Dear Mr. Murray:

On behalf of Occidental Permian, Ltd. (Oxy), I am submitting additional information in response to your email dated July 31, 2025 regarding inconsistencies between Form OP-REQ1 Section XII.I and Form OP-PBRSUP. The following attachments are included:

- ▶ Form OP-PBRSUP, revised to include units authorized under Permits by Rule §§106.359, 106.454, 106.476, and 106.511
- ▶ Form OP-CRO1 certifying this submittal and all previous project updates

If you have any questions, feel free to contact me at [miranda.cheatham@trinityconsultants.com](mailto:miranda.cheatham@trinityconsultants.com) or at (512) 349-5800.

Sincerely,

TRINITY CONSULTANTS

## 2. FORM OP-CRO1

---

**Form OP-CRO1**  
**Certification by Responsible Official**  
**Federal Operating Permit Program**  
**Texas Commission on Environmental Quality**

All initial issuance, revision, renewal, and reopening permit application submittals requiring certification must be addressed using this form. Updates to site operating permit (SOP) and temporary operating permit (TOP) applications, other than public notice verification materials, must be certified prior to authorization of public notice or start of public announcement. Updates to general operating permit (GOP) applications must be certified prior to receiving an authorization to operate under a GOP.

**Subject:** RE: Working Draft Permit -- FOP O553/Project 37524, Occidental Permian, Ltd., Wasson CO2 Removal Plant

Good afternoon Miranda,

In her final review, my technical specialist has identified an additional issue regarding the OP-PBRSUP/OP-REQ1 that needs to be resolved. Please provide a response for the following by **Friday, August 8<sup>th</sup>**.

- **OP-REQ1 – Section XII.I** - Several PBRs (106.359, 106.454, 106.476, 106.511) that are listed in this section are not currently listed on the OP-PBRSUP.
  - PBRs 106.359, 106.454, and 106.476 currently do not authorize any units in your permit. Please review these PBRs and determine if they should be removed from the OP-REQ1 or added to the OP-PBRSUP.
  - PBR 106.511 does authorize multiple units in your permit and needs to be added to the OP-PBRSUP (Tables A or B and Table D).
- **OP-PBRSUP** – As a note, the PBRs listed on the OP-REQ1 and OP-PBRSUP should match. Please update this form and provide me with a redated set of all four tables.
- **OP-CRO1** – As this is most likely the final update needed, I will need you to certify all previous application updates and correspondence. To do this you will need to submit a Form OP-CRO1 through STEERS with the Time Period range from 03/21/2025 – 08/08/2025 (or the date of which you respond to this email) to cover all application updates that were submitted. As a note, the RO or DAR would have to complete the submission for the documents to be properly certified.

Let me know if you have any questions. Thank you!

Sincerely,

**Kyle J. Murray**

# FEDERAL OPERATING PERMIT

A FEDERAL OPERATING PERMIT IS HEREBY ISSUED TO  
Occidental Permian, Ltd.

AUTHORIZING THE OPERATION OF  
Wasson CO2 Removal Plant  
Crude Petroleum and Natural Gas Extraction

LOCATED AT  
Yoakum County, Texas  
Latitude 33° 0' 365" Longitude 102° 45' 152"  
Regulated Entity Number: RN100226687

This permit is issued in accordance with and subject to the Texas Clean Air Act (TCAA), Chapter 382 of the Texas Health and Safety Code and Title 30 Texas Administrative Code Chapter 122 (30 TAC Chapter 122), Federal Operating Permits. Under 30 TAC Chapter 122, this permit constitutes the permit holder's authority to operate the site and emission units listed in this permit. Operations of the site and emission units listed in this permit are subject to all additional rules or amended rules and orders of the Commission pursuant to the TCAA.

This permit does not relieve the permit holder from the responsibility of obtaining New Source Review authorization for new, modified, or existing facilities in accordance with 30 TAC Chapter 116, Control of Air Pollution by Permits for New Construction or Modification.

The site and emission units authorized by this permit shall be operated in accordance with 30 TAC Chapter 122, the general terms and conditions, special terms and conditions, and attachments contained herein.

This permit shall expire five years from the date of issuance. The renewal requirements specified in 30 TAC § 122.241 must be satisfied in order to renew the authorization to operate the site and emission units.

Permit No: O553 Issuance Date: \_\_\_\_\_

**Subject:** Working Draft Permit -- FOP O553/Project 37524, Occidental Permian, Ltd., Wasson CO2 Removal Plant

Good afternoon Ms. Serrano,

I have conducted a technical review of the renewal application Occidental Permian, Ltd., Wasson CO2 Removal Plant. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided. Please review the WDP and submit to me any comments you have on the working draft permit by **Monday, July 14<sup>th</sup>**. I have also included some notes about some changes we have made to the monitoring requirements for your review below.

**1. Case-by-case periodic monitoring for Unit ID SULFURUNIT for Combustion Temperature / Exhaust Gas Temperature SO2 for 30 TAC Chapter 112, Sulfur Compounds**

- a. We have removed PM Option PM-S-013 and replaced it with case-by-case periodic monitoring to add periodic monitoring text “when waste gas is being directed to the incinerator”. The case-by-case monitoring is similar to Periodic Monitoring Option PM-S-013.

- b. Case-by-case periodic monitoring is not required for the SO<sub>2</sub> Mass Emissions in pounds per hour monitoring and can remain as PM-S-014 since there are no changes. Together, the case-by-case periodic monitoring and PM-S-014 will satisfy periodic monitoring requirements.
- c. We recommend leaving the control device type as SRUINC for Sulfur Recovery Unit with Incinerator for both the case-by-case and PM-S-014 as it is in the effective permit and since SULFURUNIT is a sulfur recovery unit. This change is currently reflected in the WDP.

Please let me know if these changes are acceptable and if you have any questions or comments. Thank you!

Please review the second portion of the “SOP Technical Review Fact Sheet” located at [http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\\_V/sop\\_wdp\\_factsheet.pdf](http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf). This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

Please let me know if you have any questions or comments and I would be happy to help. Thank you!

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Sincerely,

**Kyle J. Murray**

Dear Mr. Murray:

On behalf of Occidental Permian, Ltd. (Oxy), I am submitting additional information in response to your email dated March 12, 2025. The first attachment to this letter contains a revised Form OP-SUMR revising the authorizations listed for several units. The second attachment to this letter contains justification for the requested case-by-case deviation limits. An electronic version of the revised Major NSR Summary Table is attached to this email.

If you have any questions, feel free to contact me at [miranda.cheatham@trinityconsultants.com](mailto:miranda.cheatham@trinityconsultants.com) or at (512) 349-5800.

Sincerely,

TRINITY CONSULTANTS

TCEQ-10344 (APDG 5767v7, Revised 05/20) OP-SUMR

This form is for use by facilities subject to air quality permit requirements and may be revised periodically.

## 2. CASE-BY-CASE DEVIATION LIMIT JUSTIFICATION

---

The following information is provided in response to TCEQ's March 12, 2025 email.

### From TCEQ Email

**Justification for new case-by-case Deviation Limits** – Your application included two additional deviation limits for existing case-by-case periodic monitoring. Please provide us with the most recent performance test data, manufacturer's recommendations, engineering calculations, and/or historical data that would justify the following deviation limits (we would like to know how these values of 1200° F and 16.48 lb/hr SO<sub>2</sub> were determined):

- **SULFURUNIT** – "When waste gas is being directed to the incinerator, any monitoring data below 1200° F shall be considered and reported as deviation."
- **SULFURUNIT** – "Any monitoring data above 16.48 lb/hr SO<sub>2</sub> shall be considered and reported as a deviation."

### Response

The 1200°F temperature limit and 16.48 lb/hr SO<sub>2</sub> emission limit currently appear as deviation limits in the permit. The only proposed change is specifying the 1200°F temperature limit applies when waste gas is being directed to the incinerator.

The 1200°F temperature limit was added to the permit in 2010. The Statement of Basis includes a reference to 40 CFR Part 60 Subpart BB for sulfur oxidation. This regulation includes a 1200°F minimum temperature limit in 40 CFR 60.283(a)(1)(iii). Although 40 CFR Part 60 Subpart BB does not apply to the Wasson incinerator, it was used as a reasonable surrogate to set the minimum operating temperature. Reference to a 1200°F minimum operating temperature range was also found in TCEQ's files for Wasson Permit 16754.

The 16.48 lb/hr SO<sub>2</sub> emission limit is the current maximum allowable emission rate from Wasson Permit 16754. As documented in the attached calculations, this emission rate satisfies the 30 TAC §112.7 SO<sub>2</sub> emission limit.

**DEMONSTRATION OF COMPLIANCE WITH 30 TAC 112.7**  
**SULFUR RECOVERY PLANT**

**DATA**

**SUMMARY**

## DEMONSTRATION OF COMPLIANCE WITH 30 TAC 112.7 SULFUR RECOVERY PLANT

### SAMPLE CALCULATIONS (based on EPN IE1):

Effective Stack Height (He) =  $h + 0.083vD [ 1.5 + 0.82 D(T-550)/T ]$

where: He = effective stack height in feet  
h = physical stack height above ground level in feet  
v = stack exit velocity in feet/sec  
D = stack exit inside diameter in feet  
T = stack exit temperature in °R

$$\begin{aligned}\text{Effective Stack Height (He)} &= (25 \text{ ft stack height}) + 0.083(20 \text{ ft/sec stack velocity})(3.17 \text{ ft stack diameter}) \\ &\quad [1.5 + 0.82(3.17 \text{ ft stack diameter})(753 - 550 \text{ °R})/(753 \text{ °R})] \\ &= 36.58 \text{ ft}\end{aligned}$$

Estimated Stack Volumetric Flow Rate (q) =  $(\pi D^2/4) v 60 (530/T)$

where: q = volumetric flowrate in scfm  
D = stack exit inside diameter in feet  
v = stack exit velocity in feet/sec

$$\text{Volumetric Rate (q)} = ((\pi) (3.17 \text{ ft stack dia.})^2/4) (20 \text{ ft/sec stack vel.}) (60 \text{ sec/min}) (530/753) = 6,666 \text{ scfm}$$

For stack effluent rates greater than 4,000 scfm:

Standard Effective Stack Height (std He) =  $5.8q^{0.402}$

$$\text{Standard Effective Stack Height (std He)} = (5.8) (6666 \text{ scfm})^{0.402} = 199.8 \text{ ft}$$

Sulfur Dioxide Allowable Emission Rate (E)

For stack effluent rates greater than 4,000 scfm:

If effective stack height (He) < standard effective stack height (std He),

$$\text{then } E = (0.614q^{0.8042}) (He/\text{std He})^2$$

$$\text{otherwise, } E = 0.614q^{0.8042}$$

$$\text{SO}_2 \text{ Allowable Emission Rate (E)} = ((0.614)(6666 \text{ scfm})^{0.8042}) (36.58/199.8)^2 = 24.47 \text{ lb/hr}$$

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources, use area name or fugitive source name.

(3) Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which have been excluded from the definition of volatile organic compound.

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

NO<sub>x</sub> - total oxides of nitrogen

SO<sub>2</sub> - sulfur dioxide

PM - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented

PM<sub>10</sub> - total particulate matter equal to or less than 10 microns in diameter, including PM<sub>2.5</sub>, as represented

PM<sub>2.5</sub> - particulate matter equal to or less than 2.5 microns in diameter

CO - carbon monoxide

H<sub>2</sub>S - hydrogen sulfide

TRS - total reduced sulfur

HAP - hazardous air pollutant as listed in § 112(b) of the Federal Clean Air Act or Title 40 Code of Federal Regulations Part 63, Subpart C

- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) PSDTX682 authorized emissions.
- (6) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (7) Process Flare Normal Operation emissions authorize the activities specified in Special Condition No. 23.E.
- (8) Gas Flaring emissions only authorize maintenance startup, and shutdown (MSS) and alternate operating scenarios (AOS) activities as represented in Special Condition No. 28.
- (9) Speciated HAPs emissions rates are quantified in the total VOC emission rate.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources, use area name or fugitive source name.

(3) CO<sub>2</sub> - carbon dioxide  
 N<sub>2</sub>O - nitrous oxide  
 CH<sub>4</sub> - methane  
 HFCs - hydrofluorocarbons  
 PFCs - perfluorocarbons  
 SF<sub>6</sub> - sulfur hexafluoride  
 CO<sub>2</sub>e - carbon dioxide equivalents based on the following Global Warming Potentials (1/2015):  
                   CO<sub>2</sub> (1), N<sub>2</sub>O (298), CH<sub>4</sub>(25), SF<sub>6</sub> (22,800), HFC (various), PFC (various)

(4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period. These rates include emissions from maintenance, startup, and shutdown.

(5) Emission rate is given for informational purposes only and does not constitute enforceable limit.

---

Good afternoon Ms. Serrano,

Upon evaluation of your Federal Operating Permit renewal application, we have determined that there are a few discrepancies that need to be addressed to complete our review. Please provide a response for the following items by **Tuesday, March 25<sup>th</sup>**.

- **Justification for new case-by-case Deviation Limits** – Your application included two additional deviation limits for existing case-by-case periodic monitoring. Please provide us with the most recent performance test data, manufacturer’s recommendations, engineering calculations, and/or historical data that would justify the following deviation limits (we would like to know how these values of 1200° F and 16.48 lb/hr SO2 were determined):
  - **SULFURUNIT** – “When waste gas is being directed to the incinerator, any monitoring data below 1200° F shall be considered and reported as deviation.”
  - **SULFURUNIT** – “Any monitoring data above 16.48 lb/hr SO2 shall be considered and reported as a deviation.”
- **Major NSR Summary Table** – It appears that the updates in the 03/08/2024 amendment of NSR 16754/PSDTX682M1 have impacted the MAERT information and

possibly the Special Conditions numbers that need to be referenced in the Major NSR Summary Table. Please provide me with an updated Major NSR Summary Table (in word document format) for both the amendment of NSR 16754/PSDTX682M1 and the initial issuance of GHGPSDTX228.

Please let me know if you have any questions about these requests. Thank you!

Sincerely,

**Kyle J. Murray**

**Subject:** Technical Review -- FOP O553/Project 37524, Occidental Permian, Ltd. / Wasson CO2 Removal Plant

Good afternoon Ms. Serrano,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O553 for Occidental Permian, Ltd., Wasson CO2 Removal Plant. This application has been assigned Project No. 37524. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency – please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high-level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

Please review the “SOP Technical Review Fact Sheet” located at [http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\\_V/sop\\_wdp\\_factsheet.pdf](http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf). This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

**Kyle J. Murray**

## TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

January 24, 2025

THE HONORABLE KEVIN SPARKS  
TEXAS SENATE  
PO BOX 12068  
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application  
Project Number: 37524  
Permit Number: O553  
Occidental Permian, Ltd.  
Wasson Co2 Removal Plant  
Denver City, Yoakum County  
Regulated Entity Number: RN100226687  
Customer Reference Number: CN600755086

Dear Senator Sparks:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-102.753333,33.009722&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Kevin Sparks

## Expedite Title V

1) Per Texas Health and Safety Code, Section 382.05155, does the applicant want to expedite the processing of this application?

No

## Certification

I certify that I am the Duly Authorized Representative for this application and that, based on information and belief formed after reasonable inquiry, the statements and information on this form are true, accurate, and complete.

- 1. I am Mario A Guerrero JR, the owner of the STEERS account ER106121.
- 2. I have the authority to sign this data on behalf of the applicant named above.
- 3. I have personally examined the foregoing and am familiar with its content and the content of any attachments, and based upon my personal knowledge and/or inquiry of any individual responsible for information contained herein, that this information is true, accurate, and complete.
- 4. I further certify that I have not violated any term in my TCEQ STEERS participation agreement and that I have no reason to believe that the confidentiality or use of my password has been compromised at any time.
- 5. I understand that use of my password constitutes an electronic signature legally equivalent to my written signature.
- 6. I also understand that the attestations of fact contained herein pertain to the implementation, oversight and enforcement of a state and/or federal environmental program and must be true and complete to the best of my knowledge.
- 7. I am aware that criminal penalties may be imposed for statements or omissions that I know or have reason to believe are untrue or misleading.
- 8. I am knowingly and intentionally signing Title V Existing 553.
- 9. My signature indicates that I am in agreement with the information on this form, and authorize its submittal to the TCEQ.

| Periodic Monitoring Text: Measure and record the combustion temperature in the combustion chamber or immediately downstream of the combustion chamber. The minimum combustion temperature is 1200 degrees F (649 degrees C) when waste gas is being directed to the incinerator. The monitoring instrumentation shall be maintained, calibrated and operated in accordance with manufacturer's specifications or other written procedures. Any monitoring data below the deviation limit shall be considered and reported as a deviation. |

| Indicator: SO <sub>2</sub> Mass Emissions in Pounds per Hour                                                            |                   | Minimum Frequency: four times per hour |
| Averaging Period: hourly                                                                                                |                   |                                        |

**I. Identifying Information**

Periodic Monitoring Text: A continuous emission monitoring system (CEMS) that measures and records the mass emissions rate of sulfur dioxide expressed in pounds per hour in the exhaust stream of the control device. The CEMS shall be operated in accordance with the monitoring requirements of 40 CFR § 60.13 and the Performance Specifications of 40 CFR Part 60, Appendix B. The maximum SO<sub>x</sub> mass emission rate is the applicable or corresponding emission limit. Any monitoring data above the limit from the underlying applicable requirement shall be considered and reported as a deviation.

| <b>D. Subpart L - National Emission Standard for Benzene Emissions from Coke By-Product Recovery Plants</b>                                                                                                                                 |                                                          |
| 1. The application area is located at a coke by-product recovery plant and includes one or more of the affected sources identified in 40 CFR § 61.130(a) - (b).<br><i>If the response to Question VII.D.1 is "No," go to Section VII.E.</i> | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 2. The application area includes equipment in benzene service as determined by 40 CFR § 61.137(b).                                                                                                                                          | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 3. The application area has elected to comply with the provisions of 40 CFR § 61.243-1 and 40 CFR § 61.243-2.                                                                                                                               | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| <b>E. Subpart M - National Emission Standard for Asbestos</b>                                                                                                                                                                               |                                                          |
| <b>Applicability</b>                                                                                                                                                                                                                        |                                                          |
| 1. The application area includes sources, operations, or activities specified in 40 CFR §§ 61.143, 61.144, 61.146, 61.147, 61.148, or 61.155.<br><i>If the response to Question VII.E.1 is "No," go to Section VII.F.</i>                   | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| <b>Roadway Construction</b>                                                                                                                                                                                                                 |                                                          |
| 2. The application area includes roadways constructed or maintained with asbestos tailings or asbestos-containing waste material.                                                                                                           | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| <b>Manufacturing Commercial Asbestos</b>                                                                                                                                                                                                    |                                                          |
| 3. The application area includes a manufacturing operation using commercial asbestos.<br><i>If the response to Question VII.E.3 is "No," go to Question VII.E.4.</i>                                                                        | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| a. Visible emissions are discharged to outside air from the manufacturing operation                                                                                                                                                         | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| b. An alternative emission control and waste treatment method is being used that has received prior U.S. Environmental Protection Agency (EPA) approval.                                                                                    | <input type="checkbox"/> Yes <input type="checkbox"/> No |

| VIII. Title 40 Code of Federal Regulations Part 63 - National Emission Standards for Hazardous Air Pollutants for Source Categories (continued)                                                                                                  |                                                          |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| C. Subpart G - National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater (continued)                   |                                                          |
| Process Wastewater Streams (continued)                                                                                                                                                                                                           |                                                          |
| 16. The application area includes process wastewater streams utilizing the compliance option specified in 40 CFR § 63.110(f)(4)(ii).                                                                                                             | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 17. The application area includes process wastewater streams that are also subject to the provisions of 40 CFR Parts 260 through 272.<br><i>If the response to Question VIII.C.17 is "No," go to Question VIII.C.20.</i>                         | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 18. The application area includes process wastewater streams complying with 40 CFR § 63.110(e)(2)(i).                                                                                                                                            | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 19. The application are includes process wastewater streams complying with 40 CFR § 63.110(e)(2)(ii).                                                                                                                                            | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 20. The application area includes process wastewater streams, located at existing sources, that are designated as Group 1; are required to be treated as Group 1 under 40 CFR § 63.110; or are determined to be Group 1 for Table 9 compounds.   | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 21. The application area includes process wastewater streams, located at existing sources that are Group 2.                                                                                                                                      | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 22. The application area includes process wastewater streams, located at new sources, that are designated as Group 1; required to be treated as Group 1 under 40 CFR § 63.110; or are determined to be Group 1 for Table 8 or Table 9 compounds. | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 23. The application area includes process wastewater streams, located at new sources that are Group 2 for both Table 8 and Table 9 compounds.                                                                                                    | <input type="checkbox"/> Yes <input type="checkbox"/> No |

| <b>C. Subpart G-National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operation, and Wastewater (continued)</b>                                                                                                                                                                                                                                                                                    |                                                                     |
| <b>Drains (continued)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                     |
| 37. The application area includes drains, drain hubs, manholes, lift stations, trenches or pipes that convey water with a total annual average concentration greater than or equal to 1,000 parts per million by weight of compounds listed in 40 CFR Part 63 Subpart G, Table 9, at an annual average flow rate greater than or equal to 10 liters per minute.                                                                                                                                                       | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 38. The application area includes drains, drain hubs, manholes, lift stations, trenches or pipes that are part of a chemical manufacturing process unit that is subject to the new source requirements of 40 CFR § 63.100(l)(1) or (l)(2); and the equipment conveys water with a total annual average concentration greater than or equal to 10 parts per million by weight of compounds listed in 40 CFR Part 63 Subpart G, Table 8, at an average annual flow rate greater than or equal to 0.02 liter per minute. | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| <b>Gas Streams</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                     |
| 39. The application area includes gas streams meeting the characteristics of 40 CFR § 63.107(b) - (h) or the criteria of 40 CFR § 63.113(i) and are transferred to a control device not owned or operated by the applicant.                                                                                                                                                                                                                                                                                           | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 40. The applicant is unable to comply with 40 CFR §§ 63.113 - 63.118 for one or more reasons described in 40 CFR § 63.100(q)(1), (3), or (5).                                                                                                                                                                                                                                                                                                                                                                         | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| <b>D. Subpart N - National Emission Standards for Chromium Emissions From Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks</b>                                                                                                                                                                                                                                                                                                                                                                |                                                                     |
| 1. The application area includes chromium electroplating or chromium anodizing tanks located at hard chromium electroplating, decorative chromium electroplating, and/or chromium anodizing operations.                                                                                                                                                                                                                                                                                                               | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |

| VIII. Title 40 Code of Federal Regulations Part 63 - National Emission Standards for Hazardous Air Pollutants for Source Categories (continued)                                                                                                                                                                 |                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| O. Subpart DD - National Emission Standards for Off-site Waste and Recovery Operations (continued)                                                                                                                                                                                                              |                                                          |
| 11. The application area receives offsite materials with average VOHAP concentration less than 500 ppmw at the point of delivery that are not combined with materials having a VOHAP concentration of 500 ppmw or greater.<br><i>If the response to Question VIII.O.11 is "No," go to Question VIII.O.14.</i>   | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 12. VOHAP concentration is determined by direct measurement.                                                                                                                                                                                                                                                    | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 13. VOHAP concentration is based on knowledge of the off-site material.                                                                                                                                                                                                                                         | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 14. The application area includes an equipment component that is a pump, compressor, and agitator, pressure relief device, sampling connection system, open-ended valve or line, valve, connector or instrumentation system.<br><i>If the response to Question VIII.O.14 is "No," go to Question VIII.O.17.</i> | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 15. An equipment component in the application area contains or contacts off-site material with a HAP concentration greater than or equal to 10% by weight.                                                                                                                                                      | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 16. An equipment component in the application area is intended to operate 300 hours or more during a 12-month period.                                                                                                                                                                                           | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 17. The application area includes containers that manage non-exempt off-site material.                                                                                                                                                                                                                          | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| 18. The application area includes individual drain systems that manage non-exempt off-site materials.                                                                                                                                                                                                           | <input type="checkbox"/> Yes <input type="checkbox"/> No |

| VIII. Title 40 Code of Federal Regulations Part 63 - National Emission Standards for Hazardous Air Pollutants for Source Categories (continued)                                                                                                                                                    |                                                                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------|
| BB. Subpart GGGG - National Emission Standards for Hazardous Air Pollutants for: Solvent Extractions for Vegetable Oil Production.                                                                                                                                                                 |                                                                     |
| 1. The application area includes a vegetable oil production process that: is by itself a major source of HAP emissions or, is collocated within a plant site with other sources that are individually or collectively a major source of HAP emissions.                                             | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| CC. Subpart GGGGG - National Emission Standards for Hazardous Air Pollutants: Site Remediation                                                                                                                                                                                                     |                                                                     |
| 1. The application area includes a facility at which a site remediation is conducted.<br><i>If the answer to Question VIII.CC.1 is "No," go to Section VIII.DD.</i>                                                                                                                                | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| 2. The application area is located at a site that is a major source of HAP.<br><i>If the answer to Question VIII.CC.2 is "No," go to Section VIII.DD.</i>                                                                                                                                          | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 3. All site remediations qualify for one of the exemptions contained in 40 CFR § 63.7881(b)(1) through (6).<br><i>If the answer to Question VIII.CC.3 is "Yes," go to Section VIII.DD.</i>                                                                                                         | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 4. All site remediation activities are complete, and the Administrator has been notified in writing.<br><i>If the answer to Question VIII.CC.4 is "Yes," go to Section VIII.DD.</i>                                                                                                                | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 5. Prior to beginning site remediation activities, it was determined that the total quantity of HAP listed in Table 1 of Subpart GGGGG that will be removed during all site remediations will be less than 1 Mg/yr.<br><i>If the answer to Question VIII.CC.5 is "Yes," go to Section VIII.DD.</i> | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 6. The site remediation will be completed within 30 consecutive calendar days.                                                                                                                                                                                                                     | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 7. No site remediation will exceed 30 consecutive calendar days.<br><i>If the answer to Question VIII.CC.7 is "Yes," go to Section VIII.DD.</i>                                                                                                                                                    | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 8. Site remediation materials subject to 40 CFR Part 63, Subpart GGGGG are transferred from the application area to an off-site facility.                                                                                                                                                          | <input type="checkbox"/> Yes <input type="checkbox"/> No            |
| 9. All site remediation materials subject to 40 CFR Part 63, Subpart GGGGG are transferred from the application area to an off-site facility.<br><i>If the answer to Question VIII.CC.9 is "Yes," go to Section VIII.DD.</i>                                                                       | <input type="checkbox"/> Yes <input type="checkbox"/> No            |

Compliance Certification - Statement for Units in Compliance*</b><br>(Indicate response by entering an "X" in the appropriate column)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                     |
| 1. With the exception of those emission units listed in the Compliance Schedule section of this form (Part 2, below), and based, at minimum, on the compliance method specified in the associated applicable requirements, are all emission units addressed in this application in compliance with all their respective applicable requirements as identified in this application?                                                                                                                                                                                                                                                             | <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO |
| 2. Are there any non-compliance situations addressed in the Compliance Schedule Section of this form (Part 2)?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO |
| 3. If the response to Item B.2, above, is "Yes," indicate the total number of Part 2 attachments included in this submittal. <i>(For reference only)</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                     |
| <p>* For Site Operating Permits (SOPs), the complete application should be consulted for applicable requirements and their corresponding emission units when assessing compliance status. For General Operating Permits (GOPs), the application documentation, particularly Form OP-REQ1 should be consulted as well as the requirements contained in the appropriate General Permits portion of 30 TAC Chapter 122.</p> <p>Compliance should be assessed based, at a minimum, on the required monitoring, testing, record keeping, and/or reporting requirements, as appropriate, associated with the applicable requirement in question.</p> |                                                                     |

**Form OP-CRO1**  
**Certification by Responsible Official**  
**Federal Operating Permit Program**  
**Texas Commission on Environmental Quality**

All initial issuance, revision, renewal, and reopening permit application submittals requiring certification must be addressed using this form. Updates to site operating permit (SOP) and temporary operating permit (TOP) applications, other than public notice verification materials, must be certified prior to authorization of public notice or start of public announcement. Updates to general operating permit (GOP) applications must be certified prior to receiving an authorization to operate under a GOP.

Texas Commission on Environmental Quality

## Public Involvement Plan Form for Permit and Registration Applications

The Public Involvement Plan is intended to provide applicants and the agency with information about how public outreach will be accomplished for certain types of applications in certain geographical areas of the state. It is intended to apply to new activities; major changes at existing plants, facilities, and processes; and to activities which are likely to have significant interest from the public. This preliminary screening is designed to identify applications that will benefit from an initial assessment of the need for enhanced public outreach.

All applicable sections of this form should be completed and submitted with the permit or registration application. For instructions on how to complete this form, see TCEQ-20960-inst.

### Section 1. Preliminary Screening

- ☒ New Permit or Registration Application  
☐ New Activity - modification, registration, amendment, facility, etc. (see instructions)

**If neither of the above boxes are checked, completion of the form is not required and does not need to be submitted.**

### Section 2. Secondary Screening

- ☒ Requires public notice,  
☐ Considered to have significant public interest, **and**  
☐ Located within any of the following geographical locations:

- Austin
- Dallas
- Fort Worth
- Houston
- San Antonio
- West Texas
- Texas Panhandle
- Along the Texas/Mexico Border
- Other geographical locations should be decided on a case-by-case basis

**If all the above boxes are not checked, a Public Involvement Plan is not necessary.  
Stop after Section 2 and submit the form.**

- ☒ Public Involvement Plan not applicable to this application. Provide **brief** explanation.

The application does not have significant public interest, nor is it located within the specified areas.

### Section 3. Application Information

#### Type of Application (check all that apply):

Air    ☐ Initial    ☐ Federal    ☐ Amendment    ☐ Standard Permit    ☐ Title V  
Waste    ☐ Municipal Solid Waste    ☐ Industrial and Hazardous Waste    ☐ Scrap Tire  
          ☐ Radioactive Material Licensing                      ☐ Underground Injection Control

#### Water Quality

☐ Texas Pollutant Discharge Elimination System (TPDES)  
      ☐ Texas Land Application Permit (TLAP)  
      ☐ State Only Concentrated Animal Feeding Operation (CAFO)  
      ☐ Water Treatment Plant Residuals Disposal Permit  
☐ Class B Biosolids Land Application Permit  
☐ Domestic Septage Land Application Registration

#### Water Rights New Permit

☐ New Appropriation of Water  
☐ New or existing reservoir

#### Amendment to an Existing Water Right

☐ Add a New Appropriation of Water  
☐ Add a New or Existing Reservoir  
☐ Major Amendment that could affect other water rights or the environment

### Section 4. Plain Language Summary

Provide a brief description of planned activities.

## Section 5. Community and Demographic Information

Community information can be found using EPA's EJ Screen, U.S. Census Bureau information, or generally available demographic tools.

**Information gathered in this section can assist with the determination of whether alternative language notice is necessary. Please provide the following information.**

(City)

(County)

(Census Tract)

Please indicate which of these three is the level used for gathering the following information.

☐

City

☐

County

☐

Census Tract

(a) Percent of people over 25 years of age who at least graduated from high school

(b) Per capita income for population near the specified location

(c) Percent of minority population and percent of population by race within the specified location

(d) Percent of Linguistically Isolated Households by language within the specified location

(e) Languages commonly spoken in area by percentage

(f) Community and/or Stakeholder Groups

(g) Historic public interest or involvement

## Section 6. Planned Public Outreach Activities

(a) Is this application subject to the public participation requirements of Title 30 Texas Administrative Code (30 TAC) Chapter 39?

☐ Yes ☐ No

(b) If yes, do you intend at this time to provide public outreach other than what is required by rule?

☐ Yes ☐ No

If Yes, please describe.

**If you answered "yes" that this application is subject to 30 TAC Chapter 39, answering the remaining questions in Section 6 is not required.**

(c) Will you provide notice of this application in alternative languages?

☐ Yes ☐ No

**Please refer to Section 5. If more than 5% of the population potentially affected by your application is Limited English Proficient, then you are required to provide notice in the alternative language.**

If yes, how will you provide notice in alternative languages?

- ☐ Publish in alternative language newspaper
- ☐ Posted on Commissioner's Integrated Database Website
- ☐ Mailed by TCEQ's Office of the Chief Clerk
- ☐ Other (specify)

(d) Is there an opportunity for some type of public meeting, including after notice?

☐ Yes ☐ No

(e) If a public meeting is held, will a translator be provided if requested?

☐ Yes ☐ No

(f) Hard copies of the application will be available at the following (check all that apply):

- ☐ TCEQ Regional Office ☐ TCEQ Central Office
- ☐ Public Place (specify)

## Section 7. Voluntary Submittal

For applicants voluntarily providing this Public Involvement Plan, who are not subject to formal public participation requirements.

Will you provide notice of this application, including notice in alternative languages?

☐ Yes ☐ No

What types of notice will be provided?

- ☐ Publish in alternative language newspaper
- ☐ Posted on Commissioner's Integrated Database Website
- ☐ Mailed by TCEQ's Office of the Chief Clerk
- ☐ Other (specify)
