30 TAC § 106.533 (TCEQ Form - 10148) at www.tceq.texas.gov/permitting/air/forms/permitbyrule/checklist/sub_x_checklists.html.

B. Fee Amount: There are two fee amounts possible under the rules, as follows:

1. An owner/operator of a small business (corporation, partnership, sole proprietorship) that is independently owned and operated, formed for the purpose of making a profit, has fewer than 100 employees *or* less than \$6 million in annual gross receipts is required to submit a \$100.00 fee. In addition, an owner/operator that is a governmental entity (city, township, school district) with a population less than 10,000 according to the most recent census is required to submit a \$100.00 fee. Finally, non-profit organizations pay a \$100.00 fee.
2. All other registrations are required to submit a \$450.00 fee.

C. Payment Information: Enter the voucher number from ePay, the individual or company name, and the fee amount paid for this registration. If the payment is for a portable facility, enter the check, money order, or transaction number and the individual or company name printed on the check.

IV. Selected Facility Reviews And Voluntary Registrations *Only*

A. Voluntary Registrations: Some PBRs do not require registration, but owners and operators may voluntarily choose to register these facilities... The owners and operators must keep records according to 30 TAC § 106.8 to demonstrate compliance with every claimed PBR, and the general requirements. The TCEQ requires the use of the online TCEQ e-Services system at www.tceq.texas.gov/e-services to voluntarily register your PBR.

B. PBR Checklists: For the following types of facilities, we request that you provide the appropriate PBR checklist to demonstrate that your facility meets all general and specific PBR requirements. If a checklist is not included, then you must provide the requirements of Section V.

- Animal Feeding Operations (30 TAC § 106.161)
- Livestock Auction Facilities (30 TAC § 106.162)
- Saw Mills (30 TAC § 106.223)
- Grain Handling, Storage and Drying (30 TAC § 106.283)
- Auto Body Refinishing Facilities (30 TAC § 106.436)
- Air Curtain Incinerators (30 TAC § 106.496)

C. Distances to Property Line and Nearest Off-Property Structure: Instead of an area map and plot plan, the TCEQ is requesting distance information. The distance from the facility's emission release point to the nearest property line and off-property structure should be provided. This information is needed, as many PBRs have very specific distance limitations.

Note: In limited cases, a map or drawing of the site and surrounding land use may be requested during the technical review or by the TCEQ Regional office or the local air pollution control program during an investigation.

V. Technical Information Including State and Federal Regulatory Requirements

If any of the technical information below is not included with this submittal, it may result in an automatic deficiency and voiding of the project. Additionally, any essential information (lab analysis, NAAQS compliance demonstrations, etc.) that is needed to confirm that facilities are meeting the requirements of the PBR, must also be included. Attachments should include detailed demonstrations of compliance with all requirements.

A. PBR Requirements: You must demonstrate compliance with the following:

- General requirements in 30 TAC § 106.4, and
- Individual requirements of the specific PBR.

To assist you with preparing technical information, review our Air Permits by Rule Applicability Quick Checklist or Full Checklist at www.tceq.texas.gov/permitting/air/forms/permitbyrule/checklist/applicability_checklists.html and the Registration Checklists for Permits by Rule web page at www.tceq.texas.gov/permitting/air/forms/permitbyrule/checklist/pbr_checklists_index.html. These checklists contain important information on emission limits, typical methods to calculate emissions, records retention, and other state and federal rules, regulations, and standards that may apply to your facility. *Use of the checklists is optional; however, your review will go faster if you supply the applicable checklists.*

B. Confidential Information: Texas Health and Safety Code, §382.041 requires us not to disclose any information related to manufacturing processes that is marked Confidential. Mark any information related to secret or proprietary processes or methods of manufacture as "Confidential," if you do not want this information in the public file. All confidential information should be separated from the PBR registration and submitted as a separate file within the same submittal. Additional information regarding confidential information can be found at www.tceq.texas.gov/permitting/air/confidential.html.

- C. Process Flow Diagram:** Provide a process flow diagram so that the permit reviewer can verify all technical information regarding the affected facility. The process flow diagram should be sufficiently descriptive so the permit reviewer can determine the raw materials to be used in the process; all major processing steps and major equipment items; individual emission points associated with each process step; the location and identification of all emission abatement devices; and the location and identification of all waste streams (including wastewater streams that may have associated air emissions). Block flow diagrams generally are not sufficient except for very simple facilities such as boilers.

Alternate material flows and changes in routing of emissions during periods of planned MSS should be depicted as well as any alternate emission control devices that will be used during these periods.

- D. Process Description:** Provide a process description to accompany the process flow diagram that discusses each step in the process and provides a step-by-step explanation of exactly how your business operates. The description should lead the permit reviewer through the process with emphasis on where the emissions are generated, why the emissions must be generated, what air pollution controls are used (including process design features that minimize emissions), and where the emissions enter the atmosphere.

The process description must also explain how the facility or facilities will be operating when the maximum possible emissions are produced. For some source types, this will probably be the highest production rate. For other source types, the maximum emission rates may occur at partial load. When applicable, discuss cycle times, reaction times, temperatures, pressures, material flow rates, and production rates. Be specific, and do not use generalities such as a small amount, sometimes, and occasionally opened. The process description must also include how the facility is operated during periods of planned MSS and what emission reduction techniques will be used to limit emissions, changes in character of emissions, and the frequency and duration of each type of planned MSS activity.

All information in the process description is an enforceable representation.

- E. Maximum Emissions Data and Calculations:** Represent the maximum hourly and total annual emission rates of the project, including emission rates for planned MSS facilities and related activities. You must also provide a demonstration of expected continuous compliance with the represented emission rates.

The permit reviewer must be able to duplicate all emission calculations to verify and confirm emissions data and rates represented in the application. Supporting calculations and the technical bases for the emission rates are required. Include all emission rates calculations and any assumptions made in determining the emission rates.

List and discuss planned MSS activities separately. Provide emission rates and supporting emissions information from planned MSS activities, frequency, and duration of all planned MSS activities, and all planned MSS activity effects on emission rates. Additionally, note all emission points unique to MSS activities. Maximum hourly emission rates, in pounds per hour, from planned MSS should be based on the maximum rates expected from the MSS activities. Annual planned MSS emission rates, in tons per year, should be based on the number of expected MSS activities during any consecutive 12-month period.

Maximum hourly emission rates, in pounds per hour, should be based on the maximum (design) production capacity of the facility. Dividing the annual emissions in tons per year by the annual hours of operation in order to determine hourly emissions in pounds per hour is often unacceptable and inaccurate since this approach typically underestimates hourly emissions.

Maximum annual emission rates, in tons per year, should reflect the operation of the facility throughout any consecutive 12-month period with consideration given to future facility growth.

Include a discussion of the hours of operation and how the hours of operation relate to emission rates on an hourly and annual basis.

If the process is a non-continuous batch operation, or there are widely varying operating scenarios, clearly identify and account for the variations in emissions in the maximum hourly and annual emission rates. Supply additional information to describe the emission variations, particularly for emissions from MSS facilities and related activities.

Include emission rate information for each air contaminant during production operations and during periods of planned MSS. Contaminants must be specifically identified. For example: methanol rather than hydrocarbons or polyester/styrene resin dust and iron dust rather than dust. Provide applicable Material Safety Data Sheets (MSDS), Safety Data Sheets, Air Quality Data Sheets, or equivalent supporting documents that provide complete speciation for all mixtures that contain potential air contaminants.

If spreadsheets are used to estimate emissions, they should be formatted such that they are clear and easy to follow and include example calculations with units and the data sources for the inputs. The permit reviewer may request an electronic version of the spreadsheet to verify the emission calculations are correct.

- F. Distance from Property Line and Nearest Off-Property Structure:** Instead of an area map and plot plan, the TCEQ requests distance information, including the distance from the facility's emission release points to the nearest property line and off-property structure. This information is needed as many PBRs have very specific distance limitations.

Note: In limited cases, a map or drawing of the site and surrounding land use may be requested during the technical review or at the request of the TCEQ Regional office or local air pollution control program during an investigation.

- G. Project Status:** In an effort to prioritize PBR projects, please check the appropriate box based on if the project has been implemented or if waiting on a response from TCEQ before proceeding with the project.
- H. Projected Start of Construction and Projected Start of Operation Dates:** Provide the projected start of construction date and projected completion date.

Note: Construction is broadly interpreted as anything other than site clearance or site preparation. Activities such as land clearing, soil load-bearing tests, leveling of the area, sewers and utility lines, road building, power line installation, fencing, and construction shack building are considered site clearance or preparation. Equipment may be received at a plant site and stored, provided no attempt is made to assemble the equipment or connect it to any electrical, plumbing, or other utility system. All work, such as excavation, form erection, or foundations upon which facilities will rest is considered construction. Submit any questions regarding the definition of start of construction to airperm@tceq.texas.gov with copies to the appropriate TCEQ regional office and any local air pollution control program(s) having jurisdiction. Each request for clarification must be in writing with sufficient detail to identify the specific activity in question, and the agency response to this request must be in writing for the authorization to be valid. Additional information can be found at www.tceq.texas.gov/permitting/air/newsourcereview/before.html.

VI. Delinquent Fees and Penalties

We will not process your application until all delinquent fees and applicable penalties owed to the TCEQ or the Office of the Attorney General on behalf of the TCEQ are paid in accordance with the Delinquent Fee and Penalty Protocol. More information regarding delinquent fee and penalties can be found at www.tceq.texas.gov/agency/delin/index.html.

VII. Copies of the Registration:

Submit copies of the Form PI-7, and all other required attachments, as indicated on the PI-7 form. Retain a copy of the registration for your own records. **Failure to distribute copies of the registration will delay processing.** The original of this registration form must be sent to the TCEQ in Austin and the appropriate TCEQ regional office through the TCEQ e-Services system. A hard copy must be sent to any local air pollution control program(s) with jurisdiction. A copy must also be maintained on-site. For sites that normally operate unattended, a copy must be maintained at an office within Texas that has operational control of the site.

Also, all *subsequent* correspondence should be copied to the TCEQ regional office and local air pollution control program(s), as appropriate. Do not attach a copy of Form PI-7 to subsequent correspondence unless specifically requested, as this may cause another registration file to be created. Indicate the assigned TCEQ registration number, TCEQ regulated entity number, and permit reviewer, if known, on all subsequent correspondence.
