Subject: RE: Working Draft Permit -- FOP O4708/Project No. 37454, Et Genco LLC, WT-2 PS Power Generation

Good afternoon Lisa,

Per our phone conversation, we are preparing to send out the Public Notice Authorization Package tomorrow, 08/15. There was a minor issue with the OP-REQ1 – Question No. XI.H.1(Page 81 – Permit Shield question) that was caught by my team leader in her final review. This question was left blank in your application but requires an answer. Since there is an existing shield in your WDP (NSPS Kc for GRP-TK), this question will need to be updated to “Yes”. I have already made this change in your draft permit which results in one additional term in the Special Terms and Conditions section I have copied below. Please upload this updated page of the OP-REQ1 into STEERS by **Friday, August 22 or sooner if possible**. Thank you and have a great weekend!

Permit Shield (30 TAC § 122.148)

13. A permit shield is granted for the emission units, groups, or processes specified in the attached “Permit Shield.” Compliance with the conditions of the permit shall be deemed compliance with the specified potentially applicable requirements or specified potentially applicable state-only requirements listed in the attachment “Permit Shield.” Permit shield provisions shall not be modified by the executive director until notification is provided to the permit holder. No later than 90 days after notification of a change in a determination made by the executive director, the permit holder shall apply for the appropriate permit revision to reflect the new determination. Provisional terms are not eligible for this permit shield. Any term or condition, under a permit shield, shall not be protected by the permit shield if it is replaced by a provisional term or condition or the basis of the term and condition changes.

Sincerely,

Kyle J. Murray

Lisa,

You are correct that an updated OP-1 and OP-CRO1 will be needed. Form [OP-CRO2](#) – Change of Responsible Official Information – will also need to be submitted. It is important that the effective date listed on the OP-CRO2 is concurrent with or before the STEERS submittal date so that the certification is valid. These forms (including the updates from my previous email) can all be submitted through STEERS or the OP-CRO1 alone can be submitted, as long as the specific date on the OP-CRO1 matches the date of the STEERS submittal. I hope this helps clear things up but let me know if you have any additional questions. Thank you!

Sincerely,

Kyle J. Murray

Kyle,
I will make the updates noted below. I was also just informed that the RO will be different than the person previously listed. I assume that means I will need to provide an updated OP-1 and OP-CRO1, and the new RO will need to certify all of these updates in STEERS. Is that accurate, or is there anything else that we need to do to make the change for the RO?

Thanks.

Good morning Lisa,

Thank you for getting these documents to me ahead of schedule. Unfortunately, there are two more updates needed on the OP-REQ1.

Since Question I.A.2 was updated to Yes, Questions I.A.4 and I.A.5 would now need an answer. I have them answered to No in our system since this will most likely be the case and have updated the terms in the WDP. I have attached the WDP so you can review the new terms (Term 3 encompasses all the changes). The issuance date for NSR No. 176758 also needs to be updated to 10/23/2024. I apologize for the back and forth, but this should be the last update needed. Please complete the following by **Friday, August 1st**

- Review and provide approval of changes in revised WDP.
- Provide answers to Questions I.A.4 and I.A.5 (Page 1 on the OP-REQ1).
- Updated the issuance date for NSR No. 176758 to the most recent issuance date of 10/23/2024 (Page 79 of the OP-REQ1).
- Submit these documents through STEERS to provide certification or submit an additional OP-CRO1 through STEERS using the date of your response to this email as the certification date.

Let me know if you have any questions and thank you for your patience with this review.

Sincerely,

Kyle J. Murray

Good afternoon Lisa,

The QA/QC review by my technical specialist brought about some additional questions. Please provide a response for the following items in tandem with your OP-CRO1 submittal from our previous correspondence. If you would require more time to complete the request, please let me know.

1. **Form OP-REQ1 – Page 1 - Question I.A.2** – “The application area includes stationary vents constructed after January 31, 1972” – Vents are typically found on engines and tanks, so we wanted to double check that this question was answered correctly since most permits have this general term. Any vents would need to be addressed through general terms or on a unit-specific basis. Please update this answer to “Yes” (which will incorporate the general term in the WDP) or provide an explanation as to why you believe you do not have any vents in which this question would remain “No”. Alternatively, if addressing the vents on a unit-specific basis, Question I.A.4 would also need to be answered “Yes” (answered “No” if opting for the general term) and the vents and requirements would need to be added to the permit.

Let me know if you have any questions,. Thank you again for your help!

Sincerely,

Kyle J. Murray

Kyle,

I was just informed that our compliance and operations teams are out of the office this week for a training meeting, so I won't be able to get the signed OP-CRO1 until they are back in the office next week. However, I have attached an updated Page 2 of OP-REQ1 per your request. Would it be possible to get an extension to submit the OP-CRO1 by the end of next week (July 25) so I can make sure I can get the signature?

Good afternoon Lisa,

I noticed a minor error on the OP-REQ1 in my final review. Questions I.C.1 and I.D.1 (relating to agricultural and non-agricultural processes) cannot both be “No”. I have changed the answer for question I.C.1 to “Yes” which incorporates another term into the WDP. I have attached a screen shot of the term added below (Term 3.B) for your reference since there are no other changes to the WDP. Apologies for this oversight, but please include an updated page 2 of the OP-REQ1 (Question I.C.1) in tandem with the submission of the OP-CRO1. Let me know if you have any questions. Thank you!

- B. Emission limits on nonagricultural processes, except for the steam generators specified in 30 TAC § 111.153, shall comply with the following requirements:
- (i) Emissions of PM from any source may not exceed the allowable rates as required in 30 TAC § 111.151(a) (relating to Allowable Emissions Limits)
 - (ii) Sources with an effective stack height (h_e) less than the standard effective stack height (H_e), must reduce the allowable emission level by multiplying it by $[h_e/H_e]^2$ as required in 30 TAC § 111.151(b)
 - (iii) Effective stack height shall be calculated by the equation specified in 30 TAC § 111.151(c)

Good afternoon Lisa,

The next steps include a QA/QC review by my Technical Specialist and Team Leader. Upon completion, barring any additional discrepancies that I may have missed, we will move forward to Public Notice upon which we will send you a document/letter detailing all further instructions. This should happen within the next two weeks. In the time being, I will need you to certify all previous application updates and correspondence. To do this you will need to submit a Form OP-CRO1 through STEERS with the Time Period range from 04/16/2025 – 07/09/2025 to cover all application updates that were submitted (please verify these are the correct dates). As a note, the RO or DAR would have to complete the submission for the documents to be properly certified. Please complete this by **Wednesday, July 16th**.

Feel free to email me the signed OP-CRO1 first in order to meet the deadline, but the form will still need to be submitted through STEERS . Let me know if you have any questions. Thank you!

Good morning Lisa,

I have attached the WDP; there are no changes. The citations you have requested to be grouped (§[G] 60.4245(a)) should remain as is in the WDP because § 60.4245(a)(3) does not apply since it references certified engines. Please indicate your approval or provide me with any additional comments by **Wednesday, July 9th** (or sooner if possible) and we will proceed with the application process. Kyle,

Please see my minor comments in the attached draft permit. I've also attached an updated OP-UA2 page because you are correct that the Certified question should have been marked "no".

Thank you, and please let me know if you have any questions.

Good morning Mrs. Garcia,

I reviewed have reviewed your comments and updated your WDP. It seems that the changes you made to the Applicable Summary Requirements table for GRP-ENG, NSPS JJJJ (CO, NOx, and VOC) are associated with the attribute question “Certified” on Table 4b of the OP-UA2. It is currently answered Yes, but the citations you altered/added would indicate that the question should be answered No instead. Please let me know if that is the case by providing me with updated an OP-UA2.

Updating this attribute for this group would result in additional requirements populated by our system. I have attached the revised WDP incorporating those new requirements for your review. Please review the new citations and let me know if they are acceptable. We may have to do a manual build if there are still some discrepancies. Please complete this review by **Friday, June 20th**. Let me know if you have any questions. Thank you!

Subject: Working Draft Permit -- FOP O4708/Project No. 37454, Et Genco LLC, WT-2 PS Power Generation

Good afternoon Mrs. Garcia,

I have conducted a technical review of the renewal application for Et Genco, LLC. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided. There are also a few minor discrepancies that need to be resolved. Please review the WDP, address the items listed below, and submit to me any comments you have on the working draft permit by **Friday, May 30, 2025**. If you have no comments, please indicate your approval so that we can move forward towards public notice.

1. Form OP-UA2 – Table 4a/4b – NSPS JJJJ

- a. Please remove the answer code for Lean Burn; this code is only completed upon meeting the conditions in the snippet below. (No other updates are needed for this Index Number (60JJJJ) on these tables.)
- b. Please update the Unit ID from *GRP1-ENG* to *GRP-ENG* to be consistent with the rest of the form/application

Updated table attached.

- ★ **Complete “Lean Burn” only if BOTH of the following conditions are met:**
 - “Fuel” is “NATGAS” or “LAND” or “LBLPG;” and
 - “Horsepower” is “500-1350.”

2. Form OP-REQ1

- a. Page 1 – In your update provided on 04/16, Question I.A.2. was updated to “No”. Because questions I.A.1 & I.A.2 are both marked “No”, questions I.A.4 & I.A.5 should now be left blank. Please update. Updated page attached.

3. Form OP-PBRSUP - An update to this form was also provided on 04/16, but a different PBR was listed for Unit ID MSS on Tables B and D. The initial form listed PBR 106.359/09/13/2013 which is also listed on page 89 of the OP-REQ1. The updated OP-PBRSUP lists PBR 106.263/11/01/2001. Please confirm which PBR is being claimed for this unit. Refer to the two scenarios listed below:

- a. If PBR 106.359 is correct, please update the PBR No. and Version No./Date on Tables B and D.
- b. If PBR 106.263 is correct, please update Page 89 of the OP-REQ1 by listing this PBR and its Version No./Date and remove PBR 106.359 if it is no longer being claimed. The OP-PBRSUP would remain as is. This is the correct scenario. Forms have been updated.
- c. Do not hesitate to reach out if you have any questions about this.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_facsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Kyle J. Murray

Good afternoon Mrs. Garcia,

Upon evaluation of your Federal Operating Permit application, we have determined that there are a few discrepancies that need to be addressed to complete our review. Please provide a response for the following items by **Friday, April 18th**.

1. **Form OP-1 – Section XI. Public Notice** – The Physical Address, City, and ZIP Code listed for Winkler County Branch Library do not seem to be correct. Google shows a different address for this location. Please update.
2. **Form OP-REQ1**
 1. Question I.A.2. has both Yes and No marked. Please revise.
 2. Question IX.E.1. has both Yes and No marked. Please revise.
 3. Page 89 – Section XII.H. – Authorization No. 176758 has had a revision complete on 10/09/2024 according to our records. Please verify and update the issuance date to reflect the most recent action that is a renewal, amendment, or revision.
3. **Form OP-UA2 – 40 CFR Part 63, Subpart ZZZZ, Page 5, Table 2b** – Unit ID GRP-ENG, Index No. 63ZZZZ requires an answer for Emission Limitation. Either CO or HCHO requirements will be added to the permit for this group ID depending on the code used.
4. **Form OP-PBRSUP** –All PBRs listed on Table B also need to be listed on Table D. Please refer to the form instructions I have linked here for guidance. [TCEQ Form 20875 - OP-PBRSUP - Instructions Permit By Rule Supplemental Table](#) When making the updates to the OP-PBRSUP, please re-submit all four tables as a set and re-date them, even if not all tables have changed. You can type “N/A” for blank tables.

Thank you for your cooperation in this matter. Please contact me if you have any questions.

Sincerely,

Dear Senator Sparks:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) initial issuance application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-103.304144,31.835894&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Kevin Sparks
