

**TCEQ Chemical Sources
Current Best Available Control Technology (BACT) Requirements**

Process Vents

| Year | Source Type | Pollutant | Minimum Acceptable Control | Control Efficiency or Details |
|-------------|--------------------|---------------------|--|--|
| 2011 | Process Vents | Non-halogenated VOC | Flare, any oxidizer, adsorber, absorber/scrubber, etc. | Appropriated control device efficiency |
| | | Halogenated VOC | Thermal oxidation followed by absorber/scrubber Carbon adsorption | Recovery as per VOC control |
| | | PM | PM < 0.01 gr/scf | |
