Hi Aslyn,

Yes, an OP-CRO2 is needed to designate Joseph Mackey as the RO. When submitting the OP-CRO2 form, please make sure the Signature Date is on or after the effective date and that his effective is after the previous RO effective date.

Once a valid RO has been appointed by submitting an OP-CRO2 to STEERS, we can accept an OP-CRO1 to certify the documents submitted during the technical review.

Hi Aslyn,

I hope you had a pleasant weekend. There is an issue with the OP-CRO1 you sent on Friday. To be valid, the OP-CRO1 needs to be signed by Tasha Perez, the RO for the site, however, the latest submission is signed by Chris Smith. The OP-CRO1 will need to be resubmitted with Tasha Perez's signature **OR** if you would like to change the RO to Chris Smith, you will need to submit an OP-CRO2.

Please let me know if you have any questions.

Hi Aslyn,

I hope all is well. After further review, it has been determined you do not need to submit an OP-2 to remove PBR's 106.261 and 106.262 from the permit.

The technical review is complete and the OP-CRO1 form (or STEERS submittal) certifying the application updates submitted during review is all that is needed to move onto the next

step. Please let me know when you have completed this request.

Hi Alyson,

I have attached the revised OP-ACPS. There are no compliance issues to report. I think that the wrong checkbox must've been clicked while reviewing the form and the answer changed. I've printed the form to a PDF so that it doesn't happen again.

I looked at the OP-2 form, and I am a little confused on how to proceed. The facility isn't getting rid of any EPNs, but PBRs 106.261 and 106.262 were only included in the initial permit for MSS activities, as per the request of the TCEQ reviewer at that time. Since those PBRs now require registration and are not utilized by the facility, we have chosen not to proceed with registration of those PBRs.

Thank you,

Subject: Technical Review -- FOP 04188/Project 37282, Smith Industries LLC, Smith Industries

Hi Aslyn,

I hope all is well. I am reaching out to resolve a few discrepancies I came across during the technical review for project 37282. It seems that your application contains two different sets of forms; the application packet dated 10/01/2024 and the freestanding form submissions dated 9/13/2024. My review is based off the forms in the 10/01/2024 application packet.

Please provide clarification on the following issues by **February 24, 2025.**

- The answers submitted on the OP-ACPS form dated 10/01/2024 indicate there are emission units with non-compliance situations but there is no information in Part 2 of the form. Please update your answers indicating all emission units are in compliance or complete Part 2 of the ACPS form indicating the specific non-compliance situation.
- PBRs 106.261 and 106.262 are listed in the current effective permit, however, they are not included in the renewal application. If these PBRs are still in use, submit a revised OP-REQ1 page 88 and a revised OP-PBRSUP Table B and Table D that include PBRs 106.261 and 106.262. Ensure that the revised documents include the updated submittal date. If the PBRs are no longer in use and should be removed from the permit provide an OP-2 with the revisions.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal

of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Subject: Working Draft Permit -- FOP 04188/Project 37282, Smith Industries LLC, Smith Industries

Mrs. Aslyn Henry,

I have conducted a technical review of renewal application for Smith Industries, LLC, Smith Industries. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **01/27/2025**.

Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Subject: Technical Review -- FOP O4188/Project 37282, Smith Industries LLC, Smith Industries
Date: Thursday, November 14, 2024 11:52:00 AM

Mrs. Aslyn Henry

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O4188 for Smith Industries LLC, Smith Industries. This application has been assigned Project No. 37282. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and

to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Alyson H. Haynes
