Mr. Goldstrohm,

An issue has been identified during management review of the PNAP. Question I.C.1 on page 2 of the OP-REQ1 form has a response of YES indicating that the application area includes nonagricultural processes subject to 30 TAC § 111.151 (Unit ID 10, Index R1151-1). The associated requirements have periodic monitoring associated with them. As a result, the response to question I.C.2 or I.C.3 should be answered as YES. The current representation has a value of NO for question I.C.2. If the responses to both I.C.2 and I.C.3 are YES, there will be no change to the permit. However, if the response to I.C.2 and I.C.3 are YES and NO respectively, then provision 3.E will be added to the terms and conditions of the permit (see attached file Updated SOP3). Please update this page of the form and submit as soon as possible but no later than COB September 27. Please make sure the submittal date at the top of the form reflects the current submittal date. The submittal will also need to be certified. I sincerely apologize for any inconvenience this may cause.

Mr. Goldstrohm,

,

The above referenced project has completed peer review. The following issues have been identified as a result of this review. These updates will need to be certified. To avoid any additional issues, please make sure the date in the header bar of the form references the current date of the submittal (all pages of the PBR SUP need to reflect the same date). Please provide these updates as soon as possible.

I apologize for any inconvenience this may cause. These updates will result in the permit being updated. An updated draft will be sent to you for your review prior to proceeding to management review of the project. Please let me know if you have any questions and I will contact you immediately.

1. Since question XII.B.12 is answered "YES", as a result it is believed that either question XII.B.14 or XII.B.14 should also be answered "YES".

2. PBR 106.183 on page 88 of the OP-REQ1 submitted July 19, 2024 indicates a version date of 09/04/2000.. The occurrence of 106.183 on Tables B and D of the OP-PBRSUP indicates a version date of 06/18/1997. Occurrences on the forms should match. We need to correct these forms so that the version date either matches or all occurrences of the additional version dates are noted on each of the forms.

Subject: Technical Review & Working Draft Permit -- FOP O1091/Project 36706, Guardian Industries/Corsicana facility
Attachments: Draft permit 6-25-2024.docx

Mr. Goldstrohm,

I wanted to inform you that I have been assigned to the Federal Operating Permit (FOP) initial issuance/renewal/revision application of Permit No. O1091 for Guardian Industries, Corsicana facility. This application has been assigned Project No. 36706. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

I have conducted a technical review of this application and I have attached an electronic copy of the Working Draft Permit (WDP) for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have regarding it by July 26, 2024. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP. Note that any application updates necessary to make requested changes must accompany the WDP comments.

The following list of deficient items associated with the application. Please submit these updates no later than **July 26, 2024**.

1. Table B of the OP-PBRSUP form identifies PBR 106.264 for Unit 10. This PBR is not identified on page 88 of the OP-REQ1 and is not associated with Unit 10 in the OP-SUM. Please update these forms to include reference to the PBR. For

convenience, the draft permit has already been updated to include these references.

Please review the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process, application updates, WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified submittals, including application updates supporting the WDP comments is required to be submitted with the WDP response. After final review of the WDP, additional changes, supported by application updates, may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that were not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please let me know if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit and I will contact you immediately.

Dear Senator Hall:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-96.426944,32.063333&level=13>.

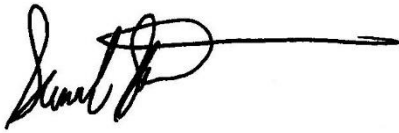

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

1. EXECUTIVE SUMMARY

Guardian Industries LLC (Guardian) owns and operates a float glass manufacturing facility (Texas Commission on Environmental Quality [TCEQ] Air Account No. NB-0014-R) located in Corsicana, Navarro County, Texas (the Corsicana Plant). Guardian operates under TCEQ Customer Number (CN) 600131015. The Corsicana Plant has been assigned TCEQ Regulated Entity Number (RN) 100221811. The Corsicana Float Plant (Corsicana Plant) is located in Navarro County, Texas. Navarro County is which is currently classified as an attainment or unclassified area for criteria pollutants with the exception of sulfur dioxide (2010 SO₂ NAAQS).¹ The SO₂ nonattainment area only includes a portion of Navarro County, and the Corsicana Plant is not located in the nonattainment area.² The site is subject to the Texas Federal Operating Permits Program according to Title 30 of the Texas Administrative Code Section 122.120 (30 TAC §122.120).

Guardian received a renewed Site Operating Permit (SOP) No. O-1091 on December 17, 2019. In accordance with 30 TAC §122.133, this renewal application is submitted 6 months prior to the expiration date of SOP No. O-1091. The following sections describe changes at the site resulting in updates to the SOP and the contents of this renewal application.

1.1 Changes at the Site

Since the last renewal of SOP No. O-1091, one (1) administrative update to the SOP was issued on March 13, 2019, and one (1) minor revision to the SOP was issued on October 11, 2021.

The following changes are included in this renewal application:

- ▶ Updates to Title V terms and conditions are represented through the form OP-REQ1;
- ▶ Standard Permits 167826 and 171690 were issued on 02/02/2022 and 03/13/2023, respectively. Standard Permit 125863 was renewed on 11/01/2023. These changes should be incorporated to the Title V permit using section XII.H of the updated OP-REQ1;
 - SP 125863 – Non-rule Pollution Control Projects to authorize changes to the combustion system configuration in the glass melting furnace.
 - SP 167826 – Electric Generating Unit Standard Permit to authorize the use of existing diesel-powered engine (EPN 776) for electricity generation.
 - SP 171690 – Non-rule Pollution Control Projects to authorize installation of Catalytic Ceramic Filter System with ammonia and hydrated lime injection as an emissions control system for the glass melting furnace.
- ▶ Standard Permit 171690 has been added as a pre-construction authorization to unit 10. This change has been reflected through the form OP-SUMR;
- ▶ As of August 2020, the form OP-PBRSUP has been required by TCEQ in Title V applications. Since this is the first renewal since 2020, the complete form OP-PBRSUP has been included in this application, and
- ▶ On July 2021, 40 CFR Part 60, Subpart IIII was amended, which migrated the emission standards found in Part 89 to Part 1039. The form OP-UA2 and OP-REQ3 reflect these updates to affected engine units;
 - In addition, we request that the citations that appear in the NSPS IIII flowchart for engine units 787A and 787B be manually revised. These are both emergency engines that do not supply electrical

power as part of a financial arrangement. These are engines to pump either fire water to the suppression system or emergency pumping of cooling water through the furnace cooling system. Neither of these engines are operated to supply power as part of a financial arrangement with another entity for all the conditions specified in § 60.4211(f)(3)(i).

- Due to the justification above, we request to ungroup Standard citation [G]§ 60.4211(f) and remove Reporting citation [G]§ 60.4214(d). The form OP-REQ3 details the citations being added and removed.

1.2 Renewal Application Contents

Per TCEQ guidance, only the following items are required to be included in a renewal application.

- ▶ TCEQ Forms OP-CRO1, OP-REQ1, OP-ACPS, and OP-2
- ▶ TCEQ Form OP-1
- ▶ Applicable TCEQ unit attribute forms if there have been changes to the forms and if the changes affect units at the site
- ▶ Core Data Form, if applicable
- ▶ TCEQ Form OP-SUMR, if applicable
- ▶ TCEQ Form OP-REQ2, if applicable
- ▶ TCEQ Form OP-REQ3, if applicable requirements have changed
- ▶ TCEQ Form OP-MON, if applicable
- ▶ TCEQ Form OP-PBRSUP, if applicable

The following TCEQ unit attribute forms have been previously submitted for the site.

- ▶ TCEQ Form OP-UA1
 - For Unit ID No. 788 (dated October 7, 2015)
- ▶ TCEQ Form OP-UA2
 - Tables 2a, 2b, and 2c and 5a, 5b, and 5c for Unit ID Nos. 787A, 787B, and 787C (dated February 7, 2019)
- ▶ TCEQ Form OP-UA3
 - Table 3 for Unit ID No. TANK7 (dated February 4, 2019)
- ▶ TCEQ Form OP-UA29
 - Table 1 for Unit ID No. 01002 (dated September 10, 2019)

Columns or answers in the current TCEQ Form OP-UA1 have not changed from the previously submitted versions of TCEQ Form OP-UA1. Therefore, TCEQ Form OP-UA1 is not included in this renewal application for the existing unit in SOP No. O-1091.

TCEQ Form OP-UA2 has been revised (ADP-ID 28v2.0, Revised 11/22) since the previous submission. Columns or answers in the current Tables 2a, 2b, and 2c have not changed from the version of TCEQ Form OP-UA2 Tables 2a, 2b, and 2c submitted previously. Therefore, Tables 2a, 2b, and 2c of the TCEQ Form OP-UA2 are not included in this renewal application. A new column in TCEQ Form OP-UA2 Table 5c is required to be answered. Therefore, Tables 5a, 5b, and 5c are included in this renewal application for SOP No. O-1091.

Columns or answers in the current TCEQ Form OP-UA3 Table 3 have not changed from the version of TCEQ Form OP-UA3 Table 3 submitted previously. Therefore, Table 3 of TCEQ Form OP-UA3 is not included in this renewal application for existing units in SOP No. O-1091.

Columns or answers in the current TCEQ Form OP-UA29 Table 1 have not changed from the version of TCEQ Form OP-UA29 Table 1 submitted previously. Therefore, Table 1 of TCEQ Form OP-UA29 is not included in this renewal application for existing units in SOP No. O-1091.

No changes in applicable compliance assurance monitoring (CAM) and periodic monitoring have been identified since the last SOP renewal; therefore, TCEQ Form OP-MON has not been included in this renewal application.

For the units impacted by a rule promulgation and the modification of TCEQ unit attribute forms, affected forms are included in this application. Additionally, the revisions to the permit are summarized in TCEQ Form OP-2, and the affected units are summarized in TCEQ Form OP-SUMR.

The enclosed SOP renewal application for Guardian consists of the following forms along with supplemental information.

- ▶ Section 2. Process Description
- ▶ Section 3. Process Flow Diagram
- ▶ Section 4. TCEQ Form OP-1
- ▶ Section 5. TCEQ Form OP-2

- ▶ Section 9. TCEQ Form OP-REQ3
- ▶ Section 10. TCEQ Form OP-ACPS
- ▶ Section 11. TCEQ Form OP-PBRSUP

2. PROCESS DESCRIPTION

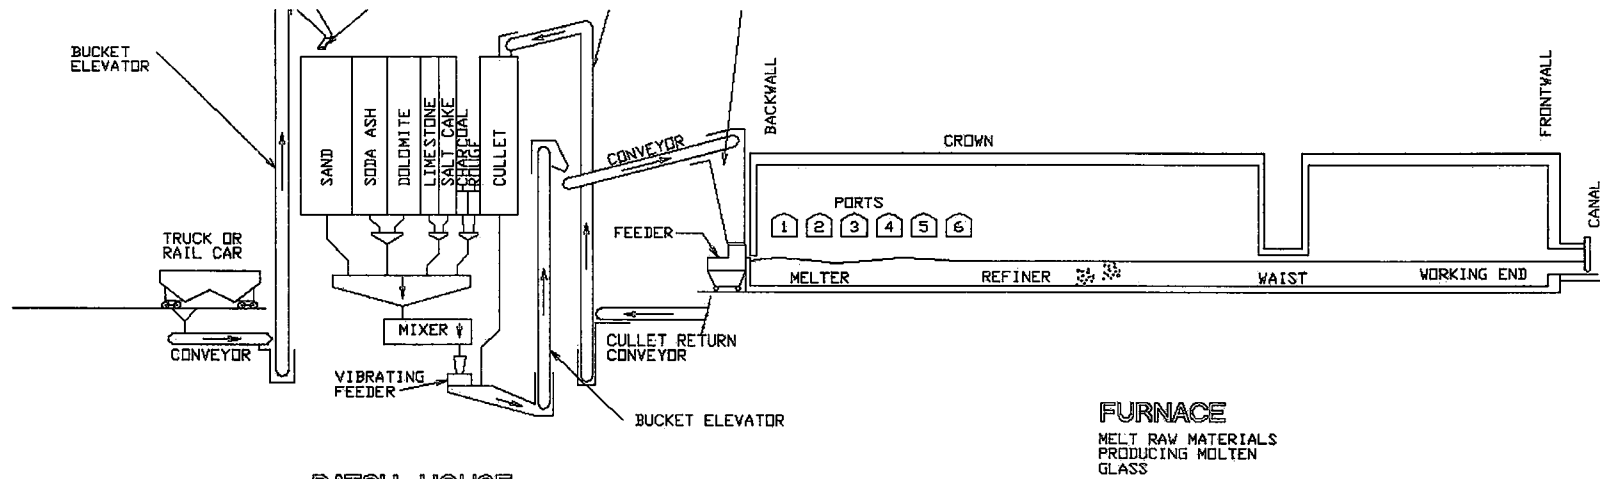

This section of the application presents an overview of the float glass manufacturing process at the Corsicana Plant. Please make note of the changes made to the process description.

2.1 Process Overview

The float glass manufacturing process consists of receiving raw material (silica sand, etc.) in quantities by rail and truck from various locations. Raw materials are unloaded and stored in the batch house. They are weighed into batches, mixed ~~and then layered~~ with broken glass (cullet) returned from the end of the process line. The mixed batch is conveyed to the furnace where the raw materials are melted using natural gas. Molten glass from the furnace flows by gravity and displacement into a tin bath where a continuous ribbon is formed by controlling glass temperature with time. The ribbon is pulled, or drawn, though the bath on a layer of molten tin, the temperature of which is controlled electrically. Upon exiting the bath, the ribbon of glass enters an electrically heated annealing lehr wherein it is cooled preparatory to the cutting into sheets. A computer controlled automatic cutting system cuts the ribbon into predetermined sizes as dictated by customer orders. Pieces are then either placed on racks, boxes, or dollies for storage or direct shipment. Any waste or damaged glass is broken and recycled to the batch house as cullet. In addition to the glass manufacturing activities, Guardian is also involved in glass finishing operations. These processes involve a glass insulating operation and a mirror coating operation. Although the process of glass insulating and mirror coating have no atmospheric emissions, solvents are used in those areas strictly for glass and equipment cleaning.
