Mr. Hunter,

Please find attached the updated OP-REQ1 incorporating the requested changes. I believe the confusion is in the fact that all combustion vents are listed in the applicable requirements table and have periodic monitoring rather than following Special Terms and Conditions 3.A. and 3.B. All other vents at the site are not subject to Special Terms and Conditions 3.A. and 3.B. as they are not capable of producing visible emissions such as vents that emit only colorless VOCs; vents from non-fuming liquids; vents that provide passive ventilation, such as plumbing vents; or vent emissions from any other source that does not obstruct the transmission of light.

Is it possible for us to submit an electronic signature in STEERS at the end of your review, like was historically done with the paper OP-CRO1 for certifying a period of time? As with the paper form, it is difficult to have the RO sign in STEERS for multiple questions/responses during the review process.

Thanks,  
Scott

Good afternoon Mr. LeBlanc,

The Effective permit for FOP O3177 has the site wide special term and condition covering stationary vents with a flow rate of less than 100,000 actual cubic feet per minute that are not listed in the Applicable Requirements Summary attachment. In this renewal application OP-REQ1, Question I.A.3 and Question I.A.4 were answered “NO” and “YES” respectively, but it doesn’t appear that all of the vents on site have been submitted with unit-specific requirements.

Please update your answers to I.A.3 and I.A.4, and submit OP-REQ1(page 1 only) by **March 31, 2025.**

Updating I.A.3 to “YES” and I.A.4 to “NO” will result in the Special Term and Conditions in the attached permit. See ST&C #3.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

Thank you for your cooperation.

**Subject:** RE: Working Draft Permit -- FOP O3177/Project 36989, El Paso Natural Gas Company, L.L.C./Keystone Compressor Station

Hello Mr. Hyden,

Thank you for the updated document. The EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

The registered PBR nos. had not been added to the emission unit specific NSR authorizations for RECIP A01, RECIP A02, and RECIP A03 and the FOP should be consistent with the PBR Supplemental table. This is accomplished through the submittal of the OP-SUMR.

I'm sorry about the trouble with STEERS. You can submit updates to an existing application through STEERS by selecting Update in the "Title V General Information – New (or Existing)". Full instructions can be found here in our [Title V STEERS Guidance](#). The instructions on updates to an existing Title V application begin on page 42.

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Mr. Hunter,

Please find attached the requested Form OP-SUMR.

I wanted to also get some clarification on the reasoning for the request. The renewal did not request any revisions to the SOP and the permit already references SE7 and the effective date for the three engines mentioned below. Is the goal just to add the registration number (111984) to the database? If so, I believe this will resolve the issue.

However, because there are no revisions or corresponding UA forms associated with this request, these entries have been left blank. The unit names were pulled from STARS.

Lastly, application updates may now be submitted through STEERS; however, I have yet to find someone at TCEQ that can tell me how that process works and access the project to submit additional information. Once the application in STEERS is submitted you can no longer access it. Do you create another application in STEERS for the site? That doesn't seem correct as it would generate another TCEQ project number. Any guidance on this would be appreciated.

Thanks,  
Scott

Good afternoon Mr. Leblanc,

After further review more information is needed to complete the renewal application. Please submit the following information by **03/26/2025**:

- Submit form OP-SUMR for emission units RECIP A01, RECIP A02, and RECIP A03, with the PBR Registration included in the following format:
  - XXX/MM/DD/YYYY[rrrr] Authorized prior to March 14, 1997
    - XXX = 30 TAC Chapter 116 standard exemption number or 30 TAC Chapter 106 PBR number.
    - MM/DD/YYYY = Standard exemption or PBR effective date, approval date, or modification completion date
    - [rrrr] = Registration number for the authorization.
  - The full instruction can be found here: [OP-SUMR form instructions](#)

I have attached an updated WDP to reflect the changes.

An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **01/30/2025**.

- OP-REQ1 – Please submit an updated OP-REQ1 page 87 only with the most recent issuance date for NSR permit 73674.

Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at [http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\\_V/sop\\_wdp\\_factsheet.pdf](http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf). This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. **Subject:** Technical Review -- FOP O3177/Project 36989, El Paso Natural Gas Company, L.L.C./Keystone Compressor Station

Mr. Robert Leblanc,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O3177 for El Paso Natural Gas Company, L.L.C., Keystone Compressor Station. This application has been assigned Project No. 36989. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. # 1.0 Introduction

The El Paso Natural Gas Company, LLC (EPNG) (CN600311682) is submitting an operating permit application for the Keystone Compressor Station (CS) (RN100216688) to renew their Title V Site Operating Permit (SOP) Number (No.) O3177. Keystone CS is located in Winkler County, which is classified as an attainment county for all criteria pollutants.

Per Title 30 of the Texas Administrative Code (30 TAC) §122.133(2), Keystone CS is required to submit a permit renewal application at least six (6) months, but no earlier than 18 months, prior to the February 19, 2025 expiration date of the existing SOP. Therefore, to avoid expiration of the existing permit and maintain compliance at the site, EPNG is submitting this SOP renewal application before the renewal deadline of August 19, 2024. No revisions to the SOP are requested with this application.

Section 2.0 contains a process description for the facility, and Section 3.0 contains all required Texas Commission on Environmental Quality (TCEQ) forms for the renewal application.

## 1.3 Current Authorizations

Presently, emissions resulting from the site's operations are authorized by TCEQ New Source Review (NSR) Permit No. 73674, Permit By Rule (PBR) registration 111984, and various unregistered PBRs. A detailed listing of these authorizations can be found at the end of the OP-REQ1 form that is included in this application.

## 2.0 Process Description

Keystone CS is a natural gas transmission facility. The following sections describe emission sources at the site.

### 2.1 Compressor Engine

- Twelve (12) Cooper-Bessemer GMW-6TF (RECIP A01-RECIP A12)
- Three (3) Cooper Bessemer GMW-8T (RECIP B01-RECIP B03) reciprocating compressor engines.

### 2.2 Tanks and Other Miscellaneous Equipment

- Three (3) oil storage vessels (Unit IDs: TANK-1, TANK-2, and TANK-3),
- One (1) underground used oil storage tank (Unit ID: TANK-4),
- One (1) used oil tank (Unit ID: TANK-5),
- One (1) oily water tank (Unit ID: TANK-6),
- One (1) auxiliary unit tank (Unit ID: TANK-7),
- One (1) plant B oil tank (Unit ID: TANK-8).

### 2.3 Fugitives

Fugitive equipment (Unit ID: FUGITIVES) at the site consists of valves, flanges, relief valves, open-ended lines, and compressor/pump seals.

### 2.4 MSS and Emergency Shutdowns

Planned maintenance, startup, and shutdown (MSS) (Unit ID: MSS), and emergency shutdown-related vent emissions at the site include station and compressor blowdowns (depressurization of natural gas from equipment). Equipment blowdowns can occur because of planned MSS activities when the station equipment needs to be depressurized. Additionally, based on operations records for similar compressor stations, shutdowns (ESD) occur one (1) time per year, on average, for various reasons, such as predictable equipment maintenance, weather-related shutdowns, etc. It should be noted that ESDs are not considered emission events. Emission events will be handled under 30 TAC §101.201 as required.

## 3.0 SOP Renewal Forms
