Jennifer,

We do not have any comments on the draft permit...everything looks good.

As far as submitting all of the post submittal updates through STEERS, what is the date range we need to include on the OP-CRO1 when certifying all post submittal changes through STEERS? More specifically I am not sure what the start date should be and want to make sure we get things included correctly so we don't have to resubmit.

Thanks,
Scott

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Good Morning,

I cannot grant the permit shield for Unit ID C-1 for NSPS KKKK because it has applicability to NSPS KKKK in the form of SOP Index No. 60KKKK-1. From the [Permit Shield Guidance](#) under “What is a “Permit Shield?””, the second bullet point states the following: “The potentially applicable requirement must not apply in any operating scenarios.” Please correct Form OP-REQ2 by striking through the permit shield request for this unit.

Please respond to this email by **Monday April 14, 2025**

Thanks
Jen

Please address the following issues.

During review of historical files associated with Turbine C-1 and the questions below, it was discovered that the conversion of the turbine from a regenerative to a simple cycle turbine in 2016 (authorized via PBR 143631) resulted in an increase in Sulfur Dioxide (SO₂) emissions from Turbine C-1. This turbine was not reconstructed as defined in 40 CFR 60.15; however, due to the increase in SO₂ emissions it was considered modified per 40 CFR 60.14 for SO₂ and subject to New Source Performance Standard (NSPS) Subpart KKKK for SO₂ only. No emission increases associated with NO_x occurred as part of the turbine conversion from regenerative to simple cycle.

The definition of modification in 40 CFR 60.14(a) states:

“...any physical or operational change to an existing facility which results in an increase in the emission rate to the atmosphere of any pollutant to which a standard applies shall be considered a modification within the meaning of section 111 of the Act. Upon modification, an existing facility shall become an affected facility for each pollutant to which a standard applies and for which there is an increase in the emission rate to the atmosphere.”

Based on this definition, the modification resulted in an increase in emission of SO₂ only. No increase in emissions of NO_x occurred; therefore, all included forms show applicability for SO₂ only. A permit shield has been requested for NO_x negative applicability to NSPS KKKK.

1. Unit ID No. C-01 does not appear in the current database (your current effective permit). There is a unit C-1 in the database. Please clarify and provide Form OP-SUMR to add the unit if it is a new unit.

Unit C-01 and C-1 are the same unit. There have been inconsistencies in the ID designations between NSR and Title V representations over the years. We have attached the updated OP-PBR SUP using ID C-1.

2. Form OP-SUMR – please submit OP-SUMR with correct PCA information. For any units authorized by a registered PBR, the OP-SUMR PCA column should be reflected. Please refer to the instructions and update the formatting for any registered PBRs listed on the Form OP-SUMR.

The only registered PBR is PBR 143631 associated with Turbine C-1. Please find attached Form OP-SUMR to include the PCA information as well as the revision associated with NSPS KKKK as mentioned above.

3. Form OP-REQ1 – Questions I.A.4 and I.A.5 have been answered differently in the current application than the effective permit. Please confirm these selections as in the introduction it mentioned No revisions to the SOP are requested with this application. Your currently selected answers resulted in the Special Terms and Conditions 3.A and 3.B deletion from the effective permit.

Please find attached the updated OP-REQ1 incorporating the requested changes. I believe the confusion is in the fact that all combustion vents are listed in the applicable requirements table and have periodic monitoring rather than following Special Terms and Conditions 3.A. and 3.B. All other vents at the site are not subject to Special Terms and Conditions 3.A. and 3.B. as they are not capable of producing visible emissions such as vents that emit only colorless VOCs; vents from non-fuming liquids; vents that provide passive ventilation, such as plumbing vents; or vent emissions from any other source that does not obstruct the transmission of light.

4. Unit ID No. C-01 – Table D of the Form OP-PBR SUP states “N/A” under Monitoring Requirements and needs to have specific information. This column should specify what is being monitored and/or recorded for each unit and frequency. Please refer to the form instructions for details about what we are looking for.

5. Form OP-PBRSUP – when all revisions requested above are made, please make sure to update the date on all 4 tables of the OP-PBRSUP and submit all tables as a set.

Please find attached the updated Form OP-PBRSUP.

Please address the following issues.

1. Unit ID No. C-01 does not appear in the current database (your current effective permit). There is a unit C-1 in the database. Please clarify and provide Form OP-SUMR to add the unit if it is a new unit.
2. Form OP-SUMR – please submit OP-SUMR with correct PCA information. For any units authorized by a registered PBR, the OP-SUMR PCA column should be reflected. Please refer to the instructions and update the formatting for any registered PBRs listed on the Form OP-SUMR.
3. Form OP-REQ1 – Questions I.A.4 and I.A.5 have been answered differently in the current application than the effective permit. Please confirm these selections as in the introduction it mentioned No revisions to the SOP are requested with this application. Your currently selected answers resulted in the Special Terms and Conditions 3.A and 3.B deletion from the effective permit.
4. Unit ID No. C-01 – Table D of the Form OP-PBRSUP states “N/A” under Monitoring Requirements and needs to have specific information. This column should specify what is being monitored and/or recorded for each unit and frequency. Please refer to the form instructions for details about what we are looking for.
5. Form OP-PBRSUP – when all revisions requested above are made, please make sure to update the date on all 4 tables of the OP-PBRSUP and submit all tables as a set.

Subject: Technical Review -- FOP O3167/Project 36988 , El Paso Natural Gas Company LLC/Guadalupe Compressor Station

Good Afternoon,

I have been assigned to the Federal Operating Permit (FOP renewal application of Permit No. O3167 for El Paso Natural Gas Company LLC, Guadalupe Compressor Station. This application has been assigned Project No. 36988. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Regulated Entity Number: RN100212091

Dear Senator Blanco:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-104.907222,31.773333&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

1.0 Introduction

The El Paso Natural Gas Company, LLC (EPNG) (CN600311682) is submitting a site operating permit (SOP) application for the Guadalupe Compressor Station (CS) (RN100212091) to renew Title V SOP Number (No.) O3167. Guadalupe CS is located in Culberson County, which is classified as an attainment county for all criteria pollutants.

Per Title 30 of the Texas Administrative Code (30 TAC) §122.133(2), Guadalupe CS is required to submit a permit renewal application at least six (6) months, but no earlier than 18 months, prior to the February 19, 2025 expiration date of the existing SOP. Therefore, to avoid expiration of the existing permit and maintain compliance at the site, EPNG is submitting this SOP renewal application before the renewal deadline of August 19, 2025. No revisions to the SOP are requested with this application.

Section 2.0 contains a process description for the facility and Section 3.0 contains all required Texas Commission on Environmental Quality (TCEQ) forms for the renewal application.

1.3 Current Authorizations

Presently, emissions resulting from the site's operations are authorized by TCEQ New Source Review (NSR) Permit No. 19019, Permit By Rule (PBR) certification 143631, and various unregistered PBRs. A detailed listing of these authorizations can be found at the end of the OP-REQ1 form that is included in this application.

2.0 Process Description

The Guadalupe CS is a natural gas transmission facility and operates the following emission sources at the site.

2.1 Compressor Engine

One (1) Waukesha L5108GL natural gas-fired reciprocating compressor engine rated at 1,350 horsepower (Unit ID: AUX-1).

2.2 Stationary Gas Turbine

One (1) a GE Frame 5 natural gas fired stationary gas turbine (Unit ID: C-1), rated at 24,720 hp.

2.3 Tanks and Other Miscellaneous Equipment

- One (1) oil storage vessel (Unit ID: TANK-1),
- One (1) ethylene glycol storage vessel (Unit ID: TANK-2),
- One (1) underground used oil sump (Unit ID: TANK-3),
- One (1) used oil storage vessel (Unit ID: TANK-4).

2.4 Fugitives

Fugitive equipment (Unit ID: AREA FUG) at the site consists of valves, flanges, relief valves, open-ended lines, and compressor/pump seals.

2.5 MSS and Emergency Shutdowns

Planned maintenance, startup, and shutdown (MSS) (Unit ID: MSS), and emergency shutdown-related vent emissions at the site include station and compressor blowdowns (depressurization of natural gas from equipment). Equipment blowdowns can occur because of planned MSS activities when the station equipment needs to be depressurized. Additionally, based on operations records for similar compressor stations, shutdowns (ESD) occur one (1) time per year, on average, for various reasons, such as predictable equipment maintenance, weather-related

shutdowns, etc. It should be noted that ESDs are not considered emission events. Emission events will be handled under 30 TAC §101.201 as required.
