

Form OP-CRO2
Change of Responsible Official Information
Federal Operating Permit Program

The Texas Commission on Environmental Quality (TCEQ) shall be notified of a new appointment or administrative information change (e.g., address, phone number, title) for a Responsible Official (RO), Designated Representative (DR), or Alternate Designated Representative (ADR) in the next submittal. This form satisfies the requirements for notification (a revised Certificate of Representation must also be submitted to the U.S. Environmental Protection agency for changes in the DR and ADR). After the initial submittal, if there is a change of Duly Authorized Representative (DAR) appointment or administrative information changes for the DAR, include a revised Form OP-DEL (Delegation of Responsible Official) with the next submittal to TCEQ.

Good morning Anugraha,

We were able to get Mr. Alvarado's STEERS account reactivated, and this morning he submitted the OP-CRO1 form in STEERS. Please check and let me know if this resolves the matter.

Also, we will shortly be submitting through STEERS an update to change the Title V DAR and Acid Rain DR and ADR due to staff changes within the company.

Regards

Good morning Ed,

We still have not received the OP-CRO1.

If the mail was sent last Friday, do you think you could provide me with its tracking information? That way, we also know what to look out for, as well as move the project review accordingly.

Good morning Anugraha,

I believe the hard copy of the Mark One II OP-CRO1 form was sent out on Friday. Please let me know if you do not receive it by tomorrow.

Also, just to let you know, we are concurrently getting Mr. Alvarado set up with a STEERS account so he can make future submittals through STEERS. Also, he will delegate new DARs (since the previous DAR left the company), so we will have more options to make submittals and be more responsive in the future.

Hello Anugraha,

Thank you for making the change we discussed in the RFI. We have reviewed the WDP and our only comment are typographical. Please see the attached marked up cover page from the WDP where the Roman numerals in the Mark One II name are called out in two places.

Since the requested changes are so minor, we have also attached an OP-CRO1 to certify any submissions since the original application submittal.

We look forward to the next steps in the process.

Good afternoon Ed,

I have conducted a technical review of renewal application for Mark One II LLC, Mark One Power Station. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **February 8, 2025**.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application updates is required to be submitted. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Thank you for your cooperation.

Hi Anugraha,

Attached please find the updated forms to reflect the changes to Standard Permit 167417 (which was revised after the FOP application was submitted), and the corrected PBR references.

We have also attached suggested citations for the NOx and CO applicability for Chapter 117 for the combustion turbines because their configuration is not captured by the default Unit Attribute codes. The configuration addresses in the attached citations are:

- As allowed at 117.8100(a)(5), the plant will follow the CEMS requirements of 40 CFR Part 75 as an alternative to paragraph (1) for both the NOx and CO CEMS.
- The turbines do not have bypass stacks or common stacks, and the CEMS are not shared between units.

Please let me know if you have any questions.

Subject: RFI -- FOP O4692/Project 37237, Mark One II LLC/Mark One Power Station

Good morning Edward,

I have been assigned to the Federal Operating Permit (FOP) initial issuance application of Permit No. O4692 for Mark One II LLC, Mark One Power Station. This application has been assigned Project No. 37237. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

During technical review, it was found that additional information is required. Please submit the following by **December 24th**:

1. Resubmit **Pg.87 of the OP-REQ1** with the latest issuance date of NSR Standard permit 167417, which is 11/22/2024.
2. Re-submit **Pg.88 of the OP-REQ1** as the PBR nos. do not match between this page and form OP-SUM. PBR No. 105.532 is missing on the OP-REQ1(See below) –

Good Morning Edward,

I have been assigned to the Federal Operating Permit (FOP) initial issuance application of Permit No. O4692 for Mark One II LLC, Mark One Power Station. This application has been assigned Project No. 37237. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. Good morning Ed,

Sorry for the delay in response. The requested change has been addressed and updated on the WDP. The PNAP review has commenced.

Additionally, since you have submitted the final OP-CRO1 form via email, please also do the following by **March 24th, 2025.**

1. Please follow up with the wet ink original signature OP-CRO1 in the mail. You could also upload the signed OP-CRO1 form in STEERS.

Let me know if you have any questions.

Hello Anugraha,

Thank you for making the change we discussed in the RFI. We have reviewed the WDP and our only comment are typographical. Please see the attached marked up cover page from the WDP where the Roman numerals in the Mark One II name are called out in two places.

Since the requested changes are so minor, we have also attached an OP-CRO1 to certify any submissions since the original application submittal.

We look forward to the next steps in the process.

Good afternoon Ed,

I have conducted a technical review of renewal application for Mark One II LLC, Mark One Power Station. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **February 8, 2025**.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application updates is required to be submitted. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Thank you for your cooperation.

Hi Anugraha,

Attached please find the updated forms to reflect the changes to Standard Permit 167417 (which was revised after the FOP application was submitted), and the corrected PBR references.

We have also attached suggested citations for the NOx and CO applicability for Chapter 117 for the combustion turbines because their configuration is not captured by the default Unit Attribute codes. The configuration addresses in the attached citations are:

- As allowed at 117.8100(a)(5), the plant will follow the CEMS requirements of 40 CFR Part 75 as an alternative to paragraph (1) for both the NOx and CO CEMS.
- The turbines do not have bypass stacks or common stacks, and the CEMS are not shared between units.

Please let me know if you have any questions.

Subject: RFI -- FOP O4692/Project 37237, Mark One II LLC/Mark One Power Station

Good morning Edward,

I have been assigned to the Federal Operating Permit (FOP) initial issuance application of Permit No. O4692 for Mark One II LLC, Mark One Power Station. This application has been assigned Project No. 37237. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

During technical review, it was found that additional information is required. Please submit the following by **December 24th**:

1. Resubmit **Pg.87 of the OP-REQ1** with the latest issuance date of NSR Standard permit 167417, which is 11/22/2024.
2. Re-submit **Pg.88 of the OP-REQ1** as the PBR nos. do not match between this page and form OP-SUM. PBR No. 105.532 is missing on the OP-REQ1(See below) –

Subject: Technical Review -- FOP O4692/Project 37237, Mark One II LLC/Mark One Power Station

This message originated outside of our organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Morning Edward,

I have been assigned to the Federal Operating Permit (FOP) initial issuance application of Permit No. O4692 for Mark One II LLC, Mark One Power Station. This application has been assigned Project No. 37237. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Thank you for your corporation.

Sincerely,

Anugraha Renny

THE TEXAS SENATE

Senator Mayes Middleton: District 11

Occupation: President & CEO, Middleton Oil

Education: University of Texas at Austin, J.D.; University of Texas at Austin, B.A.

Legislative Experience: House Member, 2019-2022; Senate Member: 2023 - present

Hometown: Galveston

Party: Republican

Mayes Middleton is President of Middleton Oil Company, an independent oil and gas company. He also runs ranching, cattle, and farming operations.

Mayes and his wife, Macy, have four children: Connor, Christian, Matthew, and Martha Ann. Mayes and Macy support numerous local community organizations and faith-based charities throughout the Galveston-Houston region.

Prior to serving in the Texas Senate, Mayes served two terms in the Texas House of Representatives, representing Chambers and Galveston Counties. During his last term in the Texas House, Mayes served as Chairman of the Texas House Freedom Caucus.

Now in the Texas Senate, Mayes represents Senate District 11, encompassing portions of Brazoria, Galveston, and Harris Counties. Throughout his time in both the House and Senate, Mayes has consistently ranked among the top most conservative members of the Legislature. Senator Middleton currently serves as the Vice Chairman of the Subcommittee on Higher Education and as a member on the Senate Committees on Administration, Business & Commerce, Education, Jurisprudence, and State Affairs.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

October 9, 2024

THE HONORABLE MAYES MIDDLETON
TEXAS SENATE
PO BOX 12068
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Initial Issuance Application

Regulated Entity Number: RN111112082
Customer Reference Number: CN606089159

Dear Senator Middleton:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) initial issuance application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.431111,29.228611&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Mayes Middleton

◆	1. The application area includes at least one unit that does not meet the CAM exemptions in 40 CFR § 64.2(b) for all applicable requirements that it is subject to, and the unit has a pre-control device potential to emit greater than or equal to the amount in tons per year required in a site classified as a major source. <i>If the response to Question XI.L.1 is "NO," go to Section XI.M.</i>	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
◆	2. The unit or units defined by XI.L.1 are using a control device to comply with an applicable requirement. <i>If the response to Question XI.L.2 is "NO," go to Section XI.M.</i>	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
◆	3. The permit holder has submitted a CAM proposal on Form OP-MON in a previous application.	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
◆	4. The owner/operator or permit holder is submitting a CAM proposal on Form OP-MON according to the deadlines for submittals in 40 CFR § 64.5 in this application. <i>If the responses to Questions XI.L.3 and XI.L.4 are both "NO," go to Section XI.M.</i>	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
	5. The owner/operator or permit holder is submitting a CAM implementation plan and schedule to be incorporated as enforceable conditions in the permit.	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
	6. Provide the unit identification numbers for the units for which the applicant is submitting a CAM implementation plan and schedule in the space below.	
◆	7. At least one unit defined by XI.L.1 and XI.L.2 is using a CEMS, COMS or PEMS meeting the requirements of 40 CFR § 64.3(d)(2).	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
◆	8. All units defined by XI.L.1 and XI.L.2 are using a CEMS, COMS or PEMS meeting the requirements of 40 CFR § 64.3(d)(2). <i>If the response to Question XI.L.8 is "YES," go to Section XI.M.</i>	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO

Periodic Monitoring Text: Ammonia emissions are calculated as the difference between the input ammonia, measured by the ammonia injection rate, and the ammonia reacted, measured by the differential NO_x upstream and downstream of the control device that injects ammonia into the exhaust stream. The ammonia emissions must be calculated in accordance with 30 TAC §117.8130(1) for each operating hour.

B. Compliance Certification - Statement for Units in Compliance* (Indicate response by entering an "X" in the appropriate column)	
1. With the exception of those emission units listed in the Compliance Schedule section of this form (Part 2, below), and based, at minimum, on the compliance method specified in the associated applicable requirements, are all emission units addressed in this application in compliance with all their respective applicable requirements as identified in this application?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
2. Are there any non-compliance situations addressed in the Compliance Schedule Section of this form (Part 2)?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
3. If the response to Item B.2, above, is "Yes," indicate the total number of Part 2 attachments included in this submittal. <i>(For reference only)</i>	
<p>* For Site Operating Permits (SOPs), the complete application should be consulted for applicable requirements and their corresponding emission units when assessing compliance status. For General Operating Permits (GOPs), the application documentation, particularly Form OP-REQ1 should be consulted as well as the requirements contained in the appropriate General Permits portion of 30 TAC Chapter 122.</p> <p>Compliance should be assessed based, at a minimum, on the required monitoring, testing, record keeping, and/or reporting requirements, as appropriate, associated with the applicable requirement in question.</p>

1.0 INTRODUCTION

Mark One II, LLC (Mark One II) is constructing the Mark One II power station (the Plant), located at an existing site known as Mark One Power Station, near Angleton, Brazoria County, Texas. Mark One II will be comprised of four natural gas-fired simple cycle LM6000 combustion turbine generators (CTG) and ancillary equipment. Per 30 Texas Administrative Code (TAC) §122.10(13)(D)(iii), any site with the potential to emit (PTE) 25 tons per year or more of nitrogen oxides (NO_x) in any ozone nonattainment area classified as "severe" is considered a major source and, per §122.120(a)(1), is required to obtain a federal operating permit (FOP). Additionally, each simple cycle combustion turbine is an affected unit as defined in 40 Code of Federal Regulations Part 72 subject to the requirements of the Acid Rain Program and per §122.120(a)(1), an FOP is required. As the site has a PTE greater than 25 tons per year of NO_x, and the units are subject to the Acid Rain Program, the Plant is required to obtain an FOP.

The required Texas Commission on Environmental Quality (TCEQ) FOP application forms are included with this application, including forms addressing application certification, administrative information, site wide applicability information, and unit attribute information.

2.0 PROCESS DESCRIPTION

This section contains an overall process description of the Mark One II operations. A process flow diagram, plot plan, and area map are included at the end of this section.

2.1 Combustion Turbines

Mark One II is comprised of four natural gas-fired simple cycle combustion turbine generators and ancillary equipment. The combustion turbine model under construction is the General Electric (GE) LM6000, nominally rated at 50 megawatts (MW) output. In each of the simple cycle units, ambient air is drawn in through the air inlet and enters the compressor section of the CTG. Water injection systems are employed on the compressor side of the unit for power augmentation. Atomized water is injected into the airflow on the compressor side, increasing the mass flow. Rapid evaporation of the water spray cools the airflow, allowing higher inlet air mass flow rates, resulting in the CTG recapturing output capacity that would be lost during hot summer conditions. Natural gas is mixed with the compressed inlet air and combusted in the combustor section of the CTG. A water injection system is used to reduce the emissions of NO_x formed in the combustors. The hot combustion gases expand through the unit across turbine blades, causing rotation of the turbine shafts, which in turn drive the compressor sections and an electric generator, producing electricity. The hot exhaust then passes through an oxidation catalyst to reduce CO and VOC emissions and subsequently passes through a selective catalytic reduction (SCR) system to reduce NO_x emissions before exiting through a stack (Emission Point Numbers [EPNs] CT-7 through CT-10).

2.2 Oil Systems

The units include closed-loop lube oil recirculation systems to lubricate the moving parts of each combustion turbine and generator. Additionally, the units include a hydraulic fluid service. Oil vapor (constituting VOC) and oil mist (constituting particulate matter (PM)) emissions are generated by oil vaporization resulting from heating of lube oil in the combustion turbines and generators and subsequent condensation of droplets when the vapor is cooled in the cooler zones of the storage reservoir compartment. Lube oil mist emissions from the reservoir compartment are controlled by a mist eliminator exhausted through a dedicated reservoir vent (Unit IDs CT-LOV-7 through CT-LOV-10). Similarly, VOC and PM emissions have been quantified for the generator lube oil systems (Unit IDs GEN-LOV-7 through GEN-LOV-10) and hydraulic oil systems (Unit IDs HYD-OV-7 through HYD-OV-10).

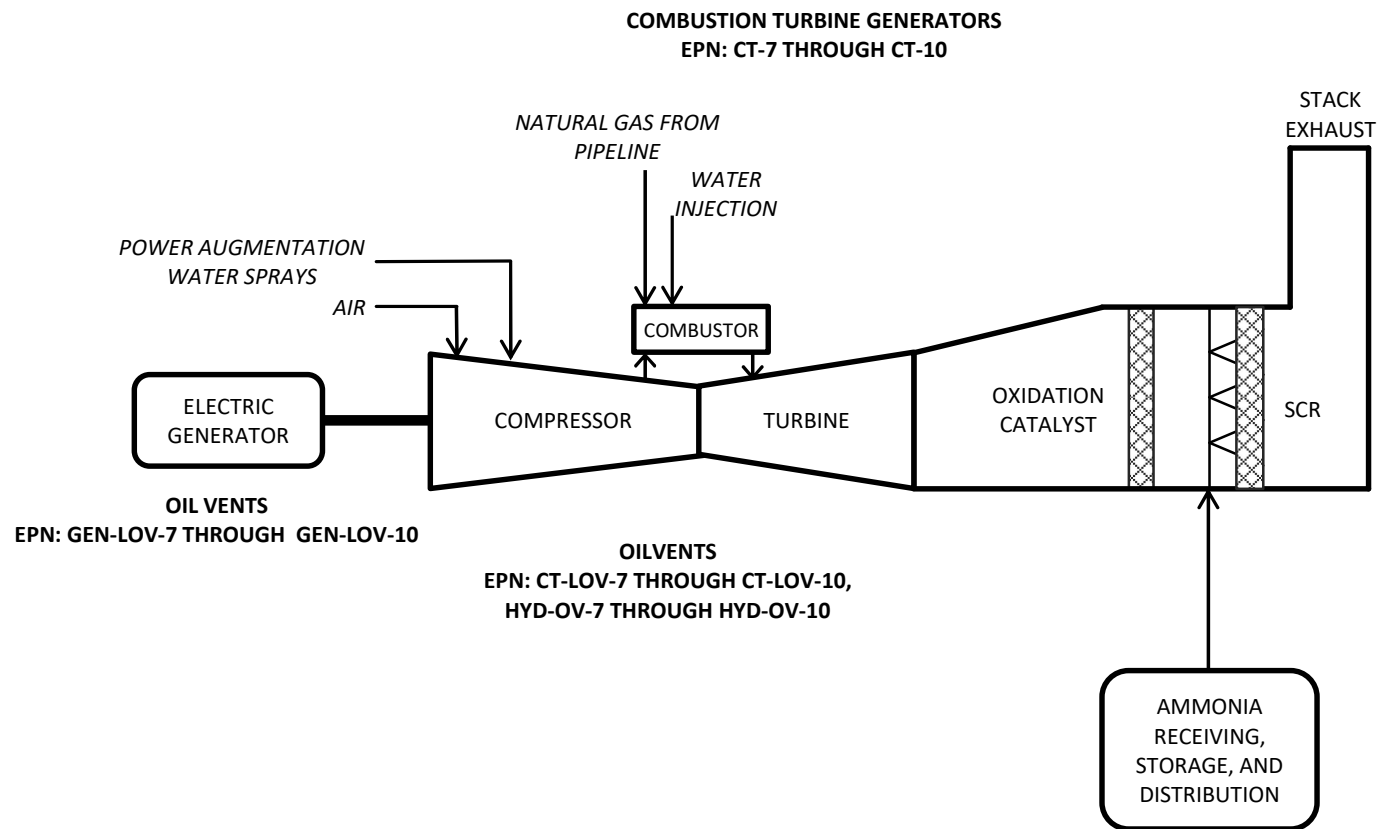

2.3 General Maintenance

Operations at the Plant include general maintenance activities, some of which may have potentially applicable requirements. Maintenance painting (ID PAINTING) has been identified and addressed in this application.

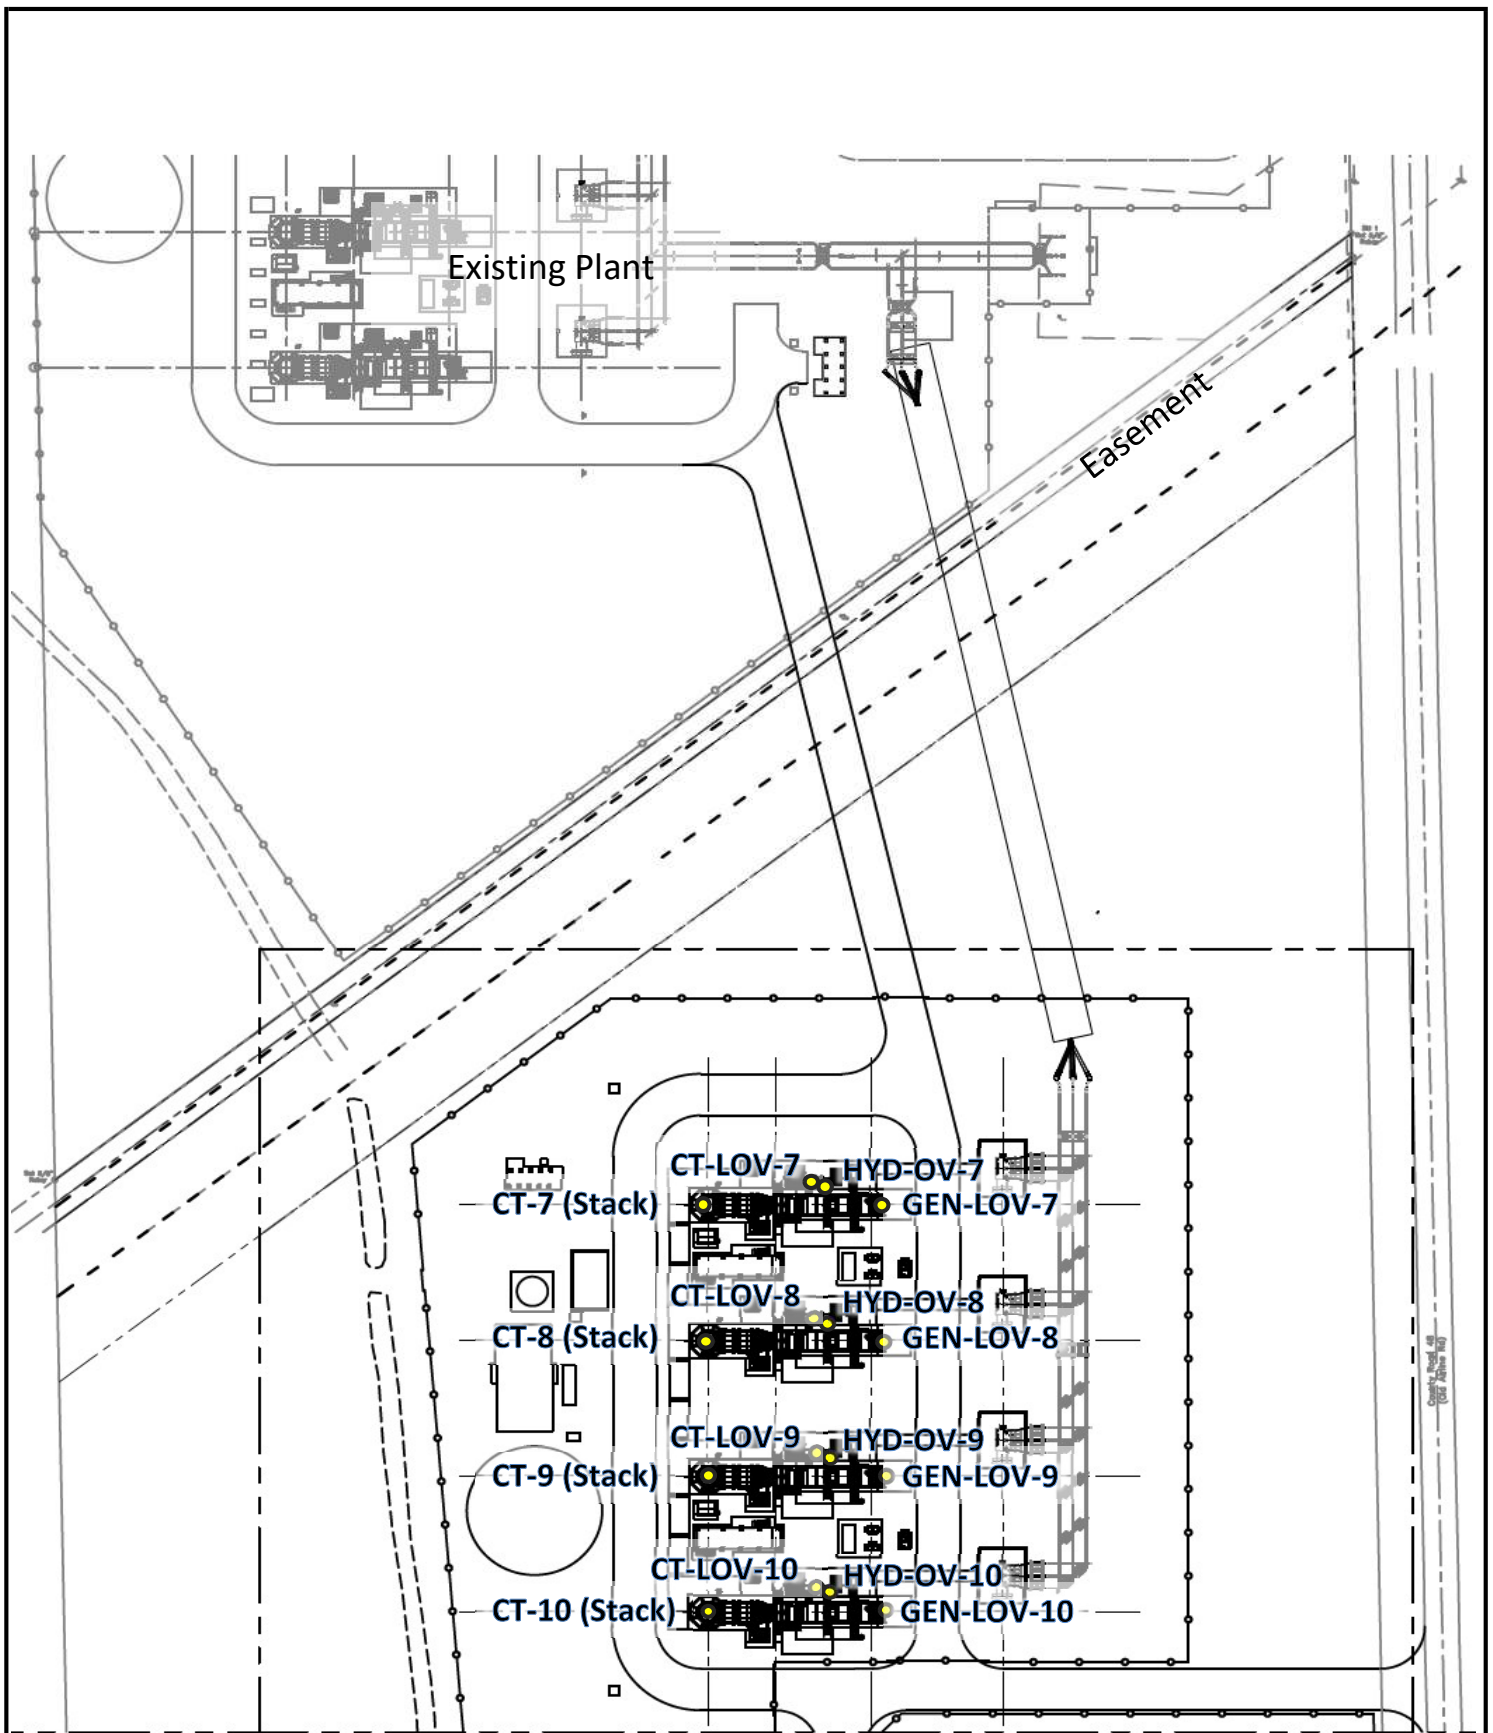

2.4 Other Equipment

One high-pressure 15,000-gallon ammonia (NH_3) solution storage tank is located at the site. An aqueous solution containing 19 percent NH_3 is delivered by tanker truck. The NH_3 storage tank maintains working pressure sufficient to prevent working and breathing loss emissions to the atmosphere. Piping components associated with the tank and the distribution of NH_3 throughout the system are sources of fugitive emissions. There are no regulatory requirements applicable to the NH_3 equipment, no permit shield is needed to document negative applicability, and the equipment is not listed on Form OP-ACPS, Application Compliance Plan and Schedule. Therefore, the ammonia equipment is not listed on Form OP-SUM, Individual Unit Summary.

Natural gas is delivered to the site via pipeline and then metered and piped to the combustion turbines. The lube oil and hydraulic oil systems receive recirculated oil through piping from oil reservoirs. The piping components in natural gas and oil service are fugitive sources of VOC emissions. Like the previously mentioned NH_3 sources, the fugitive VOC sources do not need to be listed on the Form OP-SUM.

3.0 APPLICABILITY NOTES

3.1 30 TAC Chapter 117

Following the unit attributes on Form OP-UA11 and the regulatory applicability flowchart for 30 TAC Chapter 117 results in incorporation of Monitoring and Testing citations [G]§117.8100(a)(3) and (a)(4) for both the NO_x and CO pathways (Group ID GRPTURBII, SOP Index No. R7201, and Pollutants NO_x and CO). These citations address sharing of a CEMS among the stacks of multiple units, or sharing a CEMS on a unit with multiple stacks. However, the CEMS are not shared among multiple units, and each unit only has one stack. Each CEMS is dedicated to the individual stack of each unit, and these citations therefore do not apply. Please ensure these citations are not included in the working draft permit as they do not apply to our units.

3.2 40 CFR Part 60, Subpart KKKK

Following the unit attributes on Form OP-UA11 and the regulatory applicability flowchart for 40 CFR Part 60, Subpart KKKK for both Index Nos. 60KKKK and 60KKKK-75 results in incorporation of Monitoring and Testing citation §60.4350(e). This citation applies to turbines complying with the NO_x lb/MWh standard, but our units are complying with the ppm concentration standard. The parameters listed in citation §60.4350(e) are not required to be monitored when complying with the ppm concentration standard, and this citation therefore does not apply. Please ensure this citation is not included in the working draft permit as it does not apply to our units.

3.3 Standard Permit Registration No. 167417

The new source review authorization for the Mark One II emission sources is Standard Permit Registration No. 167417 for Electric Generating Units Air Quality Standard Permit. At or about the time of submittal of the FOP application for Mark One II, the TCEQ will also be reviewing an application for changes to the standard permit registration. After the revised registration has been issued, we will submit an FOP application update to incorporate the changed standard permit registration requirements into the FOP.

2. Are there any non-compliance situations addressed in the Compliance Schedule Section of this form (Part 2)?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
3. If the response to Item B.2, above, is "Yes," indicate the total number of Part 2 attachments included in this submittal. <i>(For reference only)</i>	
<p>* For Site Operating Permits (SOPs), the complete application should be consulted for applicable requirements and their corresponding emission units when assessing compliance status. For General Operating Permits (GOPs), the application documentation, particularly Form OP-REQ1 should be consulted as well as the requirements contained in the appropriate General Permits portion of 30 TAC Chapter 122.</p> <p>Compliance should be assessed based, at a minimum, on the required monitoring, testing, record keeping, and/or reporting requirements, as appropriate, associated with the applicable requirement in question.</p>

C. Subpart G - National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater		
<i>Applicability</i>		
1.	The application area is located at a site that is subject to 40 CFR 63, Subpart F and the application area includes process vents, storage vessels, transfer racks, or waste streams associated with a chemical manufacturing process subject to 40 CFR 63, Subpart F. <i>If the response to Question VIII.C.1 is "NO," go to Section VIII.D.</i>	<input type="checkbox"/> YES <input type="checkbox"/> NO
2.	The application area includes fixed roofs, covers, and/or enclosures that are required to comply with 40 CFR § 63.148.	<input type="checkbox"/> YES <input type="checkbox"/> NO
3.	The application area includes vapor collection systems or closed-vent systems that are required to comply with 40 CFR § 63.148. <i>If the response to Question VIII.C.3 is "NO," go to Question VIII.C.8.</i>	<input type="checkbox"/> YES <input type="checkbox"/> NO
4.	The application area includes vapor collection systems or closed-vent systems that are constructed of hard-piping.	<input type="checkbox"/> YES <input type="checkbox"/> NO
5.	The application area includes vapor collection systems or closed-vent systems that contain bypass lines that could divert a vent stream away from a control device and to the atmosphere. <i>If the response to Question VIII.C.5 is "NO," go to Question VIII.C.8.</i>	<input type="checkbox"/> YES <input type="checkbox"/> NO
<i>Vapor Collection and Closed Vent Systems</i>		
6.	Flow indicators are installed, calibrated, maintained, and operated at the entrances to bypass lines in the application area.	<input type="checkbox"/> YES <input type="checkbox"/> NO
7.	Bypass lines in the application area are secured in the closed position with a car-seal or a lock-and-key type configuration.	<input type="checkbox"/> YES <input type="checkbox"/> NO

I. Identifying Information

Periodic Monitoring Text: Ammonia emissions are calculated as the difference between the input ammonia, measured by the ammonia injection rate, and the ammonia reacted, measured by the differential NO_x upstream and downstream of the control device that injects ammonia into the exhaust stream. The ammonia emissions must be calculated in accordance with 30 TAC §117.8130(1) for each operating hour.

PUBLIC INVOLVEMENT PLAN FORM

Texas Commission on Environmental Quality

Public Involvement Plan Form for Permit and Registration Applications

The Public Involvement Plan is intended to provide applicants and the agency with information about how public outreach will be accomplished for certain types of applications in certain geographical areas of the state. It is intended to apply to new activities; major changes at existing plants, facilities, and processes; and to activities which are likely to have significant interest from the public. This preliminary screening is designed to identify applications that will benefit from an initial assessment of the need for enhanced public outreach.

All applicable sections of this form should be completed and submitted with the permit or registration application. For instructions on how to complete this form, see TCEQ-20960-inst.

Section 1. Preliminary Screening

- ☒ New Permit or Registration Application
☐ New Activity - modification, registration, amendment, facility, etc. (see instructions)

If neither of the above boxes are checked, completion of the form is not required and does not need to be submitted.

Section 2. Secondary Screening

- ☒ Requires public notice,
☐ Considered to have significant public interest, and
☒ Located within any of the following geographical locations:

- Austin
- Dallas
- Fort Worth
- Houston
- San Antonio
- West Texas
- Texas Panhandle
- Along the Texas/Mexico Border
- Other geographical locations should be decided on a case-by-case basis

**If all the above boxes are not checked, a Public Involvement Plan is not necessary.
Stop after Section 2 and submit the form.**

- ☒ Public Involvement Plan not applicable to this application. Provide **brief** explanation.

Historically the nearby community has not been involved with the site.

Section 3. Application Information

Type of Application (check all that apply):

Air ☐ Initial ☐ Federal ☐ Amendment ☐ Standard Permit ☒ Title V
Waste ☐ Municipal Solid Waste ☐ Industrial and Hazardous Waste ☐ Scrap Tire
☐ Radioactive Material Licensing ☐ Underground Injection Control

Water Quality

☐ Texas Pollutant Discharge Elimination System (TPDES)
☐ Texas Land Application Permit (TLAP)
☐ State Only Concentrated Animal Feeding Operation (CAFO)
☐ Water Treatment Plant Residuals Disposal Permit
☐ Class B Biosolids Land Application Permit
☐ Domestic Septage Land Application Registration

Water Rights New Permit

☐ New Appropriation of Water
☐ New or existing reservoir

Amendment to an Existing Water Right

☐ Add a New Appropriation of Water
☐ Add a New or Existing Reservoir
☐ Major Amendment that could affect other water rights or the environment

Section 4. Plain Language Summary

Provide a brief description of planned activities.

Mark One II, LLC (CN606089159) is constructing the Mark One II electric generating plant, consisting of four natural gas-fired simple cycle combustion turbines and ancillary equipment. The new plant is located at the existing Mark One Power Station site at 24444 County Road 48, Angleton, Brazoria County, Texas 77515.

Section 5. Community and Demographic Information

Community information can be found using EPA's EJ Screen, U.S. Census Bureau information, or generally available demographic tools.

Information gathered in this section can assist with the determination of whether alternative language notice is necessary. Please provide the following information.

Acid Rain Program

I certify that I was selected as the 'designated representative' or 'alternate designated representative', as applicable, by an agreement binding on the owners and operators of the affected source and each affected unit at the source.

I certify that I have all necessary authority to carry out my duties and responsibilities under the Acid Rain Program on behalf of the owners and operators of the affected source and each affected unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions.

I certify that the owners and operators of the affected source and each affected unit at the source shall be bound by any order issued to me by the Administrator, the permitting authority, or a court regarding the source or unit.

Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, an affected unit, or where a utility or industrial customer purchases power from an affected unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the designated representative or alternate designated representative, as applicable, and of the agreement by which I was selected to each owner and operator of the affected source and each affected unit at the source and; allowances and proceeds of transactions involving allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of allowances by contract, allowances and proceeds of transactions involving allowances will be deemed to be held or distributed in accordance with the contract.

STEP 5: Read the applicable certification statements, sign, and date.

Acid Rain Program

I certify that I was selected as the 'designated representative' or 'alternate designated representative', as applicable, by an agreement binding on the owners and operators of the affected source and each affected unit at the source.

I certify that I have all necessary authority to carry out my duties and responsibilities under the Acid Rain Program on behalf of the owners and operators of the affected source and each affected unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions.

I certify that the owners and operators of the affected source and each affected unit at the source shall be bound by any order issued to me by the Administrator, the permitting authority, or a court regarding the source or unit.

Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, an affected unit, or where a utility or industrial customer purchases power from an affected unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the designated representative or alternate designated representative, as applicable, and of the agreement by which I was selected to each owner and operator of the affected source and each affected unit at the source and; allowances and proceeds of transactions involving allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of allowances by contract, allowances and proceeds of transactions involving allowances will be deemed to be held or distributed in accordance with the contract.

CSAPR NO_x Annual Trading Program

I certify that I was selected as the designated representative or alternate designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CSAPR NO_x Annual unit at the source.

I certify that I have all the necessary authority to carry out my duties and responsibilities under the CSAPR NO_x Annual Trading Program on behalf of the owners and operators of the source and of each CSAPR NO_x Annual unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions and by any decision or order issued to me by the Administrator regarding the source or unit.

Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CSAPR NO_x Annual unit, or where a utility or industrial customer purchases power from a CSAPR NO_x Annual unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the 'designated representative' or 'alternate designated representative', as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CSAPR NO_x Annual unit at the source; and CSAPR NO_x Annual allowances and; proceeds of transactions involving CSAPR NO_x Annual allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CSAPR NO_x Annual allowances by contract, CSAPR NO_x Annual allowances and proceeds of transactions involving CSAPR NO_x Annual allowances will be deemed to be held or distributed in accordance with the contract.

CSAPR NO_x Ozone Season Group 1 Trading Program

I certify that I was selected as the designated representative or alternate designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CSAPR NO_x Ozone Season Group 1 unit at the source.

I certify that I have all the necessary authority to carry out my duties and responsibilities under the CSAPR NO_x Ozone Season Group 1 Trading Program on behalf of the owners and operators of the source and of each CSAPR NO_x Ozone Season Group 1 unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions and by any decision or order issued to me by the Administrator regarding the source or unit.

Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CSAPR NO_x Ozone Season Group 1 unit, or where a utility or industrial customer purchases power from a CSAPR NO_x Ozone Season Group 1 unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the 'designated representative' or 'alternate designated representative', as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CSAPR NO_x Ozone Season Group 1 unit at the source; and CSAPR NO_x Ozone Season Group 1 allowances and proceeds of transactions involving CSAPR NO_x Ozone Season Group 1 allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CSAPR NO_x Ozone Season Group 1 allowances by contract, CSAPR NO_x Ozone Season Group 1 allowances and proceeds of transactions involving CSAPR NO_x Ozone Season Group 1 allowances will be deemed to be held or distributed in accordance with the contract.

CSAPR NO_x Ozone Season Group 2 Trading Program
