Good morning,

During the supervisor review, we noticed that there were some issues:

- Several PBRs and PBR's registrations were added in Form OP-PBRSUP and added in the permit, please submit an updated Forms OP-2, OP-SUMR, and OP-REQ1 that reflects the added PBRs & registrations in the permit/OP-PBRSUP.

Please submit/upload the final OP-CRO1 through **STEERS**, which includes the date of comment submittal in the documentation dates (We recommend a date range from the date of the submittal of application to the date of the submittal of the final OP-CRO1, so this will cover any updates during the project.)

Please provide the information by **September 12, 2025**

Hello Ulises,

Thank you for the opportunity to review our draft permit. We have included the requested OP-UA02 Table 5c entries as an attachment to this email. We also reviewed the draft permit and it appears that the draft permit is incomplete pending the updates from OP-UA02. You will see our comments on the attached draft permit which will likely be updated once you enter the "AECD" field into TCEQ's Title V database.

Once you have the updates from OP-UA02, we would like to see an updated version of the draft

permit. If all looks good, we can then send the final OP-CRO1 for the items submitted during this draft review.

Please let me know of any questions or additional information you may need.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. Subject: Technical Review -- FOP O2846/Project 37590, United Services Automobile Association/ San Antonio Facility

Good afternoon,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O2846 for United Services Automobile Association/ San Antonio Facility. This application has been assigned Project No. 37590. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

Form OP-CRO1 - Instructions
Certification by Responsible Official
Texas Commission on Environmental Quality

General:

Title 30 Texas Administrative Code § 122.132(e) [30 TAC § 122.132(e)] (relating to “Application and Required Information for Initial Permit Issuance, Reopening, Renewal, or General Operating Permits”) and 30 TAC § 122.165 (relating to “Certification by a Responsible Official”) require that a Responsible Official (RO), or appropriate designee, shall certify all documents submitted to the Texas Commission on Environmental Quality (TCEQ) in support of a federal operating permit (FOP), or that are required by 30 TAC Chapter 122 or by an operating permit condition(s). This Form OP-CRO1 (Certification by Responsible Official) or submittal through Title V STEERS satisfies these certification requirements in a manner consistent with 30 TAC § 122.165.

(Certification by the authorized Designated Representative (DR), or Alternate Designated Representative (ADR), apply to the Acid Rain or CSAPR Program sources only and is executed on OP-CRO1, page 2 [Certification by Designated Representative]. The DR or ADR shall certify application information for sites with one or more units subject to the Acid Rain or CSAPR Programs and shall certify application information and reports as an RO. This Form OP-CRO1, page 2, [Certification by Designated Representative] or submittal through Title V STEERS satisfies these certification requirements in a manner consistent with 30 TAC § 122.165.)

All initial issuance, revision, and renewal FOP applications, as well as all post-issuance submittals requiring certification must be accompanied by Form OP-CRO1. However, while a site operating permit (SOP) or temporary operating permit (TOP) is undergoing technical review, application updates (e.g., administrative changes, responses to a TCEQ permit application deficiency notice, or request for information) do not require a Form OP-CRO1 to be included with each submittal. This certification will be requested at the time of the Working Draft Permit review, and any required certifications must be included with the applicant’s response to the review of the Working Draft Permit. (Refer to the SOP Technical Review Fact Sheet found on the TCEQ website at:

www.tceq.texas.gov/permitting/air/titlev/site/site_experts.html for additional details.)

Likewise, updates to general operating permit (GOP) applications undergoing technical review do not require individual certification with each submittal and need only be certified prior to being granted an authorization to operate under the GOP by TCEQ.

All materials related to public notice certification must also be certified; including the original tear sheet(s), publisher’s affidavit(s), and the “Public Notice Verification Form/Air Permits.” These submittals’ dates should be included on the certification form submitted immediately following the close of the public comment period. (Specific details regarding these submittals and the certification procedure are included in the Public Notice Authorization Package sent to applicants with draft FOPs.)

The dates of each application update submittal being certified may be entered on Form OP-CRO1. (Up to eight submittal dates may be entered on each form.) Alternatively, a single Form OP-CRO1 may be used to certify a range of dates (time period). Note that the time period option may not be used if “Submittal Type” in Section III is “Other.”

If the RO authority is being delegated to a Duly Authorized Representative (DAR), a completed and signed Form OP-DEL entitled “Delegation of Responsible Official” must also be submitted for the DAR certification to be valid. Form OP-DEL need not be included in subsequent submittals unless there is a new appointment or an administrative information change regarding the DAR.

For all submittals through Title V STEERS, the Responsible Official (RO) or Duly Authorized Representative (DAR) will submit and certify the submittal without submitting a separate OP-CRO1 certification form. STEERS is the certification mechanism. Application updates can be submitted and certified through STEERS by the RO/DAR, or updates can be emailed to the assigned permit reviewer by the technical contact/consultant which will require a follow up certification with an OP-CRO1 form through STEERS or via a mailed original hard copy.

If an applicant submits updates through email, an electronic copy of Form OP-CRO1 must accompany the submittal followed by the hard copy original being mailed to the permit reviewer. If an applicant submits updates through the mail, the hard copy original must accompany the submittal being mailed to the permit reviewer. The applicant can choose to certify all updates at the end of the technical review period by mailing in the original hard copy Form OP-CRO1 or submitting the form through STEERS (with the appropriate time period selected). Submitting the form through STEERS means it must be filled out and then uploaded to STEERS. This is the only way for Title V to certify a time period through STEERS.

For an electronic copy followed by the hard copy original, this form must bear the signature of the RO, DAR, DR, or ADR and a signature date for the certification to be valid. The Signature Date, which will be used to validate signature authority of the RO, DAR, DR, or ADR, must be on or after the effective date of the RO, DAR, DR, or ADR certifying to the change. Signature stamps can be accepted in place of an original signature. Electronic signature stamps such as DocuSign will not be accepted. Photocopies and electronic submittals can be submitted, however, must be followed up with the original signed certification form.

This certification does not extend to information which is designated by TCEQ as “information for reference only.” For additional information, please refer to TCEQ guidance entitled “Responsible Official and Certifications” found on the TCEQ website at: www.tceq.texas.gov/permitting/air/titlev/ro_and_certs.html.

Information on where to submit this form can be found on the TCEQ website at:
www.tceq.texas.gov/permitting/air/titlev/submittal.html.

Important: At any time after the initial permit application submittal when a new RO, DR, or ADR is appointed, or there is a change to the administrative information regarding the RO, DR, or ADR (e.g., address, phone number, title), the applicant must submit a completed Form OP-CRO2 “Change of Responsible Official Information,” as an administrative update through STEERS for notification purposes. At any time after the initial permit application submittal that a new DAR is appointed, or there is a change to the administrative information regarding the DAR, the applicant must submit a completed Form OP-DEL through STEERS for notification purposes.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

March 3, 2025

THE HONORABLE JOSE MENENDEZ
TEXAS SENATE
PO BOX 12068
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application
Project Number: 37590
Permit Number: O2846
United Services Automobile Association
San Antonio Facility
San Antonio, Bexar County
Regulated Entity Number: RN101966075
Customer Reference Number: CN600611354

Dear Senator Menendez:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-98.576388,29.533333&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Jose Menendez

1. EXECUTIVE SUMMARY

United Services Automobile Association (USAA) owns and operates its headquarters in San Antonio, Texas (San Antonio Facility), which is located in Bexar County. USAA has been assigned Customer Number (CN) 600611354. The San Antonio Facility has been assigned Texas Commission on Environmental Quality (TCEQ) Air Quality Account Number BG-1306-P and Regulated Entity Number (RN) 101966075.

Bexar County is currently classified as serious nonattainment for the 2015 ozone standard and attainment or unclassified area for all remaining criteria pollutants.¹ The San Antonio Facility is a minor source with respect to federal New Source Review permitting and a major source with respect to the federal operating permits program (Title V) due to potential emissions of Nitrogen Oxides (NO_x) and Carbon Monoxide (CO).

USAA is currently authorized under TCEQ Federal Operating Permit (FOP) No. 02846 issued on November 4, 2020 which has a renewal date of June 4, 2025. As specified in Title 30 Texas Administrative Code Section 122.241, Title V permits are required to be renewed every five (5) years. State and Federal regulations also require permit holders to submit timely and complete permit applications between six (6) and eighteen (18) months prior to the expiration date of the permit. This permit expires on November 3, 2025; thus, this permit renewal application is being submitted in accordance with 30 TAC Chapter 122.241 prior to June 4, 2025. With this permit renewal application, USAA is requesting that Permit No. 02846 be reissued to include all equipment and operations that are currently permitted under FOP No. 02846 except as noted in section 3 of this application.

Section 2 contains a summary of the permitted operations associated with this renewal application. Section 3 contains a summary of the requested changes associated with this application. Section 4 of this application contains TCEQ General and Administrative Forms including the Site Information Summary Form OP-1, Permit Renewal Form OP-2, Application Compliance Plan and Schedule Form OP-ACPS, Responsible Official Certification Form OP-CRO1, and Individual Unit Summary Form OP-SUMR. Section 5 of this application contains TCEQ Potentially Applicable Requirement Forms including the Area-Wide Applicability Determinations and General Information Form OP-REQ1, Negative Applicability Requirement Determinations Form OP-REQ2, and Permit-by-Rule Supplemental Form OP-PBRSUP. An area map and plot plan of the San Antonio Facility are provided in Appendices A and B, respectively.

2. PROCESS DESCRIPTION

USAA is a nationwide provider of insurance and banking resources. The San Antonio Facility is the headquarters for all USAA customer operations. The site also provides support to additional USAA facilities across the United States and abroad.

Operations at the San Antonio Facility include the storage of essential information on computer storage devices related to insurance data, critical banking operations, and the maintenance of disaster preparedness workstations among other business activities at the headquarters. Emergency generators, comfort boilers, water heaters, and diesel storage tanks are used in support of these essential operations. The San Antonio Facility operates continuously throughout the year (i.e., 8,760 hours).

Additional equipment operated at the site, but considered off-permit sources include a small paint booth, small heaters, and cooling water units.

3. REQUESTED CHANGES

As stated in Section 1, USAA wishes to renew the FOP O2846 with no major revisions. GRPBOIL and GRPHEAT have been removed from the permit. GRP-BOIL2 has been added to the permit with no applicable requirements.
