

## TCEQ COATINGS SOURCES CURRENT BACT REQUIREMENTS FOR MSS ACTIVITIES

### Degreasing Operations

This information is maintained by the Combustion/Coatings NSR Section and is subject to change. Last update 11/17/2006.

Year	Source Type	Pollutant	Minimum Acceptable Control	Control Efficiency or Details
2006	Hand Wipe Solvent	Exempt Solvent, VOC, HAPs and Halogenated Solvents	Same as current BACT requirements, except as stated on this table.	
	Remote Reservoir Cleaner	Exempt Solvent, VOC, HAPs and Halogenated Solvents	Same as current BACT requirements, except as stated on this table.	
	Cold Solvent Cleaner	Exempt Solvent, VOC and Halogenated Solvents	Same as current BACT requirements, except as stated on this table.	
			HAPs	
	Open Top Vapor Degreaser	Exempt Solvent, VOC and Halogenated Solvents	The unit should be operating properly before the degreasing operation is started and should continue to operate until degreasing operations are complete.	
			HAPs	
	Conveyorized Degreaser	Exempt Solvent, VOC and Halogenated Solvents	The unit should be operating properly before the degreasing operation is started and should continue to operate until degreasing operations are complete.	
			HAPs
