Good morning Mike,

I have been checking periodically to see if the STEERS submission has been made with all updated forms for this facility. As of yesterday, I still do not see that the submission has been made.

If you could reach to either the RO or DAR for this facility, and make sure that the submission has been signed off on that would be great.

Please let me know if you have any questions.

Thanks,

Good afternoon Michael,

During the final review, I noticed one final issue that needs to be addressed. On the OP-PBRSUP Table D Monitoring requirements section several units list that they have “No monitoring requirements”. All PBRs require at least recording keeping as a minimum requirement. Please document the monitoring/recordkeeping/or reporting that is used to demonstrate compliance with these PBRS. Please submit the updated OP-PBRSUP by **June 2, 2025**. Please note that the full OP-PBRSUP must be submitted, not just the updates. Please let me know if you have any questions.

Good morning Mike,

Thank you for the updated documentation. For unit: GRP-CT can you please submit an OP-2 to have these units removed from the permit since they do not have any applicable requirements under CRF 40 Part 63, Subpart Q. These units are only on the permit for this regulation, so these units do not need to be showcase on the renewal permit.

I would also ask if you could please wait to submit the documents to STEERS until we get past the Working Draft Permit stage. Just to make sure that if other documentation is needed then multiple STEERS submissions don't have to be done. Additionally, this will help when it is time to certify the review for this project. If you could please send me the OP-2 by Friday next week that would be great. Please let me know if you have any questions about the OP-2.

Good morning, Ryan,

Below in red are the responses to your questions. The documents will be uploaded into STEERS shortly.

OP-UA2
On Table 2a for unit G1 the Brake HP is listed as 10-250, which is not one of the available codes on the form. In the previous renewal of this permit, the code 100-250 was provided. Please confirm if this is the correct Brake HP code for unit ID G1 and provide an updated OP-UA02. This is the correct Brake HP. OP-UA02 has been updated to reflect 100-250 Brake HP.

OP-PBRSUP
PBR Registration No. 111828 is included on form OP-PBRSUP, Table A with the registration date listed as 06/07/1996. Our records indicate that this registration was issued on 03/20/2006. Please update form PBRSUP, Table A. OP-PBRSUP, Table A has been updated to reflect the registration date of 03/20/2006.

Additionally, Standard Exemption 51 should have its registration no. (111828) listed on Table D instead of the version date. OP-PBRSUP, Table D has been updated to reflect registration no. 111828 for PBR 51 registrations.

Please provide an updated OP-PBRSUP with the updates that I have listed above for this section. Please note that a fully completed OP-PBRSUP needs to be submitted, not just the updates requested above. A complete and updated OP-PBRSUP form has been provided.

Units: GRP-CT
According to the OP-1 submitted with the renewal application, the site is not a major source of HAPs. As a result, Unit Group ID GRP-CT does not have applicable requirements under 40 CFR Part 63, Subpart Q. Please confirm if this is correct. If the site is not a major source of HAPs, 40 CFR Part 63, Subpart Q requirements will not be included in the permit for these units. This is correct.

Greetings Michael,

I have completed my initial review of the renewal application for FOP O84, City of Garland Power & Light and have identified the following items that require additional information and/or documentation:

OP-UA2
On Table 2a for unit G1 the Brake HP is listed as 10-250, which is not one of the available codes on the form. In the previous renewal of this permit, the code 100-250 was provided. Please confirm if this is the correct Brake HP code for unit ID G1 and provide an updated OP-UA02.

OP-PBRSUP
PBR Registration No. 111828 is included on form OP-PBRSUP, Table A with the registration date listed as 06/07/1996. Our records indicate that this registration was issued on 03/20/2006. Please update form PBRSUP, Table A.

Additionally, Standard Exemption 51 should have its registration no. (111828) listed on Table D instead of the version date.

Please provide an updated OP-PBRSUP with the updates that I have listed above for this section. Please note that a fully completed OP-PBRSUP needs to be submitted, not just the updates requested above.

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O84 for City of Garland Power & Light, Spencer Generating Station. This application has been assigned Project No. 37573. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.

c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at Where to Submit FOP Applications and Permit-Related Documents.

Please review the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

February 20, 2025

THE HONORABLE BRENT HAGENBUCH
TEXAS SENATE
PO BOX 12068
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application
Project Number: 37573
Permit Number: O84
City of Garland Power & Light
Spencer Generating Station
Denton, Denton County
Regulated Entity Number: RN100214766
Customer Reference Number: CN600130140

Dear Senator Hagenbuch:

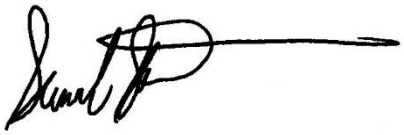
This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. https://gisweb.tceq.texas.gov/LocationMapper/?marker=-97.106666,33.197777&level=13.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

Re: Accepted Federal Operating Permit Renewal Application

This letter is being sent to you for information only and no action is required. If you need further information, please contact me at (512) 239-1250.

Sincerely,



Samuel Short, Deputy Director

Good morning Mike,

I have been checking periodically to see if the STEERS submission has been made with all updated forms for this facility. As of yesterday, I still do not see that the submission has been made.

If you could reach to either the RO or DAR for this facility, and make sure that the submission has been signed off on that would be great.

Please let me know if you have any questions.

Thanks,

Ryan Glaze

Good morning Micheal,

During final review its was noticed that on the OP-PBRSUP that you sent SE 70 hasn't been removed from table B. If you could please provide an updated OP-PBRSUP with SE 70 removed from table B. I apologize for this last-minute request. If you could please have this done before next Wednesday. That would be great.

Good morning Micheal,

Thank you for the updated documentation. I will make the changes requested to remove SE 70 from the permit. At this time, go ahead and submit all updated documentation requested to STEERS to certify the review period for this project. If you can please have this done by **June 10, 2025** that would be great.

Please let me know if you have any other questions about this project.

Morning Ryan,

In responding to your request regarding monitoring for all PBRs, we decided to remove SE 70. This is an outdated SE and no longer applies. A revised OP-PBRSUP and page 89 of the OP-REQ1 are attached. Please let me know if you need additional information.

Good afternoon Michael,

During the final review, I noticed one final issue that needs to be addressed. On the OP-PBRSUP Table D Monitoring requirements section several units list that they have “No monitoring requirements”. All PBRs require at least recording keeping as a minimum requirement. Please document the monitoring/recordkeeping/or reporting that is used to demonstrate compliance with these PBRS. Please submit the updated OP-PBRSUP by **June 2, 2025**. Please note that the full OP-PBRSUP must be submitted, not just the updates. Please let me know if you have any questions.

Good morning Mike,

Thank you for the updated documentation. For unit: GRP-CT can you please submit an OP-2 to have these units removed from the permit since they do not have any applicable requirements under CRF 40 Part 63, Subpart Q. These units are only on the permit for this regulation, so these units do not need to be showcase on the renewal permit.

I would also ask if you could please wait to submit the documents to STEERS until we get past the Working Draft Permit stage. Just to make sure that if other documentation is needed then multiple STEERS submissions don't have to be done. Additionally, this will help when it is time to certify the review for this project. If you could please send me the OP-2 by Friday next week that would be great. Please let me know if you have any questions about the OP-2.

Good morning, Ryan,

Below in red are the responses to your questions. The documents will be uploaded into STEERS shortly.

OP-UA2
On Table 2a for unit G1 the Brake HP is listed as 10-250, which is not one of the available codes on the form. In the previous renewal of this permit, the code 100-250 was provided. Please confirm if this is the correct Brake HP code for unit ID G1 and provide an updated OP-UA02. This is the correct Brake HP. OP-UA02 has been updated to reflect 100-250 Brake HP.

OP-PBRSUP
PBR Registration No. 111828 is included on form OP-PBRSUP, Table A with the registration date listed as 06/07/1996. Our records indicate that this registration was issued on 03/20/2006. Please update form PBRSUP, Table A. OP-PBRSUP, Table A has been updated to reflect the registration date of 03/20/2006.

Additionally, Standard Exemption 51 should have its registration no. (111828) listed on Table D instead of the version date. OP-PBRSUP, Table D has been updated to reflect registration no. 111828 for PBR 51 registrations.

Please provide an updated OP-PBRSUP with the updates that I have listed above for this section. Please note that a fully completed OP-PBRSUP needs to be submitted, not just the updates requested above. A complete and updated OP-PBRSUP form has been provided.

Units: GRP-CT
According to the OP-1 submitted with the renewal application, the site is not a major source of HAPs. As a result, Unit Group ID GRP-CT does not have applicable requirements under 40 CFR Part 63, Subpart Q. Please confirm if this is correct. If the site is not a major source of HAPs, 40 CFR Part 63, Subpart Q requirements will not be included in the permit for these units. This is correct.

Greetings Michael,

I have completed my initial review of the renewal application for FOP O84, City of Garland Power & Light and have identified the following items that require additional information and/or documentation:

OP-UA2
On Table 2a for unit G1 the Brake HP is listed as 10-250, which is not one of the available codes on the form. In the previous renewal of this permit, the code 100-250 was provided. Please confirm if this is the correct Brake HP code for unit ID G1 and provide an updated OP-UA02.

OP-PBRSUP
PBR Registration No. 111828 is included on form OP-PBRSUP, Table A with the registration date listed as 06/07/1996. Our records indicate that this registration was issued on 03/20/2006. Please update form PBRSUP, Table A.

Additionally, Standard Exemption 51 should have its registration no. (111828) listed on Table D instead of the version date.

Please provide an updated OP-PBRSUP with the updates that I have listed above for this section. Please note that a fully completed OP-PBRSUP needs to be submitted, not just the updates requested above.

Units: GRP-CT

According to the OP-1 submitted with the renewal application, the site is not a major source of HAPs. As a result, Unit Group ID GRP-CT does not have applicable requirements under 40 CFR Part 63, Subpart Q. Please confirm if this is correct. Subject: Technical Review -- FOP O84/Project 37573, City of Garland Power & Light/Spencer Generating Station

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O84 for City of Garland Power & Light, Spencer Generating Station. This application has been assigned Project No. 37573. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.

c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at Where to Submit FOP Applications and Permit-Related Documents.

Please review the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

February 20, 2025

THE HONORABLE BRENT HAGENBUCH
TEXAS SENATE
PO BOX 12068
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application
Project Number: 37573
Permit Number: O84
City of Garland Power & Light
Spencer Generating Station
Denton, Denton County
Regulated Entity Number: RN100214766
Customer Reference Number: CN600130140

Dear Senator Hagenbuch:

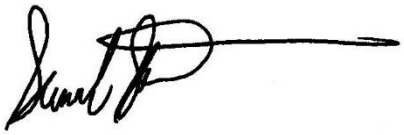
This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. https://gisweb.tceq.texas.gov/LocationMapper/?marker=-97.106666,33.197777&level=13.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

Re: Accepted Federal Operating Permit Renewal Application

This letter is being sent to you for information only and no action is required. If you need further information, please contact me at (512) 239-1250.

Sincerely,



Samuel Short, Deputy Director
