Thanks, David! Please see attached a revised draft reflecting this change. The only difference is in the language in Special Term and Condition 3.A. It no longer refers to a construction date since vents constructed both before and after the 1972 date are complying with the 20% opacity limit.

The update to the OP-REQ1 does need to be certified, so you can either upload the page in STEERS and have the RO or DAR sign/submit, or you can obtain an OP-CRO1 to certify today's submittal. If you choose the OP-CRO1, you can send me a scan of the signed form, but then please follow up with the wet ink original in the mail. Please address this certification request by **Wednesday, May 21, 2025**.

Subject: RE: [EXTERNAL] FW: Working Draft Permit Review -- FOP O1238/Project 36448, NuStar Logistics, L.P./Corpus Christi Terminal

Hi David,

The project has completed our internal quality and team leader review. Only one item came up to address before we can send out the public notice package. The issue pertains to answers on the OP-REQ1 with regard to stationary vents subject to 30 TAC Chapter 111.

In previous projects, question I.A.1 was answered "No", indicating that there were no stationary vents constructed on or before January 31, 1972. However, in the current project, that question was answered "Yes", but no further information was provided about those vents. Please confirm which of the following is correct and provide the necessary information:

- 1) There are no vents constructed on or before January 31, 1972. If this is accurate, please provide a corrected page 1 of the OP-REQ1 with question I.A.1 answered "No."
- 2) There are vents constructed on or before January 31, 1972. If this is accurate, please provide the following form updates based on how you want these addressed in the permit:
 - a. If you wish to voluntarily comply with the 20% opacity limit in 111.111(a)(1)(B) for these older vents, then they can be covered by the language for that limit that is already in the Special Terms and Conditions of the permit. The only thing you would

- need is to provide a corrected page 1 of the OP-REQ1 with question I.A.3 answered "Yes". (I.A.1 already has the Yes, so no changes would be needed for that question.)
- b. If you wish to comply with the normal requirements for these older vents (the 30% opacity limit in 111.111(a)(1)(A)), then the vents need to be listed as units. They'll appear in the Applicable Requirements Summary of the permit. In this case, the OP-REQ1 answers are fine. You would need to list each vent on the OP-SUMR and Table 1a of the OP-UA15. Then, if "Vent Source" is "OTHER", and "Opacity Monitoring System" is "NONE", you would also need to provide periodic monitoring on the OP-MON. In addition to the options we have in our Periodic Monitoring Guidance document, we also have an additional option that is not yet in the guidance, PM-P-032, which is quarterly visible emissions monitoring. You can use any appropriate option, or propose case-by-case.

Also, to clarify a common misconception – when the source routed to the vent is from colorless VOCs, non-fuming liquids, or other sources that are not capable of producing visible emissions, it is true that periodic monitoring would not apply. However, the opacity limit in Chapter 111 still does apply and needs to appear in the permit (the vent is just in compliance by default). So, if there are older vents complying with 111.111(a)(1)(A), and they were not listed because they come from those types of sources, then yes, they need to be addressed. We have a code choice on the UA-15 for the "Vent Source" question of "NOVIS" for this exact type of vent. That will lead to 111.111(a)(1)(A) appear in the permit, but no additional monitoring would be required.

Please provide the information above by **Wednesday, May 14, 2025**. (The information will need to be certified, so you can either have the information uploaded in STEERS, or you can send me an OP-CRO1 [may be scanned, but follow-up with wet ink original in mail]).

If you have any questions as you prepare this response, feel free to contact me.

Carolyn,

The updates to the Form OP-1 along with certification form OP-CRO1 are attached. The changes noted in your e-mail have been made. In addition, the State Representative has been updated.

- The application will be placed at the La Retama Central Library here in Corpus Christi;
- Contact information for the RO and myself have been updated; and
- The current State Representative is Denise Villalobos. The change is due to election since the application was initially submitted.

I will mail the original OP-CRO1 to your attention.

Thank you for returning my call. Please let me know if you have any questions or additional information is needed.

Hi David,

Just wanted to give you an update and request some administrative information. The project is going through our internal quality and management reviews, after which we'll be able to send out the public notice package to you. I do need a couple details:

- 1) Please provide an revised Technical Contact section of Form OP-1 with your information. This is where you can provide your new mailing address that you had mentioned and you can also update your email to the Sunoco email. That way I can get those updates into our system.
- 2) Please also provide a revised Public Notice section of Form OP-1. Since you are the public notice contact you can update your address in this section. In addition, for the public viewing location we try to have it be a different place than the TCEQ regional office, such as a library, courthouse, city hall, etc. (The documents are accessible from TCEQ Central Office and the regional office anyway, which the notice will mention, but we have found it is helpful if there is a non-TCEQ location also.) The TCEQ regional office is technically allowed to be used in your case because it is located in the same county as the site. So, if that is the place you want to stick with, just let me know. Otherwise, provide a different location on the form. I believe the site did use a library in the past.

If you can send me these by **Friday, March 14, 2025**, that would be great. I do need these to be certified as well, so you can either upload them in STEERS and have the RO sign/submit, or you can provide an OP-CRO1. If emailing the OP-CRO1, please follow up with the wet ink original in the mail later.

Thanks!

Hi Natasha,

Hope you had a pleasant holiday season. Attached is a revised WDP. The only change has been to update the date reference in Special Term and Condition 10 to use the date from your latest OP-PBRSUP submittal. (All your form updates matched what I had tentatively chosen on my end, so there were no changes to any applicable requirements or permit shields from the first draft.)

At this time I will prepare the file for public notice and our internal quality check. The only thing I need from you is certification for your responses from December 6. You can do this in one of several ways:

Form OP-CRO1
Certification by Responsible Official
Federal Operating Permit Program
Texas Commission on Environmental Quality

All initial issuance, revision, renewal, and reopening permit application submittals requiring certification must be addressed using this form. Updates to site operating permit (SOP) and temporary operating permit (TOP) applications, other than public notice verification materials, must be certified prior to authorization of public notice or start of public announcement. Updates to general operating permit (GOP) applications must be certified prior to receiving an authorization to operate under a GOP.

Carolyn,

I appreciate you taking my call last week and allowing for additional time to submit the OP-CRO1. The RO hasn't been available as yet to go over the submittal and get a signature. However, in the interim I wanted to send you the attached OP-CRO2 designation of RO.

Wes Gore was the RO when the application was submitted, however, we had to designate a different RO for various reasons immediately after the acquisition of NuStar by Sunoco LP. In short, I'm not certain the TCEQ database has the most up-to-date RO information. NuStar Logistics, LP is still the legal operating entity that owns and operates the Corpus Christi Terminal so there are no changes to the name or owner/operator. However, communications will be on Sunoco letterhead and from Sunoco e-mail addresses.

In addition, the mailing address for our administrative office here in Corpus Christi has changed. We are now located at the Corpus Christi Terminal at 2829 Texaco Rd. I'll discuss with Natasha and determine what forms need to be updated with the current address for Wes and I.

Hi Natasha,

Thanks for your comments. I will look through everything and prepare a revised working draft permit to send back to you.

In regard to MACT BBBBBB for F-1 and F-2, when our rule analysis was still pending, we had placeholders using “high-level” language for the unit types that we thought might need unit attribute forms developed. Therefore, fugitive units would have that language in the Applicable Requirements Summary, which is what you see in the effective permit. However, we then determined that the equipment leak (fugitive) portion of this rule should only be sitewide, due to how the citations were written, and that we would not be creating a unit attribute form for fugitive units after all. Our rule analysis is now complete. The equipment leak citations are included in Special Term and Condition 7 in your permit and there will no longer be an Applicable Requirements Summary row for F-1 and F-2 for this rule.

Hope that clarifies the situation a bit. As I review your responses I’ll let you know if there is anything else I need to complete the revised WDP.

Sincerely,

Subject: Working Draft Permit Review -- FOP O1238/Project 36448, NuStar Logistics, L.P./Corpus Christi Terminal

Good evening,

I have conducted a technical review of the renewal application for NuStar Logistics, L.P., Corpus Christi Terminal. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **Thursday, December 5, 2024**. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

final review of the WDP, additional changes supported by application updates may require

determined to be in compliance, the RO may certify that the source is in compliance with the applicable opacity requirement. However, if an opacity test is performed and the source is determined to be out of compliance, the permit holder shall list this occurrence as a deviation on the next deviation report as required under 30 TAC § 122.145(2). The opacity test must be performed by a certified opacity reader.

- (c) Some vents may be subject to multiple visible emission or monitoring requirements. All credible data must be considered when certifying compliance with this requirement even if the observation or monitoring was performed to demonstrate compliance with a different requirement.

B. Emission limits on nonagricultural processes, except for the steam generators specified in 30 TAC § 111.153, shall comply with the following requirements:

- (i) Emissions of PM from any source may not exceed the allowable rates as required in 30 TAC § 111.151(a) (relating to Allowable Emissions Limits)
- (ii) Sources with an effective stack height (h_e) less than the standard effective stack height (H_e), must reduce the allowable emission level by multiplying it by $[h_e/H_e]^2$ as required in 30 TAC § 111.151(b)
- (iii) Effective stack height shall be calculated by the equation specified in 30 TAC § 111.151(c)

C. Outdoor burning, as stated in 30 TAC § 111.201, shall not be authorized unless the following requirements are satisfied:

- (i) Title 30 TAC § 111.207 (relating to Exception for Recreation, Ceremony, Cooking, and Warmth)
- (ii) Title 30 TAC § 111.219 (relating to General Requirements for Allowable Outdoor Burning)
- (iii) Title 30 TAC § 111.221 (relating to Responsibility for Consequences of Outdoor Burning)

Commented [NH1]: New Condition

4. The permit holder shall comply with the following requirements for units subject to any subpart of 40 CFR Part 60, unless otherwise stated in the applicable subpart:

- A. Title 40 CFR § 60.7 (relating to Notification and Recordkeeping)
- B. Title 40 CFR § 60.8 (relating to Performance Tests)
- C. Title 40 CFR § 60.11 (relating to Compliance with Standards and Maintenance Requirements)
- D. Title 40 CFR § 60.12 (relating to Circumvention)
- E. Title 40 CFR § 60.13 (relating to Monitoring Requirements)
- F. Title 40 CFR § 60.14 (relating to Modification)

8. The permit holder shall comply with certified registrations submitted to the TCEQ for purposes of establishing federally enforceable emission limits. A copy of the certified registration shall be maintained with the permit. Records sufficient to demonstrate compliance with the established limits shall be maintained. The certified registration and records demonstrating compliance shall be provided, on request, to representatives of the appropriate TCEQ regional office and any local air pollution control agency having jurisdiction over the site. The permit holder shall submit updated certified registrations when changes at the site require establishment of new emission limits. If changes result in emissions that do not remain below major source thresholds, the permit holder shall submit a revision application to codify the appropriate requirements in the permit.

Commented [NH2]: New Condition

Additional Monitoring Requirements

9. The permit holder shall comply with the periodic monitoring requirements as specified in the attached "Periodic Monitoring Summary" upon issuance of the permit. Except for, as applicable, monitoring malfunctions, associated repairs, and required quality assurance or control activities (including, as applicable, calibration checks and required zero and span adjustments), the permit holder shall conduct all monitoring in continuous operation (or shall collect data at all required intervals) at all times that the pollutant-specific emissions unit is operating. The permit holder may elect to collect monitoring data on a more frequent basis and average the data, consistent with the averaging time or minimum frequency specified in the "Periodic Monitoring Summary," for purposes of determining whether a deviation has occurred. However, the additional data points must be collected on a regular basis. In no event shall data be collected and used in particular instances to avoid reporting deviations. Deviations shall be reported according to 30 TAC § 122.145 (Reporting Terms and Conditions).

New Source Review Authorization Requirements

10. Permit holder shall comply with the requirements of New Source Review authorizations issued or claimed by the permit holder for the permitted area, including permits, permits by rule (including the terms, conditions, monitoring, recordkeeping, and reporting identified in registered PBRs and permits by rule identified in the PBR Supplemental Tables dated March 13, 2024 in the application for project 36448), standard permits, flexible permits, special permits, permits for existing facilities including Voluntary Emissions Reduction Permits and Electric Generating Facility Permits issued under 30 TAC Chapter 116, Subchapter I, or special exemptions referenced in the New Source Review Authorization References attachment. These requirements:
- A. Are incorporated by reference into this permit as applicable requirements
 - B. Shall be located with this operating permit
 - C. Are not eligible for a permit shield
11. The permit holder shall comply with the general requirements of 30 TAC Chapter 106, Subchapter A or the general requirements, if any, in effect at the time of the claim of any PBR.
12. The permit holder shall maintain records to demonstrate compliance with any emission limitation or standard that is specified in a permit by rule (PBR) or Standard Permit listed in the New Source Review Authorizations attachment. The records shall yield reliable data from the relevant time period that are representative of the emission unit's compliance with the PBR or Standard Permit. These records may include, but are not limited to, production capacity and throughput, hours of operation, safety data sheets (SDS), chemical composition of raw materials, speciation of air contaminant data, engineering calculations, maintenance records, fugitive data, performance tests, capture/control device efficiencies, direct pollutant monitoring (CEMS, COMS, or PEMS), or

I. Title 30 TAC Chapter 111 - Control of Air Pollution from Visible Emissions and Particulate Matter (continued)		
B. Materials Handling, Construction, Roads, Streets, Alleys, and Parking Lots		
1. Items a - d determine applicability of any of these requirements based on geographical location.		
◆	a. The application area is located within the city of El Paso.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
◆	b. The application area is located within the Fort Bliss Military Reservation, except areas specified in 30 TAC § 111.141.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
◆	c. The application area is located in the portion of Harris County inside the loop formed by Beltway 8.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
◆	d. The application area is located in the area of Nueces County outlined in Group II state implementation plan (SIP) for inhalable particulate matter adopted by the TCEQ on May 13, 1988.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<i>If there is any "Yes" response to Questions I.B.1.a - d, answer Questions I.B.2.a - d. If all responses to Questions I.B.1.a-d are "No," go to Section I.C.</i>		
2. Items a - d determine the specific applicability of these requirements.		
◆	a. The application area is subject to 30 TAC § 111.143.	<input type="checkbox"/> Yes <input type="checkbox"/> No
◆	b. The application area is subject to 30 TAC § 111.145.	<input type="checkbox"/> Yes <input type="checkbox"/> No
◆	c. The application area is subject to 30 TAC § 111.147.	<input type="checkbox"/> Yes <input type="checkbox"/> No
◆	d. The application area is subject to 30 TAC § 111.149.	<input type="checkbox"/> Yes <input type="checkbox"/> No
C. Emissions Limits on Nonagricultural Processes		
◆	1. The application area includes a nonagricultural process subject to 30 TAC § 111.151.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
	2. The application area includes a vent from a nonagricultural process that is subject to additional monitoring requirements. <i>If the response to Question I.C.2 is "No," go to Question I.C.4.</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
	3. All vents from nonagricultural process in the application area are subject to additional monitoring requirements.	<input type="checkbox"/> Yes <input type="checkbox"/> No

C. Industrial Wastewater		
1.	The application area includes affected VOC wastewater streams of an affected source category, as defined in 30 TAC § 115.140. <i>If the response to Question III.C.1 is "No" or "N/A," go to Section III.D.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A
2.	The application area is located at a petroleum refinery in the Beaumont/Port Arthur or Houston/Galveston/Brazoria area. <i>If the response to Question III.C.2 is "Yes" and the refinery is in the Beaumont/Port Arthur area, go to Section III.D.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
3.	The application area is complying with the provisions of 40 CFR Part 63, Subpart G, as an alternative to complying with this division (relating to Industrial Wastewater). <i>If the response to Question III.C.3 is "Yes," go to Section III.D.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.	The application area is located at a plant with an annual VOC loading in wastewater, as determined in accordance with 30 TAC § 115.148, less than or equal to 10 Mg (11.03 tons). <i>If the response to Question III.C.4 is "Yes," go to Section III.D.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.	The application area includes wastewater drains, junction boxes, lift stations, or weirs that are subject to the control requirements of 30 TAC § 115.142(1).	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.	The application area includes wastewater drains, junction boxes, lift stations, or weirs that handle streams chosen for exemption under 30 TAC § 115.147(2).	<input type="checkbox"/> Yes <input type="checkbox"/> No
7.	The application area includes wastewater drains, junction boxes, lift stations, or weirs that have an executive director approved exemption under 30 TAC § 115.147(4).	<input type="checkbox"/> Yes <input type="checkbox"/> No
D. Loading and Unloading of VOCs		
◆ 1.	The application area includes VOC loading operations.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
◆ 2.	The application area includes VOC transport vessel unloading operations. <i>For GOP applications, if the responses to Questions III.D.1 - D.2 are "No," go to Section III.E.</i>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

VI. Title 40 Code of Federal Regulations Part 60 - New Source Performance Standards (continued)	
B. Subpart Y - Standards of Performance for Coal Preparation and Processing Plants	
1. The application area is located at a coal preparation and processing plant. <i>If the response to Question VI.B.1 is "No," go to Section VI.C.</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2. The coal preparation and processing plant has a design capacity greater than 200 tons per day (tpd). <i>If the response to Question VI.B.2 is "No," go to Section VI.C.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
3. The plant has an option to enforceably limit its operating level to less than 200 tpd and is choosing this option. <i>If the response to Question VI.B.3 is "Yes," go to Section VI.C.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
4. The plant contains an open storage pile, as defined in § 60.251, as an affected facility. <i>If the response to Question VI.B.4 is "No," go to Section VI.C.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
5. The open storage pile was constructed, reconstructed or modified after May 27, 2009.	<input type="checkbox"/> Yes <input type="checkbox"/> No
C. Subpart GG - Standards of Performance for Stationary Gas Turbines (GOP applicants only)	
◆ 1. The application area includes one or more stationary gas turbines that have a heat input at peak load greater than or equal to 10 MMBtu/hr (10.7GJ/hr), based on the lower heating value of the fuel fired. <i>If the response to Question VI.C.1 is "No" or "N/A," go to Section VI.E.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> N/A
◆ 2. One or more of the affected facilities were constructed, modified, or reconstructed after October 3, 1977 and prior to February 19, 2005. <i>If the response to Question VI.C.2 is "No," go to Section VI.E.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
◆ 3. One or more stationary gas turbines in the application area are using a previously approved alternative fuel monitoring schedule as specified in 40 CFR § 60.334(h)(4).	<input type="checkbox"/> Yes <input type="checkbox"/> No
◆ 4. The exemption specified in 40 CFR § 60.332(e) is being utilized for one or more stationary gas turbines in the application area.	<input type="checkbox"/> Yes <input type="checkbox"/> No

VII. Title 40 Code of Federal Regulations Part 61 - National Emission Standards for Hazardous Air Pollutants (continued)	
D. Subpart L - National Emission Standard for Benzene Emissions from Coke By-Product Recovery Plants	
1. The application area is located at a coke by-product recovery plant and includes one or more of the affected sources identified in 40 CFR § 61.130(a) - (b). <i>If the response to Question VII.D.1 is "No," go to Section VII.E.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
2. The application area includes equipment in benzene service as determined by 40 CFR § 61.137(b).	<input type="checkbox"/> Yes <input type="checkbox"/> No
3. The application area has elected to comply with the provisions of 40 CFR § 61.243-1 and 40 CFR § 61.243-2.	<input type="checkbox"/> Yes <input type="checkbox"/> No
E. Subpart M - National Emission Standard for Asbestos	
Applicability	
1. The application area includes sources, operations, or activities specified in 40 CFR §§ 61.143, 61.144, 61.146, 61.147, 61.148, or 61.155. <i>If the response to Question VII.E.1 is "No," go to Section VII.F.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
Roadway Construction	
2. The application area includes roadways constructed or maintained with asbestos tailings or asbestos-containing waste material.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Manufacturing Commercial Asbestos	
3. The application area includes a manufacturing operation using commercial asbestos. <i>If the response to Question VII.E.3 is "No," go to Question VII.E.4.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
a. Visible emissions are discharged to outside air from the manufacturing operation	<input type="checkbox"/> Yes <input type="checkbox"/> No

VIII. Title 40 Code of Federal Regulations Part 63 - National Emission Standards for Hazardous Air Pollutants for Source Categories (continued)		
G. Subpart R - National Emission Standards for Gasoline Distribution Facilities (Bulk Gasoline Terminals and Pipeline Breakout Stations) (continued)		
4.	The bulk gasoline terminal or pipeline breakout station is located within a contiguous area and under common control with sources, other than bulk gasoline terminals or pipeline breakout stations that emit or have the potential to emit HAPs. <i>If the response to Question VIII.G.4 is "Yes," go to Question VIII.G.10.</i>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
5.	An emissions screening factor was calculated for the bulk gasoline terminal or pipeline breakout station. <i>If the response to Question VIII.G.5 is "No," go to Question VIII.G.10.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.	The value 0.04(OE) is less than 5% of the value of the bulk gasoline terminal emissions screening factor (ET) or the pipeline breakout station emissions screening factor (Ep). <i>If the response to Question VIII.G.6 is "No," go to Question VIII.G.10.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
7.	Emissions screening factor less than 0.5 (ET or EP < 0.5). <i>If the response to Question VIII.G.7 is "Yes," go to Section VIII.H.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
8.	Emissions screening factor greater than or equal to 0.5, but less than 1.0 (0.5 ≤ ET or EP < 1.0). <i>If the response to Question VIII.G.8 is "Yes," go to Section VIII.H.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
9.	Emissions screening factor greater than or equal to 1.0 (ET or EP ≥ 1.0). <i>If the response to Question VIII.G.9 is "Yes," go to Question VIII.G.11.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No

VIII. Title 40 Code of Federal Regulations Part 63 - National Emission Standards for Hazardous Air Pollutants for Source Categories (continued)		
I. Subpart T - National Emission Standards for Halogenated Solvent Cleaning		
1.	The application area includes an individual batch vapor, in-line vapor, in-line cold, and/or batch cold solvent cleaning machine that uses a hazardous air pollutant (HAP) solvent, or any combination of halogenated HAP solvents, in a total concentration greater than 5% by weight, as a cleaning and/or drying agent.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2.	The application area is located at a major source and includes solvent cleaning machines, qualifying as affected facilities, that use perchloroethylene, trichloroethylene or methylene chloride.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3.	The application area is located at an area source and includes solvent cleaning machines, other than cold batch cleaning machines, that use perchloroethylene, trichloroethylene or methylene chloride.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
J. Subpart U - National Emission Standards for Hazardous Air Pollutant Emissions: Group 1 Polymers and Resins		
1.	The application area includes elastomer product process units and/or wastewater streams and wastewater operations that are associated with elastomer product process units. <i>If the response to Question VIII.J.1 is "No," go to Section VIII.K.</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2.	Elastomer product process units and/or wastewater streams and wastewater operations located in the application area are subject to 40 CFR Part 63, Subpart U. <i>If the response to Question VIII.J.2 is "No," go to Section VIII.K.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
3.	The application area includes process wastewater streams that are designated as Group 1 or are determined to be Group 1 for organic HAPs as defined in 40 CFR § 63.482.	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.	The application area includes process wastewater streams that are Group 2 for organic HAPs as defined in 40 CFR § 63.482.	<input type="checkbox"/> Yes <input type="checkbox"/> No

VIII. Title 40 Code of Federal Regulations Part 63 - National Emission Standards for Hazardous Air Pollutants for Source Categories (continued)

CC. Subpart GGGGG - National Emission Standards for Hazardous Air Pollutants: Site Remediation (continued)

10.	The application area includes a remediation material management unit used for cleanup of radioactive mixed waste per § 63.7886(c).	<input type="checkbox"/> Yes <input type="checkbox"/> No
11.	The application area includes a remediation material management unit or combination of units with a total annual quantity of HAP less than 1 Mg/yr that is being exempted from § 63.7886(b) per § 63.7886(d).	<input type="checkbox"/> Yes <input type="checkbox"/> No
12.	The application area includes a remediation material management unit that has an average total VOHAP concentration of remediation material less than 500 ppmw and is complying with § 63.7886(b)(2). <i>If the response to Question VIII.CC.12 is "No," go to Question VIII.CC.14.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
13.	The application area includes a remediation material management unit that concentrates all or part of the material such that the material's VOHAP concentration could increase.	<input type="checkbox"/> Yes <input type="checkbox"/> No
14.	The application area includes containers that manage site remediation materials subject to 40 CFR Part 63, Subpart GGGGG. <i>If the response to Question VIII.CC.14 is "No," go to Question VIII.CC.21.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
15.	The application area includes containers that are also subject to and complying with another subpart under 40 CFR part 61 or part 63 per § 63.7886(b)(3).	<input type="checkbox"/> Yes <input type="checkbox"/> No
16.	The application area includes containers that are complying with alternative work practice standards that have been approved by the EPA per § 63.7900(e).	<input type="checkbox"/> Yes <input type="checkbox"/> No
17.	The application area includes containers using Container Level 1 controls as specified in 40 CFR § 63.922(b).	<input type="checkbox"/> Yes <input type="checkbox"/> No
18.	The application area includes containers with a capacity greater than 0.46 m ³ that meet the requirements of 40 CFR § 63.7900(b)(3)(i) and (ii).	<input type="checkbox"/> Yes <input type="checkbox"/> No
19.	The application area includes containers using Container Level 2 controls as specified in 40 CFR § 63.923(b).	<input type="checkbox"/> Yes <input type="checkbox"/> No
20.	The application area includes containers using Container Level 3 controls as specified in 40 CFR § 63.924(b).	<input type="checkbox"/> Yes <input type="checkbox"/> No
21.	The application area includes individual drain systems complying with the requirements of 40 CFR § 63.962.	<input type="checkbox"/> Yes <input type="checkbox"/> No

Subject: Working Draft Permit Review -- FOP O1238/Project 36448, NuStar Logistics, L.P./Corpus Christi Terminal
Attachments: WDP - O1238.docx; Unresolved Items O1238 Project 36448.docx

Good evening,

I have conducted a technical review of the renewal application for NuStar Logistics, L.P., Corpus Christi Terminal. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **Thursday, December 5, 2024**. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

In addition, there is an attached list of Unresolved Items that includes questions/corrections for the application material. **Please respond to these items when you submit your WDP comments.**

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to

the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Carolyn Maus, P.E.

Unresolved Items:

1. OP-REQ1:

- a. Question XI.B.1 was marked Yes for units subject to a regulation with no unit attribute forms, and question XI.B.2 said that regulation was 40 CFR Part 63, Subpart BBBBBB. Since we have now completed our rule analysis and forms for this rule, XI.B.1 should be No and XI.B.2 should be blank. Please submit a corrected page.
- b. Questions XI.L.1-2 were marked Yes, indicating that there is a unit that meets criteria for Compliance Assurance Monitoring (CAM). Since no CAM was provided, and existing monitoring is only periodic monitoring, I think this may have been an error. If they should be No, please submit a corrected page. If you do have a unit that needs CAM, then you would need to change XI.L.4 to Yes and finish the rest of the questions in this section, as well as provide me with an OP-MON form identifying the CAM.
- c. Since the amendment for NSR 32769/PSDTX1258M4 is now complete, please update the issuance dates in sections XII.E and XII.H to 9/23/2024 and submit the updated page.
- d. Also, since 106.261 was consolidated into the NSR permit, please update section XII.I to remove 106.261 and submit the updated page.

2. OP-PBRSUP:

- a. Since the registration for 106.261 is now voided, please remove the information from Table A and just list N/A in the first cell. Please also include Table C with N/A marked. (That will make it clear in the file that these tables were not accidentally left out.)
 - b. Please remove the row for F-400/106.261 from Table D.
 - c. For the MSS row on Table D, in the monitoring requirement column it mentions that emissions from MSS activities will be monitored. If the actual emissions are being monitored, that is fine. If other parameters are being monitored instead and emissions are being calculated, or some variation of that, please adjust the wording so that it is more accurate.
 - d. For sites with PBR authorizations, our permit terms will refer to the latest submittal of the OP-PBRSUP. This reference will include the project number in which the form was most recently submitted as well as the date on that form so that someone could locate it in the permit file. Therefore, when you make the corrections to address the items above, please re-submit all four tables as a set (even if a table isn't changing) and list the submittal date in the form header.
3. Form OP-2 mentioned that Tables 28a-28b of OP-UA3 had been filled out for MACT BBBBBB. However, those pages were not included in the application materials. I selected what I thought were the likely attributes for S-201 through S-207 based on the data provided for other rules to put tentative requirements in the working draft permit. Please provide these MACT BBBBBB UA form pages so I can confirm my selections or update your permit as needed.
4. I have granted the MACT BBBBBB permit shields for T1334, GRP-TANKS, GRP-CRUDE, GRP-CRUDE2, and GRP-CRUDE3. However, I adjusted the reason to simply say the tanks do not store gasoline. Having the wording that the tanks do not receive and store gasoline from the pipeline (coming from the pipeline breakout station definition) could imply to the reader that they might receive gasoline from other sources or could lead to confusion about the affected source type. If this adjustment is acceptable, please submit an updated OP-REQ2 using my reason. Also, the negative applicability citation should be 63.11082(a). That citation lists the parts of the affected source that are subject to the rule, which includes gasoline storage tanks, and then your reason is saying these are not gasoline storage tanks.
5. I have updated the Major NSR Summary Table for NSR 32769/PSDTX1258M4 based on the changes to the MAERT from the 9/23/2024 issuance. It seemed like the conditions would still be the same for each row. However, please check the table and let me know if there are any updates needed.

Subject: Technical Review -- FOP 01238/Project 36448, NuStar Logistics, L.P./Corpus Christi Terminal

Good evening,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. 01238 for NuStar Logistics, L.P., Corpus Christi Terminal. This application has been assigned Project No. 36448. Please address all correspondence pertaining to this permit application, including any updates, to me at the address in my email signature, and use both the Permit and Project reference numbers above to facilitate tracking. I have begun technical review and will inform you if I have further questions or need any updated forms.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1. This form will be requested at a later date.

If you choose to submit your application updates through STEERS, please notify me when these updates have been submitted.

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Dear Senator Hinojosa:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-97.413333,27.818055&level=13>.

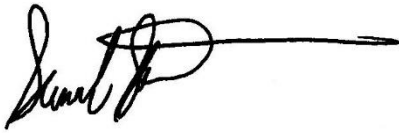

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Juan Hinojosa

RE: Site Operating Permit (SOP) Renewal Application
NuStar Logistics, L.P. – Corpus Christi Terminal
Corpus Christi, Nueces County, Texas
Regulated Entity Number: RN102317658
Customer Reference Number: CN603180662
Title V Permit Number: O1238

Dear Sir/Madam,

On behalf of NuStar Logistics, L.P. (NuStar), TRC Environmental Corporation (TRC) is hereby submitting the enclosed renewal application for NuStar's Title V Permit No. O1238. Pursuant to §122.133, this renewal application is being submitted at least six months prior to the expiration date (September 18, 2024) of the Title V Permit.

The enclosed application meets all requirements for SOP renewal applications per Title 30 of the Texas Administrative Code (30 TAC) Chapter 122.

Pursuant to §122.241, the completed application includes the following forms:

OP-1	OP-2
OP-ACPS	OP-SUMR
OP-REQ1	OP-UA3
OP-PBRSUP	OP-REQ2

Please note this renewal application addresses only the emission units which are being added, updated or deleted, or units with changes in regard to rule applicability or those units whose unit attribute (UA) forms have been updated since the last Title V permit revision and/or renewal. Emission units that are not included in this renewal application should remain as they are represented in NuStar's current Title V Permit.

A copy of this application will be emailed to EPA - Region 6. If you require any additional information, please contact Mr. David Edge of NuStar at 361-249-9446 or by email at David.Edge@nustarenergy.com.

Sincerely,

TRC Environmental Corporation

Natasha Halageri
Senior Project Manager

VII. Title 40 Code of Federal Regulations Part 61 - National Emission Standards for Hazardous Air Pollutants (continued)	
E. Subpart M - National Emission Standard for Asbestos (continued)	
<i>Asbestos Spray Application (continued)</i>	
d. Asbestos-containing waste material is processed into non-friable forms.	<input type="checkbox"/> YES <input type="checkbox"/> NO
e. Asbestos-containing waste material is adequately wetted.	<input type="checkbox"/> YES <input type="checkbox"/> NO
f. Alternative filtering equipment is being used that has received EPA approval.	<input type="checkbox"/> YES <input type="checkbox"/> NO
g. A HEPA filter is being used that is certified to be at least 99.97% efficient for 0.3 micron particles.	<input type="checkbox"/> YES <input type="checkbox"/> NO
h. The EPA has authorized the use of wet collectors designed to operate with a unit contacting energy of at least 9.95 kilopascals.	<input type="checkbox"/> YES <input type="checkbox"/> NO
<i>Fabricating Commercial Asbestos</i>	
5. The application area includes a fabricating operation using commercial asbestos. <i>If the response to Question VII.E.5 is "NO," go to Question VII.E.6.</i>	<input type="checkbox"/> YES <input type="checkbox"/> NO
a. Visible emissions are discharged to outside air from the manufacturing operation.	<input type="checkbox"/> YES <input type="checkbox"/> NO
b. An alternative emission control and waste treatment method is being used that has received prior EPA approval.	<input type="checkbox"/> YES <input type="checkbox"/> NO
c. Asbestos-containing waste material is processed into non-friable forms.	<input type="checkbox"/> YES <input type="checkbox"/> NO
