TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

March 25, 2025

THE HONORABLE KEVIN SPARKS
TEXAS SENATE
PO BOX 12068
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application
Project Number: 37650
Permit Number: O3051
Occidental Permian, Ltd.
Denver Unit CO2 Recovery Plant
Denver City, Yoakum County
Regulated Entity Number: RN102413861
Customer Reference Number: CN600755086

Dear Senator Sparks:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-102.814166,32.998055&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Kevin Sparks

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

March 25, 2025

THE HONORABLE KEVIN SPARKS
TEXAS SENATE
PO BOX 12068
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application

Permit Number: O3051
Occidental Permian, Ltd.
Denver Unit CO2 Recovery Plant
Denver City, Yoakum County
Regulated Entity Number: RN102413861
Customer Reference Number: CN600755086

Dear Senator Sparks:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-102.814166,32.998055&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Kevin Sparks

Good afternoon,

I have updated the compliance schedule and removed the second line for PBR 106.264. Both should no longer be on the Working Draft Permit. If there are no other comments, I will end the working draft permit review period and start with the next phase of the review process.

Please let me know if you have any questions about this project.

Thanks,

Good Afternoon,

We have two remaining comments on the draft permit, and the associated form updates are attached.

1. The compliance schedules can be removed from the draft permit, per the attached Form OP-ACPS.
2. The second line item for PBR 106.264, Version No./Date 11/01/2001 can be removed. Form OP-REQ1 Page 89 is attached to reflect the correct list of PBRs and version dates.

Good morning,

I have completed initial review for Occidental Permian SOP-Renewal for Permit No. O3051 and have identified the following items that require additional information and/or documentation:

Additionally, I have attached the Working Draft Permit (WDP) for this SOP-Renewal. Please review the WDP and determine if the contents are correct. If any changes or modifications need to be made, please let me know with the changes needed. If no changes need to be made, please let me know so I can continue with the next phase of the review process.

OP-REQ1

For Section VI Subsection C. Question 1 the response provided was no. Based on the instructions for that question the next question that needs to be answer is Section VI, Subsection E. Question 1. Section VI Subsection D. Question 1 doesn't need to be answered. Please provide an updated OP-REQ1 with the removal of the answer to Section VI, Subsection D. Question 1.

OP-PBRSUP

For table D, unit H-1BB, the PBR numbers need to be listed in the PBR No. column . The registration number 145323 needs to be put in the Version No./Date or Registration No. column.

Please provide an updated OP-PBRSUP with the requested changes above.

On a side note: looking at the previous issuance of this permit, I noticed there are several Standard Exemptions and Permits by Rule that were approved that were not documented on the OP-PBRSUP and OP-REQ1 page 89 for this renewal. I just wanted to confirm that these SE and PBRs are no longer active and its correct to remove them from the permit. I have them listed below as follows.

Standard Exemptions 8, 51, 66, 5 and Permits by Rule 106.352 and 106.263.

If these SE and PBRs are no longer active at the facility then, no action needs to take place on your part.

If you could please provide the updated OP-REQ1 and OP-PBRSUP to me by **June 3, 2025**.

If you could please provide a response if any changes to the WDP need to be made by **June 10, 2025** that would be great.

Please let me know if you have any questions about the requested documentation or the contents of the WDP.

Thanks,

Ryan Glaze

WARNING - This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.

Greetings Femi

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O3051 for Occidental Permian Ltd., Denver Unit CO2 Recovery Plant. This application has been assigned Project No. 37650. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table.
The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Good afternoon,

I have updated the compliance schedule and removed the second line for PBR 106.264. Both should no longer be on the Working Draft Permit. If there are no other comments, I will end the working draft permit review period and start with the next phase of the review process.

Please let me know if you have any questions about this project.

Good Afternoon,

We have two remaining comments on the draft permit, and the associated form updates are attached.

1. The compliance schedules can be removed from the draft permit, per the attached Form OP-ACPS.
2. The second line item for PBR 106.264, Version No./Date 11/01/2001 can be removed. Form OP-REQ1 Page 89 is attached to reflect the correct list of PBRs and version dates.

Subject: RE: Technical Review -- FOP O3051/Project 37650, Occidental Permian Ltd., Denver Unit CO2 Recovery Plant

Good morning,

I have completed initial review for Occidental Permian SOP-Renewal for Permit No. O3051 and have identified the following items that require additional information and/or documentation:

Additionally, I have attached the Working Draft Permit (WDP) for this SOP-Renewal. Please review the WDP and determine if the contents are correct. If any changes or modifications need to be made, please let me know with the changes needed. If no changes need to be made, please let me know so I can continue with the next phase of the review process.

OP-REQ1

For Section VI Subsection C. Question 1 the response provided was no. Based on the instructions for that question the next question that needs to be answer is Section VI, Subsection E. Question 1. Section VI Subsection D. Question 1 doesn't need to be answered. Please provide an updated OP-REQ1 with the removal of the answer to Section VI, Subsection D. Question 1.

OP-PBRSUP

For table D, unit H-1BB, the PBR numbers need to be listed in the PBR No. column . The registration number 145323 needs to be put in the Version No./Date or Registration No. column.

Please provide an updated OP-PBRSUP with the requested changes above.

On a side note: looking at the previous issuance of this permit, I noticed there are several Standard Exemptions and Permits by Rule that were approved that were not documented on the OP-PBRSUP and OP-REQ1 page 89 for this renewal. I just wanted to confirm that these SE and PBRs are no longer active and its correct to remove them from the permit. I have them listed below as follows.

Standard Exemptions 8, 51, 66, 5 and Permits by Rule 106.352 and 106.263.

If these SE and PBRs are no longer active at the facility then, no action needs to take place on your part.

If you could please provide the updated OP-REQ1 and OP-PBRSUP to me by **June 3, 2025**.

If you could please provide a response if any changes to the WDP need to be made by **June 10, 2025** that would be great.

Please let me know if you have any questions about the requested documentation or the contents of the WDP.

Thanks,

Ryan Glaze

Greetings Femi

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O3051 for Occidental Permian Ltd., Denver Unit CO2 Recovery Plant. This application has been assigned Project No. 37650. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table.
The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.
