## TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

August 21, 2024

THE HONORABLE JOAN HUFFMAN  
TEXAS SENATE  
PO BOX 12068  
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application  
Project Number: 37032  
Permit Number: O2334

Jack A Fusco Energy Center  
Thompsons, Fort Bend County  
Regulated Entity Number: RN100216092  
Customer Reference Number: CN603517848

Dear Senator Huffman:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.622777,29.472222&level=13>.

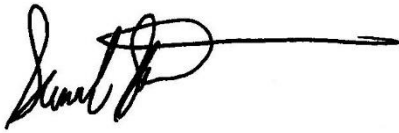

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

## 1.0 INTRODUCTION

Calpine Construction Finance Company, L.P. (Calpine) owns and operates the Jack A. Fusco Energy Center, LLC, an electric generating plant located in Richmond, Fort Bend County, Texas. Per 30 Texas Administrative Code (TAC) §122.241(a), the SOP for the Jack A. Fusco Energy Center (Permit Number O-2334) expires five years from the date of issuance. Thus, Calpine is submitting this permit renewal six months prior to its SOP expiration date of February 19, 2025, as required by 30 TAC §122.133(2).

Calpine is requesting a revision as noted in the OP-2 form regarding the removal of GRP-STEAM representing two duct burners (DB-001 and DB-002). Applicable requirements apply to the combustion turbine generators, including the duct burners, which are identified separately in the permit as GRP-TURBINES.

The following documentation is provided with this application: all required TCEQ FOP application forms, including forms addressing application certification, administrative information, site wide applicability information, and unit attribute information. The Major NSR Summary Table currently in the Title V Permit is current except for the issuance date, which should be February 3, 2020.

## **2.0 PROCESS DESCRIPTION**

The Jack A. Fusco Energy Center is a natural gas-fired combined cycle power generation facility. The primary sources of criteria pollutants associated with the facility are two gas-fired combustion turbines with duct burners venting through two Heat Recovery Steam Generator (HRSG) stacks.

The two HRSG units each have the capability of auxiliary duct burner firing. The two HRSG units furnish steam to a common steam turbine for the additional generation of electricity.

The combustion turbines and HRSG duct burners are fired exclusively with pipeline-quality natural gas which minimizes emissions of volatile organic compounds, particulate matter, and sulfur dioxide. Emission control systems include the use of dry low-NOx combustors and burners coupled with Selective Catalytic Reduction (SCR) for control of NOx and good combustion practices for abatement of CO and VOCs.
