2. The application area is located at a petroleum refinery in the Beaumont/Port Arthur or Houston/Galveston/Brazoria area. <i>If the response to Question III.C.2 is "YES" and the refinery is in the Beaumont/Port Arthur area, go to Section III.D.</i>	☐ YES ☐ NO
3. The application area is complying with the provisions of 40 CFR Part 63, Subpart G, as an alternative to complying with this division (relating to Industrial Wastewater). <i>If the response to Question III.C.3 is "YES," go to Section III.D.</i>	☐ YES ☒ NO
4. The application area is located at a plant with an annual VOC loading in wastewater, as determined in accordance with 30 TAC § 115.148, less than or equal to 10 Mg (11.03 tons). <i>If the response to Question III.C.4 is "YES," go to Section III.D.</i>	☐ YES ☐ NO
5. The application area includes wastewater drains, junction boxes, lift stations, or weirs that are subject to the control requirements of 30 TAC § 115.142(1).	☐ YES ☒ NO
6. The application area includes wastewater drains, junction boxes, lift stations, or weirs that handle streams chosen for exemption under 30 TAC § 115.147(2).	☐ YES ☐ NO
7. The application area includes wastewater drains, junction boxes, lift stations, or weirs that have an executive director approved exemption under 30 TAC § 115.147(4).	☐ YES ☐ NO
D. Loading and Unloading of VOCs	
◆ 1. The application area includes VOC loading operations.	☒ YES ☐ NO
◆ 2. The application area includes VOC transport vessel unloading operations. <i>For GOP applications, if the responses to Questions III.D.1 - D.2 are "NO," go to Section III.E.</i>	☒ YES ☐ NO

2. The coal preparation and processing plant has a design capacity greater than 200 tons per day (tpd). <i>If the response to Question VI.B.2 is "NO," go to Section VI.C.</i>	☐ YES ☐ NO
3. The plant has an option to enforceably limit its operating level to less than 200 tpd and is choosing this option. <i>If the response to Question VI.B.3 is "YES," go to Section VI.C.</i>	☐ YES ☐ NO
4. The plant contains an open storage pile, as defined in § 60.251, as an affected facility. <i>If the response to Question VI.B.4 is "NO," go to Section VI.C.</i>	☐ YES ☐ NO
5. The open storage pile was constructed, reconstructed or modified after May 27, 2009.	☐ YES ☐ NO
C. Subpart GG - Standards of Performance for Stationary Gas Turbines (GOP applicants only)	
◆ 1. The application area includes one or more stationary gas turbines that have a heat input at peak load greater than or equal to 10 MMBtu/hr (10.7GJ/hr), based on the lower heating value of the fuel fired. <i>If the response to Question VI.C.1 is "NO" or "N/A," go to Section VI.D.</i>	☐ YES ☐ NO ☒ N/A
◆ 2. One or more of the affected facilities were constructed, modified, or reconstructed after October 3, 1977 and prior to February 19, 2005. <i>If the response to Question VI.C.2 is "NO," go to Section VI.D.</i>	☐ YES ☐ NO
◆ 3. One or more stationary gas turbines in the application area are using a previously approved alternative fuel monitoring schedule as specified in 40 CFR § 60.334(h)(4).	☐ YES ☐ NO
◆ 4. The exemption specified in 40 CFR § 60.332(e) is being utilized for one or more stationary gas turbines in the application area.	☐ YES ☐ NO

Hi Cassandra,

I still need an updated OP-REQ1 pages 87 and 88 with only the active standard permit and the PBRs the site is using. I also need an updated OP-PBRSUP (all tables) with only those PBRs as well. Do you know when you could send those to me?

Sincerely,

Savannah G. Quiros

Hello all,

After QA/QC, I wanted to get some clarification on the following items:

- OP-REQ1 Page 1: You answered No to questions I.A.1. and I.A.2. To confirm, you have absolutely no vents on site? Usually applicants answer yes to either I.A.1 or I.A.2, so I want to make sure. [This is not accurate. There are vents on site please see the revised REQ1 form attached.](#)
- OP-REQ1 Pages 87 and 88; OP-PBRSUP: In our databases, permit registration numbers 97658 and 115121 have been voided; there are currently no PBR registrations for the site. The only active NSR permit I have is 80829. Could you please confirm? [Correct, there are no active PBR registrations for the site. The only active PBR is unregistered and the current NSR is 80829.](#)

Sincerely,

Savannah G. Quiros

H. Control Of Reid Vapor Pressure (RVP) of Gasoline	
◆ 1. The application area includes stationary tanks, reservoirs, or other containers holding gasoline that may ultimately be used in a motor vehicle in El Paso County. <i>If the response to Question III.H.1 is "NO" or "N/A," go to Section III.I.</i>	☐ YES ☐ NO ☒ N/A
◆ 2. The application area includes stationary tanks, reservoirs, or other containers holding gasoline that will be used exclusively for the fueling of agricultural implements.	☐ YES ☐ NO
◆ 3. The application area includes a motor vehicle fuel dispensing facility.	☐ YES ☐ NO
◆ 4. The application area includes stationary tanks, reservoirs, or other containers holding gasoline and having a nominal capacity of 500 gallons or less.	☐ YES ☐ NO
I. Process Unit Turnaround and Vacuum-Producing Systems in Petroleum Refineries	
1. The application area is located at a petroleum refinery.	☐ YES ☒ NO
J. Surface Coating Processes (Complete this section for GOP applications only.)	
◆ 1. Surface coating operations (other than those performed on equipment located on-site and in-place) that meet the exemption specified in 30 TAC § 115.427(3)(A) or 115.427(7) are performed in the application area.	☐ YES ☐ NO ☐ N/A

K. Cutback Asphalt	
1. Conventional cutback asphalt containing VOC solvents for the paving of roadways, driveways, or parking lots, is used or specified for use in the application area by a state, municipal, or county agency. <i>If the response to Question III.K.1 is "N/A," go to Section III.L.</i>	☐ YES ☒ NO ☐ N/A
2. The use, application, sale, or offering for sale of conventional cutback asphalt containing VOC solvents for the paving of roadways, driveways, or parking lots occurs in the application area.	☐ YES ☒ NO ☐ N/A
3. Asphalt emulsion is used or produced within the application area.	☐ YES ☒ NO
4. The application area is using an alternate control requirement as specified in 30 TAC § 115.513. <i>If the response to Question III.K.4 is "NO," go to Section III.L.</i>	☐ YES ☒ NO
5. The application area uses, applies, sells, or offers for sale asphalt concrete, made with cutback asphalt, that meets the exemption specified in 30 TAC § 115.517(1).	☐ YES ☐ NO
6. The application area uses, applies, sells, or offers for sale cutback asphalt that is used solely as a penetrating prime coat.	☐ YES ☐ NO
7. The applicant using cutback asphalt is a state, municipal, or county agency.	☐ YES ☐ NO
L. Degassing of Storage Tanks, Transport Vessels and Marine Vessels	
◆ 1. The application area includes degassing operations for stationary, marine, and/or transport vessels. <i>If the response to Question III.L.1 is "NO" or "N/A," go to Section III.M.</i>	☒ YES ☐ NO ☐ N/A
◆ 2. Degassing of only ocean-going, self-propelled VOC marine vessels is performed in the application area. <i>If the response to Question III.L.2 is "YES," go to Section III.M.</i>	☐ YES ☒ NO ☐ N/A

Hi Kevin,

Yes, you'll need to create a new Title V application. Around the third page of filling out information, STEERS will ask you if this is for a new project or an existing project. Then you can enter the information for this this permit.

Sincerely,

Subject: RE: Working Draft Permit - FOP 04572/Project 35937, Musket Corporation/Fort Worth Fuel Terminal

Hi Savannah,

We do not have any additional comments on the draft permit. Regarding the updated CRO1 form which is required to be submitted through STEERS, would we need to create a new Title V application to submit this? I tried to access the previous application, which I was unable to, and tried to submit a revision application however there is not a permit associated with this RN in the central registry.

Could you advise the proper way to submit this?

Thank you,

Kevin Sokolowski

Subject: RE: Working Draft Permit - FOP O4572/Project 35937, Musket Corporation/Fort Worth Fuel Terminal

Good morning, Savannah,

We have reviewed the working draft permit (WPD) and have one minor comment. In the New Source Review Authorizations table, on page 16 of the WPD, there is a typo for authorization number 115121, this was typed as "11521", in addition the issuance date is blank, per the central registry this was issued on 02/10/2014.

Title 30 TAC Chapter 116 Permits, Special Permits, and Other Authorizations (Other Than Permits By Rule, PSD Permits, or NA Permits) for the Application Area.	
Authorization No.: ~~11521~~ 115121	Issuance Date: 02/10/2014
Authorization No.: 80829	Issuance Date: 02/20/2018
Authorization No.: 98593	Issuance Date: 09/29/2011

Attached you will find the updated OP-REQ1 with the deficiencies noted below in your email corrected as required. Please let Cassandra and I know if you have any questions regarding this or require a redlined WPD document.

Regards,

Kevin Sokolowski

◆	2. Tank-truck tanks are filled with non-gasoline VOCs having a TVP greater than or equal to 0.5 psia under actual storage conditions at a facility subject to 30 TAC § 115.214(a)(1)(C) within the application area.	☒ YES ☐ NO ☐ N/A
◆	3. Tank-truck tanks are filled with, or emptied of, gasoline at a facility that is subject to 30 TAC § 115.214(b)(1)(C) or 115.224(2) within the application area.	☐ YES ☐ NO ☒ N/A
G. Control of Vehicle Refueling Emissions (Stage II) at Motor Vehicle Fuel Dispensing Facilities		
◆	1. The application area includes one or more motor vehicle fuel dispensing facilities and gasoline is transferred from a stationary storage container into motor vehicle fuel tanks. <i>If the response to Question III.G.1 is "NO" or "N/A," go to Section III.H.</i>	☐ YES ☒ NO ☐ N/A
◆	2. The application area includes facilities that began construction on or after November 15, 1992 and prior to May 16, 2012.	☐ YES ☐ NO
◆	3. The application area includes facilities that began construction prior to November 15, 1992. <i>If the responses to Questions III.G.2 and Question III.G.3 are both "NO," go to Section III.H.</i>	☐ YES ☐ NO
◆	4. The application area includes only facilities that have a monthly throughput of less than 10,000 gallons of gasoline.	☐ YES ☐ NO
◆	5. The decommissioning of all Stage II vapor recovery control equipment located in the application area has been completed and the decommissioning notice submitted.	☐ YES ☐ NO ☐ N/A

H. Control Of Reid Vapor Pressure (RVP) of Gasoline	
◆ 1. The application area includes stationary tanks, reservoirs, or other containers holding gasoline that may ultimately be used in a motor vehicle in El Paso County. <i>If the response to Question III.H.1 is "NO" or "N/A," go to Section III.I.</i>	☐ YES ☐ NO ☒ N/A
◆ 2. The application area includes stationary tanks, reservoirs, or other containers holding gasoline that will be used exclusively for the fueling of agricultural implements.	☐ YES ☐ NO
◆ 3. The application area includes a motor vehicle fuel dispensing facility.	☐ YES ☐ NO
◆ 4. The application area includes stationary tanks, reservoirs, or other containers holding gasoline and having a nominal capacity of 500 gallons or less.	☐ YES ☐ NO
I. Process Unit Turnaround and Vacuum-Producing Systems in Petroleum Refineries	
1. The application area is located at a petroleum refinery.	☐ YES ☒ NO
J. Surface Coating Processes (Complete this section for GOP applications only.)	
◆ 1. Surface coating operations (other than those performed on equipment located on-site and in-place) that meet the exemption specified in 30 TAC § 115.427(3)(A) or 115.427(7) are performed in the application area.	☐ YES ☐ NO ☐ N/A

K. Cutback Asphalt	
1. Conventional cutback asphalt containing VOC solvents for the paving of roadways, driveways, or parking lots, is used or specified for use in the application area by a state, municipal, or county agency. <i>If the response to Question III.K.1 is "N/A," go to Section III.L.</i>	☐ YES ☒ NO ☐ N/A
2. The use, application, sale, or offering for sale of conventional cutback asphalt containing VOC solvents for the paving of roadways, driveways, or parking lots occurs in the application area.	☐ YES ☒ NO ☐ N/A
3. Asphalt emulsion is used or produced within the application area.	☐ YES ☒ NO
4. The application area is using an alternate control requirement as specified in 30 TAC § 115.513. <i>If the response to Question III.K.4 is "NO," go to Section III.L.</i>	☐ YES ☒ NO
5. The application area uses, applies, sells, or offers for sale asphalt concrete, made with cutback asphalt, that meets the exemption specified in 30 TAC § 115.517(1).	☐ YES ☐ NO
6. The application area uses, applies, sells, or offers for sale cutback asphalt that is used solely as a penetrating prime coat.	☐ YES ☐ NO
7. The applicant using cutback asphalt is a state, municipal, or county agency.	☐ YES ☐ NO
L. Degassing of Storage Tanks, Transport Vessels and Marine Vessels	
◆ 1. The application area includes degassing operations for stationary, marine, and/or transport vessels. <i>If the response to Question III.L.1 is "NO" or "N/A," go to Section III.M.</i>	☒ YES ☐ NO ☐ N/A
◆ 2. Degassing of only ocean-going, self-propelled VOC marine vessels is performed in the application area. <i>If the response to Question III.L.2 is "YES," go to Section III.M.</i>	☐ YES ☒ NO ☐ N/A

C. Subpart G - National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater	
Applicability	
1. The application area is located at a site that is subject to 40 CFR 63, Subpart F and the application area includes process vents, storage vessels, transfer racks, or waste streams associated with a chemical manufacturing process subject to 40 CFR 63, Subpart F. <i>If the response to Question VIII.C.1 is "NO," go to Section VIII.D.</i>	☐ YES ☐ NO
2. The application area includes fixed roofs, covers, and/or enclosures that are required to comply with 40 CFR § 63.148.	☐ YES ☐ NO
3. The application area includes vapor collection systems or closed-vent systems that are required to comply with 40 CFR § 63.148. <i>If the response to Question VIII.C.3 is "NO," go to Question VIII.C.8.</i>	☐ YES ☐ NO
4. The application area includes vapor collection systems or closed-vent systems that are constructed of hard-piping.	☐ YES ☐ NO
5. The application area includes vapor collection systems or closed-vent systems that contain bypass lines that could divert a vent stream away from a control device and to the atmosphere. <i>If the response to Question VIII.C.5 is "NO," go to Question VIII.C.8.</i>	☐ YES ☐ NO
Vapor Collection and Closed Vent Systems	
6. Flow indicators are installed, calibrated, maintained, and operated at the entrances to bypass lines in the application area.	☐ YES ☐ NO
7. Bypass lines in the application area are secured in the closed position with a car-seal or a lock-and-key type configuration.	☐ YES ☐ NO

Subject: [EXT] Working Draft Permit - FOP O4572/Project 35937, Musket Corporation/Fort Worth Fuel Terminal

Cassandra,

I have conducted a technical review of initial issuance application for Musket Corporation, Fort Worth Fuel Terminal. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **03/20/2025**. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP (for example, your explicit approval of the WDP).

During review, the following deficiencies were noted. Please send an updated OP-REQ1 pages 82-88 to me by the same deadline, **03/20/2025**:

- On Form OP-SUM some units list NSR Authorization No. 11521 but the OP-REQ1 page 87 does not have it listed.
- Since CAM/PM is not required, please update OP-REQ1 pages 82-84.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf [tceq.texas.gov]. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents \[tceq.texas.gov\]](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Savannah G. Quiros

Hi Cassandra,

I had a question for you about the monitoring requirements. Is unit ID LOAD subject to CAM or PM? It's marked as CAM in the OP-SUM, but you sent CAM and PM on the OP-MON form. Also, the options you chose are nearly the same, only the frequencies are different. CAM has it once every day and PM once every week. Could you please confirm the monitoring requirements for unit LOAD?

Sincerely,

Hi Cassandra,

I have one more revision I need from you! The True Vapor Pressure (TVP) on OP-UA4 Page 1, for unit ID LOAD is listed as "0.5-11S". Based on your other answers, I believe the correct code should be "0.5+". Code 0.5-11S is restricted for units using alternate control requirements (ACRs) 213B and 213D, which you are not using. Since you chose NONE for ACR, the TVP code should be 0.5+

Please email me an updated OP-UA4 at your earliest convenience by **02/03/2025**.

Hi Savannah,

Please see the attached revised OP-UA3 form. I have also attached a revised OP-SUM, OP-REQ2, and OP-REQ3. These forms were revised to include T-5 in the GRP-IFRS. T-5 was originally excluded from this group as it is slightly larger (80,000 bbl) than the other four tanks in the group (60,000 bbl). The size difference does not affect regulatory applicability for the tank so T-5 was added to the GRP-IFRS.

Please let me know if you have any additional comments.

Hi Cassandra,

OP-UA3 page 3 is missing the maximum true vapor pressure (Maximum TVP) for GRP-IFRS (T-1, T-2, T-3, T-4, T-5). Also if units are grouped, you can just put the group ID on the form (GRP-IFRS) instead of each individual unit ID (see attached). Please email me the updated OP-UA3 at your earliest convenience by **01/17/2025**.

Thank you,

Hi Savannah,

Please see our responses below and the attached corresponding forms.

First the answers to previous questions (my answers are in [blue](#))

1. Is OP-UA7 still required for VCU1 and VCU2?

[I am not able to tell you what rule\(s\) apply to what units. The responsibility falls on the applicant to determine what rule\(s\) apply to any units. You can also see more definitions in 30 TAC Chapter 101. Based on the attached previous email exchange with Carolyn Maus, "Control device requirements are usually going to be included within the set of requirements that applies to the emission unit, so a control device will not necessarily be listed." Flares are an exception to this rule, but as we determined the VCUs are not flares, Form OP-UA7 does not apply. We had previously submitted Form OP-UA7, but it should be disregarded.](#)

2. If OP-UA7 is not required, should we submit a revised OP-SUM with OP-UA7 removed from the VCU1 and VCU2 lines?

[You can submit a revised OP-SUM. Revised OP-SUM attached. For the purposes of the application VCU1 and VCU2 are considered part of the load process per the answer to Question 1, so they have been removed from the form.](#)

3. We will update PM and CAM options for SOP Index No. R5211-0001. We had included periodic monitoring for 30 TAC 111.111(a)(4) for visible emissions from gas flares. Should we remove these monitoring requirements?

[No, don't remove the monitoring requirements. It is possible to be subject to additional periodic monitoring for more than one rule. We revised the CAM and PM monitoring requirements for the LOAD unit to reflect the correct type of control device, which is VCU instead of flare. We removed the PM monitoring pages specifically relating to flares as 30 TAC 111.111\(a\)\(4\) is not applicable to the VCUs based on the Texas regulatory definition of flare.](#)

4. Is 30 TAC 122.602 Periodic Monitoring applicable based on the requirements in 30 TAC 111.111(a) Visible Emissions, specifically (1) stationary vents or (8) other sources?

[Periodic monitoring can apply to Chapter 111\(a\), depending on what the unit is subject to. Since the VCUs are not categorized as flares based on the Texas regulatory definition, periodic monitoring requirements specific to flares were removed from the OP-MON form.](#)

5. Should we email the updated forms or is there a way to submit them in STEERS?

You can email the forms to me and then certify them later. Noted.

I also need

- an OP-UA12 (Unit ID FUG has UA12 as its' applicable form, but no UA-12 was submitted) There are no applicable regulations in OP-UA12 and Unit FUG is still included on OP-SUM but the applicable form as been removed. FUG is not included on REQ2 or ACPS either. We can provide our analysis if need be.
- an updated pg 87 OP-REQ1 (NSR permit 80829 has 7 separate instances/dates on pg 87, only the latest version should be on the OP-REQ1) Revised and attached.

Please feel free to call or email if you have any additional questions or comments in the course of the permit application review.

Hi Cassandra,

Control device requirements are usually going to be included within the set of requirements that applies to the emission unit, so a control device will not necessarily be listed individually. There are a few exceptions. Probably the most common would be flares (on OP-UA7, as you note) and incinerators (on OP-UA35). However, we do also have forms for other combustion devices, (heaters/furnaces on OP-UA05, steam generating units on OP-UA06, turbines on OP-UA11, dryers/kilns/ovens on OP-UA51), so if a combustion control device fell into one of those categories and needed the regulations on one of those forms, then it should be listed there.

The OP-UA52 pertains to closed-vent systems and control devices that are used to control specific sources within the rules on the form, mainly things like containers, individual drain systems, etc., and you can see which items these are by looking in the instructions at the beginning of each rule table. These types of sources (often related to wastewater) are addressed in our site-wide requirements in the Special Terms and Conditions, so the emission sources aren't normally going to appear as an individual unit on a UA form. Because of that, we didn't have a place to include the CVS-CD requirements, like we would for other emission unit types that are addressed on other UA forms. Therefore, the OP-UA52 was created to provide a way to list unit-specific requirements for a closed vent system and control device that is used in this way.

We do have a flare definition for the purpose of our state rules. It is found in 30 TAC Chapter 101, Subchapter A, 101.1 (Definitions). I did not see one in the federal rules, but there may be a particular subpart of Part 60, 61, or 63 that defines it. In any case, our definition may help you make a determination, as I believe we are defining it in the way it would commonly be used in the industry. I know that a vapor combustor can sometimes be considered and operated as a flare, but we also have a separate definition for one that is not a flare. You mentioned that your control device has been permitted as a flare before – is it currently permitted that way now, and if so, what authorization is it using? I could take a look at the NSR authorization to offer an opinion.

Hi Carolyn,

I do have one additional question that I forgot to ask on the call. When deciding which form to fill out for a combustion control device for VOC vapors, how would you determine which form to fill out?

I cannot find a definition of “flare” within the regulations to determine whether form OP-UA7 applies. Additionally, form OP-UA52 looks like it could apply. The unit has been permitted as a flare in the past but based on federal regulations seems to fit the definition of a “vapor processing system” better.

Please give me a call if this would be easier to discuss by phone.

Subject: Additional Questions

Carolyn,

Thank you for your help last Friday. I have a couple follow up questions that I was hoping you could answer.

1. The attached reference includes SOP Index Number Prefixes for some state and federal regs. I didn't see the prefix for 30 TAC 115, Subchapter B, Division 7. Do you know the appropriate SOP index number prefix for that particular reg?
2. How can I find the PBR authorization? I have tried the TCEQ Records Online and the TCEQ Central Registry and I cannot find any of the PBRs the facility has informed me of. The facility has submitted documentation to register several PBRs through the years.

I appreciate any help you can provide.

Thank you,

Cassandra Gomez
Engineer
Geosyntec Consultants, Inc.

3. We will update PM and CAM options for SOP Index No. R5211-0001. We had included periodic monitoring for 30 TAC 111.111(a)(4) for visible emissions from gas flares. Should we remove these monitoring requirements?

No, don't remove the monitoring requirements. It is possible to be subject to additional periodic monitoring for more than one rule.

4. Is 30 TAC 122.602 Periodic Monitoring applicable based on the requirements in 30 TAC 111.111(a) Visible Emissions, specifically (1) stationary vents or (8) other sources?

Periodic monitoring can apply to Chapter 111(a), depending on what the unit is subject to.

5. Should we email the updated forms or is there a way to submit them in STEERS?

You can email the forms to me and then certify them later.

I also need

- an OP-UA12 (Unit ID FUG has UA12 as its' applicable form, but no UA-12 was submitted)
- an updated pg 87 OP-REQ1 (NSR permit 80829 has 7 separate instances/dates on pg 87, only the latest version should be on the OP-REQ1)

Based on the information provided above, would you be able to email me the needed information/updated forms by **12/02/2024**?

Sincerely,

Savannah G. Quiros

Hi Savannah,

Thank you for the update and clarification. Previous air permit applications categorized the VCUs as flares so we appreciate the explanation of how the VCUs are handled in the NSR permit.

We will update the forms as required; however, we do have some additional questions about the forms to be changed.

1. Is OP-UA7 still required for VCU1 and VCU2?
2. If OP-UA7 is not required, should we submit a revised OP-SUM with OP-UA7 removed from the VCU1 and VCU2 lines?
3. We will update PM and CAM options for SOP Index No. R5211-0001. We had included periodic monitoring for 30 TAC 111.111(a)(4) for visible emissions from gas flares. Should we remove these monitoring requirements?
4. Is 30 TAC 122.602 Periodic Monitoring applicable based on the requirements in 30 TAC 111.111(a) Visible Emissions, specifically (1) stationary vents or (8) other sources?
5. Should we email the updated forms or is there a way to submit them in STEERS?

We will submit the updated forms shortly upon receiving these answers. Please let me know if you have any additional comments.

Hi Cassandra,

In regards to the OP-CRO1 through STEERS: Because Kevin sent the application through STEERS, it is automatically certified (so no OP-CRO1 needed in this case). As long as the forms are submitted using the DAR's or RO's STEERS account, the documents are certified! In the future, there should be an option to submit "miscellaneous" forms as attachments..

I spoke with my technical specialist about the VCUs: the VCUs appear to be represented as vapor combustors in the NSR permit since the monitoring is temperature based. A flare would have to be monitored for the absence of a pilot flame. I see you filled out OP-UA4, Table 1.b; the control device code "COMB" would be most correct, and you may get PM requirement PM- V-008. Does you agree with this assessment? If so, I would need updated OP-UA4 and OP-MON forms through STEERS. Let me know

Sincerely,

Subject: Permit No. 04572 Project No. 35937 Musket Fort Worth

Hello Savannah,

I am reaching out regarding the application submitted through STEERS on September 13, 2024. We didn't see where to submit CRO1 in STEERS but Kevin did sign the application. I'm including CRO1 here just in case. The application differs from the existing NSR permit and we would like to provide clarity.

The application was submitted with the VCU1 and VCU2 units permitted as flares in the application based on previous applications and NSR Permit No. 80829. However, we have become aware that these units may meet the Texas definition of vapor combustor in 30 TAC 101.1(112). While the NSR permit does not explicitly call VCU1 and VCU2 flares, the permit conditions appear to treat the units as flares and not vapor combustor units. Per our conversation on September 12, 2024, we would like a discussion to clarify how these units should be dealt with in the permit application moving forward.

Additionally, the NSR permit includes 40 CFR 60, Subpart XX Standards for Bulk Gasoline Terminals. The facility does not load, unload, or store gasoline. An NSR application was submitted to bring gasoline to the facility; however, the facility never began service for gasoline. Regardless of gasoline throughput, the facility receives all product by rail and Subpart XX only applies to gasoline terminals that receive gasoline by pipeline, ship, or barge.

The NSR permit includes exemption requirements for 40 CFR 63, Subpart R. The facility should not be exempt from Subpart R, as Subpart R is not applicable for the same reasons stated above for Subpart XX.

Please let me know when you have availability to discuss these items.

Subject: Full Application for Initial Title V Application for Musket Fort Worth Fuel Terminal

Dear Savannah Quiros:

Geosyntec Consultants, Inc. (Geosyntec) is submitting this Title V Permit Application package on behalf of Musket Corporation (Musket) to permit their facility in Fort Worth, Texas, located in Tarrant County. Tarrant County was redesignated from serious to severe nonattainment for ozone on November 7, 2022, which triggered the facility to change from a synthetic minor to major source, therefore requiring a Title V operating permit.

An abbreviated permit application was submitted on November 6, 2023, and the full application is being submitted to complete the requirement for a Title V operating permit. The facility description and emission rates are included below. Form OP-UA12, Fugitive Emissions Unit Attributes, is not included as none of the regulatory tables are applicable to fugitive emissions at the facility. The forms and files included in this application are:

- Form OP-1 Site Information Summary
- Form OP-CRO1 Certification by Responsible Official
- Form OP-REQ1 Area-Wide Applicability Determinations and General Information
- Form OP-ACPS Application Compliance Plan and Schedule
- Form OP-SUM Individual Unit Summary
- Form OP-REQ2 Negative Applicable/Superseded Requirement Determinations
- Form OP-REQ3 Applicable Requirements Summary
- Form OP-MON Monitoring Requirements
- Form OP-PBRSUP Permit by Rule Supplemental Table
- Form OP-UA2 Stationary Reciprocating Internal Combustion Engine Attributes
- Form OP-UA3 Storage Tank/Vessel Attributes
- Form OP-UA4 Loading/Unloading Operations Attributes
- Form OP-UA7 Flare Attributes
- Facility Description
- Attachment A: Regulatory Applicability
- Attachment B: Area Map
- Attachment C: Plot Plan
- Attachment D: Process Flow Diagram

FACILITY DESCRIPTION

The Musket facility located at 5101 Lone Star Boulevard, Fort Worth, is a bulk ethanol terminal that consists of ethanol and diesel railcar unloading, product storage tanks, tank truck loading, and a fire pump engine. Emissions from loading are controlled by a flare or a backup flare.

Denatured ethanol with up to 2% by weight gasoline is unloaded from railcars into storage tanks after arriving at the facility. Product storage at the facility consists of four 60,000-barrel internal floating roof (IFR) tanks (T-1 through T-4) and one 80,000-barrel IFR storage tank (T-5) for denatured ethanol storage. T-6 was permitted initially, but never constructed and is not included in this application. IFR tank emissions includes rim seal, withdrawal, deck fitting, and deck seam losses.

Diesel with up to 20% biodiesel is stored in one 12,000-gallon horizontal tank for refueling the tank trucks (TFUEL) and one 300-gallon horizontal tank for the foam system (TFOAMSYS).

Emissions from loading operations occur due to the displacement of vapors from tank trucks. Loading operations use bottom- or submerged-fill. Ethanol and diesel emissions from tank truck loading are controlled by a primary on-site flare (VCU2) or a backup flare (VCU1). The facility is limited to storing and loading 784,000,000 gallons per year (gal/yr) of denatured ethanol and 500,000 gal/yr of diesel. The flares use up to 400,000 standard cubic feet of natural gas for the pilot flame.

Although the flares are named VCU1 and VCU2 in the permit applications and in the issued Permit No. 80829 which would indicate a vapor combustion unit, the control units are permitted as flares.

The facility also includes one 227-horsepower diesel fire pump that operates for a maximum of six hours per year as well as fugitive emissions from valves, pumps, connectors, compressors, relief valves, open-ended lines, sampling, and process drains. Diesel loading DLOAD and engines ENG-832, ENG-867, and ENG-848 were previously authorized through Permit by Rules (PBR) and are no longer on site and therefore, not included in this permit application.

EMISSION RATES

The emissions associated with the Musket bulk ethanol facility are volatile organic compounds (VOCs), nitrogen oxides (NO_x), carbon monoxide (CO), sulfur dioxide (SO₂), and particulate matter (PM₁₀ and PM_{2.5}). Table 1 below details the facility-wide emission rates for each of these pollutants. The facility is a major source of VOC and NO_x emissions, as Tarrant County is designated as severe nonattainment for ozone. VOC and NO_x emissions exceed 25 tons per year (TPY). All other criteria emission rates and hazardous air pollutant (HAP) emission rates are below the major source threshold.

Table 1: Maximum Allowable Emission Rates

Emission Point No.	Source Name	Air Contaminant Name	Emission Rates	
			lbs/hour	TPY
T-1	IFR Storage Tank	VOC	0.5	0.46

Regulatory Applicability

1. REGULATORY APPLICABILITY

Geosyntec reviewed Federal and Texas air quality regulations to determine applicable air regulations to the Title V application (Project) at the Musket Fort Worth Fuel Terminal (Facility). The regulations that potentially apply to ethanol loading and storage are described in the following subsections.

Musket is currently in compliance with applicable regulations and is submitting this Title V air permit application to comply with 30 Texas Administrative Code (TAC) Chapter 122.

1.1 Federal Regulations

Standards of Performance of New Stationary Sources

The United States Environmental Protection Agency (USEPA) has set forth standards of performance for specific new, reconstructed, and modified sources known as Standards of Performance of New Stationary Sources (NSPS) which are contained in 40 CFR Part 60. Each subsection below details federal regulations that were deemed potentially applicable and whether they apply.

40 CFR 60, Subpart A – General Provisions

The provisions of 40 CFR Part 60, Subpart A apply to the owner or operator of any stationary source subject to an NSPS. These general provisions include recordkeeping, reporting, monitoring, and testing requirements. Because the Project will be subject to NSPS, it will be required to comply with the applicable requirements of 40 CFR Part 60, Subpart A.

40 CFR 60 Subpart Kb - Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984

Tank T-1 through T-5 have a capacity over 151 m³, so this regulation does apply to the ethanol tanks. TFUEL and TFOAMSYS have a capacity less than 75 m³, so this regulation does not apply to the diesel and biodiesel tanks onsite.

40 CFR 60 Subpart IIII - Standards of Performance for Stationary Compression Ignition Internal Combustion Engines

ENG1, the emergency diesel fire pump engine, will adhere to the requirements of Subpart IIII as they apply to an emergency engine rated at 227 hp. 40 CFR Part 60.4205(c) requires fire pump engines with a displacement less than 30 liters per cylinder to comply with the emission standards in Table 4 of this Subpart.

40 CFR 60 Subpart XX - Standards of Performance for Bulk Gasoline Terminals That Commenced Construction, Modification, or Reconstruction After December 17, 1980, and On or Before June 10, 2022

The facility does not meet the definition of a bulk gasoline terminal, as gasoline is not received, stored, or loaded by the facility. Also, the facility does not receive product by pipeline, ship, or barge. The facility receives all product by rail.

National Emission Standards for Hazardous Air Pollutants

The US EPA has set forth standards of performance for specific new, reconstructed, and modified sources known as National Emission Standards for Hazardous Air Pollutants (NESHAP) for Source Categories which are contained in 40 CFR Part 63. Each subsection below details federal regulations that were deemed potentially applicable and whether they apply.

40 CFR Part 63, Subpart A – General Provisions

All sources subject to a 40 CFR 63 Subpart are required to meet the general provisions in Subpart A, as applicable.

40 CFR Part 63, Subpart ZZZZ – National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines

40 CFR Part 63, Subpart ZZZZ (National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines) (also referred to as RICE MACT) applies to stationary RICE located at a major or area source of HAP emissions. The Musket Facility is an area source of HAP emissions, therefore, the provisions of 40 CFR Part 63, Subpart ZZZZ apply to the emergency fire pump engine, ENG1. In accordance with 40 CFR §63.6590(c)(1), a stationary RICE located at an area source of HAP meets the requirements of 40 CFR Part 63, Subpart ZZZZ by meeting the requirements of 40 CFR Part 60, Subpart IIII or 40 CFR Part 60, Subpart JJJJ (Standards of Performance for Stationary Spark Ignition Internal Combustion Engines). The fire pump engine will comply with this regulation by meeting the requirements of 40 CFR 60 Subpart IIII.

1.2 State Regulations

Each facility submitting a New Source Review permit application must include a discussion of state regulatory requirements addressing 30 Texas Administrative Code (TAC) Chapters 101, 111, 112, 113, 115, and 117. A discussion for each chapter is broken out into the sections below.

1.2.1 Chapter 101 – General Air Quality Rules

§101.3 Circumvention

Musket is currently not using nor will they use in the future any activities or devices to dilute, conceal or to appear to minimize the effects of emissions from sources within the facility.

§101.4 Nuisance

There are no emissions of air contaminants or combined emissions in a concentration that would be expected to cause injury or adversely affect human health or welfare, plant or animal life, or property in any way.

§101.5 Traffic Hazard

There have not been nor are there any anticipated discharges of air contaminants, uncombined water or other materials to drift into the roadways and surrounding areas to cause traffic hazards or interference caused by emissions from the facility.

§101.8 Sampling

Upon request of the TCEQ, Musket will conduct sampling to determine the opacity, rate, composition, and/or concentration of the stream requested. Musket anticipates that the sampling method will be specified by the board or executive director and sampling will be conducted to show reasonable accuracy as needed.

§101.9 Sampling Ports

Upon request of the TCEQ, Musket will provide sampling ports if they are not already available.

§101.10 Emissions Inventory Requirement

The Musket Facility is a major source of VOC and NO_x in a nonattainment area. On an annual basis, Musket will file the appropriate emissions inventory data to the agency by the appropriate deadline.

§101.13-19 Administrative Provisions

Musket will comply with all applicable requirements in these sections as they apply to the Facility.

§101.20 Compliance with Environmental Protection Agency Standards

Musket will comply with all applicable requirements of NSPS and NESHAP standards that apply to this application.

§101.21 The National Primary and Secondary Ambient Air Quality Standard (NAAQS)

The facility is in Tarrant County, which is classified severe nonattainment for ozone. Facilities covered by this application will be operated to comply with all applicable requirements associated with the NAAQS.

§101.23 Alternate Emission Reduction ("Bubble") Policy

Operation of facilities covered by this application will not be regulated by the Alternative Emission Reduction Policy.

§101.24-27 Fees

Musket will submit all fees as required to the TCEQ.

§101.28 Stringency Determination for Federal Operating Permits

Musket is not requesting any more stringent requirements under this regulation.

§101.100-122 Failure to Attain Fee

Musket will comply with the requirements of this section as necessary.

§101.150-155 Voluntary Supplemental Leak Detection Program

Musket will comply with the regulations as necessary for the fugitive emissions subject to this leak detection program in association with this application.

§101.201 Emissions Event Reporting and Recordkeeping Requirements

Musket will comply with the reporting and recordkeeping requirements as they apply to the Facility in this section as necessary.

§101.211 Scheduled Maintenance, Startup, and Shutdown Reporting and Recordkeeping Requirements

Musket will comply with the requirements of this section for startup, shut down and scheduled maintenance as necessary.

§101.221-224 Operational Requirements, Demonstrations, and Actions to Reduce Excess Emissions

Musket will comply with the requirements of this section as necessary.

§101.231-233 Variances

Musket is not seeking a variance with this application; therefore, these sections do not apply.

§101.300-311 Emission Credit Banking and Trading

Musket is not seeking emission reduction credits associated with this application; therefore, these sections do not apply.

§101.330-339 Emissions Banking and Trading Allowances

These sections do not apply as this permit application does not have any electric generating facilities permitted under Chapter 116, Subchapter I (relating to Electric Generating Facility Permits). The only electric generating device is an emergency fire pump.

§101.350-363 Mass Emission Cap and Trade Program

This Musket facility is not located in the Houston-Galveston-Brazoria ozone nonattainment area, so it is not applicable.

§101.370-379 Discrete Emission Credit Banking and Trading

Musket will not generate or use any discrete emission credits in association with this application.

§101.390-403 Highly-Reactive Volatile Organic Compound (HRVOC) Emission Cap and Trade Program

Musket is not subject to the HRVOC Emission Cap and Trade Program because it has no known sources of HRVOC emissions; therefore, these sections do not apply.

§101.501-508 Clean Air Interstate Rule

Musket does not operate any units subject to the Clean Air Interstate Rule.

§101.600-602 Expedited Permitting

Musket is not requesting expedited processing of this application.

1.2.2 Chapter 111 – Control of Air Pollution from Visible Emissions and Particulate Matter

§111.111 Requirements for Specified Sources

Musket will comply with all applicable requirements in these sections as they apply to the Facility.

§111.113 Alternate Opacity Limitations

Musket does not anticipate that opacity will be an issue, therefore there is no need to apply for an alternate limit.

§111.121 Single-, Dual-, and Multiple-Chamber Incinerators

The equipment to be installed as part of this Facility does not include any incinerators, therefore this section does not apply.

§111.123 Medical Waste Incinerators

Musket is not installing a medical waste incinerator; therefore this section does not apply.

§111.124 Burning Hazardous Waste Fuels in Commercial Combustion Facilities

The equipment to be installed as part of this Facility does not include Commercial Combustion equipment; therefore this section does not apply.

§111.125 Testing Requirements

Since section 111.121 and 111.123 do not apply, this testing requirements section is not applicable to the Musket Facility. There will be no incinerators or burning of Hazardous Waste Fuels with this project.

§111.131-139 are based on Division 3 Abrasive Blasting of Water Storage Tanks Performed by Portable Operations

Division 3 does not apply to this project, therefore the subsections 111.131-139 do not apply.

§111.141-149 Division 4 – Materials Handling, Construction, Roads, Streets, Alleys and Parking Lots

Musket will take precautions to achieve control of dust emissions.

§111.151 Allowable Emissions Limits

Musket will comply with the PM emissions for any equipment installed as part of the Project.

§111.153 Emissions Limits for Steam Generators

The equipment does not have steam generators, therefore this section is not applicable.

§111.171- §111.175 Emissions on Agricultural Processes

The processes as part of the Project are not Agricultural in nature; therefore this part does not apply.

§111.181- §111.183 Exemptions for Portable or Transient Operations

There are no portable or transient operations as part of the Project; therefore this part does not apply.

1.2.3 Chapter 112 – Control of Air Pollution from Sulfur Compounds

§112.1 Definitions

Musket will comply with the sections of the Definitions as they apply to the Project.

§112.2 Compliance, Reporting and Recordkeeping

Musket will comply with this section as necessary based on the equipment installed as part of the Project.

§112.3 Net Ground Level Concentration

Musket will not cause the net ground level concentration of SO₂ to exceed 0.4 ppmv.

§112.4 Net Ground Level Concentration – Exemption Conditions

1.2.4 Chapter 113 – Standards of Performance for Hazardous Air Pollutants and for Designated Facilities and Pollutants

§113.1 Definitions

Musket will comply with the requirements of this section as necessary.

§113.100 General Provisions

Musket will comply with the requirements of this section as necessary.

§113.105 Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act

Musket is not a major source of hazardous air pollutants; therefore this section does not apply.

§113.106 List of Hazardous Air Pollutants, Petitions Process, Lesser Quantity Designations, Source Category List

Musket will comply with the requirements of this section as necessary.

§113.110 - §113.1090

These sections do not apply as they are for industries and emissions units not applicable to the Project.

§113.1090 Stationary Reciprocating Internal Combustion Engines

Musket will comply with the requirements of this section as applicable in 40 CFR 63, Subpart ZZZZ as applicable to the engines proposed to be installed.

§113.1100 - §113.1555

These sections do not apply because they are for industries and emissions units not applicable to the Project.

1.2.5 Chapter 114 – Control of Air Pollution from Motor Vehicles

Musket will operate any motor vehicles in compliance with the requirements of this regulation as implemented in the State of Texas.

1.2.6 Chapter 115 – Control of Air Pollution from Volatile Organic Compounds

§115.10 Definitions

Musket will comply with the requirements of this section as applicable to the Project.

§115.110-119 Storage of Volatile Organic Compounds

The Musket storage tanks only store products with a vapor pressure less than 1.5 psia. Musket will maintain sufficient records to demonstrate continuous compliance with the applicable exemption criteria.

§115.120-129 Vent Gas Control

Any vent streams as part of this project will be controlled in accordance with the control requirements specified in 115.122(c)(1).

§115.131-139 Water Separation

Musket does not have any water separation at the site.

§115.140-149 Industrial Wastewater

The Musket Facility is not an affected source category.

§115.152-159 Municipal Solid Waste Landfills

The Musket Facility does not operate any municipal solid waste landfill facilities, therefore these sections do not apply.

§115.160-169 Batch Processes

The Musket Facility does not operate any processes under the applicable SIC codes.

§115.170-183 Oil and Natural Gas Service in Ozone Nonattainment Areas

The Musket Facility does not operate any units subject to this requirement.

§115.211 Emission Specifications (Loading and Unloading of VOCs)

The Musket Facility does not operate a gasoline terminal, therefore §115.211 does not apply.

§115.212-219 Loading and Unloading of Volatile Organic Compounds

The Musket Facility located in Tarrant County, which is a nonattainment county. The facility is not a gasoline terminal or gasoline bulk plant; as such, vapors generated by loading of VOCs with a true maximum vapor pressure greater than or equal to 0.5 psia must be controlled as described by §115.212(b)(1).

§115.221-229 Filling of Gasoline Storage Vessels (Stage I) for Motor Vehicle Fuel Dispensing Facilities

There is no gasoline motor vehicle fuel dispensing associated with the facility, therefore these sections do not apply.

§115.234-239 Control of Volatile Organic Compound Leaks from Transport Vessels

Musket will not allow tank-trucks to be loaded unless the tank-truck has passed a leak-tight test within the past year.

§115.240-248 Control of Vehicle Refueling Emissions (Stage II) at Motor Vehicle Fuel Dispensing Facilities

There is no gasoline vehicle fueling station at the facility, therefore these sections do not apply.

§115.252-259 Control of Reid Vapor Pressure of Gasoline

The Musket Facility is not located in the El Paso area, therefore these sections do not apply.

§115.311-359 Process Unit Turnaround and Vacuum-Producing Systems in Petroleum Refineries

The Musket Facility is not a petroleum refinery or a gasoline processing operation, therefore these sections do not apply.

§115.410-479 Solvent-Using Processes

The Musket Facility does not have any emissions units or processes subject to this requirement.

§115.510-539 Cutback Asphalt and Pharmaceutical Manufacturing Facilities

The Musket Facility does not have any emissions units or processes subject to this requirement.

§115.540-549 Degassing or Cleaning of Stationary, Marine, and Transport Vessels

The Musket Facility does not have any emissions units or processes subject to this requirement.

§115.552-559 Petroleum Dry Cleaning Systems

The Musket Facility does not have any emissions units or processes subject to this requirement.

§115.600-619 Automotive Windshield Washer Fluid

The Musket Facility does not have any emissions units or processes subject to this requirement.

§115.720-789 Highly-Reactive Volatile Organic Compounds

The Musket Facility is not located in the Houston/Galveston/Brazoria (HGB) ozone non-attainment area, therefore these sections do not apply.

§115.901-916 Alternate Means of Control

Musket is not requesting an Alternate Means of Control (AMOC) as part of this permit application, therefore these sections do not apply.

§115.920-923 Early Reductions

Musket is not requesting an extension to comply with any requirement in this chapter, therefore these sections do not apply.

§115.930-940 Compliance and Control Plan Requirements

A schedule for achieving compliance with the applicable sections of this regulation will be provided upon request by the Executive Director.

§115.950 Emissions Trading

Emission reduction credits and discrete emission reduction credits will not be used to meet the emission control requirements of this chapter.

1.2.7 Chapter 116 – Control of Air Pollution by Permits for New Construction or Modification

Musket is not constructing or modifying any emissions units as part of this permit application and is not subject to new construction or modification requirements.

1.2.8 Chapter 117 – Control of Air Pollution from Nitrogen Compounds

§117.100-156 Beaumont-Port Arthur Ozone Nonattainment Area Major Sources

Musket is not located in the subject area, therefore the requirements are not applicable.

§117.200-252 Bexar County Ozone Nonattainment Area Major Sources

Musket is not located in the subject area, therefore the requirements are not applicable.

§117.300-356 Houston-Galveston-Brazoria Ozone Nonattainment Area Major Sources

Musket is not located in the subject area, therefore the requirements are not applicable.

§117.400-456 Dallas-Fort Worth Eight-Hour Ozone Nonattainment Area Major Sources

The only unit potentially subject to these requirements is the fire pump engine, however, the fire pump engine is exempt from the requirements except §117.410(f), 117.440(i), 117.445(f)(4) and (9), 117.450, and 117.454. The fire pump engine is exempt per §117.403(a)(9) as it is limited to less than 100 hours per year operation in nonemergency situations. The fire pump engine is subject to §117.410(f), 117.440(i), 117.445(f)(4) and (9), 117.450, and 117.454. Musket does not operate any other subject units per §117.400.

Subchapter 117C Combustion Control at Major Utility Electric Generation Sources in Ozone Nonattainment Areas

Musket does not operate any units subject to this subpart.

Subchapter 117D Combustion Control at Minor Sources in Ozone Nonattainment Areas

Musket is a major source of air pollution and not subject to requirements for minor sources.

Subchapter 117E Multi-Region Combustion Control

Musket does not operate any units subject to this subpart.

Subpart 117F Acid Manufacturing

Musket does not operate any units subject to this subpart.

Subpart 117G General Monitoring and Testing Requirements

Musket is not required to monitor or test under the requirements of this chapter.

Subpart 117H Administrative Provisions

Musket will comply with the schedule in §117.9030.

1.2.9 Chapter 118 – Control of Air Pollution Episodes

The Musket Facility will implement all reasonably available emission reduction methods in the event of a Level I air pollution episode and will comply with the TCEQ directions to reduce or curtail emission rates in the event of a Level II episode. The Musket Facility is not a major source and is not located in El Paso, Galveston, Harris, Jefferson, or Orange counties, therefore emission reduction plan is not required for this facility.

1.2.10 Chapter 122 – Federal Operating Permits Program

§122.110 - 165 Permit Requirements

The Musket Facility is a major source and is applying for a Federal Operating Permit.

§122.201 - 243 Initial Permit Issuances, Revisions, Reopenings, and Renewals

The Musket Facility will comply with these requirements as necessary.

§122.312 - 360 Public Announcement, Public Notice, Affected State Review, Notice and Comment Hearing, Notice of Proposed Final Action, EPA Review, and Public Petition

The Musket Facility will comply with these requirements as necessary.

§122.410 - 414 Acid Rain Permits

Musket does not operate any units subject to acid rain requirements.

§122.501 - 510 General Operating Permits

Musket is not applying for a General Operating Permit.

§122.602 - 606 Periodic Monitoring and Compliance Assurance Monitoring

The VCUs and the ethanol liquid loading are both required to implement periodic monitoring per §122.602. Ethanol liquid loading is also required to implement compliance assurance monitoring. Musket has included Form OP-MON.

Form OP-ACPS
Application Compliance Plan and Schedule

Date:	Regulated Entity No.:	Permit No.:
Company Name: Musket Corporation		Area Name: Musket Fort Worth Fuel Terminal

- Part 1 of this form must be submitted with all initial FOP applications and renewal applications.
- The Responsible Official must use Form OP-CRO1 (Certification by Responsible Official) to certify information contained in this form in accordance with 30 TAC § 122.132(d)(8).

Part 1

A. Compliance Plan — Future Activity Committal Statement	
The <i>Responsible Official</i> commits, utilizing reasonable effort, to the following: As the responsible official it is my intent that all emission units shall continue to be in compliance with all applicable requirements they are currently in compliance with, and all emission units shall be in compliance by the compliance dates with any applicable requirements that become effective during the permit term.	
B. Compliance Certification - Statement for Units in Compliance* (Indicate response by entering an "X" in the appropriate column)	
1. With the exception of those emission units listed in the Compliance Schedule section of this form (Part 2, below), and based, at minimum, on the compliance method specified in the associated applicable requirements, are all emission units addressed in this application in compliance with all their respective applicable requirements as identified in this application?	☐ YES ☒ NO
2. Are there any non-compliance situations addressed in the Compliance Schedule Section of this form (Part 2)?	☐ YES ☒ NO
3. If the response to Item B.2, above, is "Yes," indicate the total number of Part 2 attachments included in this submittal. <i>(For reference only)</i>	
* For Site Operating Permits (SOPs), the complete application should be consulted for applicable requirements and their corresponding emission units when assessing compliance status. For General Operating Permits (GOPs), the application documentation, particularly Form OP-REQ1 should be consulted as well as the requirements contained in the appropriate General Permits portion of 30 TAC Chapter 122. Compliance should be assessed based, at a minimum, on the required monitoring, testing, record keeping, and/or reporting requirements, as appropriate, associated with the applicable requirement in question.

F. Control of VOC Leaks from Transport Vessels (Complete this section for GOP applications for GOPs 511, 512, 513 and 514 only) (continued)		
◆	2. Tank-truck tanks are filled with non-gasoline VOCs having a TVP greater than or equal to 0.5 psia under actual storage conditions at a facility subject to 30 TAC § 115.214(a)(1)(C) within the application area.	☒ YES ☐ NO ☐ N/A
◆	3. Tank-truck tanks are filled with, or emptied of, gasoline at a facility that is subject to 30 TAC § 115.214(b)(1)(C) or 115.224(2) within the application area.	☐ YES ☐ NO ☒ N/A
G. Control of Vehicle Refueling Emissions (Stage II) at Motor Vehicle Fuel Dispensing Facilities		
◆	1. The application area includes one or more motor vehicle fuel dispensing facilities and gasoline is transferred from a stationary storage container into motor vehicle fuel tanks. <i>If the response to Question III.G.1 is "NO" or "N/A," go to Section III.H.</i>	☐ YES ☒ NO ☐ N/A
◆	2. The application area includes facilities that began construction on or after November 15, 1992 and prior to May 16, 2012.	☐ YES ☐ NO
◆	3. The application area includes facilities that began construction prior to November 15, 1992. <i>If the responses to Questions III.G.2 and Question III.G.3 are both "NO," go to Section III.H.</i>	☐ YES ☐ NO
◆	4. The application area includes only facilities that have a monthly throughput of less than 10,000 gallons of gasoline.	☐ YES ☐ NO
◆	5. The decommissioning of all Stage II vapor recovery control equipment located in the application area has been completed and the decommissioning notice submitted.	☐ YES ☐ NO ☐ N/A

K. Cutback Asphalt	
1. Conventional cutback asphalt containing VOC solvents for the paving of roadways, driveways, or parking lots, is used or specified for use in the application area by a state, municipal, or county agency. <i>If the response to Question III.K.1 is "N/A," go to Section III.L.</i>	☐ YES ☒ NO ☐ N/A
2. The use, application, sale, or offering for sale of conventional cutback asphalt containing VOC solvents for the paving of roadways, driveways, or parking lots occurs in the application area.	☐ YES ☒ NO ☐ N/A
3. Asphalt emulsion is used or produced within the application area.	☐ YES ☒ NO
4. The application area is using an alternate control requirement as specified in 30 TAC § 115.513. <i>If the response to Question III.K.4 is "NO," go to Section III.L.</i>	☐ YES ☒ NO
5. The application area uses, applies, sells, or offers for sale asphalt concrete, made with cutback asphalt, that meets the exemption specified in 30 TAC § 115.517(1).	☐ YES ☐ NO
6. The application area uses, applies, sells, or offers for sale cutback asphalt that is used solely as a penetrating prime coat.	☐ YES ☐ NO
7. The applicant using cutback asphalt is a state, municipal, or county agency.	☐ YES ☐ NO
L. Degassing of Storage Tanks, Transport Vessels and Marine Vessels	
◆ 1. The application area includes degassing operations for stationary, marine, and/or transport vessels. <i>If the response to Question III.L.1 is "NO" or "N/A," go to Section III.M.</i>	☒ YES ☐ NO ☐ N/A
◆ 2. Degassing of only ocean-going, self-propelled VOC marine vessels is performed in the application area. <i>If the response to Question III.L.2 is "YES," go to Section III.M.</i>	☐ YES ☒ NO ☐ N/A

VIII. Title 40 Code of Federal Regulations Part 63 - National Emission Standards for Hazardous Air Pollutants for Source Categories (continued)	
C. Subpart G - National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater	
Applicability	
1. The application area is located at a site that is subject to 40 CFR 63, Subpart F and the application area includes process vents, storage vessels, transfer racks, or waste streams associated with a chemical manufacturing process subject to 40 CFR 63, Subpart F. <i>If the response to Question VIII.C.1 is "NO," go to Section VIII.D.</i>	☐ YES ☐ NO
2. The application area includes fixed roofs, covers, and/or enclosures that are required to comply with 40 CFR § 63.148.	☐ YES ☐ NO
3. The application area includes vapor collection systems or closed-vent systems that are required to comply with 40 CFR § 63.148. <i>If the response to Question VIII.C.3 is "NO," go to Question VIII.C.8.</i>	☐ YES ☐ NO
4. The application area includes vapor collection systems or closed-vent systems that are constructed of hard-piping.	☐ YES ☐ NO
5. The application area includes vapor collection systems or closed-vent systems that contain bypass lines that could divert a vent stream away from a control device and to the atmosphere. <i>If the response to Question VIII.C.5 is "NO," go to Question VIII.C.8.</i>	☐ YES ☐ NO
Vapor Collection and Closed Vent Systems	
6. Flow indicators are installed, calibrated, maintained, and operated at the entrances to bypass lines in the application area.	☐ YES ☐ NO
7. Bypass lines in the application area are secured in the closed position with a car-seal or a lock-and-key type configuration.	☐ YES ☐ NO

<i>Reloading or Cleaning of Railcars, Tank Trucks, or Barges</i>	
8. The application area includes reloading and/or cleaning of railcars, tank trucks, or barges that deliver HAPs to a storage tank. <i>If the response to Question VIII.C.8 is "NO," go to Question VIII.C.11.</i>	☐ YES ☐ NO
9. The application area includes operations that are complying with § 63.119(g)(6) through the use of a closed-vent system with a control device used to reduce inlet emissions of HAPs by at least 95 percent by weight or greater.	☐ YES ☐ NO
10. The application area includes operations that are complying with § 63.119(g)(6) through the use of a vapor balancing system.	☐ YES ☐ NO
<i>Transfer Racks</i>	
11. The application area includes Group 1 transfer racks that load organic HAPs.	☐ YES ☐ NO

2. Sterilization facilities located in the application area are subject to 40 CFR Part 63, Subpart O. <i>If the response to Question VIII.E.2 is "NO," go to Section VIII.F.</i>	☐ YES ☐ NO
3. The sterilization source has used less than 1 ton (907 kg) of ethylene oxide within all consecutive 12-month periods after December 6, 1996.	☐ YES ☐ NO
4. The sterilization source has used less than 10 tons (9070 kg) of ethylene oxide within all consecutive 12-month periods after December 6, 1996.	☐ YES ☐ NO
F. Subpart Q - National Emission Standards for Industrial Process Cooling Towers	
1. The application area includes industrial process cooling towers. <i>If the response to Question VIII.F.1 is "NO," go to Section VIII.G.</i>	☐ YES ☒ NO
2. Chromium-based water treatment chemicals have been used on or after September 8, 1994.	☐ YES ☐ NO
G. Subpart R - National Emission Standards for Gasoline Distribution Facilities (Bulk Gasoline Terminals and Pipeline Breakout Stations)	
1. The application area includes a bulk gasoline terminal.	☐ YES ☒ NO
2. The application area includes a pipeline breakout station. <i>If the responses to Questions VIII.G.1 and VIII.G.2 are both "NO," go to Section VIII.H.</i>	☐ YES ☒ NO
3. The bulk gasoline terminal or pipeline breakout station is located within a contiguous area and under common control with another bulk gasoline terminal or a pipeline breakout station. <i>If the response to Question VIII.G.3 is "YES," go to Question VIII.G.10.</i>	☐ YES ☐ NO

1. The application area includes processes that produce pulp, paper, or paperboard and are located at a plant site that is a major source of HAPs as defined in 40 CFR § 63.2. <i>If the response to Question VIII.H.1 is "NO," go to Section VIII.I.</i>	☐ YES ☒ NO
2. The application area uses processes and materials specified in 40 CFR § 63.440(a)(1) - (3). <i>If the response to Question VIII.H.2 is "NO," go to Section VIII.I.</i>	☐ YES ☐ NO
3. The application area includes one or more sources subject to 40 CFR Part 63, Subpart S that are existing sources. <i>If the response to Question VIII.H.3 is "NO," go to Section VIII.I.</i>	☐ YES ☐ NO
4. The application area includes one or more kraft pulping systems that are existing sources.	☐ YES ☐ NO
5. The application area includes one or more dissolving-grade bleaching systems that are existing sources at a kraft or sulfite pulping mill.	☐ YES ☐ NO
6. The application area includes bleaching systems that are existing sources and are complying with the Voluntary Advanced Technology Incentives Program for Effluent Limitation Guidelines in 40 CFR § 430.24. <i>If the response to Question VIII.H.6 is "NO," go to Section VIII.I.</i>	☐ YES ☐ NO
7. The application area includes bleaching systems that are complying with 40 CFR § 63.440(d)(3)(i).	☐ YES ☐ NO
8. The application area includes bleaching systems that are complying with 40 CFR § 63.440(d)(3)(ii).	☐ YES ☐ NO

I. Subpart T - National Emission Standards for Halogenated Solvent Cleaning	
1. The application area includes an individual batch vapor, in-line vapor, in-line cold, and/or batch cold solvent cleaning machine that uses a hazardous air pollutant (HAP) solvent, or any combination of halogenated HAP solvents, in a total concentration greater than 5% by weight, as a cleaning and/or drying agent.	☐ YES ☒ NO
2. The application area is located at a major source and includes solvent cleaning machines, qualifying as affected facilities, that use perchloroethylene, trichloroethylene or methylene chloride.	☐ YES ☒ NO
3. The application area is located at an area source and includes solvent cleaning machines, other than cold batch cleaning machines, that use perchloroethylene, trichloroethylene or methylene chloride.	☐ YES ☒ NO
J. Subpart U - National Emission Standards for Hazardous Air Pollutant Emissions: Group 1 Polymers and Resins	
1. The application area includes elastomer product process units and/or wastewater streams and wastewater operations that are associated with elastomer product process units. <i>If the response to Question VIII.J.1 is "NO," go to Section VIII.K.</i>	☐ YES ☒ NO
2. Elastomer product process units and/or wastewater streams and wastewater operations located in the application area are subject to 40 CFR Part 63, Subpart U. <i>If the response to Question VIII.J.2 is "NO," go to Section VIII.K.</i>	☐ YES ☐ NO
3. The application area includes process wastewater streams that are designated as Group 1 or are determined to be Group 1 for organic HAPs as defined in 40 CFR § 63.482.	☐ YES ☐ NO
4. The application area includes process wastewater streams that are Group 2 for organic HAPs as defined in 40 CFR § 63.482.	☐ YES ☐ NO

Correct, if the units are no longer on site nor being used, they and their corresponding construction authorizations do not need to be included on the OP-PBRSUP or OP-SUM forms.

Hello Savannah,

For the PBRSUP and SUM forms, the facility obtained or claimed PBRs in the past for units that are no longer at the facility. I just wanted to verify that these PBRs and units do not need to be listed on the application forms, correct?

Subject: Technical Review - FOP O4572/Project 35937, Musket Corporation/Fort Worth Fuel Terminal

Cassandra,

My name is Savannah Quiros and I have been assigned to the Federal Operating Permit (FOP) initial issuance application of Permit No. O4572 for Musket Corporation, Fort Worth Fuel Terminal. This application has been assigned Project No. 35937. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

As an FYI, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

1. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
1. Reference to confidential business information (CBI) in NSR permits and PBR submittals.

1. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
1. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#) [tceq.texas.gov].

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf [tceq.texas.gov]. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Savannah G. Quiros
