

**Recordkeeping “One-Liners” List for Permits by Rule  
Title 30 Texas Administrative Code § 106.8  
Texas Commission on Environmental Quality**

There are two distinct types of Permits by Rule (PBR). There are many PBRs that only list the type of facility and state that it is permitted by rule and have no restrictions other than the general restrictions applicable to all PBRs as contained in Title 30 Texas Administrative Code § 106.4 (30 TAC § 106.430), “Requirements for Permitting by Rule.” These “one-liners” have no recordkeeping requirements imposed by 30 TAC § 106.8. There are other PBRs that have specific conditions and may or may not individually require recordkeeping.

Facilities authorized under the “one-liners” category will not have recordkeeping requirements imposed under the 30 TAC § 106.8 rule but may be asked to provide information demonstrating compliance. While these facilities are expected to comply with the general restrictions in 30 TAC § 106.4, the Texas Commission on Environmental Quality (TCEQ) expects that verification of compliance would be obvious on inspection or could be demonstrated by records otherwise kept for business purposes. One-liners are those PBRs which; only name the type of facility, designate the facility as a permit by rule, and impose no other conditions in the PBR itself. Owners or operators of facilities authorized by one-liners are not required to maintain ongoing compliance records but only to collect and present information when individually requested by the TCEQ Executive Director. Compliance with all historical PBRs which meet the one-liner criteria would be verified in the same way. The claimant would only need to provide information, such as business records, to demonstrate compliance with 30 TAC § 106.4. All historical PBRs can be found on the TCEQ Web site at [www.tceq.state.tx.us/permitting/airperm/](http://www.tceq.state.tx.us/permitting/airperm/).
