Tusar,

My day got extremely busy after we got off the phone. I was able to make all the necessary changes and I'm attaching it here. I don't have any comments on the WDP changes and I'll let you know tomorrow if David comes up with anything in his review. Thanks again. Let me know if I need to resubmit in STEERS.

It was my understanding that we did submit an OP-MON on a previous application back in 2013, but it looks like CAM didn't get into the permit. I went ahead and made the changes requested. I updated the date on the two pages that cover XI.L. Section and will update the dates on all the pages before final submittal into STEERS.

Thanks.

2 more corrections:

1. OP-PBRSUP – Table A – We have “Facility” here which is missing from Table D. Please add “Facility” in Table D.
2. There is no CAM in this permit. The draft should not have that condition. It came from OP-REQ1 (page 84, item XI.L) – Please change the response to “NO”. I will update the draft
Please change date at the top.

Tusar,

Thanks for your phone call earlier, I made the adjustments that we spoke about and I'm attaching them here. I'll get with David and see if he has any comments on the latest draft permit. As for now, I think we still need to address that ST&C 7 references a "CAM Summary" attachment that is not in the permit. Otherwise, I think this should be good to go.

Good afternoon. I am responding after reviewing your documents. Please see the updated draft and accept if you have no comments. Also see attached OP-SUMR and OP-PBRSUP with my comments as both these documents need some clean up. Also OP-REQ1 page 89 need some minor corrections. There is no need to have NSR permit 56414 to be listed 3

times. I would like to go with you may be on Tuesday or Wednesday depending on your availability. Once finalized you can submit them through STEERS.

I am currently preparing the Public Notice Authorization Package. Looking forward to talking to you soon.

David:

Good afternoon. I have conducted a technical review of *renewal* application for Gulf South Pipeline Company LLC/Goodrich Compressor Station. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application dated November 26, 2024, and updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by ***July 28, 2025***.

On my email dated 2/4/2025 I pointed out several issues, you responded on 2/27/2025 (see attached). But as I am reviewing them noted that they are lots of mistakes, so you need to resubmit all of them

1. Please submit the OP-SUMR – The OP-SUMR must have all the Unit IDs, Descriptions and Correct Pre-Construction Authorizations (PCAs). The OP-SUMR dated 1/28/2025 does not have all the Unit IDs . I can only point out to some. C-1, C-2. C-4, C-5, C-6 and may by more Units are missing. Please provide all Unit IDs, you may refer to the **New Source Review Authorization References by Emissions Unit in the draft or effective permit**. If there is a PBR Registration number associated, please provide it in the correct format.
106.352/11/22/2012[56416]
Please note the PBR Registrations as represented in OP-PBRSUP must match. **I'm re-submitting the OP-SUMR with all of the units listed at the site on the NSR Authorization References. This conflicts with our previous applications and the OP-SUMR instructions to "Complete Table 1 if the revision is adding a new emission unit, emission point, or process or deleting an existing emission unit, emission point, or process". We're not proposing adding or deleting units here. I left the applicable forms portion blank since those OP-UA forms weren't submitted nor was an OP-REQ2. I filled out the PCAs portion to the best of my ability. I can be available for discussion if we need to further clarify the request here.**
2. OP-REQ1 (page 86, 87 and 88) – The actuals PBR with Version No./Date should be in XII.I (not the PBR registration numbers). Please list all the PBRs. Please follow the instructions. I believe you have only one Non-Rule Standard permit 107976. So OP-REQ1 (XII.2 should be NO, XII.3 Yes). Please resubmit these 3 pages. The issuance date for 56414 is 05/06/2025. Please update both XII.H and I. **XII.I lists all PBRs and their respective version date as per the instructions given on the OP-REQ1. Could you clarify if you're looking for the current version date to be reflected? I've made the changes to XII.2 as well as updated the latest**

issuance for 56414 (please note this issuance occurred after the response to your request in February).

3. Please submit OP-PBR SUP (all 4 Tables) – All PBR Registration Numbers should be there. All items in Table A and Table B must be in Table D. **Please make sure the information on OP-SUMR and OP-REQ1 and OP-PBR SUP are all consistent.** If there is nothing to represent in Table C, you may write N/A. You must put date, permit number and RN number at the top. Please submit all pages. **I included the NA language to Table C as well as added Unit ID: ST-1B to table 4 as it was the only unit not shown in Table 1 or 2 to also reflect in 4.**
4. Please submit me a soft copy first, once I approve it you will submit them through STEERS. **This will serve as the soft copy. We have the forms and OP-CRO1 ready to submit in STEERS upon approval. Thank you.**

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit. A quick acknowledgement to this email will be very much appreciated. Thank you for your cooperation.

Sincerely,

Tusar Swami, P.E.

Tusar,

I made some changes to the OP-UA12 after getting a better understanding of what the instructions are asking for. Wanted to know what your schedule is like for the rest of the week to jump on a Teams call and iron out some questions that we have regarding the rest of the forms. I'm attaching the UA12 to this email.

Thanks,

Travis

Tusar,

I have attempted to reach you a few times in the past week and left messages but have not heard from you. I did my best answer all of the requests and have prepared the OP-SUMR, OP-REQ1, OP-PBR SUP, and OP-UA12 to the best of my ability. Some spaces are left blank that you may see in your review but if you're at all available to have a quick half-hour call to discuss these requests, I'd greatly appreciate it. Please see my responses below:

1. Please submit the OP-SUMR. **Attached. This is a permit renewal instead of a revision so there is some language I wasn't able to interpret what was needed.**
2. OP-REQ1 (page 87 and 88) – 116434 is a PBR Registration number (106.359) – The PBR with Version No./Date should be in XII.I. Please list all the PBRs. Please follow the instructions. **Edits are made for review and the full OP-REQ1 is attached.**
3. Please submit OP-PBR SUP (all 4 Tables) – All PBR Registration Numbers should be there. All items in Table A and Table B must be in Table D. **Please make sure the information on OP-SUMR and OP-REQ1 and OP-PBR SUP are all consistent. Attached, some tables are empty as they don't seem to fit what is being asked of this permit.**
4. Unit IDs FUG-1 and FUG-2 (GRP-FUGITIV), Please update OP-UA12 (07/23 version) – Table 19 and Table 20 as appropriate. **Attached for review.**
5. You may submit everything via STEERS so that all are certified. **I want to make sure these responses are fulfilled before submitting via steers and emailing to local TCEQ and EPA officials to ensure accuracy.**

I understand that we were given a due date of today, however, we would like to request an extension in the event that more is needed to completely fulfill this request.

Thanks,

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

Re: Accepted Federal Operating Permit Renewal Application

Regulated Entity Number: RN100218494

Dear Senator Nichols:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-94.938333,30.609722&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Robert Nichols

**SUBJECT: Renewal and Minor Revisions for Federal Operating Permit (FOP)
 Gulf South Pipeline Company, LLC - Goodrich Compressor Station
 Primary TCEQ Account Number: PF-0019-V
 Regulated Entity Number: RN100218494
 Operating Permit Number: 03066**

Dear Sir/Madam:

This letter and its enclosure constitute Gulf South Pipeline Company, LLC's (Gulf South's) application to renew the FOP for the above referenced facility. In addition to renewing the permit, Gulf South is confirming that no changes have been made to the site since the renewal application dated April 8, 2019. Pursuant to 30 TAC 122.134(b)(2), resubmittal of information relating to existing emission units that have not undergone any regulatory changes is not provided herein and thus will not be submitted OP-REQ2 or OP-3 forms for revisions to the permit. With the exceptions noted in the attached forms, the existing emission units remaining in service are accurately represented in the current FOP.

This FOP renewal application has been prepared in accordance with 30 TAC Chapter 122, Subchapter C, Division 4, and TCEQ guidance for preparing such applications. A list of the TCEQ forms included in this submittal can be found in the enclosure. We believe this submittal constitutes a complete application to renew the above referenced permit.

The current FOP was issued on May 27, 2020, and expires on May 27, 2025. Pursuant to 30 TAC 122.241, the facility can continue to operate under its current FOP following its expiration as long as a complete renewal application is submitted under 30 TAC 122.133(2), which requires the application to be submitted at least six months prior to the permit expiration date. Since this renewal application is being submitted prior to April 29, the submittal is timely, and the station will continue to operate in accordance with the current FOP until TCEQ renews the permit.

The enclosed application has been certified by a Duly Authorized Representative for this site (Greg Terry). The signed OP-CROI form is included in the attached forms. If you find during your review that additional information is required, or if you have any questions, please contact me at (903) 692-0843 or Travis Lee at (502) 424-2742.

Sincerely,

David Nickel
