

**Texas Commission on Environmental Quality**  
**Form OP-UA24 - Instructions**  
**Wool Fiberglass Insulation Manufacturing Plant Attributes**

**General:**

This form is used to provide a description and data pertaining to all wool fiberglass insulation manufacturing plants with potentially applicable requirements associated with a particular account number and application. Each table number, along with the possibility of a corresponding letter (i.e., Table 1a, Table 1b), corresponds to a certain state or federal rule. If the rule on the table is not potentially applicable to a wool fiberglass insulation manufacturing plant, then it should be left blank and need not be submitted with the application. If the codes entered by the applicant show negative applicability to the rule or sections of the rule represented on the table, then the applicant need not complete the remainder of the table(s) that corresponds to the rule. Further instruction as to which questions should be answered and which questions should not be answered are located in the “Specific” section of the instruction text. The following is included in this form:

**Table 1: Title 40 Code of Federal Regulations Part 60 (40 CFR Part 60)**  
**Subpart PPP: Standard of Performance for Wool Fiberglass Insulation Manufacturing Plants**

The Texas Commission on Environmental Quality (TCEQ) primary account number (XX-XXXX-X) and the application area name from Form OP-1 (Site Information Summary) must appear in the header of each page for the purpose of identification for the initial submittal. The date of the initial form submittal must also be included and should be consistent throughout the application (MM/DD/YYYY). **Leave the permit number blank for the initial form submittal.** If this form is included as part of the permit revision process, enter the permit number assigned by the TCEQ, the area name (from Form OP-1), the date of the revision submittal, and the account number.

Unit attribute questions that do not require a response from all applicants are preceded by qualification criteria in the instructions. If the unit does not meet the qualification criteria, a response to the question is not required. **Anytime a response is not required based on the qualification criteria, leave the space on the form blank.**

**Notwithstanding any qualification criteria in the form instructions or information provided in other TCEQ guidance, the applicant may leave an attribute question blank (or indicate “N/A” for “Not Applicable”) if the attribute is not needed for the applicable requirement determinations of a regulation for a unit.**

In some situations, the applicant has the option of selecting alternate requirements, limitations, and/or practices for a unit. Note that these alternate requirements, limitations, and/or practices must have the required approval from the TCEQ Executive Director and/or the U.S. Environmental Protection Agency Administrator before the federal operating permit application is submitted.

---

**Specific:**

**Table 1: Title 40 Code of Federal Regulations Part 60 (40 CFR Part 60)**  
**Subpart PPP: Standard of Performance for Wool Fiberglass Insulation Manufacturing Plants**

**Process ID No.:**

Enter the identification number (ID No.) for the wool fiberglass insulation manufacturing plant (maximum 10 characters) as listed on Form OP-SUM (Individual Unit Summary).

**SOP Index No.:**

Site operating permit (SOP) applicants should indicate the SOP index number for the unit or group of units (maximum 15 characters consisting of numeric, alphanumeric characters, and/or dashes prefixed by a code for the applicable regulation [i.e., 60KB-XXXX]). For additional information relating to SOP index numbers, please refer to the TCEQ guidance document “Federal Operating Permit Application.”

**Manufactures Rotary Spin Wool Fiberglass Insulation:**

Enter "YES" if the facility is a rotary spin wool fiberglass insulation manufacturing line. Otherwise, enter "NO."

▼ **Continue only if "Manufactures Rotary Spin Wool Fiberglass Insulation" is "YES."**

**Construction/Modification Date:**

Select one of the following options that best describes the date of commencement of the most recent construction, reconstruction, or modification. Enter the code on the form.

<b>Code</b>	<b>Description</b>
84-	On or before February 7, 1984
84+	After February 7, 1984

▼ **Continue only if "Construction/Modification Date" is "84+."**

**Control Device:**

Select one of the following control devices which is used to comply with the mass emission standard. Enter the code on the form. Use multiple lines if more than one code applies.

*Note: If the wool fiberglass insulation manufacturing plant uses more than one control device, assign different SOP index numbers to capture all information on separate lines. Each SOP index number will represent a set of attributes associated with the different control devices and each set of applicable requirements should be listed separately on Form OP-REQ3.*

<b>Code</b>	<b>Description</b>
WETSCR	Wet scrubber
ESP	Wet electrostatic precipitator
NONE	No control device is used or a control device other than a wet scrubber or wet electrostatic precipitator is used

**Control Device ID No.:**

Enter the identification number (ID No.) for the control device to which emissions are routed (maximum 10 characters). This number should be consistent with the control device identification number listed on Form OP-SUM.
