Good afternoon, Alyson. Thank you for the opportunity to review the revised WDP.

Attached, please find a tracked-changes version of WDP-4 with Word comments and screenshots to help illustrate. In short, please consider the following:

- The Part 63, Subpart YYYYY requirements were removed for emission unit EAF and need to be added back.
- The Part 60, Subpart AAa requirements that were generated for emission unit FUGEAF differ from the RES and flowchart. Please find redline/strikeout comments for the citations.
- The NSR permit issue date was updated in the New Source Review Authorization References Table, and the PSD permit issue date should be revised to match it.
- Please add the noted PBR references in the New Source Review Authorization References by Emissions Unit Table.

I would be happy to discuss these comments in more detail at your convenience. Thank you!!

Hi Tara,

I hope you are having a pleasant week! I have generated a revised Working Draft Permit. Please review the attached document and submit to me any comments you have by **September 5**,

2025 .

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Best Regards,

Alyson H. Haynes

Good morning, Alyson. Thank you so much for your patience. Attached, please find a revised OP-UA36. I have also attached an OP-REQ3 to help illustrate the requested changes. I believe the revisions address APD's concerns. I'd be happy to discuss the restructuring of the requirements at your convenience if you have any questions.

In addition, Nucor would like to request an update to the PBR Supplemental Table and the WDP's NSR Authorization References by Emissions Unit Table by adding two non-registered PBR claims. Attached are the OP-PBRSUP and OP-SUMR forms. Please let me know if you can accommodate this request. Thank you!

Good afternoon, Alyson. We have two comments on the WDP.

1. The WDP is missing the Special Term and Condition requiring compliance with certified PBR registrations. Please find the associated page of Form OP-REQ1. The response to Question C.1. in the attached was changed from a NO response to a YES response.
2. The New Source Review Authorization References table in the WDP contains the current version of the Permit Nos. 53581/PSDTX1029M3 (06/23/2023) and an older version (12/23/2019). Please remove the old version date, as follows:

New Source Review Authorization References

The New Source Review authorizations listed in the table below are applicable requirements under 30 TAC Chapter 122 and enforceable under this operating permit.

Prevention of Significant Deterioration (PSD) Permits	
PSD Permit No.: PSDTX1029M3	Issuance Date: 06/26/2023
PSD Permit No.: PSDTX1029M3	Issuance Date: 12/23/2019
Title 30 TAC Chapter 116 Permits, Special Permits, and Other Authorizations (Other Than Permits By Rule, PSD Permits, or NA Permits) for the Application Area.	
Authorization No.: 53581	Issuance Date: 06/26/2023
Authorization No.: 53581	Issuance Date: 12/23/2019

Thank you for the opportunity to review the permit. Please feel free to let me know if there is anything else I can do to assist.

Jewett Texas Division

Ms. Haynes:

Thank you for your review of the Title V renewal project. Please find responses to your questions below.

- OP-UA2; Table 5c for 40 CFR Part 60 Subpart IIII- Based on my review and the form instructions for the OP-UA2 form, unit ID EWP, index No. 60IIII-01 and unit ID EWP2, index No. 60IIII-02 require entry for "AECD Type". Please review the form instructions and submit and updated OP-UA2.

Response: Attached, please find an updated Form OP-UA2 with the requested information.

- PBRs 106.144, 106.261, 106.262, 106.452, 106.473, 106.511 are listed in the current effective permit, however, they are not included in the renewal application. If these PBRs are still in use, submit a revised OP-REQ1 page 88 and a revised OP-PBRSUP form that include all active PBRs.

Response: The renewal application included the most up-to-date PBR references and was intended to replace the PBR list in the current permit. Nucor has, however, claimed three additional PBRs in 2025 after submittal of the renewal application in 2024. The forms have been updated to include the 2025 claims. Please note that 106.144, 106.452, 106.473, and 106.511 are no longer in use and have not been included.

Please let me know if there is anything additional I may provide to help with your review of this project. Thank you for your consideration.

Date: Tuesday, January 14, 2025 3:06:00 PM

Mr. Aaron Smith

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O1289 for Nucor Corporation, Nucor Steel Jewett Texas Division. This application has been assigned Project No. 37466. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBR SUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP](#)

Applications and Permit-Related Documents.

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Good afternoon, Alyson. We have two comments on the WDP.

1. The WDP is missing the Special Term and Condition requiring compliance with certified PBR registrations. Please find the associated page of Form OP-REQ1. The response to Question C.1. in the attached was changed from a NO response to a YES response.
2. The New Source Review Authorization References table in the WDP contains the current version of the Permit Nos. 53581/PSDTX1029M3 (06/23/2023) and an older version (12/23/2019). Please remove the old version date, as follows:

New Source Review Authorization References

The New Source Review authorizations listed in the table below are applicable requirements under 30 TAC Chapter 122 and enforceable under this operating permit.

Prevention of Significant Deterioration (PSD) Permits	
PSD Permit No.: PSDTX1029M3	Issuance Date: 06/26/2023
PSD Permit No.: PSDTX1029M3	Issuance Date: 12/23/2019
Title 30 TAC Chapter 116 Permits, Special Permits, and Other Authorizations (Other Than Permits By Rule, PSD Permits, or NA Permits) for the Application Area.	
Authorization No.: 53581	Issuance Date: 06/26/2023
Authorization No.: 53581	Issuance Date: 12/23/2019

Thank you for the opportunity to review the permit. Please feel free to let me know if there is anything else I can do to assist.

Please review the WDP and submit to me any comments you have on the working draft permit by **05/04/2025.**

Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Subject: RE: TX Title V Permit Update:Technical Review -- FOP O1289/Project 37466, Nucor Steel,
Jewett Texas Division

Ms. Haynes:

Thank you for your review of the Title V renewal project. Please find responses to your questions below.

- OP-UA2; Table 5c for 40 CFR Part 60 Subpart IIII- Based on my review and the form instructions for the OP-UA2 form, unit ID EWP, index No. 60IIII-01 and unit ID EWP2, index No. 60IIII-02 require entry for "AECD Type". Please review the form instructions and submit and updated OP-UA2.

Response: Attached, please find an updated Form OP-UA2 with the requested information.

- PBRs 106.144, 106.261, 106.262, 106.452, 106.473, 106.511 are listed in the current effective permit, however, they are not included in the renewal application. If these PBRs are still in use, submit a revised OP-REQ1 page 88 and a revised OP-PBRSUP form that include all active PBRs.

Response: The renewal application included the most up-to-date PBR references and was intended to replace the PBR list in the current permit. Nucor has, however, claimed three additional PBRs in 2025 after submittal of the renewal application in 2024. The forms have been updated to include the 2025 claims. Please note that 106.144, 106.452, 106.473, and 106.511 are no longer in use and have not been included.

Please let me know if there is anything additional I may provide to help with your review of this project. Thank you for your consideration.

Subject: Technical Review -- FOP O1289/Project 37466, Nucor Corporation, Nucor Steel Jewett Texas Division
Date: Tuesday, January 14, 2025 3:06:00 PM

Mr. Aaron Smith

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O1289 for Nucor Corporation, Nucor Steel Jewett Texas Division. This application has been assigned Project No. 37466. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP](#)

Applications and Permit-Related Documents.

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

December 10, 2024

THE HONORABLE CHARLES SCHWERTNER
TEXAS SENATE

AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application

Regulated Entity Number: RN100211093

Dear Senator Schwertner:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-96.164722,31.357222&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Charles Schwertner

Good morning Tara,

Thank you for your comments and OP-REQ1 update! I have updated the draft permit and attached a courtesy copy.

A final certification is needed so that the permit can be issued. Please do one of the following by **tomorrow, September 30th, 2025.**

- Send me an OP-CRO1. You can use the Time Period or Specific Date option on the form as long as the dates 04/09/2025, 08/21/2025 and 09/26/2025 are covered. You may email me a scan, but please follow up with the wet ink original in the mail afterwards. You could also upload the OP-CRO1 in STEERS.
- Submit all updates in STEERS (you can upload the 04/09/2025, 08/21/2025 and 09/26/2025 emails and the attachments as well). It will be certified via the submittal process by having the RO sign and submit.

Good afternoon! I really appreciate the detailed information you provided on our comments. We have no further questions on those items.

Attached, please find the requested form and some minor comments on the WDP. The comments relate solely to the date of the PBR Supplemental Table and the NSR/PSD permit issue dates on the Major NSR Summary Table. I have attached the document in track changes format. Please feel free to contact me if I can provide anything further. Thank you so much for your help and have a great weekend.

Good afternoon Ms. Tara,

I have completed the review of the draft permit with the updates to your comments that were provided on September 5 to the previous reviewer (Alyson), and I've attached the final WDP for your review. Since this review was a transfer, please excuse me if any update is missing or if I've requested something that you've already probably mentioned to Alyson prior. Just let me know accordingly. I am following up on your last email to Alyson on 9/5 and my responses are in **green**.

In short, please consider the following:

1. The Part 63, Subpart YYYYY requirements were removed for emission unit EAF and need to be added back.

A – The MACT YYYYY requirements for electric arc furnace units for metallic scrap utilization for HAP emissions are considered site-wide emissions and have been correctly addressed in the OP-REQ1 under Qn.VIII DD (page 74). This is reflected in the draft permit through Special terms & conditions 7 and 8. Hence, they do not need to be addressed separately with unit-specific requirements.

2. The Part 60, Subpart AAa requirements that were generated for emission unit FUGEAF differ from the RES and flowchart. Please find redline/strikeout comments for the citations.

A – Yes, I agree. The citations have been updated for the AAa requirements.

3. The NSR permit issue date was updated in the New Source Review Authorization References Table, and the PSD permit issue date should be revised to match it.

A – Updated.

4. Please add the noted PBR references in the New Source Review Authorization References by Emissions Unit Table.

A – I believe this table is up to date per the application submittals. Let me know if I'm missing anything here.

Additionally, please respond to the following items along with your response to the WDP :

- Please re-submit **Pages 88 (Qn. XII.E) and 89 (Qn. XII. H) of the OP-REQ1** with the updated issuance dates 07/31/2025 for PSDTX1029M3 and NSR permit 53581.
- The Major NSR summary Table (Appendix B) is also attached to the WDP. If there are any required updates to the table, kindly use track changes.

Kindly provide your responses no later than **September 26th, 2025**

Let me know if you have any questions regarding this.

Have a great weekend!

Sincerely,

Subject: Technical review (Re-assigned) - FOP O1289/Project 37466, Nucor Corporation, Nucor Steel Jewett

Good morning Ms.Tara,

Please note that I have been re-assigned to the Federal Operating Permit (FOP) Renewal issuance application of Permit No. O1289, Project No. 37466 for Nucor Corporation, Nucor Steel Jewett. I will resume the technical review and send the updated WDP as soon as possible.

Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Thank you for your corporation.
