## 1.0 INTRODUCTION

---

ET Gathering & Processing LLC (ETGP) owns and operates the Coyanosa Gas Plant (Plant) located in Pecos County, TX. ETGP is identified by Customer Reference Number (CN) 606187110 and the Plant operates under Regulated Entity Number (RN) 100239698. The Plant holds the following construction authorizations:

- New Source Review (NSR) Permit No. 2351A
- Permit by Rule (PBR), under Title 30 of the Texas Administrative Code (30 TAC) §106.352(I), §106.359, §106.492, and §106.512 Registration No. 103360
- PBR Under 30 TAC §106.512 Registration No. 44282
- PBR Under 30 TAC §106.512 Registration No. 47996
- PBR Under 30 TAC §106.512 Registration No. 53212
- PBR Under 30 TAC §106.512 Registration No. 54078
- Historical Standard Exemptions under Registration Nos. 22594 and 22609

The Station also operates under a PBR claim per 30 TAC §106.511 for diesel emergency generators and various other PBR claims as detailed in form OP-REQ1 Section XXII.I.

With this application, ETGP is requesting renewal of its Site Operating Permit (SOP) No. O3187.

The Plant is located in Pecos County and is in attainment with all relevant National Ambient Air Quality Standards (NAAQS).

There are multiple updates incorporated into this renewal application as follows:

- Incorporate negative applicability from federal requirements for a new Unit ID FUG5 included in forms OP-UA12 and OP-REQ2
- Addition of two (2) emergency generators included in forms OP-UA2, OP-REQ3, and OP-PBRSUP

All updates are also summarized in forms OP-2 and OP-SUMR.

This document was prepared in accordance with Texas Commission on Environmental Quality's (TCEQ's) Site Operating Permit (SOP) Renewal Application Guidance (APDG 6401v3, Revised 07/17))) and the requirements listed in 30 TAC Section (§) 122.241, Permit Renewals.

An area map showing the location of the Plant is included in this section as Figure 1.1 and a plot plan is included in this section as Figure 1.2.

This Title V renewal application includes the following TCEQ forms:

- TCEQ Form OP-CRO1
- TCEQ Form OP-1

## 2.0 PROCESS DESCRIPTION

---

The Plant is a natural gas liquid (NGL) processing plant that sweetens and dehydrates inlet natural gas and then compresses it for pipeline transportation. Natural gas from the production field enters the Plant through an inlet slug catcher and several separators (there are multiple natural gas inlets at the Plant depending on whether the inlet gas is sour, sweet, high pressure, and/or low pressure). The separators remove entrained liquids from the gas stream.

The separated condensate is sent to the condensate stabilization unit. Heat for the stabilization process is provided by a hot oil system and two (2) hot oil heaters (Facility Identification Numbers [FINs] HMOHTR1 and HMO-HTR2). Stabilizer overhead vapors are sent to two (2) Caterpillar G3512B flash gas compressors (FINs FGC-1 and FGC-2). Once the condensate is stabilized, it is stored in two (2) 1,000-barrel (bbl) storage tanks (FINs COND-TK1 and COND-TK3) and two (2) 500-bbl storage tanks (FINs COND-TK2 and CONDTK4). Produced water from the inlet and Plant equipment dumps is routed to a three (3) phase separator. Slop oil that is separated out from the produced water is stored in a 210-bbl storage tank (FIN SLOP-TK) while the water is stored in a 500-bbl storage tank (FIN PW-TK). Vapors from the storage tanks are captured by a vapor recovery unit (VRU) and routed to the flash gas compressors. Most of the stabilized product is routed offsite via a natural gas liquids (NGL) pipeline. There are also three (3) truck loading racks (FINs LD-1, LD-2, and LD-3) to remove stabilized product and produced water/slop from the Plant as necessary.

Vapors from the storage tanks and loading operations are routed to a vapor combustion unit (VCU) for destruction (FIN VCU). The VCU may be down for planned maintenance up to 5% of the year. During this time, storage and loading vapors will be routed to the acid gas flare (FIN 7) to maintain the same level of control as during normal operations.

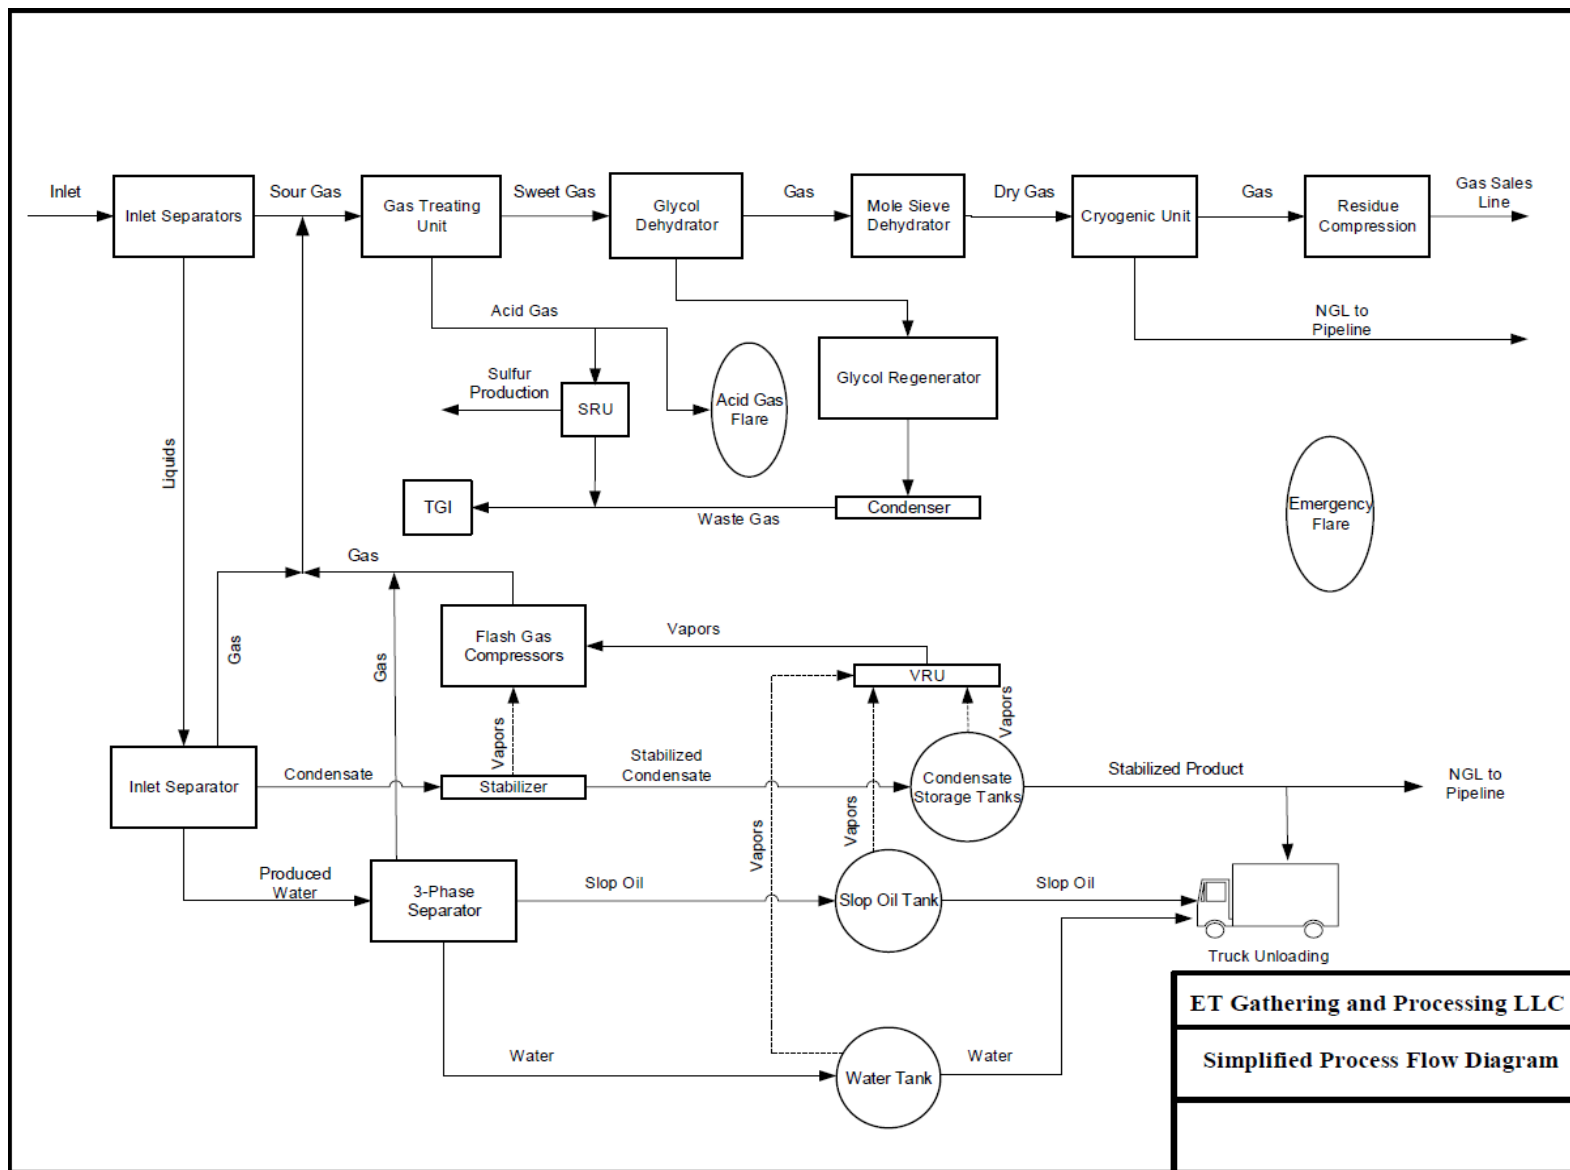

After separation, natural gas is treated in an amine unit to remove hydrogen sulfide (H<sub>2</sub>S) and carbon dioxide (CO<sub>2</sub>). The acid gas from the still vent is vented to a sulfur recovery unit (SRU) where elemental sulfur is removed. Waste gas from the SRU is sent to the tail gas incinerator (FIN TGI). During SRU and TGI downtime, and during periods where the inlet gas contains less than 2 long tons per day (LTPD) of sulfur on average, the acid gas is vented to the acid gas flare, where the acid gas is burned producing sulfur dioxide (SO<sub>2</sub>) and other products of combustion. Flash gas from the amine unit is routed to a vapor recovery unit (VRU); however, during VRU downtime, the flash gas is routed to the acid gas flare (FIN 7) for control.

After the gas is sweetened it passes through a dehydration unit to remove water. The dry gas is compressed, sent through a molecular sieve unit if further dehydration is required, and finally sent to the sales line or to the cryogenic unit for removal of NGL. Waste gas from the dehydration unit regenerator is vented to the TGI for destruction. During TGI downtime, the waste gas is routed to the acid gas flare. Flash gas from the dehydration unit is routed to a VRU, and during VRU downtime, the flash gas is routed to the acid gas flare (FIN 7) for control.

A process flow diagram can be found at the end of this section as Figure 2.1.

Application Compliance Plan and Schedule**

<b>Date: October 3, 2024</b>	<b>Regulated Entity No.: 100239698</b>	<b>Permit No.: O3187</b>
<b>Company Name: ET Gathering &amp; Processing LLC</b>		<b>Area Name: Coyanosa Gas Plant</b>

- Part 1 of this form must be submitted with all initial FOP applications and renewal applications.
- The Responsible Official must use Form OP-CRO1 (Certification by Responsible Official) to certify information contained in this form in accordance with 30 TAC § 122.132(d)(8).

**Part 1**

<b>A. Compliance Plan — Future Activity Committal Statement</b>	
<p>The <i>Responsible Official</i> commits, utilizing reasonable effort, to the following: As the responsible official it is my intent that all emission units shall continue to be in compliance with all applicable requirements they are currently in compliance with, and all emission units shall be in compliance by the compliance dates with any applicable requirements that become effective during the permit term.</p>	
<b>B. Compliance Certification - Statement for Units in Compliance*</b> (Indicate response by entering an "X" in the appropriate column)	
<b>1.</b> With the exception of those emission units listed in the Compliance Schedule section of this form (Part 2, below), and based, at minimum, on the compliance method specified in the associated applicable requirements, are all emission units addressed in this application in compliance with all their respective applicable requirements as identified in this application?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
<b>2.</b> Are there any non-compliance situations addressed in the Compliance Schedule Section of this form (Part 2)?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
<b>3.</b> If the response to Item B.2, above, is "Yes," indicate the total number of Part 2 attachments included in this submittal. <i>(For reference only)</i>	
<p>* For Site Operating Permits (SOPs), the complete application should be consulted for applicable requirements and their corresponding emission units when assessing compliance status. For General Operating Permits (GOPs), the application documentation, particularly Form OP-REQ1 should be consulted as well as the requirements contained in the appropriate General Permits portion of 30 TAC Chapter 122.</p> <p>Compliance should be assessed based, at a minimum, on the required monitoring, testing, record keeping, and/or reporting requirements, as appropriate, associated with the applicable requirement in question.</p>

Unit ID No.	PBR No.	Version No./Date Or Registration No.	Monitoring Requirement
FGCOMP-1	106.512	06/13/2001	Conduct biennial emissions testing for NOX and CO and compare results against the PBR Registration No. 103360 emission limits. Facility maintains records of biennial emissions documentation.
FGCOMP-2	106.512	06/13/2001	Conduct biennial emissions testing for NOX and CO and compare results against the PBR Registration No. 103360 emission limits. Facility maintains records of biennial emissions documentation.
STAB-FUG	106.352	11/22/2012	To demonstrate compliance with the emission limits in 30 TAC 106.4, the site will perform annual emissions calculations, pursuant to 30 TAC 101.10 (Emission Inventory) requirements, for this unit and compare them to the 30 TAC 106.4 emission limits. These calculations will be based on the component count by type, VOC content in the gas and liquid streams handled, and fugitive leaking factors, as appropriate and per TCEQ guidance.
TK-3	106.352	11/22/2012	Monitor and record annual storage tank throughputs. These annual storage tank throughputs are compared against the PBR Registration No. 103360 throughput limits to ensure no exceedance of emission limits.
VCU	106.492	09/04/2000	Monitor and record waste gas stream composition and volumes to verify that maximum flare tip velocity is not exceeded and minimum heat content is achieved. Monitor and record any instances of pilot flame interruption while waste gas is directed to the flare. Monitor and record any instances where liquids are inadvertently directed to the flare and appropriately report those as upset conditions.
HMO-HTR	106.183	09/04/2000	Monitor and record fuel usage to verify that fuel burned is only sweet natural gas or fuel gas containing no more than 0.1 grain of total sulfur compounds, calculated as sulfur, per dry standard cubic foot.

- Part 1 of this form must be submitted with all initial FOP applications and renewal applications.
- The Responsible Official must use Form OP-CRO1 (Certification by Responsible Official) to certify information contained in this form in accordance with 30 TAC § 122.132(d)(8).

**Part 1**

<b>A. Compliance Plan — Future Activity Committal Statement</b>	
<p>The <i>Responsible Official</i> commits, utilizing reasonable effort, to the following: As the responsible official it is my intent that all emission units shall continue to be in compliance with all applicable requirements they are currently in compliance with, and all emission units shall be in compliance by the compliance dates with any applicable requirements that become effective during the permit term.</p>	
<b>B. Compliance Certification - Statement for Units in Compliance*</b> (Indicate response by entering an "X" in the appropriate column)	
<b>1.</b> With the exception of those emission units listed in the Compliance Schedule section of this form (Part 2, below), and based, at minimum, on the compliance method specified in the associated applicable requirements, are all emission units addressed in this application in compliance with all their respective applicable requirements as identified in this application?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
<b>2.</b> Are there any non-compliance situations addressed in the Compliance Schedule Section of this form (Part 2)?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
<b>3.</b> If the response to Item B.2, above, is "Yes," indicate the total number of Part 2 attachments included in this submittal. <i>(For reference only)</i>	
<p>* For Site Operating Permits (SOPs), the complete application should be consulted for applicable requirements and their corresponding emission units when assessing compliance status. For General Operating Permits (GOPs), the application documentation, particularly Form OP-REQ1 should be consulted as well as the requirements contained in the appropriate General Permits portion of 30 TAC Chapter 122.</p> <p>Compliance should be assessed based, at a minimum, on the required monitoring, testing, record keeping, and/or reporting requirements, as appropriate, associated with the applicable requirement in question.</p>

## TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

October 24, 2024

THE HONORABLE CESAR BLANCO  
TEXAS SENATE  
PO BOX 12068  
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application  
Project Number: 37274  
Permit Number: O3187  
ETC Texas Pipeline, Ltd.  
Coyanosa Gas Plant  
Coyanosa, Pecos County  
Regulated Entity Number: RN100239698  
Customer Reference Number: CN601587652

Dear Senator Blanco:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-102.9875,31.185277&level=13>.

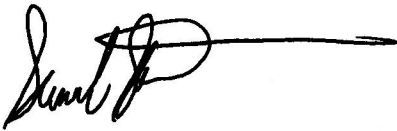

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Cesar Blanco

Dear Mr. Clark:

We have received your letter dated October 12, 2023, concerning an ownership change for the above-referenced site. We appreciate being informed that ET Gathering & Processing LLC is now the owner of the above-referenced facility. Our files have been updated to document this change.

We understand that no changes have been made at the above-referenced site that affect the applicable or potentially applicable requirements identified in the federal operating permit (FOP). In addition, you shall maintain compliance with all applicable requirements as defined in Title 30 Texas Administrative Code § 122.10.

You must submit a compliance certification (Form PCC) and any deviation report(s) as required by 30 Texas Administrative Code § 122.145 and 146 for the period from the effective date of the transfer of ownership through a period not to exceed 12 months. This compliance certification should be submitted within 30 days after the end of the certification period to the TCEQ Midland Regional Office, 10 Desta Drive, Suite 350E, Midland, Texas 79705-4530 and the Environmental Protection Agency Region VI. **Please contact the regional office at (432) 570-1359 if you have any questions regarding the compliance certification process.**

A new permit face for the site FOP which includes the updated ownership information is enclosed with this letter. Please replace the corresponding page of the site FOP with this new permit face.

Thank you for updating information pertaining to your federal operating permit. Please maintain a copy of this letter with your permit(s) for future reference. If you have questions concerning the review or this notice, please contact Ms. Rosa Mora-Nichols at (512) 239-2071.

Mr. Toby Clark

# FEDERAL OPERATING PERMIT

A FEDERAL OPERATING PERMIT IS HEREBY ISSUED TO  
ET Gathering & Processing LLC

AUTHORIZING THE OPERATION OF  
Coyanosa Gas Plant  
Natural Gas Extraction

LOCATED AT  
Pecos County, Texas  
Latitude 31° 11' 26" Longitude 102° 59' 25"  
Regulated Entity Number: RN100239698

This permit is issued in accordance with and subject to the Texas Clean Air Act (TCAA), Chapter 382 of the Texas Health and Safety Code and Title 30 Texas Administrative Code Chapter 122 (30 TAC Chapter 122), Federal Operating Permits. Under 30 TAC Chapter 122, this permit constitutes the permit holder's authority to operate the site and emission units listed in this permit. Operations of the site and emission units listed in this permit are subject to all additional rules or amended rules and orders of the Commission pursuant to the TCAA.

This permit does not relieve the permit holder from the responsibility of obtaining New Source Review authorization for new, modified, or existing facilities in accordance with 30 TAC Chapter 116, Control of Air Pollution by Permits for New Construction or Modification.

The site and emission units authorized by this permit shall be operated in accordance with 30 TAC Chapter 122, the general terms and conditions, special terms and conditions, and attachments contained herein.

This permit shall expire five years from the date of issuance. The renewal requirements specified in 30 TAC § 122.241 must be satisfied in order to renew the authorization to operate the site and emission units.

No worries Ryan – that makes sense and we didn't submit the previous update yet so we'll move ahead with this change if you're good with the attached.

I filled in Tables 19e-p to cover the details for that unit.

We can move to submit the update application here next unless you have any other comments/questions on this project.

Thank you,  
James

Good Afternoon Ryan,

It looks like we did submit the OP-DEL via STEERS for Coyanosa Gas Plant back in August of last year but I'm not sure if it was processed.

Can you take a look at the attached and let me know if we need to do anything else for this OP-DEL?

Thank you,

Good afternoon James,

The person listed as the DAR for this facility isn't certify as the DAR. Please submit an OP-DEL to STEERS to certify Micheal Crawford as the Duly Authorized Representative for this facility. If you could please do so at the same time you are doing so for Permit O3190 that would be great. Please let me know if you have any questions.

Thanks,

Good morning James,

Thank you for the updated document. The new issuance date has been updated and will now show up on the permit. There should be no other updates. Once I receive the certification from STEERS and receive final approval from my team leader, we should be ready to send out your project to public notice. Please let me know if you have any other questions about this project.

Good morning,

If that is the case since it has been issued on 11/01/2024 if you want to submit an OP-REQ1 page 89 with the updated issuance date, I can make sure that change takes place. This project is getting very close to

being send out so I'm trying to make sure all final details can be done. If you can get this form back to me by next Thursday (April 24) at the latest that would be helpful.

Thanks,

Yes we do want to incorporate that amendment – it wasn't finished up until after we submitted this renewal. We addressed updates from that project within the renewal except for the date – we had the draft permit in hand but hadn't received the final authorization date.

Good morning James,

Thank you for that update. One further question I noticed that there was an amendment made to the NSR Authorization 2351A on 11/01/2024. Is this amendment being incorporated into the renewal? I just wanted to make sure in case this change needs to be made to the permit.

Thanks,

Good Morning Ryan,

PBRs 44282 was the original authorization for the Solar Centaur turbine Unit ID C-2. That unit's authorization was updated in PBR registration 47996. Those registrations were both originally completed in the early 2000s so I'm not sure what the system was for voiding/replacing registrations, but the correct registration for C-2 is 47996.

PBR 54078 was used to authorize a swing turbine for Unit ID C-3 in 2003 and then that unit was again replaced in 2004 under PBR registration 53212.

What I'm identifying as the registrations in the OP-PBRSUP for the units previously identified under PBRs 44282 and 54078 are the latest revisions to registrations for those respective units.

I hope this helps clear it up but let me know if there is anything else you need us to do on our end.

Thank you,  
James

Greetings James,

There was an issue found on the OP-PBRSUP that I didn't realize until recently. The facility has two PBR Registrations 44282 and 54078 that are missing from the OP-PBRSUP. Can you please make sure that these two registrations are active and if so please put them on the OP-PBRSUP. If you could please have this updated form back to me by **April 22, 2025** that would be great. I apologize for this inconvenience and error on my part. Please let me know if you have any questions.

Good afternoon James,

On table D if you could just put the PBR no. and for the version no./Date or Registration No. box the registration No.

So, for example: Unit C-1 in the PBR No. box it should have 106.512 and for the Version No./Date or Registration No. box it should have 53212.

That should be the case for all PBRs that have a registration number associated to them. I apologize if this has caused any confusion on what I was asking for.

Please let me know if you need anything else or more time to make this change. Again, I apologize for not being clear in my instructions.

Thanks,

**Subject:** RE: FOP O3187/Project 37274, ETC Texas Pipeline Ltd./Coyanosa Gas Plant

Good morning James,

During review of your PRBs a few questions arose that need-resolution.

OP-PBRSUP

You have two registered PBRs one being NSR authorization 54078 and the other being 44282. Both are left off the PBRSUP. Are these two authorizations still being used at the facility? if so, they need to be added to OP-PBRSUP Table A & D.

On Table C you have two PBRs 106.359 and 106.263 that do not belong to that table. See the instructions to Form OP-PBRSUP. The instructions direct that those two PBRs need to be listed either on Table A or Table B. PBR 106.359 is associated with NSR authorization no. 103360. So, with that in mind, this PBR needs to be showcased on Table A & D since it is registered.

PBR 106.263 does not qualify as an insignificant source since it is listed on the Form OP-PBRSUP instructions as needing to be listed on either Table A or Table B. With that in mind, please remove PBR 106.263 from Table C and put it on table A (or B if it is claimed and not registered) & D.

On Table D for the PBRs with an associated NSR authorization. In the box for the Version No./Date registration No. please just put the registration No. associated with that PBR.

If you could please get these updates back to me by **Tuesday (March 25, 2025)** that would be great.

If you have any questions, please let me know.

Thanks,
