Good morning Carolyn,

I have not mailed the original OP-CRO1 (signed) to TCEQ. I do have it in my office but I am working from home today and will mail it to you tomorrow.

Thanks
Ash

Hi Ash,

Just to provide you an update, this project will be going through out internal QA/QC and management review over the next week or so. I do not anticipate any additional issues, but I will let you know if anything comes up. We will be able to send out the public notice package after that review.

The one question I had for you was regarding the OP-CRO1. The scan of the signed form that you attached below looks fine, and it will allow us to proceed with the project. Did you send me the original in the mail afterward? I don't think I saw it but I could have missed it. If not, could you please mail me that? Or, if you do not have the original, please upload the scanned copy in STEERS and have the RO or DAR submit it. (In order for certifications to meet EPA's requirements, an electronic OP-CRO1 needs to either be submitted in STEERS, or if it is emailed, then it has to be followed up with the original in the regular mail.)

Thanks!

Attachments: Revised WDP - O2391 - Project 37704.docx

Good evening,

I have reviewed all your responses and have updated the permit. Attached is a revised WDP. Here are the changes that have been made:

- 1) Updated Special Term and Condition 9 to refer to 8/12/2025 PBR Supplemental Tables.
- 2) Added Chapter 115, Vent Gas Control requirements for CO2VENTDIS and CO2VENTSUC.
- 3) Removed 106.261/11/01/2003 from authorizations for AUXBLR.
- 4) Added PBR registration number 144168 and its PBRs to the authorizations for FUGITIVES.

There are two items needed at this point:

- 1) On the 8/12/2025 OP-PBRSUP form, Table A, the V-601 row has a typo where it says 102.261 instead of 106.261. Please correct that, re-date all four tables and submit again as a set.
- 2) The submittals from 6/06/2025 and 6/09/2025 need to be certified. You can do that one of the following ways:
 - a. If you already plan to provide the corrected OP-PBRSUP/any final comments in STEERS, then you could upload the items from June with that submittal. Those older items would be the email body from 6/06/2025 and the updated forms from 6/09/2025. **Or,**
 - b. If you will be emailing the corrected OP-PBRSUP/any final comments, then you could just upload an OP-CRO1 form in STEERS and use the Time Period option on that form. The Time Period would use a start date of 6/06/2025 and an end date of your final response.

Please provide those items by **Friday, September 26, 2025**. Feel free to contact me with any questions.

Sincerely,

Air Liquide Large Industries U.S. LP
Title V Permit No. O2391
Response to TCEQ-Identified Unresolved Items

Unresolved Items:

- 1) We need to streamline permit shield sections to focus on rules that are truly potentially applicable. This reduces review time for permit reviewers/applicants and makes the permit more readable. I have identified some of the existing permit shields for FUGITIVES that I do not believe are necessary. I have removed them – please confirm this is acceptable. This will not add any requirements to the permit.
 - a. 30 TAC Chapter 115, Pet Ref B Counties – This shield is for 30 TAC Chapter 115, Subchapter D, Division 2 and states that this site is not located in an affected county. Since there is no operational change that a site in a non-affected county could make for that rule to become applicable, this type of shield is not needed and we discourage its inclusion. (Also, the permit will still contain the shield for the other division (Division 3) that *does* pertain to the site’s county.) I’d like to remove the shield for Division 2.
ALLI U.S. LP Response: ALLI U.S. LP agrees with the proposal to remove the permit shield for 30 TAC Chapter 115, Subchapter D, Division 2.
 - b. I’d like to remove the shields for petroleum refinery rules (NSPS GGG and MACT CC), NSPS KKK (natural gas processing plant), and MACT HH (oil and natural gas production). These site types are far enough apart from industrial gas manufacturing that there is little concern anyone would think these rules could apply.
ALLI U.S. LP Response: ALLI U.S. LP agrees with the proposal to remove the permit shield for 40 CFR Part 60, Subparts GGG and KKK and 40 CFR Part 63, Subparts CC and HH.
- 2) There are existing permit shields that are not valid because they are based on partial exemptions rather than complete negative applicability. This means that there are still some applicable requirements associated with those exemptions. Below is an explanation.
 - a. 30 TAC Chapter 115, Vent Gas Controls, for CO2VENTDIS and CO2VENTSUC: The exemption in 115.127(a)(1)(A) still has associated testing/recordkeeping requirements. I have removed the shields and added requirements. Please fill out Tables 2a-2c of UA-15, as applicable, for these two vents so I can confirm the citations.
ALLI U.S. LP Response: ALLI U.S. LP concurs with the requirement to remove the permit shield for CO2VENTDIS and CO2VENTSUC for 30 TAC Chapter 115, Subchapter B, Division 1, since there are relevant recordkeeping requirements at 30 TAC §115.126(3)-(4) to confirm the applicability of the exemption at 30 TAC §115.127(a)(2)(A). As requested, Tables 2a through 2c of OP-UA15 for these two vents are included with this response.
 - b. 30 TAC Chapter 115, Vent Gas Controls, for FLARE: First, this shield is actually for 30 TAC Chapter 115, HRVOC Vent Gas. A typo was made in entering the rule name in a previous project. Second, the shield is based on 115.727(a). That exempts the site from control requirements, but 115.726(e)(1) requires recordkeeping to document that the specified characteristics are met. That citation is addressed as a sitewide requirement in the Special Terms and Conditions. Therefore, this shield cannot be granted. There are no additional forms to fill out, but I have removed the shield.
ALLI U.S. LP Response: ALLI U.S. LP concurs with the requirement to remove the permit shield for FLARE for 30 TAC Chapter 115, Subchapter H, Division 1, since there are relevant recordkeeping requirements at 30 TAC §115.726(e)(1) and §115.726(e)(3)(B) to confirm the applicability of the exemptions at 30 TAC §115.727(a) and §115.727(d).

- c. 30 TAC Chapter 115, HRVOC Vent Gas, for CO2VENTDIS and CO2VENTSUC: Similarly, these shields are also based on 115.727(a), and so since there is the recordkeeping to be conducted, I have removed these shields.

ALLI U.S. LP Response: ALLI U.S. LP concurs with the requirement to remove the permit shield for CO2VENTDIS and CO2VENTSUC for 30 TAC Chapter 115, Subchapter H, Division 1, since there are relevant recordkeeping requirements at §115.726(e)(3)(A) to confirm the applicability of the exemption at 30 TAC §115.727(c)(1).

3) Additional corrections for Form OP-PBRSUP:

- a. Table D includes PBR registration 144168 (106.261 & 106.262) for FUGITIVES, but there is no matching row on Table A. Please correct whichever table is in error, re-date all four tables, and submit them again as a set. Also, if this registration *does* authorize FUGITIVES, please add it to the OP-SUMR.

ALLI U.S. LP Response: PBR Registration No. 144168 authorized small quantities (<0.01 lb/hr, <0.01 ton/yr) of incremental ammonia and carbon monoxide emissions to existing emissions unit FUGITIVES. Additionally, this PBR authorized a new process vent, V-601, which has no other applicable requirements except for new source review authorization via PBRs 106.261/106.262. ALLI U.S. LP is including with this response an updated OP-PBRSUP and OP-SUMR to incorporate these items into the permit.

- b. Effective permit included 106.261/11/01/2003 for AUXBLR. Is this still needed? If so, please add it to the appropriate tables of the OP-PBRSUP and to the OP-SUMR.

ALLI U.S. LP Response: PBR 106.261/11/01/2003 for AUXBLR is not needed. ALLI U.S. LP requests that this NSR reference be removed for this emissions unit. The remaining NSR authorizations for AUXBLR should be retained as follows: 32274, PSDTX995M1, N042. No changes to OP-SUMR are required.

- 4) Existing periodic monitoring for AUXBLR for 30 TAC Chapter 111, Visible Emissions used option PM-P-001. PM-P-001 refers to compliance with a particulate matter standard in the PM text so it is not appropriate for this rule, which only has an opacity limit. We created additional options that are not yet in the guidance to address this issue. Option PM-P-033 is identical to PM-P-001, except the particulate matter reference is removed. I have updated the monitoring to that option. When you respond to the WDP, please confirm this is acceptable by submitting PM-P-033 on the OP-MON for AUXBLR.

ALLI U.S. LP Response: ALLI U.S. LP agrees with the slight change proposed for periodic monitoring for AUXBLR to refer only to "Opacity" and not to "PM (Opacity)."

Hi Ash,

I have conducted a technical review of the renewal application for Air Liquide Large Industries, U.S. LP, Freeport HyCO Plant. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **Monday, August 18, 2025**. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP. In addition, **please address the items on the attached Additional Unresolved Items list with that response.**

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Unresolved Items:

- 1) We need to streamline permit shield sections to focus on rules that are truly potentially applicable. This reduces review time for permit reviewers/applicants and makes the permit more readable. I have identified some of the existing permit shields for FUGITIVES that I do not believe are necessary. I have removed them - please confirm this is acceptable.  - a. 30 TAC Chapter 115, Pet Ref B Counties - This shield is for 30 TAC Chapter 115, Subchapter D, Division 2 and states that this site is not located in an affected county. Since there is no operational change that a site in a non-affected county could make for that rule to become applicable, this type of shield is not needed and we discourage its inclusion. (Also, the permit will still contain the shield for the other division (Division 3) that *does* pertain to the site's county.) I'd like to remove the shield for Division 2.
 - b. I'd like to remove the shields for petroleum refinery rules (NSPS GGG and MACT CC), NSPS KKK (natural gas processing plant), and MACT HH (oil and natural gas production). These site types are far enough apart from industrial gas manufacturing that there is little concern anyone would think these rules could apply.
- 2) There are existing permit shields that are not valid because they are based on partial exemptions rather than complete negative applicability. This means that there are still some applicable requirements associated with those exemptions. Below is an explanation.
 - a. 30 TAC Chapter 115, Vent Gas Controls, for CO2VENTDIS and CO2VENTSUC: The exemption in 115.127(a)(1)(A) still has associated testing/recordkeeping requirements. I have removed the shields and added requirements. Please fill out Tables 2a-2c of UA-15, as applicable, for these two vents so I can confirm the citations.
 - b. 30 TAC Chapter 115, Vent Gas Controls, for FLARE: First, this shield is actually for 30 TAC Chapter 115, HRVOC Vent Gas. A typo was made in entering the rule name in a previous project. Second, the shield is based on 115.727(a). That exempts the site from control requirements, but 115.726(e)(1) requires recordkeeping to document that the specified characteristics are met. That citation is addressed as a sitewide requirement in the Special Terms and Conditions. Therefore, this shield cannot be granted. There are no additional forms to fill out, but I have removed the shield.
 - c. 30 TAC Chapter 115, HRVOC Vent Gas, for CO2VENTDIS and CO2VENTSUC: Similarly, these shields are also based on 115.727(a), and so since there is the recordkeeping to be conducted, I have removed these shields.
- 3) Additional corrections for Form OP-PBRSUP:
 - a. Table D includes PBR registration 144168 (106.261 & 106.262) for FUGITIVES, but there is no matching row on Table A. Please correct whichever table is in error, re-date all four tables, and submit them again as a set. Also, if this registration *does* authorize FUGITIVES, please add it to the OP-SUMR.
 - b. Effective permit included 106.261/11/01/2003 for AUXBLR. Is this still needed? If so, please add it to the appropriate tables of the OP-PBRSUP and to the OP-SUMR.
- 4) Existing periodic monitoring for AUXBLR for 30 TAC Chapter 111, Visible Emissions used option PM-P-001. PM-P-001 refers to compliance with a particulate matter standard in the PM text so it is not appropriate for this rule, which only has an opacity limit. We created additional options that are not yet in the guidance to address this issue. Option PM-P-033 is identical to PM-P-001, except the particulate matter reference is removed. I have updated the monitoring to that option. When you respond to the WDP, please confirm this is acceptable by submitting PM-P-033 on the OP-MON for AUXBLR.

Hi Ash,

I have reviewed the renewal application and the existing data for the units in this permit. There are a few updates needed before I send you the working draft permit. Please address the items on the attached Unresolved Items list by **Tuesday, June 10, 2025**.

Unresolved Items:

ALLI U.S. LP Response: *Specific responses to each unresolved item are included below in red font, and updates to previously submitted forms are noted in redline/strikeout format on those updated forms. Any new forms (e.g. OP-SUMR, OP-UA6) are included in their entirety. Please advise if there are additional updates required, or if ALLI U.S. LP should submit a (final) OP-CRO1 now to address these changes.*

1) Form OP-REQ1: Please submit corrected pages to address the following items.

- a. Question I.C.2 was answered Yes. However, this question is asking about vents that have additional monitoring (PM or CAM) for 30 TAC 111.151 (Emission Limits for Nonagricultural Processes). The permit area does not currently have vents with PM or CAM for 30 TAC 111.151. Please correct this to No. Or, if you believe PM or CAM is needed for 111.151, please list those vents on the OP-SUMR, Table 15 of OP-UA15, and the OP-MON. You can review the criteria that would trigger PM or CAM in the OP-REQ1 instructions for this question as well as the beginning of the UA form instructions for Table 15 of OP-UA15.

ALLI U.S. LP Response: *Question I.C.2 has been updated to a "No" response.*

- b. Question I.D.1 was answered Yes. However, typically we do not see a site that is subject to both 111.151 (Emission Limits on Nonagricultural Processes) and 111.171 (Emission Limits on Agricultural Processes). Also, previously this question was answered No, and based on the type of site I would not expect 111.171 to apply. Please correct this to No, or provide an explanation.

ALLI U.S. LP Response: *Question I.D.1 has been updated to a "No" response.*

- c. Questions III.N.3-4 were both answered Yes. Technically, if that is the case, then III.N.5-7 should be left blank since everything is exempted under 115.727(a). In other words, the fact that streams also meet the conditions of additional situations addressed by III.N.5-7 doesn't matter and is duplicative. However, if you prefer to keep the requirements for all applicable situations listed (as in your effective permit), that is fine, as long as you are complying with all of the listed citations for each situation. Please either remove the answers from III.N.5-7 or confirm you'd like to keep everything as is.

ALLI U.S. LP Response: *Questions III.N.5-7 have been updated to blanks/no response.*

2) Form OP-SUMR/OP-PBRSUP:

- a. Since this is the first time we will be adding the PBR registration numbers to the permit, this information should be included on Form OP-SUMR. (You were correct to fill out the OP-PBRSUP, but the OP-SUMR will ask for the information in the format that we need to ensure everything is correct in the permit.) Therefore, please list units FUGITIVES, FLARE, and SMR on the OP-SUMR with all their preconstruction authorizations. The form instructions provide the form to use for the PBRs, version dates, and registration numbers. You do not need to list units COANALYZE or V-601 on the OP-SUMR because these units have no other data – these will only appear on the OP-PBRSUP.

ALLI U.S. LP Response: *New Form OP-SUMR has been provided as requested. Additionally, OP-2 has been updated to reflect these minor revisions – the addition of PBR registration numbers to the NSR authorizations for each PBR-affected emission unit listed on Form OP-PBRSUP – so that appropriate links to OP-SUMR and OP-PBRSUP are established.*

- b. There is one typo on Form OP-PBRSUP. On Table A, the PBR registration date for the FLARE row was listed as 06/04/2016. This should be 06/07/2016 like the two rows above it. Please correct this, re-date all four tables, and submit them again as a set.

ALLI U.S. LP Response: *Form OP-PBRSUP has been updated as requested.*

- 3) OP-UA6: Since the last renewal, we have updated/added questions on this form for NSPS Db due to the incorporation of rule amendments into our rule analysis. Please review the latest form instructions from our website and submit Tables 3a-3e for unit AUXBLR.

ALLI U.S. LP Response: *New Form OP-UA6 has been provided as requested, and it includes all relevant tables (3a-3e, 5a-5c), for completeness.*

COANALYZE	106.261	140396	Assume maximum design basis for volume and speciation of post-sample venting and frequency of venting (90 seconds/sample * 8,760 hr/yr, as represented in PBR registration). If sample frequency increases to a period shorter than every 90 seconds, update PBR registration representations and compliance calculations.
FUGITIVES	106.261	140396	Because CO and ammonia are not well detected by Method 21 instrument monitoring, use as-observed AVO, SOCMI without ethylene factors, and 0% control credit to estimate emissions and demonstrate compliance for the few components added with this PBR.
FLARE	106.261	140396	Flow and CO content in flared gas stream is confirmed using the permit-required flare gas flow meter and composition analyzer/calorimeter. [See Permit No. 32274/PSDTX995M1/N042, Special Conditions (SCs) 10.D. and 22.D.] Other pollutants emitted at the flare are unaffected by this PBR registration.
SMR	106.261 106.262	140710	Updated actual SMR heat input and resulting emissions are monitored and recorded consistent with Permit No. 32274/PSDTX995M1/N042, Special Conditions (SCs) 7, 8, 17, 18, 19, 20, 21, 22.A., and 22.C.

FUGITIVES	106.261 106.262	144168	Because CO and ammonia are not well detected by Method 21 instrument monitoring, use as-observed AVO, SOCMI without ethylene factors, and 0% control credit to estimate emissions and demonstrate compliance for the few components added with this PBR.

Subject: Re: Technical Review -- FOP O2391/Project 37704, Air Liquide Large Industries, U.S. LP/Freeport HyCO Plant

Good morning Ms. Carolyn,

Unresolved Items:

- 1) Form OP-REQ1: Please submit corrected pages to address the following items.
 - a. Question I.C.2 was answered Yes. However, this question is asking about vents that have additional monitoring (PM or CAM) for 30 TAC 111.151 (Emission Limits for Nonagricultural Processes). The permit area does not currently have vents with PM or CAM for 30 TAC 111.151. Please correct this to No. Or, if you believe PM or CAM is needed for 111.151, please list those vents on the OP-SUMR, Table 15 of OP-UA15, and the OP-MON. You can review the criteria that would trigger PM or CAM in the OP-REQ1 instructions for this question as well as the beginning of the UA form instructions for Table 15 of OP-UA15.
 - b. Question I.D.1 was answered Yes. However, typically we do not see a site that is subject to both 111.151 (Emission Limits on Nonagricultural Processes) and 111.171 (Emission Limits on Agricultural Processes). Also, previously this question was answered No, and based on the type of site I would not expect 111.171 to apply. Please correct this to No, or provide an explanation.
 - c. Questions III.N.3-4 were both answered Yes. Technically, if that is the case, then III.N.5-7 should be left blank since everything is exempted under 115.727(a). In other words, the fact that streams also meet the conditions of additional situations addressed by III.N.5-7 doesn't matter and is duplicative. However, if you prefer to keep the requirements for all applicable situations listed (as in your effective permit), that is fine, as long as you are complying with all of the listed citations for each situation. Please either remove the answers from III.N.5-7 or confirm you'd like to keep everything as is.
- 2) Form OP-SUMR/OP-PBRSUP:
 - a. Since this is the first time we will be adding the PBR registration numbers to the permit, this information should be included on Form OP-SUMR. (You were correct to fill out the OP-PBRSUP, but the OP-SUMR will ask for the information in the format that we need to ensure everything is correct in the permit.) Therefore, please list units FUGITIVES, FLARE, and SMR on the OP-SUMR with all their preconstruction authorizations. The form instructions provide the form to use for the PBRs, version dates, and registration numbers. You do not need to list units COANALYZE or V-601 on the OP-SUMR because these units have no other data – these will only appear on the OP-PBRSUP.
 - b. There is one typo on Form OP-PBRSUP. On Table A, the PBR registration date for the FLARE row was listed as 06/04/2016. This should be 06/07/2016 like the two rows above it. Please correct this, re-date all four tables, and submit them again as a set.
- 3) OP-UA6: Since the last renewal, we have updated/added questions on this form for NSPS Db due to the incorporation of rule amendments into our rule analysis. Please review the latest form instructions from our website and submit Tables 3a-3e for unit AUXBLR.

Good evening,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O2391 for Air Liquide Large Industries, U.S. LP, Freeport HyCO Plant. This application has been assigned Project No. 37704. Please address all correspondence pertaining to this permit application, including any updates, to me at the address in my email signature, and use both the Permit and Project reference numbers above to facilitate tracking. I have begun technical review and will inform you if I have further questions or need any updated forms.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.

d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1. This form will be requested at a later date.

If you choose to submit your application updates through STEERS, please notify me when these updates have been submitted.

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Dear Senator Huffman:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.385277,28.981111&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

To the Agency:

On behalf of Air Liquide Large Industries U.S. LP (ALLI U.S. LP), SEE Solutions, LLC (SEE) is pleased to attach the referenced Title V Permit Renewal Application. This permit's expiration date is September 11, 2025; therefore, this submittal represents a timely application within the six to eighteen (18) month period prior to permit expiration.

There are no revisions associated with this renewal application; the site has made no changes since the last permit issuance on September 11, 2020. However, while the Duly Authorized Representative (DAR) is unchanged, there is a new Responsible Official (RO) for this permit. Therefore, this renewal application includes the appropriate form (OP-CRO2) to affect the change of the RO. Because this application is being submitted via the State of Texas Environmental Electronic Reporting System (STEERS), a separate Certification by Responsible Official form (OP-CRO1) is not required nor included.

Finally, since the last issuance of Title V Permit No. 02391, the Texas Commission on Environmental Quality (TCEQ) has introduced a new form related to Permit by Rule (PBR) monitoring and compliance demonstrations, OP-PBRSUP. Because this site uses several PBRs, ALLI U.S. LP is including this new form with this renewal application, for completeness.

Based on the above summary, included with this renewal application are the following forms:

- OP-1 – Site Information Summary
- OP-2 – Application for Permit Revision/Renewal
- OP-REQ1 – Application Area-Wide Applicability Determinations and General Information

- OP-PBRSUP – Permits by Rule Supplemental Table
- OP-CRO2 – Change of Responsible Official
- OP-ACPS – Application Compliance Plan and Schedule

Since there are no changes to the site information, unit attributes, monitoring, or applicable requirements and no permit shield changes are being requested, ALLI U.S. LP is not submitting any of the following forms: CORE Data, Unit Attribute (OP-UA), Negative Applicable Requirement (OP-REQ2), Applicable Requirement (OP-REQ3), or Monitoring (OP-MON). Likewise, there have been no changes to the underlying new source review (NSR) authorizations since the last Title V permit issuance. Therefore, there are no changes to the existing Major NSR Summary Table nor NSR Permit No. 32274/PSDTX995M1/N042 dated August 9, 2017, which already is included in the permit, and to avoid confusion/duplication, neither a copy of the unchanged Major NSR Summary Table nor the unchanged NSR permit are included with this application. However, if updated versions of any these forms and tables require re-submittal of existing information to match current Unit Attribute or other codes, or if you require a duplicate copy of the major NSR permit, ALLI U.S. LP will submit such updates if requested by the TCEQ permit reviewer.

If you have questions regarding the application, please contact Mr. Aswath Kalappa at ALLI U.S. LP via phone at (832) 236-0523 or Aswath.Kalappa@AirLiquide.com.

Sincerely,

SEE Solutions, LLC

Unit ID No.	PBR No.	Version No./Date Or Registration No.	Monitoring Requirement
COANALYZE	106.261	140396	Assume maximum design basis for volume and speciation of post-sample venting and frequency of venting (90 seconds/sample * 8,760 hr/yr, as represented in PBR registration). If sample frequency increases to a period shorter than every 90 seconds, update PBR registration representations and compliance calculations.
FUGITIVES	106.261	140396	Because CO and ammonia are not well detected by Method 21 instrument monitoring, use as-observed AVO, SOCMI without ethylene factors, and 0% control credit to estimate emissions and demonstrate compliance for the few components added with this PBR.
FLARE	106.261	140396	Flow and CO content in flared gas stream is confirmed using the permit-required flare gas flow meter and composition analyzer/calorimeter. [See Permit No. 32274/PSDTX995M1/N042, Special Conditions (SCs) 10.D. and 22.D.] Other pollutants emitted at the flare are unaffected by this PBR registration.
SMR	106.261 106.262	140710	Updated actual SMR heat input and resulting emissions are monitored and recorded consistent with Permit No. 32274/PSDTX995M1/N042, Special Conditions (SCs) 7, 8, 17, 18, 19, 20, 21, 22.A., and 22.C.
V-601	106.261 106.262	144168	Vent flow data as recorded by distributed process control system (DCS) tags and speciation estimated by process simulation analyses used to estimate and record the small incremental CO and ammonia emissions associated with this PBR registration.
FUGITIVES	106.261 106.262	144168	Because CO and ammonia are not well detected by Method 21 instrument monitoring, use as-observed AVO, SOCMI without ethylene factors, and 0% control credit to estimate emissions and demonstrate compliance for the few components added with this PBR.
