Good afternoon,

I have conducted a technical review of *renewal* application for *Tennessee Gas Pipeline Company LLC/ Compressor Station 17*. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **April 11, 2025**.

Additionally, the following deficiencies has been identified:

- Regarding changing the technical contact information, please submit an updated OP-1 Page 3 form.
- Unit 17T-10UL – Index Number: R5211-2 – The facility put “11+” in True Vapor Pressure. The selection of “11+” is for “213C” in Alternate Control Requirement, however the facility selected “NONE”. If the selection of “NONE” in Alternate Control Requirement is correct, then the facility has to put “1.5+” in True Vapor Pressure. Please provide an updated OP-UA4 form.

***Note: Some units/modifications/requested items where not include in the Working Draft Permit due to deficiencies being found in the application/permit ***

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original

signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Re: Accepted Federal Operating Permit Renewal Application

Regulated Entity Number: RN100221274
Customer Reference Number: CN601223811

Dear Senator Huffman:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-96.143888,29.532777&level=13>.

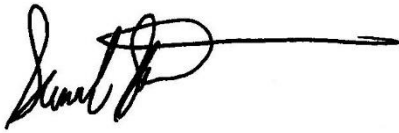

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Joan Huffman

1.3 Current Authorizations

Presently, emissions resulting from the site's operations are authorized by TCEQ New Source Review (NSR) Permit No. 18785 and various unregistered Permits-By-Rule (PBR). A detailed listing of these authorizations can be found at the end of Form OP-REQ1 included in this application.

2.0 Process Description

Compressor Station 17 is a natural gas transmission facility (SIC 4922). The following sections describe emission sources at this site.

2.1 Turbines

Fuel gas for the combustion equipment at the station is split off from the mainline after running through filter-separators. The pipeline gas is compressed by two (2) turbines rated at 11,350 hp (Unit ID Nos. 17TURB-1C and 17TURB-2C). The compressed gas then flows out of the station and back to the pipelines. Each turbine has the potential to operate up to 8,760 hours per year.

2.2 Emergency Engine

There is one (1) four-cycle lean burn (4SLB) emergency generator (Unit ID No. 17AUX-2A) that does not operate except in the case of a loss of purchased power (i.e. emergency use only) or to participate in the ERCOT's Emergency Response Program. .

2.3 Tanks and Other Miscellaneous Equipment

TGP also operates the following equipment at Compressor Station 17:

- Two (2) 8,820-gal Condensate Tanks (17T-1 and 17T-2),
- One (1) 6,620-gal Lube Oil Tank (17T-3),
- One (1) 10,575-gal Used Oil Tank (17T-7),
