		Applicability		
	1.	The application area is located at a site that is subject to 40 CFR 63, Subpart F and the application area includes process vents, storage vessels, transfer racks, or waste streams associated with a chemical manufacturing process subject to 40 CFR 63, Subpart F.  If the response to Question VIII.C.1 is "No," go to Section VIII.D.	☐ Yes ⊠ No	
	2.	The application area includes fixed roofs, covers, and/or enclosures that are required to comply with 40 CFR § 63.148.	Yes No	
	3.	The application area includes vapor collection systems or closed-vent systems that are required to comply with 40 CFR § 63.148.  If the response to Question VIII.C.3 is "No," go to Question VIII.C.8.	Yes No	
	4.	The application area includes vapor collection systems or closed-vent systems that are constructed of hard piping.	Yes No	
	5.	The application area includes vapor collection systems or closed-vent systems that contain bypass lines that could divert a vent stream away from a control device and to the atmosphere.  If the response to Question VIII.C.5 is "No," go to Question VIII.C.8.	Yes No	
		Vapor Collection and Closed Vent Systems		
	6.	Flow indicators are installed, calibrated, maintained, and operated at the entrances to bypass lines in the application area.	Yes No	
	7.	Bypass lines in the application area are secured in the closed position with a car-seal or a lock-and-key type configuration.	Yes No

	1.	The application area includes one or more of the affected sources in 40 CFR § 63.541(a) that are located at a secondary lead smelter.  If the response to Question VIII.L.1 is "No" or "N/A," go to Section VIII.M.	☐ Yes ⊠ No ☐ N/A
	2.	The application area is using and approved alternate to the requirements of § 63.545(c)(1)-(5) for control of fugitive dust emission sources.	Yes No
	М.	Subpart Y - National Emission Standards for Marine Tank Vessel Loading Operations	
	1.	The application area includes marine tank vessel loading operations that are specified in 40 CFR § 63.560 and located at an affected source as defined in 40 CFR § 63.561.	☐ Yes ⊠ No
	N.	Subpart CC - National Emission Standards for Hazardous Air Pollutants from Petroleum Refineries	
		Applicability	
	1.	The application area includes petroleum refining process units and/or related emission points that are specified in 40 CFR § 63.640(c)(1) - (c)(7). If the response to Question VIII.N.1 is "No," go to Section VIII.O.	☐ Yes ⊠ No
	2.	All petroleum refining process units/and or related emission points within the application area are specified in 40 CFR § 63.640(g)(1) - (g)(7).  If the response to Question VIII.N.2 is "Yes," go to Section VIII.O.	Yes No

Jasmine,

Attached are updated copies of the OP-SUMR and OP-PBRSUP which should address your comment.

The changes are in bold on page 5 of the OP-SUMR and on pages 2 and 4 of the OP-PBRSUP.

I reviewed the draft SOP and I don't have any comments.

Please let me know if there are any additional comments that need to be addressed.

Thank you, Shawn Pena Environmental Specialist 361-553-3401

#### Shawn.

The updated SOP draft is attached for you to review. Please provide comments by 06/27/2025 or sooner

In addition, you need to submit OP-SUMR to have the units under PBRs to match the PCA on the OP-PBRSUP.

I already updated those PCA for you, which you can see in the SOP NSR by unit list table. The registered PBR118024 and 108571 were added to each unit (second pic).

However, the OP-SUMR form is still required for documentation as your application is part of the permit.

The OP-SUMR should have the registered PBRs (PBRSUP Table A) and PBR (PPBSUP Table B). (we are cross checking OP-REQ1, SUMR, and PBRSUP for the PBRs.)

You could only include the units on PBRSUP in the updated OP-SUMR if it is convenient.

#### Shawn,

The updated SOP draft is attached for you to review. Please provide comments by 06/27/2025 or sooner.

In addition, you need to submit OP-SUMR to have the units under PBRs to match the PCA on the OP-PBRSUP.

I already updated those PCA for you, which you can see in the SOP NSR by unit list table. The registered PBR118024 and 108571 were added to each unit (second pic).

However, the OP-SUMR form is still required for documentation as your application is part of the permit.

The OP-SUMR should have the registered PBRs (PBRSUP Table A) and PBR (PPBSUP Table B). (we are cross checking OP-REQ1, SUMR, and PBRSUP for the PBRs.)

You could only include the units on PBRSUP in the updated OP-SUMR if it is convenient.

Jasmine,

Attached are updated copies of UA4, OP-PBRSUP and OP-REQ1. This should address the concerns regarding those forms. Please let me know if you have any additional questions or concerns.

Also, would it be possible to get a copy of the most recent version of the WDP for my reference?

Okay. Thanks for letting me know.

In UA4, the index number is wrong. I will change it to 63EEEE-01.

Because you already have R5211-01 for 115 rule. It is confusing to have same index for two rules. When you send me the updated PBRSUP/SUMR, you can update the UA4.

Jasmine.

Attached is a copy of the major NSR summary table in Word format and a completed version of the UA4 MACT EEEE Table 11A for SDL17. Please let me know if you have any questions.

I'd like to request some additional time to provide the response for item number 2 below related to the OP-REQ1, PBRSUP and OP-SUMR. I need to review some information with a coworker, but we haven't met due to scheduling conflicts. I plan to complete that review early next week. Would it be possible to aim for 06/11/25 for that response?

Thank you, Shawn

#### Shawn

I have reviewed your renewal application.

- 1, Please submit UA4 MACT EEEE table for SDL17. We recently developed RRT for this rule.
- 2, There are inconsistencies between OP-REQ1 page 86 PBR list and OP-PBRSUP. For instance, 106.476 is in PBRSUP, not REQ1, 106.263 is in OP-REQ1, but not PBRSUP. We are cross checking these OP-REQ1, PBRSUP, and OP-SUMR. These 3 should match. When you submit OP-PBRSUP, it should be a complete set with same date on top on 4 tables. That will be referenced in permit term. (all update forms should have new date)
- 3, please email me the major nsr summary table in word document so that I can copy/paste to SOP appendix B. (no need to have a new date)

You can just reply my email with providing the requested information, due 06/06. At the end, I will ask you to submit OP-CRO1 through STEERS to certify all these submittals.

Thanks Iasmine

### TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

April 17, 2025

THE HONORABLE LOIS KOLKHORST TEXAS SENATE PO BOX 12068 AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application

Project Number: 38034
Permit Number: O2026
Union Carbide Corporation
High Pressure II Unit
Seadrift, Calhoun County

Regulated Entity Number: RN102181526 Customer Reference Number: CN601688781

#### Dear Senator Kolkhorst:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. https://gisweb.tceq.texas.gov/LocationMapper/?marker=-96.771666,28.515&level=13.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Lois Kolkhorst Page 2 April 17, 2025

- (3) CO carbon monoxide
  - NO<sub>x</sub> total oxides of nitrogen
  - PM particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented
  - PM<sub>10</sub> particulate matter equal to or less than 10 microns in diameter, including PM<sub>2.5</sub>, as represented
  - PM<sub>2.5</sub> particulate matter equal to or less than 2.5 microns in diameter
  - VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Emission rate is an estimate and compliance is demonstrated by meeting the requirements of the applicable special conditions and permit application representations.
- (6) Annual emission limits for the VOC from EPNs 253 through 268 are reflected in the emission rates for EPNs 261 through 268. The hourly and annual PM emissions from EPNs 254 through 268 are reflected in the emission rates for EPNs 261 through 268.
- (7) Total VOC emissions from EPNs 253 through 268 are not to exceed 124.1 tons per year (tpy).
- (8) Annual emission limits for the VOC from EPNs 270 through 282 are reflected in the emission rates for EPNs 276 through 282. The hourly and annual PM emissions from EPNs 271 through 282 are reflected in the emission rates for EPNs 276 through 282.
- (9) Total VOC emissions from EPNs 270 through 282 are not to exceed 118 tpy.
- (10) The VOC emissions from this source are accounted for at EPN 549.
- (11) Emissions from this flare are only from these permitted facilities.

- (12) The allowable emission rates listed for individual VOC species from this EPN are included in the total VOC emission rates.
- (13) Annual MSS emissions of individual VOC species for Fuel Gas Burn System including furnace gas header shutdowns/maintenance are limited as indicated. The allowable emission rates listed for individual MSS VOC species from this EPN are included in the Flare 246 total MSS VOC emission rates.
- (14) SO2 emissions from the combustion of supplemental natural gas are authorized under NSR Permit No.1567.

Yes. Mention my name in the cover letter so it can be assigned to me. I will combine 2 projects. When you submit in STEERS, let me know.

I may need to forward it to APIRT to create the renewal project.

Jasmine,

I was hoping for your advice regarding the renewal of Title V Permit O2026.

The renewal is due in April, and we are hoping for input regarding if we could combine the renewal into this project. If that is possible, we could submit applicable updated forms such as an OP-REQ1.

Please let us know if you have any advice on how to proceed with the renewal process.

Thank you, Shawn From: Pena, Shawn (S) <Shawn.Pena@dow.com>

Jasmine,

Please see the comments in red below.

Please note that I think there is a typo in Group GRPVNT1B in the Unit Summary. The change requested moving Unit 306 from Group GRPVENT2 to GRPVNT1B but it looks like the Unit was captured as "360". Attached is a redlined version. Please let me know if you have any questions.

Regards, Shawn

#### Hello Shawn

I updated permit draft. Please proofread.

- 1, SDL17 cannot be in the group as it has MACT 4E requirements, different from the group. So I pulled it out. You will see in permit.
  - Thank you. Pulling SDL17 from the group GRPUNLDGHI makes sense and we agree.
- 2, Do you want to update the NSR/PSD issuance date to latest issuance date 05/03/2024? If so, let me know. I will send the major nsr summary table to you so that you can fill out.
  - Yes. Please update the NSR/PSD issuance date.

Please respond to this email by Friday. Jasmine

Hello Shawn

I updated permit draft. Please proofread.

- 1, SDL17 cannot be in the group as it has MACT 4E requirements, different from the group. So I pulled it out. You will see in permit.
- 2, Do you want to update the NSR/PSD issuance date to latest issuance date 05/03/2024? If so, let me know. I will send the major nsr summary table to you so that you can fill out.

Please respond to this email by Friday. Jasmine

Hello Shawn,

I have been assigned to the Federal Operating Permit (FOP) revision application of Permit No. O2026 for Union Carbide, High Pressure II Unit. This application has been assigned Project No. 37269. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

I have conducted a technical review of this application and I have attached an electronic copy of the Working Draft Permit (WDP) for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have regarding it by 02/28/2025. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP. Note that any application updates necessary to make requested changes must accompany the WDP comments.

Please note in the WDP, the following issues haven't been addressed. Please clarify.

- 1, Term 1E was updated to include MACT EEEE.
  - The addition of MACT EEEE to term 1E looks good.
- 2, You requested added MACT EEEE to Unit SDL17. However, SDL17 is in a group GRPUNLDGHI. Do you want to add the MACT EEEE for the entire group? In WDP, I added the MACT 4E to the group. just want to confirm.
  - We request that MACT EEEE only applies to SDL17 and not to the other members of that group.
- 3, MACT EEEE requirements is under our technical specialist Carolyn Maus's review. I will let you know her comments once she finishes and will add it to the permit draft later.
  - Thank you. Will there be a separate WDP after Carolyn's review?
- 4, Permit Page 17, GRPVENT2 requirements were updated based on your UA form. However, the RRT generated citations are little different from your citations on OP-REQ3. Do you accept it? If not, I have to ask Carolyn to review this manual edit request.
  - We accept these citations.

Please submit a written response by this deadline.

Please review the "SOP Technical Review Fact Sheet" located at <a href="http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\_V/sop\_wdp\_factsheet.pub

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified submittals, including application updates supporting the WDP comments is required to be submitted with the WDP response. After final review of the WDP, additional changes, supported by application updates, may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application

I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at <a href="mailto:R6AirPermitsTX@epa.gov">R6AirPermitsTX@epa.gov</a> and to the TCEQ regional office having jurisdiction.
