Good morning Daniel,

Thank you for submitting the updated forms via STEERS.

During management review, the following item was modified and I wanted to make you aware of the change. No further action and/or forms are required.

1. **Permit Shield Table (Draft Page 17)** – Unit ID GEN-1 is a spark ignited ICE (subject to NSPS JJJJ). There is nothing that can be done to modify the engine to make it a compression ignition ICE (subject to NSPS IIII). Therefore, the unit can never be potentially applicable to NSPS IIII; the permit shield was therefore removed.

The Public Notice Package is set to be electronically mailed to you today.

Please let me know if you have any questions.

Best Regards,

Emily L. Knodell

[Use caution with links/attachments]

Good morning,

During management review, the following items were found. Please resolve by **07/07/2025** and certify the updates via STEERS.

1. **Form OP-REQ1, Page 89:** NSR STDPMT 94264 has a more recent issuance date (amendment issued 05/30/2025). Would you like to incorporate the more recent date into the renewal? If so, please submit Form OP-REQ1, Page 89 showing the more recent date. I know we updated it back in January from 08/02/2011 to 09/08/2023, but it looks like they just came out with another update at the end of May.
2. **Form OP-PBRSUP:** The OP-PBRSUP dated 10/16/2024 only has Table B and D; Then OP-PBRSUP dated 12/20/2024 only has Table C. Please submit the OP-PBRSUP in full, including tables A, B, C, and D at the same time with matching dates on each table (see the image below, the highlighted date *must* match on each table). Also, no table should be blank, but "none" or "NA" can be used on a table as appropriate, this allows the public to know a table was not inadvertently left out and that the site is not using any insignificant PBRs. Please submit a revised OP-PBRSUP. Also, SE51 authorizes 3 tanks, i.e. TK-10, TK-11 and TK-7. But on Form OP-PBRSUP, SE 51 is in the Table C . The tanks under SE 51 (TK-10, TK-11 and TK-7) should be in Table B and D. Please see our OP-PBRSUP guidance (attached).

Let me know if you have any questions.

Best Regards,

Emily L. Knodell

Good afternoon Daniel,

Thank you for your review and approval on the WDP. I am now preparing this project for management review.

Please resolve the item below by **06/09/2025**.

1. **Form OP-CRO1:** At this time, I would like to ask for the form OP-CRO1 certifying the changes made to the application. Please fill out the Time Period from **11/12/2024** to **06/04/2025**. Please send me an electronic copy and the original, signed hardcopy. Alternatively in lieu of the OP-CRO1, you can submit this email thread and attachments as an update to the application through STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. STEERS does not accept the Outlook ".msg" file type, but it does take PDFs.

Please let me know if you have any questions. Thank you!

Subject: RE: Working Draft Permit -- FOP O3229/Project 37304, Enterprise Hydrocarbons L.P./Shilling Gas Treating Plant

Good afternoon Daniel,

Thank you for providing comments on the WDP. For the comment regarding Unit IDs PROAMINE2, FUG-2, and FUG-3 not being in the permit, I ran a report and these units show non-applicability based on the unit attribute data provided and therefore do not need to be in the Title V permit. I can manually include them so they show their preconstruction authorizations in the permit if you would like them to show up, but they will not have any applicable requirements.

Yes, please include the preconstruction authorizations in the permit.

For the other comments, please see item #1 below. Please resolve by **05/16/2025**.

1. **Form OP-SUMR & OP-2:** Please submit a revised Form OP-SUMR & OP-2 to support the changes listed below.

- **Unit ID VCU:** I looked into the file for the last minor revision project worked for this permit (Project 33237) and do see the request for this unit to be added as you mentioned. However, this form (dated 12/15/2021) lists the applicable form as the OP-REQ1. Does it have an applicable unit attribute (UA) form? Please enter the number of the UA form which contains the specific information regarding the corresponding emission unit and provide the UA form so I can enter the information on this unit and get it added (see image of Form OP-SUMR below, this is from the last project).

I don't believe there is an applicable UA form. I've included the unit on the OP-2 and OP-SUMR.

- **TURB-1/TURB-1S:** Please indicate the deletion of these units in your revised Form OP-SUMR & OP-2 and I will remove them.

I've included the unit on the OP-2 and OP-SUMR.

- **HT-2 & HT-2S:** Please indicate the deletion of these units in your revised Form OP-SUMR & OP-2 and I will remove them.

I've included the unit on the OP-2 and OP-SUMR.

- **TK-5:** Please indicate the deletion of this unit in your revised Form OP-SUMR & OP-2 and I will remove it.

I've included the unit on the OP-2 and OP-SUMR.

Please let me know if you have any questions. Thank you & have a great weekend!

Subject: [EXTERNAL] Working Draft Permit -- FOP O3229/Project 37304, Enterprise Hydrocarbons L.P./Shilling Gas Treating Plant

[Use caution with links/attachments]

Good afternoon Daniel,

I have conducted a technical review of *renewal* application for **Enterprise Hydrocarbons L.P./Shilling Gas Treating Plant**. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

You may notice some items are highlighted in **yellow** throughout the attached WDP. I did this when I ran a document comparison of the current effective permit vs. the WDP I am sending now, it helps me keep track of what is being updated and might help you as well. The highlights will be removed later on when I prepare the project for management review.

Please review the WDP and submit to me any comments you have by **May 8, 2025**.

Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Good morning Daniel,

During technical review, the following items were found. Please resolve by **12/19/2024**.

1. **Form OP-PBRSUP:** In the application, Tables B and D were submitted, but Tables A and C are also needed. Please submit a complete OP-PBRSUP which includes Tables A, B, C, D with matching dates on each. Even if the tables are blank, this lets the public know that they were not inadvertently left out.
2. **Unit IDs PRO-AMINE, FUG-2, FUG-3:** Are these new Unit IDs to be added to the permit? I see Unit ID PRO-AMINE on Form OP-UA10 (Page 1, 10) and Unit IDs FUG-2 & FUG-3 on Form OP-UA12 (Pages 1) with unit attributes, but I do not see it in our database as an existing unit. If this is a new Unit ID, please submit them on Form OP-SUMR and include them on Form OP-2. This will give me the identifying information needed for the units so I can add them to the permit correctly.

Please let me know if you have any questions. Thank you.

Good morning Mr. Daniel Quesada,

My name is Emily Knodell and I have been assigned to the Federal Operating Permit (FOP) *renewal* application of Permit No. **O3229** for *Enterprise Hydrocarbons L.P./Shilling Gas Treating Plant*. This application has been assigned Project No. **37304**. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-

PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please review the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

I would appreciate a quick confirmation that this email has reached you.

Thank you for your cooperation.

Sincerely,

Dear Senator Zaffirini:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-98.871388,27.9425&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.
