

Texas Commission on Environmental Quality

Form OP-UA47 - Instructions Shipbuilding and Ship Repair Unit Attributes

General:

This form is used to provide a description and data pertaining to shipbuilding and ship repair units with potentially applicable requirements associated with a particular account number and application. Each table number, along with the possibility of a corresponding letter (i.e., Table 1a, Table 1b), corresponds to a certain state or federal rule. If the rule on the table is not potentially applicable to a shipbuilding or ship repair unit, then it should be left blank and need not be submitted with the application. If the codes entered by the applicant show negative applicability to the rule or sections of the rule represented on the table, then the applicant need not complete the remainder of the table(s) that corresponds to the rule. Further instruction as to which questions should be answered and which questions should not be answered are located in the “Specific” section of the instruction text. The following is included in this form:

**Table 1: Title 40 Code of Federal Regulations Part 63 (40 CFR Part 63)
Subpart II: National Emission Standards for Shipbuilding and Ship Repair (Surface Coating)**

The Texas Commission on Environmental Quality (TCEQ) primary account number (XX-XXXX-X) and the application area name from Form OP-1 (Site Information Summary) must appear in the header of each page for the purpose of identification for the initial submittal. The date of the initial form submittal must also be included and should be consistent throughout the application (MM-DD-YYYY). **Leave the permit number blank for the initial form submittal.** If this form is included as part of the permit revision process, enter the permit number assigned by the TCEQ, the area name (from Form OP-1), the date of the revision submittal, and the account number.

Unit attribute questions that do not require a response from all applicants are preceded by qualification criteria in the instructions. If the unit does not meet the qualification criteria, a response to the question is not required. **Anytime a response is not required based on the qualification criteria, leave the space on the form blank.**

Notwithstanding any qualification criteria in the form instructions or information provided in other TCEQ guidance, the applicant may leave an attribute question blank (or indicate “N/A” for “Not Applicable”) if the attribute is not needed for the applicable requirement determinations of a regulation for a unit.

In some situations, the applicant has the option of selecting alternate requirements, limitations, and/or practices for a unit. Note that these alternate requirements, limitations, and/or practices must have the required approval from the TCEQ Executive Director and/or the U.S. Environmental Protection Agency (EPA) Administrator before the federal operating permit application is submitted.

Specific:

**Table 1: Title 40 Code of Federal Regulations Part 63 (40 CFR Part 63)
Subpart II: National Emission Standards for Shipbuilding and Ship Repair (Surface Coating)**

Complete only if the source emits or has the potential to emit, in the aggregate, 9.1 megagrams per year (10 tons per year) or more of any hazardous air pollutant (HAP), or 22.7 megagrams per year (25 tons per year) or more of any combination of HAPS.

PROCESS ID NO.: Enter the identification number (ID No.) for the shipbuilding or ship repair operation (maximum 10 characters) as listed on Form OP-SUM (Individual Unit Summary).

SOP INDEX NO.: Site operating permit (SOP) applicants should indicate the SOP index number for the unit or group of units (maximum 15 characters consisting of numeric, alphanumeric characters, and/or dashes prefixed by a code for the applicable regulation [i.e., 60KB-XXXX]). For additional information relating to SOP index numbers, please refer to the TCEQ guidance document entitled “Federal Operating Permit Application Guidance Document.”

COATING VOLUME: Enter “YES” if the facility applies coatings used in volumes of less than 200 liters (52.8 gallons) per year, provided the total volume of coating exempt under 40 CFR § 63.781(b) does not exceed 1,000 liters (264 gallons) per year. Otherwise, enter “NO.”

▼ **Continue only if “Coating Volume” is “NO.”**

ALTERNATIVE MEANS OF LIMITING EMISSIONS: Enter “YES” if the TCEQ Executive Director (or EPA Administrator) has approved alternative means of limiting emissions from coating operations. Otherwise, enter “NO.”

AMLE ID No.: If an alternative means of limiting emissions (AMLE) has been approved, then enter the corresponding AMLE unique identifier (maximum 10 characters). If the unique identifier is unavailable, then enter the date of the AMLE approval letter. The unique identifier and/or date of approval letter is contained in the Compliance File under the appropriate account number. Otherwise, leave this column blank.

▼ **Continue only if “Alternative Means of Limiting Emissions” is “NO.”**

COATING TYPE: Select one of the following options that describes the coating type. Enter the code on the form.

<u>Code</u>	<u>Description</u>
NOSOL	No thinning solvent or other material besides water will be added to coatings
SOL	Thinning solvent will be added and compliance is demonstrated on a coating-by-coating basis
SOLGRP	The same thinning solvent is added and compliance is demonstrated on a group compliance basis

ALTERNATIVE TEST METHOD: Enter “YES” if the compliance is demonstrated through an alternative test method (ATM). Otherwise, enter “NO.”

ATM ID NO.: If an ATM has been approved, then enter the corresponding ATM unique identifier for each unit or process. If the unique identifier is unavailable, then enter the date of the ATM approval letter. The unique identifier and/or the date of the approval letter is contained in the Compliance File under the appropriate account number. Otherwise, leave this column blank.
