Thank you for your review Paige,

The site is not a gas processing facility. It is a transmission compression facility that transports natural gas along a transmission pipeline.

Please let me know if you have any other questions or comments on this project.

Thank you,  
James

James,

Good news, I am just about done with my technical review for this renewal project, there is just something that I need clarification on before I can proceed to the next step of permit review (Public Notice). I noticed there is a permit shield present for EU "FUG" in the permit, with a Basis of Determination that states "Site is not a Gas Processing Plant".

However, after reviewing the process description on page 5 of the application there seems to be some conflict in information. Could you please confirm whether or not this site is a gas processing facility.

Please provide correspondence regarding this matter at your earliest convenience, but no later than **August 6, 2024**.

Best,

Good Morning Paige,

Following up on your note to let you know that I had responded to the original review chain per the attached – we had a Working Draft Permit that we are good with – no comments or questions.

We've got an update application loaded to STEERS pending signature/submittal to address the OP-REQ1 p87 update to remove the NSR authorization.

I'll be out of the office and out of town on PTO for the first two weeks of July but will be back in the office July 15<sup>th</sup> if there are any other comments/questions that come up in the meantime.

Thank you,  
James

**Subject:** Technical Review - FOP O3220/Project 36665, Florida Gas Transmission Company LLC/Bolin Compressor Station

Mr. James VanAssche:

I have been recently assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O3220 for Florida Gas Transmission Company LLC/Bolin Compressor Station. Please address all correspondence pertaining to this permit application, including any updates, to me via email from this point on, and use both the Permit and Project reference numbers above.

Please note, I have received your WDP comments. I'll be looking out for the OP-REQ1 form STEERS submission. Please let me know the reference number of this submission once completed to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to the [OP-PBRSUP](#) and [OP-REQ1](#) form instructions.

Please review the “[SOP Technical Review Fact Sheet](#)”. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Sincerely,

THE HONORABLE JOAN HUFFMAN  
TEXAS SENATE  
PO BOX 12068  
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application

Regulated Entity Number: RN100228949  
Customer Reference Number: CN603432808

Dear Senator Huffman:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.893611,29.1475&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

## 1.0 INTRODUCTION

---

Florida Gas Transmission Company LLC (FGTC) owns and operates the Florida Gas Boling Compressor Station (Station) located in Matagorda County, TX. FGTC is identified by Customer Reference Number (CN) 603432808 and the Station operates under Regulated Entity Number (RN) 100228949. The Station holds construction authorizations under a New Source Review (NSR) Existing Facility Permit No. 55779 and a Permit by Rule (PBR), under Title 30 of the Texas Administrative Code (30 TAC) §106.512, Registration No. 161497. The Station also operates under a number of PBR and Standard Exemption (SE) claims as detailed in Section XII of Form OP-REQ1.

With this application, FGTC is requesting renewal of its Site Operating Permit (SOP) No. O3220.

The Station is located in Matagorda County and is in attainment with all relevant National Ambient Air Quality Standards (NAAQS).

One update is incorporated into this renewal application to include the removal of an air compressor engine, Unit ID AIRCOMP, as the unit has been removed from the Station.

FGTC is updating the Responsible Official and Duly Authorized Representative with this application and has attached the OP-CRO2 and OP-DEL forms accordingly.

This document was prepared in accordance with Texas Commission on Environmental Quality's (TCEQ's) Site Operating Permit (SOP) Renewal Application Guidance (APDG 6401v3, Revised 07/17))) and the requirements listed in 30 TAC Section (§) 122.241, Permit Renewals.

An area map showing the location of the Plant is included in this section as Figure 1.1 and a plot plan is included in this section as Figure 1.2.

This Title V renewal application includes the following TCEQ forms:

- TCEQ Form OP-CRO1
- TCEQ Form OP-CRO2
- TCEQ Form OP-DEL
- TCEQ Form OP-1
- TCEQ Form OP-2

## 2.0 PROCESS DESCRIPTION

---

Natural gas flows into the station and passes through an inlet separator, where entrained liquids are removed from the gas stream by gravitational forces. The gas is passed to compressor units, where it is compressed and then exits the station at higher pressure. The entrained pipeline liquids removed in the separator are stored in a condensate tank and ultimately removed from the station via tanker truck when necessary.

A process flow diagram can be found at the end of this section as Figure 2.1.
