## TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

March 28, 2025

THE HONORABLE LOIS KOLKHORST  
TEXAS SENATE  
PO BOX 12068  
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application  
Project Number: 37901  
Permit Number: O3026  
Lower Colorado River Authority  
Winchester Power Park  
Winchester, Fayette County  
Regulated Entity Number: RN105377352  
Customer Reference Number: CN600253637

Dear Senator Kolkhorst:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-96.993055,30.024166&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Lois Kolkhorst

g. The EPA has authorized the use of wet collectors designed to operate with a unit contacting energy of at least 9.95 kilopascals. ☐ YES ☐ NO

***Non-sprayed Asbestos Insulation***

6. The application area includes insulating materials (other than spray applied insulating materials) that are either molded and friable or wet-applied and friable after drying. ☐ YES ☐ NO

***Asbestos Conversion***

7. The application area includes operations that convert regulated asbestos-containing material and asbestos-containing waste material into nonasbestos (asbestos-free) material. ☐ YES ☐ NO

**F. Subpart P - National Emission Standard for Inorganic Arsenic Emissions from Arsenic Trioxide and Metallic Arsenic Production Facilities**

1. The application area is located at a metallic arsenic production plant or at an arsenic trioxide plant that processes low-grade arsenic bearing materials by a roasting condensation process. ☐ YES ☐ NO

**G. Subpart BB - National Emission Standard for Benzene Emissions from Benzene Transfer Operations**

1. The application area is located at a benzene production facility and/or bulk terminal.  
*If the response to Question VII.G.1 is "NO," go to Section VII.H.* ☐ YES ☐ NO

2. The application area includes benzene transfer operations at marine vessel loading racks. ☐ YES ☐ NO

Indicator: Visible Emission or Opacity		Minimum Frequency: Annual
Averaging Period : 6 minutes		
Periodic Monitoring Text:		

Observe for visible emissions while each facility is in operation. Observations shall be made at least 15 feet and no more than 0.25 miles from the emission points. Up to three emission points may be read concurrently, provided that all three emission points are within a 70-degree viewing sector or angle in front of the observer such that the sun position is at the observer's back and can be maintained for all three emission points.

Observations shall be performed and recorded annually. If visible emissions are observed from an emission point, then the opacity shall be determined and documented within 24 hours for that emission point using Title 40 Code of Federal Regulations Part 60 (40 CFR Part 60), Appendix A, Test Method 9.

Justification: The proposed periodic monitoring, specifically the reduction in monitoring frequency from quarterly to annual, is justified based on the infrequent and sporadic operation of GRP-LUBVENT. These oil mist vents are controlled by oil mist eliminators and only operate when the associated combustion turbines operate which is historically less than 10% of the time.

**Application for Renewal  
Site Operating Permit No. O-3026  
Lower Colorado River Authority (CN 600253637)  
Winchester Power Park (RN105377352)  
Winchester, Fayette County, Texas (FC-A001-A)**

To Whom It May Concern:

The Lower Colorado River Authority (LCRA) is submitting the enclosed TCEQ Site Operating Permit (SOP) Renewal Application for the Winchester Power Park (WPP) located near Winchester, Texas in Fayette County. The facility is currently operating under SOP No. O-3026, and includes an Acid Rain Permit and CSAPR designation, which was issued March 17, 2021. LCRA is seeking to renew the SOP, and this renewal application is submitted in accordance with Title 30 of the Texas Administrative Code (TAC) §122.241 and §122.243.

The following changes are being requested:

- Add case-by-case Periodic Monitoring for the lube oil vents (GRP-LUBVENT) to replace the special terms and conditions previously applicable for the lube oil vents. LCRA is requesting to do annual visible emission checks to satisfy the periodic monitoring required to demonstrate compliance with 30 TAC 111.111(1)(B). WPP is an unmanned peaking electric generation facility and quarterly visible emissions has historically required that the turbines be started up solely to do visible emission checks for the lube oil vents since the turbines often run during non-daylight hours or when no staff is present. This results in an unnecessary emissions and fuel consumption.

LCRA has submitted the following forms as part of this renewal application: OP-1, OP-2, OP-REQ1, OP-REQ3, OP-SUMR, OP-ACPS, OP-AR1, OP-MON, OP-PBR SUP, and UA-15.

If you have any questions regarding the information provided in this renewal application, please do not hesitate to contact me at (512) 791-7556.

Sincerely,

A handwritten signature in black ink that reads "Sam Harris". The signature is written in a cursive, flowing style.
