Good morning,

Please submit/upload the final OP-CRO1 through **STEERS by April 25, 2025**, which includes the date of comment submittal in the documentation dates (We recommend a date range from the date of the submittal of application to the date of the submittal of the final OP-CRO1, so this will cover any updates during the project.)

Thanks,

Good Morning Ulises,

Attached you will find a consolidated OP-PBRSUP. This should address all PBRs registered and unregistered.

Let me know if there are any other technical review questions - we will certify all application updates in a single STEERS submittal once complete.

Thank you,  
James

Good afternoon,

During the QAQC review, we noticed that the OP-PBRSUP has an issue:

- Every submittal of the PBRSUP must be a complete submittal of all four Tables identifying all registered PBRs. Each table has to identify all registered PBRs that are used in the site

Please provide an updated OP-PBRSUP form by **April 25, 2025**

Good Morning Ulises,

Please see attached OP-REQ1 – this is just p87 to address that NSR renewal date and the OP-PBRSUP to address the emergency generators and gasoline tank PBR requirements.

Please let me know what other comments or questions you have on this renewal project.

I will submit all of the application updates in a single submittal in STEERS if there are no more technical review items.

Thank you,

Good Afternoon Ulises,

Thank you for your review on this project. The working draft permit looks good and we have no comments.

Please see attached OP-UA2 and OP-REQ1 updates.

Regarding the OP-PBRSUP – we submitted an extensively reviewed and commented upon OP-PBRSUP in a 2022 revision application that covers all of the PBR claims/registrations other than the

ones added in this renewal.

I can send the final version of that OP-PBRSUP for the file if that helps but I didn't include all of those PBRs since we went through an extensive process with that form in the 2022 project.

Please let me know if you have any other follow up comments or questions on this review. We plan to certify the application updates via STEERS in a single submittal once the technical review is complete.

Thank you,  
James

Good morning James,

I have conducted a technical review of *renewal* application for ET Gathering & Processing LLC/Waha Gas Plant. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **March 25, 2025**.

**Additionally, the following deficiencies has been identified:**

- In the OP-UA2 form, Unit IDs: CAT-65 (SOP Index Number: 60JJJJ-1), the facility put 'YES' in Lean Burn section, but if the answer is correct then the Horsepower section should be '500-1350'. please provide an updated OP-UA2 form.
- In the OP-UA2 form, Unit IDs: GEN-1 & GEN-2 (SOP Index Number: 60IIII), the facility put 'N75-130' in Kilowatts sections, it should be 'E75-130'. Please provide an updated OP-UA2 form.

- We noticed there were two recent issuance dates issued on 10/25/2023 for NSR 74857, and 06/17/2019 for NSR 74857. I was wondering if the facility wants to incorporate the most recent issuance dates into the Title V permit. If the facility wants to incorporate, please submit an OP-REQ1 Page 87.
- OP-PBRSUP: There are several PBRs listed in the permit that have not been identified on the OP-PBRSUP. Please provide an updated OP-PBRSUP form with all the PBRs listed in the permit.

**\* Note: Some units/modifications/requested items were not included in the Working Draft Permit due to deficiencies being found in the application/permit.**

Please review the second portion of the "SOP Technical Review Fact Sheet" located at [http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\\_V/sop\\_wdp\\_factsheet.pdf](http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf). This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

Thank you for your cooperation.

**Subject:** Technical Review -- FOP O2546/Project 36912, ET Gathering & Processing LLC/Waha Gas Plant

Good morning,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O2546 for ET Gathering & Processing LLC/Waha Gas Plant. This application has been assigned Project No. 36912. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all**

application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

(1) Actual emission rates for all plant equipment, including units authorized under standard exemption or PBR claims or registrations, are calculated annually for the Emissions Inventory. Emission rates are calculated using manufacturer/vendor guarantees, inspection/test results, actual operating data recorded throughout the calendar year, and TCEQ and/or EPA approved assumptions and calculation methodologies. Emissions Inventory data, including the calculated emission rates, are compared to the applicable limits and representations in the registration applications and claim documents to identify any potential compliance concerns.

July 25, 2024

THE HONORABLE CESAR BLANCO  
TEXAS SENATE  
PO BOX 12068  
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application  
Project Number: 36912  
Permit Number: O2546  
ET Gathering & Processing LLC  
Waha Gas Plant  
Coyanosa, Pecos County  
Regulated Entity Number: RN100211408  
Customer Reference Number: CN606187110

Dear Senator Blanco:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-103.084722,31.268888&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Cesar Blanco

## 1.0 INTRODUCTION

---

ET Gathering & Processing LLC (ETGP) owns and operates the Waha Gas Plant (Plant) located in Pecos County, TX. ETGP is identified by Customer Reference Number (CN) 606187110 and the Plant operates under Regulated Entity Number (RN) 100211408. The Plant holds the following construction authorizations:

- New Source Review (NSR) Permit No. 74857
- Standard Permit No. 92327
- Permit by Rule (PBR), under Title 30 of the Texas Administrative Code (30 TAC) §106.512, Registration No. 53463
- PBR Under 30 TAC §106.352 Registration No. 31232

The Station also operates under a PBR claim per 30 TAC §106.359 for maintenance, startup and shutdown (MSS) activities and various other PBR claims as detailed in form OP-REQ1 Section XXII.I.

With this application, ETGP is requesting renewal of its Site Operating Permit (SOP) No. 02546.

The Plant is located in Pecos County and is in attainment with all relevant National Ambient Air Quality Standards (NAAQS).

There are multiple updates incorporated into this renewal application as follows:

- Updated engine regulatory requirements for Unit IDs CAT-65, CAT-67, and CAT-69 included in forms OP-UA2 and OP-REQ3
- Updated regulatory requirements for Unit ID PROACIDGAS included in forms OP-UA10, OP-REQ2 and OP-REQ3
- Addition of two (2) emergency generators included in forms OP-UA2, OP-REQ3, and OP-PBRSUP
- Addition of a gasoline storage tank included in forms OP-UA3, OP-REQ3 and OP-PBRSUP
- A revised periodic monitoring proposal for Unit IDs WAU25 and WAU26 to change from oxygen monitoring to NOx monitoring included on form OP-MON

All updates are also summarized in forms OP-2 and OP-SUMR.

This document was prepared in accordance with Texas Commission on Environmental Quality's (TCEQ's) Site Operating Permit (SOP) Renewal Application Guidance (APDG 6401v3, Revised 07/17))) and the requirements listed in 30 TAC Section (§) 122.241, Permit Renewals.

An area map showing the location of the Plant is included in this section as Figure 1.1 and a plot plan is included in this section as Figure 1.2.

This Title V renewal application includes the following TCEQ forms:

## 2.0 PROCESS DESCRIPTION

---

The Plant consists of an amine treatment unit to remove carbon dioxide (CO<sub>2</sub>) and hydrogen sulfide (H<sub>2</sub>S) from the inlet gas, triethylene glycol (TEG) and mole sieve dehydration units to remove excess water from the inlet gas, a cryogenic plant to separate methane and natural gas liquids from the raw gas, and compressor engines and turbines to boost the pressure of the gas throughout and after processing.

Inlet gas from the field is compressed by internal combustion engine- and turbine-driven compressors (including FIN SATURN-4D). Water and condensate are removed from the inlet gas stream in an inlet slug catcher. The water and condensate are separated in a three-phase separator. The water from the separator is stored in produced water storage tanks and the condensate is sent through a low-pressure separator and then to a stabilizer. The stabilizer overhead vapors are routed to a flash gas compressor engine which directs them back to the suction side of the Plant compressors. Stabilized condensate is stored in six (6) condensate storage tanks. Vapors from the storage tanks are captured by a vapor recovery unit (VRU) and routed back into the process. Stabilized condensate is typically sent out via pipeline but may be loaded out into tank trucks as necessary. Condensate loading vapors are captured and sent to an enclosed truck flare with 98% destruction efficiency. Liquids from the Plant scrubber dumps go to a closed drain system and into a skimmer pit where water and oil are separated. The oil goes to a three-phase separator and the water goes to the produced water tanks. Produced water is pumped offsite to a disposal well.

After inlet compression, the sour gas feed is sweetened using a diethanolamine (DEA) treating system to remove H<sub>2</sub>S. Due to its acidic nature, CO<sub>2</sub> is also removed by the amine. The amine still acid gas stream flows to the acid gas injection (AGI) TEG dehydration unit to remove excess water from the acid gas before it is reinjected into strata via an AGI compressor (electric) unit. The dehydration unit regenerator waste gas is routed through an aerial cooler to condense the liquids and to an accumulator to separate the condensed liquids from the vapor. The vapor stream is then sent to the reinjection compressor. The condensed water is sent offsite to a disposal well.

An AGI flare is tied into the inlet line to the compressor such that when the compressor is down the acid gas is immediately diverted to the flare and burned to destroy the H<sub>2</sub>S. The flare is operated with an auto ignition system and supplemental fuel is automatically added to assist in the burning of the acid gas.

Water is removed from the sweetened gas by a mole sieve regenerator. When the mole sieve tower becomes saturated, a slip stream is routed to a glycol dehydration unit. The dehydration vent emissions are routed to the process flare. The process flare also handles compressor maintenance, startup, and shutdown (MSS) activities and is used to combust vapors from various scrubbers at the site. The scrubbers collect any extraneous fluid that prevents the intended fluids from entering the contactors, dehydrators, compressors, etc. Once the level of collected fluid reaches a certain point, the scrubbers “dump” the fluid into the Plant’s closed drain system. The closed drain system is routed to the flare knock out vessel to remove any liquids. Vapors from the knock-out vessel then go to the flare and the liquids are sent back through the process.

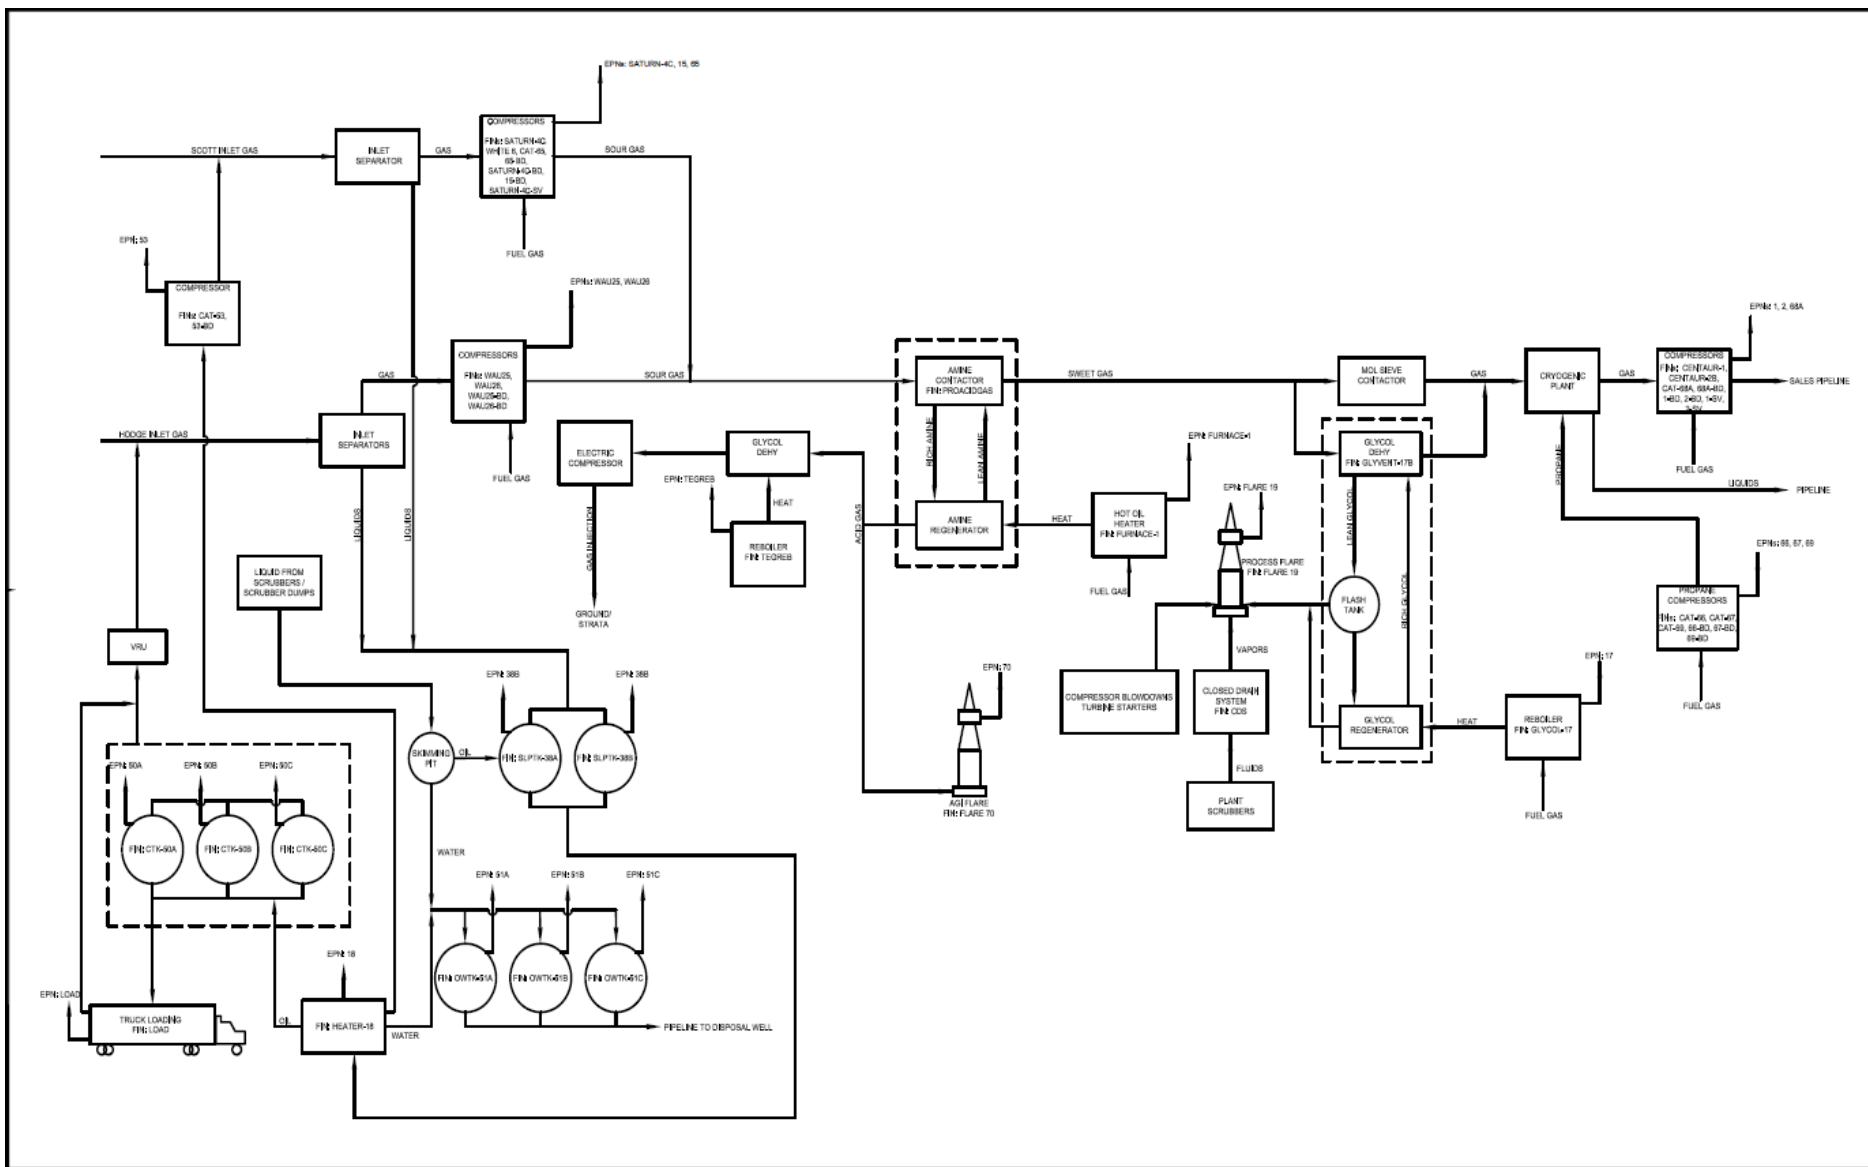

Three (3) compressor engines are used in propane service in the cryogenic process to cool the treated gas stream in order to recover natural gas liquids. Additional reciprocating internal combustion engines and turbines are used to power compression of residue gas before it is sent offsite via the sales pipeline. Heat

for the amine process is recovered from the compressor turbines. In the event the recovered heat is not sufficient, there is a backup hot oil heater to ensure the process maintains adequate heat.

A process flow diagram can be found at the end of this section as Figure 2.1.

**Form OP-CRO1**  
**Certification by Responsible Official**  
**Federal Operating Permit Program**

All initial permit application, revision, renewal, and reopening submittals requiring certification must be addressed using this form. Updates to site operating permit (SOP) and temporary operating permit (TOP) applications, other than public notice verification materials, must be certified prior to authorization of public notice or start of public announcement. Updates to general operating permit (GOP) applications must be certified prior to receiving an authorization to operate under a GOP.

## TCEQ FORM OP-ACPS – APPLICATION COMPLIANCE PLAN AND SCHEDULE

---

**Texas Commission on Environmental Quality**  
**Form OP-ACPS**  
**Application Compliance Plan and Schedule**

<b>Date:</b> June 25, 2024	<b>Regulated Entity No.:</b> 100211408	<b>Permit No.:</b> O2546
<b>Company Name:</b> ET Gathering & Processing LLC		<b>Area Name:</b> Waha Gas Plant

- Part 1 of this form must be submitted with all initial FOP applications and renewal applications.
- The Responsible Official must use Form OP-CRO1 (Certification by Responsible Official) to certify information contained in this form in accordance with 30 TAC § 122.132(d)(8).

**Part 1**

<b>A. Compliance Plan — Future Activity Committal Statement</b>	
<p>The <i>Responsible Official</i> commits, utilizing reasonable effort, to the following:          As the responsible official it is my intent that all emission units shall continue to be in compliance with all applicable requirements they are currently in compliance with, and all emission units shall be in compliance by the compliance dates with any applicable requirements that become effective during the permit term.</p>	
<b>B. Compliance Certification - Statement for Units in Compliance*</b> (Indicate response by entering an "X" in the appropriate column)	
<b>1.</b> With the exception of those emission units listed in the Compliance Schedule section of this form (Part 2, below), and based, at minimum, on the compliance method specified in the associated applicable requirements, are all emission units addressed in this application in compliance with all their respective applicable requirements as identified in this application?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
<b>2.</b> Are there any non-compliance situations addressed in the Compliance Schedule Section of this form (Part 2)?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
<b>3.</b> If the response to Item B.2, above, is "Yes," indicate the total number of Part 2 attachments included in this submittal. <i>(For reference only)</i>	
<p><small>* For Site Operating Permits (SOPs), the complete application should be consulted for applicable requirements and their corresponding emission units when assessing compliance status. For General Operating Permits (GOPs), the application documentation, particularly Form OP-REQ1 should be consulted as well as the requirements contained in the appropriate General Permits portion of 30 TAC Chapter 122.</small></p> <p><small>Compliance should be assessed based, at a minimum, on the required monitoring, testing, record keeping, and/or reporting requirements, as appropriate, associated with the applicable requirement in question.</small></p>
