Hi Katelyn,

Sorry I was unable to pick your call as I am in a meeting. Can I call you back around 3, if that's okay? Or you could shoot your question via email, and I will get back to you by COB today itself.

Thank you for your patience.

Hi Katelyn,

Thank you for your prompt response!

I have corrected the typo as you rightly pointed out and attached a courtesy copy of the WDP.

Regarding point 2 - Apologies for the confusion. You are right, special term & condition **4** was what was added back due to mandatory site-wide compliance for VOC storage tanks as I mentioned. Qn.III.B.1 should be 'yes', as you correctly submitted in the beginning of this renewal application, and as present in the effective permit.

Let me know if you have any questions.

Sincerely,

Anugraha Renny

Hi Anugraha,

Thank you for providing the draft permit for final review. Our team has the following correction to the draft permit (see text in **red**):

- Draft page 22 – Permit Shield Table – typo for GRPGTI03 – “Storage capacity is greater than **20, gallons** and less than 40,000 gallons with a true vapor pressure less than 2.2 psia.”
Correct to 20,000 gallons

We are also providing comments to the updates outlined in your email (see text in **red**):

- Permit shields for units V-1 and V-2 have been removed because these units have Chapter 115 loading/unloading requirements and not storage tanks requirements. So, I don't think you need storage tank permit shields. **Concur**
- The special term and condition 5 was added since the site includes VOC storage tanks and is subject to 30 TAC Ch.115, hence site-wide compliance is mandatory. **Are you referring to special term and condition 4, not 5? In the attached email correspondence with TCEQ/Robert Hunter from July 1, 2025, we updated OP-REQ1, III.B.1 (page 4 of 89) from “Yes” to “No,” which should have removed special condition 4. Please confirm if this condition will be removed given the updated OP-REQ1 form provided.**
- The PBR pre-construction authorizations for units T-106-35, T-106-36, T-106-37, and T-106-38 were added in the ‘New Source Review Authorization References by Emission Unit’ table since they were not added in the previous reviews. **Concur**

Please reach out with any questions.

Thank you,
Katelyn

Good morning,

- Permit shields for units V-1 and V-2 have been removed because these units have Chapter 115 loading/unloading requirements and not storage tanks requirements. So, I don't think you need storage tank permit shields.

Subject: Technical review (Re-assigned) -- FOP O851/Project 37471, Pelican Island Storage Terminal, LLC/ Pelican Island Storage Terminal

Good morning Ms.Katelyn,

Please note that I have been re-assigned to the Federal Operating Permit (FOP) Renewal issuance application of Permit No. O851, Project No. 37471 for Pelican Island Storage Terminal, LLC, Pelican Island Storage Terminal. I will resume the technical review and let you know if anything would be required before the PNAP can be sent out.

Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Thank you for your corporation.

Hey Katelyn,

Thank you for your response. Please review the WDP and submit to me any comments you have on the working draft permit by **July 15, 2025**. Please provide the following information by the same deadline:

- **OP-UA3** – Please review the form instructions and unit attributes submitted for emission group GRPGTI05 on Tables 4a – 4b addressing 30 TAC Chapter 115 applicability. The Storage Capacity answer selected (A40K+) is not an option for operating scenarios where the Product Stored is OIL1. From my review, the unit attribute for Storage Capacity for GRPGTI05 should be B40K+, and with that answer you will need to continue on to Table 4b of the OP-UA3 to provide an answer for Tank Description and True Vapor Pressure.
 - I have added the Chapter 115 applicable requirements for GRPGTI05 to the draft permit.

Since this is a follow-up review to the previously submitted and reviewed WDP, only comments concerning changes since the last WDP may be considered by TCEQ. Any comments outside the scope of the most recent changes should be submitted as a separate project.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Thank you for your cooperation.

Hello Robert,

We have completed our review of the Working Draft Permit (WDP) 2 and have no comments on the permit draft.

In regards to the bulleted questions below, we've provided a revised OP-REQ1 (Page 2 of 89) and changed the answer to Question I.C.3 from "Yes" to "No" since only a few vents on site have PM requirements. For the second bullet, OP-REQ1, III.B.1 (Page 4 of 89) was answered "Yes" originally but has been changed to "No." This should remove Special Condition 4 from the WDP2.

The revised OP-REQ1 form pages 2 and 4 have been uploaded via STEERS.

Please let me know if you need any further information.

Thank you,
Katelyn

Good afternoon Katelyn,

I have conducted a technical review of renewal application for Pelican Island Storage Terminal, LLC, Pelican Island Storage Terminal and attached an updated WDP.

Please review the WDP and submit to me any comments you have on the working draft permit by **June 2, 2025**. Please submit the following information by the same deadline:

- **OP-REQ1** – Question I.C.3 was answered “Yes” implying ALL vents on site have PM/CAM requirements, so the term was not included in this permit. From my review, this answer should be updated to “No” because only a select few vents on site have PM requirements in the permit. I have added the term to the Special Terms and Conditions. Please submit an updated OP-REQ1 (page 2 only).
- **OP-REQ1** – Question III.B.1 was answered “Yes” on page 4 of the OP-REQ1. With this answer, the Chapter 115 requirements for emission group GRPGTI05 will be in the Special Terms and Conditions(Special Term and Condition #4). If this OP-REQ1 answer needs to be changed, please submit an update OP-REQ1 (page 4 only).

Since this is a follow-up review to the previously submitted and reviewed WDP, only comments concerning changes since the last WDP may be considered by TCEQ. Any comments outside the scope of the most recent changes should be submitted as a separate project.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Subject: RE: Working Draft Permit -- FOP O851/Project 37471, Pelican Island Storage Terminal, LLC/
Pelican Island Storage Terminal

Hello Robert,

Thank you for providing your comments and the working draft permit. Please see below for our responses to your comments/questions regarding FOP O851/Project 37471:

1. **OP-SUMR** - There is not a T-106-26 nor T-106-27 emission unit in the effective permit. Would you like to add these units to the permit and GRPGTI02? Or are you references Unit IDs T-100-26 and T-100-27
Response: Tanks T-100-26 and T-100-27 were incorrectly listed on the current Title V O851, dated August 19, 2020. These tanks should be listed as T-106-26 and T-106-27. Form OP-2, Table 2, was submitted via STEERS for revising the Tank IDs T-100-26 and T-100-27 to T-106-26 and T-106-27, respectively.
2. **OP-SUMR/ OP-UA14** - The Oil/Water Separator emission unit was listed on the OP-SUMR with Unit ID: V-2, but on the OP-UA14 form, an emission unit with Unit ID: WTRSPT was submitted on the OP-UA14. If these are different units, please update the OP-SUMR and OP-UA14. If Unit IDs refer to the same unit, please update the OP-SUMR or OP-UA14 so that the IDs match.
Response: Emission unit was inadvertently listed as "WTRSPT". Corrected OP-UA14 form was submitted via STEERS with Unit ID "V-3". V-2 is for loading/unloading.
3. **OP-SUMR** – For emission units T-109-39 and T-109-40, please submit the PBRs/ version dates and their registration numbers in the following format:
 1. [106.XXX/MM/DD/YYYY\[rrrr\]](#) Authorized on or after March 14, 1997 (except 106.181 is on or after December 27, 1996)
 1. MM/DD/YYYY = Effective date of the Standard Exemption or PBR in effect at the time claimed or granted.

2. [rrrr] = Registration number for the authorization. If multiple registration numbers apply, list them separated by commas.

Response: Updated OP-SUMR, revised page was submitted via STEERS.

4. **OP-REQ1** – PBR Registration 164707 establishes federally enforceable emission rates, so question XI.C.1 should be answered yes. I have included the Special Term and Condition for certified emission limitations (Term no. 12). Please submit an updated OP-REQ1, page 79 only.

Response: Updated OP-REQ1, Page 79 was submitted via STEERS. Thank you for updating the special term 7 to include a condition related to federally enforceable emission rates.

We have completed our review of the WDP and following updates or clarifications are requested:

1. Special Condition 3.C is absent in WDP, however, is part of the current Title V permit. Can you please explain this change?
2. In the permit, please include tanks T-109-39 and T-109-40 and Group ID GRPGTI05 in the Applicable Requirements Summary Table on Page 14. Applicability of this group is provided in the application on form OP-REQ3.
3. Remove the Group ID GRPGTI06 as the tanks in this group have been consolidated in group ID GRPGTI02.

Please reach out with any questions.

Thank you,
Katelyn

Good afternoon Mr. Matt Trottier,

I have conducted a technical review of renewal application for Pelican Island Storage Terminal, LLC, Pelican Island Storage Terminal. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **May 21, 2025**. Please submit the following information by the same deadline:

1. **OP-SUMR** - There is not a T-106-26 nor T-106-27 emission unit in the effective permit. Would you like to add these units to the permit and GRPGTI02? Or are you references Unit IDs T-100-26 and T-100-27
2. **OP-SUMR/ OP-UA14** - The Oil/Water Separator emission unit was listed on the OP-SUMR with Unit ID: V-2, but on the OP-UA14 form, an emission unit with Unit ID: WTRSPT was submitted on the OP-UA14. If these are different units, please update the OP-SUMR and OP-UA14. If Unit IDs refer to the same unit, please update the OP-SUMR or OP-UA14 so that the IDs match.
3. **OP-SUMR** – For emission units T-109-39 and T-109-40, please submit the PBRs/ version dates and their registration numbers in the following format:
 - a. [106.XXX/MM/DD/YYYY\[rrrr\]](#) Authorized on or after March 14, 1997 (except 106.181 is on or after December 27, 1996)

 - ii. [rrrr] = Registration number for the authorization. If multiple registration numbers apply, list them separated by commas.
4. **OP-REQ1** – PBR Registration 164707 establishes federally enforceable emission rates, so question XI.C.1 should be answered yes. I have included the Special Term and Condition for certified emission limitations (Term no. 12). Please submit an updated OP-REQ1, page 79 only.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Subject: Technical Review -- FOP O851/Project 37471, Pelican Island Storage Terminal, LLC/ Pelican Island Storage Terminal

Mr. Matt Trottier,

I have been assigned to the Federal Operating Permit (FOP) initial issuance/renewal/revision application of Permit No. O851 for Pelican Island Storage Terminal, LLC, Pelican Island Storage Terminal. This application has been assigned Project No. 37471. Please address all

correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Robert P. Hunter

APPENDIX A – TCEQ FORMS

1.0 INTRODUCTION

Pelican Island Storage Terminal, LLC owns and operates the Pelican Island Storage Terminal (PIST), located in Galveston County, Texas. PIST is a bulk petroleum liquid storage and distribution facility that stores and transloads residual and distillate fuel oils, carbon black oil, vacuum gas oil, and fuel oil cutter stock. The company's customer number is CN600131668. The site's regulated entity number is RN100224120.

This site is authorized to operate under Federal Operating Permit (FOP) O851, which is due to expire on August 19, 2025. In accordance with Title 30 of the Texas Administrative Code Chapter 122, Section 133 (30 TAC §122.133), FOP holders are required to prepare and submit a renewal application at least 6 months, but no earlier than 18 months, before the date of permit expiration. This renewal application is being submitted within the time frame to be considered a timely application.

1.1 Description of Revisions

Based on the Texas Commission on Environmental Quality (TCEQ) Air Permit Division Site Operating Permit (SOP) Renewal Guidance (APDG 6401v3, revised July 2017), the most recent version of the TCEQ forms were completed and are included in this application under Section 2. This application includes the following requested permit revisions:

1. Revise the list of applicable permits by rules (PBRs) on Form OP-REQ1.
2. Document the negative applicability of selected federal requirements for emission sources as indicated on Form OP-REQ2.
3. Include all PBRs on Form OP-PBRSUP.
4. Revise negative applicability for tanks T-100-4, T-100-5, T-55-6, and T-55-7 from 40 Code of Federal Regulations (CFR) Part 60, Subpart Ka to 40 CFR Part 60, Subpart Kb because each of the tanks was modified after July 23, 1984 and prior to October 4, 2023. These tanks were removed from group ID GRPGTI01 and added to group ID GRPGTI02.
5. Remove Tank T-5-8 from group ID GRPGTI01 and listed it separately because it has a lower capacity and is not subject to 30 TAC §15.118(a)(6)(A).
6. Consolidate group ID GRPGTI06 into group ID GRPGTI02 because all tanks listed in GRPGTI06 (i.e., T-27-29, T-27-30, T-106-31, T-106-32, T-54-33, T-54-34, T-215-28, T-106-26, T-106-27, T-50-23, T-50-24, T-106-35, T-106-36, T-106-37, and T-106-38) have the same applicable regulations as existing group ID GRPGTI02. Therefore, these tanks are now listed under group ID GRPGTI02 and group ID GRPGTI06 has been removed.

7. Remove existing tanks T-2-16, T-2-17, T-2-18, and T-2-19 from the application, as these tanks now store stormwater and do not emit any regulated air pollutants.
8. Add new tanks T-109-39 and T-109-40 to new group ID GRPGTI05 authorized by an unregistered PBR 30 TAC §106.472.
9. Add new tanks SG-001 and T-4-9, authorized by an unregistered PBR 30 TAC §106.472. These tanks are listed individually on Title V Forms.
10. Add equipment oil/water separator (V-3) authorized by an unregistered PBR 30 TAC §106.472. This equipment is listed individually on Title V Forms.
11. Remove multiple SOP index numbers for group ID GRPGTI01 associated with applicable regulations 30 TAC Chapter 115 and 40 CFR Part 60, Subpart Ka. Updated SOP index numbers are listed in this application.
12. Revise Form OP-UA3 to reflect the updates made in SOP index numbers and that all tanks are fitted with submerged fill pipes.

This site is authorized to operate under Federal Operating Permit (FOP) O851, which is due to expire on August 19, 2025. In accordance with Title 30 of the Texas Administrative Code Chapter 122, Section 133 (30 TAC §122.133), FOP holders are required to prepare and submit a renewal application at least 6 months, but no earlier than 18 months, before the date of permit expiration. This renewal application is being submitted within the time frame to be considered a timely application.

1.1 Description of Revisions

Based on the Texas Commission on Environmental Quality (TCEQ) Air Permit Division Site Operating Permit (SOP) Renewal Guidance (APDG 6401v3, revised July 2017), the most recent version of the TCEQ forms were completed and are included in this application under Section 2. This application includes the following requested permit revisions:

1. Revise the list of applicable permits by rules (PBRs) on Form OP-REQ1.
2. Document the negative applicability of selected federal requirements for emission sources as indicated on Form OP-REQ2.
3. Include all PBRs on Form OP-PBRSUP.
4. Revise negative applicability for tanks T-100-4, T-100-5, T-55-6, and T-55-7 from 40 Code of Federal Regulations (CFR) Part 60, Subpart Ka to 40 CFR Part 60, Subpart Kb because each of the tanks was modified after July 23, 1984 and prior to October 4, 2023. These tanks were removed from group ID GRPGTI01 and added to group ID GRPGTI02.
5. Remove Tank T-5-8 from group ID GRPGTI01 and listed it separately because it has a lower capacity and is not subject to 30 TAC §15.118(a)(6)(A).
6. Consolidate group ID GRPGTI06 into group ID GRPGTI02 because all tanks listed in GRPGTI06 (i.e., T-27-29, T-27-30, T-106-31, T-106-32, T-54-33, T-54-34, T-215-28, T-106-26, T-106-27, T-50-23, T-50-24, T-106-35, T-106-36, T-106-37, and T-106-38) have the same applicable regulations as existing group ID GRPGTI02. Therefore, these tanks are now listed under group ID GRPGTI02 and group ID GRPGTI06 has been removed.

7. Remove existing tanks T-2-16, T-2-17, T-2-18, and T-2-19 from the application, as these tanks now store stormwater and do not emit any regulated air pollutants.
8. Add new tanks T-109-39 and T-109-40 to new group ID GRPGTI05 authorized by an unregistered PBR 30 TAC §106.472.
9. Add new tanks SG-001 and T-4-9, authorized by an unregistered PBR 30 TAC §106.472. These tanks are listed individually on Title V Forms.
10. Add equipment oil/water separator (V-3) authorized by an unregistered PBR 30 TAC §106.472. This equipment is listed individually on Title V Forms.
11. Remove multiple SOP index numbers for group ID GRPGTI01 associated with applicable regulations 30 TAC Chapter 115 and 40 CFR Part 60, Subpart Ka. Updated SOP index numbers are listed in this application.
12. Revise Form OP-UA3 to reflect the updates made in SOP index numbers and that all tanks are fitted with submerged fill pipes.
