**Subject:** RE: REVISIONS to Working Draft Permit -- FOP O3100/Project 37929 Texan Eastern Transmissions LP Vidor Compressor Station

Dear Alyson – Per my phone call today, I should have removed 3 small nat gas fired space heaters from the TETLP/Vidor, TX Title V permit.

My apologies for the changes which will affect the: Unit Summary, ARS, Periodic Monitoring Summary, and Permit Shield.

Attached is a **REVISED OP-2 Form**, with the changes in **red** font.

- I've added Revision No. 6, 7, and 8 to remove Emission Units: 412-HTR01, 412-HTR02, and 412-HTR03, respectively.

Attached is **OP-SUMR Form** to request the removal of the 3 space heaters and their corresponding negative applicability and/or applicable requirements.

- These 3 space heaters are authorized under existing Oil & Gas Standard Permit No. 56578.
- TETLP will be initiating shortly a permit modification to remove these 3 emission units from permit No. 56578.

Please let me know if you require any additional information. **FYI - I will be out on vacation from Fri 7/25 to Sun 8/3, returning to the office Mon 8/4.**

If you have any urgent questions while I am out, please contact Melissa Ryan of Trinity Consultants [@'Melissa Ryan'](#) for assistance – Thank you!

Sincerely,

**Subject:** [External] Working Draft Permit -- FOP O3100/Project 37929 Texan Eastern Transmissions LP Vidor Compressor Station

**CAUTION! EXTERNAL SENDER**

Were you expecting this email? TAKE A CLOSER LOOK. Is the sender legitimate? DO NOT click links or open attachments unless you are 100% sure that the email is safe.

Hi Chuck,

You are correct. I have confirmed with my supervisor that the OP-2 is not needed to remove the requested PBRs from the permit. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **August 5, 2025**.

Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at [http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\\_V/sop\\_wdp\\_factsheet.pdf](http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf). This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through

email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Alyson - Your question is listed below.

**The response is PBRs 106.433 and 106.452 are no longer in use. Thus, the listing of PBRs were removed in the TV forms. I conferred with one of my consultants (Melissa Ryan/Trinity Consultants) who has 25+ years of TCEQ TV experience, she had not heard of using OP-2 as a means for removing a PBR from a TV permit. I also have never “removed” a PBR listing from a TV using Form OP-2. Historically, I have only listed active PBRs and**

**omitted PBRs that are no longer used. Can you confirm if that form is necessary? Plus our RO/DAR is out of office for vacation this week and all of next week too.**

I have started the technical review of the renewal application for Texas Eastern Transmissions LP/Vidor Compressor Station and have determined that additional information is necessary to complete the review.

Please provide the following items no later than **July 1, 2025:**

- PBRs 106.433 and 106.452 are listed in the effective permit, however, they are not included in the renewal application. If these PBRs are still in use, submit a revised OP-REQ1 page 88 and a revised OP-PBRSUP that include PBRs 106.433 and 106.452. Ensure that the revised documents include the updated submittal date. If the PBRs are no longer in use and should be removed from the permit, provide an OP-2 form with a revision item for the removal of the PBRs.

**Subject:** Technical Review -- FOP O3100/Project 37929 Texan Eastern Transmissions LP Vidor Compressor Station

Mr. Zukor,

I have started the technical review of the renewal application for Texas Eastern Transmissions LP/Vidor Compressor Station and have determined that additional information is necessary to complete the review.

Please provide the following items no later than **July 1, 2025:**

- PBRs 106.433 and 106.452 are listed in the effective permit, however, they are not included in the renewal application. If these PBRs are still in use, submit a revised OP-REQ1 page 88 and a revised OP-PBRSUP that include PBRs 106.433 and 106.452. Ensure that the revised documents include the updated submittal date. If the PBRs are no longer in use and should be removed from the permit, provide an OP-2 form with a revision item for the removal of the PBRs.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Mr. Zukor

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O3100 for Texas Eastern Transmissions LP, Vidor Compressor Station. This application has been assigned Project No. 37929. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).**

*Optional: Request any information that may have been noted as deficient or out-of-date during a preliminary project review (e.g. OP-1 with current contact data, current OP-REQ1, etc.), and include a deadline.*

Please review the “SOP Technical Review Fact Sheet” located at [http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\\_V/sop\\_wdp\\_factsheet.pdf](http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf). This guidance contains important information regarding the review process and application update procedures. Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

**Alyson H. Haynes**

## TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

*Protecting Texas by Reducing and Preventing Pollution*

April 1, 2025

THE HONORABLE ROBERT NICHOLS  
TEXAS SENATE  
PO BOX 12068  
AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Renewal Application

Vidor Compressor Station  
Orange, Orange County  
Regulated Entity Number: RN100825264  
Customer Reference Number: CN600126221

Dear Senator Nichols:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-93.975833,30.063055&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

## 1. EXECUTIVE SUMMARY

---

Texas Eastern Transmission, LP (TETLP) owns and operates an existing natural gas pipeline compressor station located near Vidor, in Orange County, Texas (Vidor Compressor Station [CS]). The primary operations at the Vidor CS are natural gas compression and transmission through pipelines. TETLP has been assigned Texas Commission on Environmental Quality (TCEQ) Customer Reference Number CN600126221 and the Vidor CS operates under TCEQ Regulated Entity Reference Number RN100825264. The site operates under TCEQ Account No. OC-0072-V. All emission sources at the Vidor CS are authorized via the following air permits:

- ▶ Title V Site Operating Permit (SOP) Number (No.) O-3100,
- ▶ New Source Review (NSR) Permit No. 56626,
- ▶ Oil and Gas Standard Permit No. 56578, and
- ▶ Non-registerable Permits by Rule (PBRs).

Operation of the Vidor CS is authorized by Title V SOP No. O-3100, which was last renewed on September 25, 2020. In addition to the Title V renewal, TETLP is requesting the following changes, which collectively represent a significant revision to the existing Title V SOP:

- ▶ Request a permit shield for “negative applicability” for Title 40 of the Code of Federal Regulations (40 CFR) Part 60, New Source Performance Standards (NSPS) OOOOb.

This Title V SOP permit expires on September 25, 2025. Therefore, this Title V SOP renewal and significant revision application is being submitted in a timely fashion as specified in §122.241(b). This document was prepared in accordance with TCEQ’s SOP Renewal Application Guidance, and the requirements listed in Title 30 of the Texas Administrative Code (30 TAC) §122.132, Application and Required Information for Initial Permit Issuance, Reopening, Renewal, or General Operating Permits.

Orange County is currently classified as an attainment or unclassified area for all criteria pollutants. The Vidor CS is an existing minor source with respect to the Prevention of Significant Deterioration (PSD) program and an existing major source with respect to the Title V Federal Operating Permits program. The site is a major source for Title V due to site-wide hazardous air pollutant (HAP) emissions being greater than 25 tpy, and volatile organic compounds (VOC), nitrogen oxides (NO<sub>x</sub>), and carbon monoxide (CO) emissions being greater than 100 tpy.

The enclosed Title V SOP application for the Vidor CS consists of the following forms and supplemental information:

- ▶ Section 2. Process Description and Flow Diagram
- ▶ Section 3. TCEQ Form OP-1
- ▶ Section 4. TCEQ Form OP-2
- ▶ Section 5. TCEQ Form OP-CRO1
- ▶ Section 6. TCEQ Form OP-ACPS

- ▶ Section 8. TCEQ Form OP-REQ2
- ▶ Section 9. TCEQ Form OP-PBR SUP

## 2. PROCESS DESCRIPTION AND FLOW DIAGRAM

---

As natural gas travels through interstate pipelines, gas pressure is lost due to fluid friction inside the pipe's walls. At several points along the pipeline, natural gas must be recompressed to increase pipeline pressure to ensure the natural gas moves at sufficient volumes along the pipeline and delivered to customers at serviceable pressures. This is accomplished by additional compressor stations, like the Vidor CS. The natural gas enters the compressor station, where it is compressed by up to nine (9) engines. In general, the primary air emission sources at compressor stations are the compressor engines. Air emissions from these sources consist of typical natural gas combustion by-products: CO, NO<sub>x</sub>, sulfur dioxide (SO<sub>2</sub>), particulate matter (PM), particulate matter with an aerodynamic diameter of 10 microns or less (PM<sub>10</sub>), particulate matter with an aerodynamic diameter of 2.5 microns or less (PM<sub>2.5</sub>), VOC, and HAP. The Vidor CS also includes additional emission sources such as: inlet gas filtration and separation, storage of petroleum-based materials, truck loading operations, emergency electrical generation, heaters, natural gas releases associated with equipment operation and maintenance activities, and equipment piping components. A process flow diagram is included at the end of this section for reference.

The Vidor CS does not include production, natural gas liquids fractionation, or glycol dehydration equipment as part of its existing operations.

There are nine (9) Ingersoll Rand 4-stroke lean-burn natural gas-fired reciprocating compressor engines [Emission Point Numbers (EPNs) 41201 through 41209]. The engines are rated ranging from 1,000 hp to 2,000 hp and drive corresponding centrifugal compressors, which boosts the pressure of natural gas in the pipeline. Increasing the pressure of the natural gas allows it to move through the transmission pipeline. The reciprocating engines will use natural gas from the pipeline as fuel. There are two (2) emergency generators on site (EPNs 41236 and 41237).

Storage tanks and separator vessels at the Vidor CS include:

- ▶ Four (4) separator vessels (EPNs 412-V1, 412-V2, 412-V4S, 412-V4D) and two (2) pipeline liquids storage tanks (EPNs 412-V5, and 412-V5-DEFS)
- ▶ Three (3) engine oil storage tanks (EPNs 412-F, 412-JL, and 412-JS)
- ▶ Four (4) engine coolant storage tanks (EPNs 412-S3A, 412-S3B, 412-S4A, and 412-S4B)
- ▶ Twelve (12) miscellaneous storage tanks (EPNs 412-JA, 412-LO1, 412-LO1A, 412-LO1B, 412-LO2, 412-LO2A, 412-LO2B, 412-LO3, 412-LO3A, 412-LO3B, 412-OW1, and 412-OW2)

Loading operations associated with the ancillary tanks include engine oil, coolant, and pipeline liquids loading (EPNs 412-O-TL, 412-C-TL, 412-OW-TL, 412-V-DEFS-TL, and 412-V-TL).

Fugitive emissions at the Vidor CS include equipment leaks from all piping connections, flanges, and valves on-site (EPN FUG).

<b>N. Subpart CC - National Emission Standards for Hazardous Air Pollutants from Petroleum Refineries (continued)</b>		
<i>Applicability (continued)</i>		
9.	The application area includes Group 1 or Group 2 wastewater streams that are complying with 40 CFR § 63.640(o)(2)(ii). <i>If the response to Question VIII.N.9 is "No," go to Question VIII.N.13.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
10.	The application area includes Group 2 wastewater streams or organic streams whose benzene emissions are subject to control through the use of one or more treatment processes or waste management units under the provisions of 40 CFR Part 61, Subpart FF on or after December 31, 1992.	<input type="checkbox"/> Yes <input type="checkbox"/> No
<i>Containers, Drains, and other Appurtenances</i>		
11.	The application area includes containers that are subject to the requirements of 40 CFR § 63.135 as a result of complying with 40 CFR § 63.640(o)(2)(ii).	<input type="checkbox"/> Yes <input type="checkbox"/> No
12.	The application area includes individual drain systems that are subject to the requirements of 40 CFR § 63.136 as a result of complying with 40 CFR § 63.640(o)(2)(ii).	<input type="checkbox"/> Yes <input type="checkbox"/> No
13.	The application area includes Group 1 gasoline loading racks as specified in § 63.650(a).	<input type="checkbox"/> Yes <input type="checkbox"/> No
<b>O. Subpart DD - National Emission Standards for Off-site Waste and Recovery Operations</b>		
1.	The application area receives material that meets the criteria for off-site material as specified in 40 CFR § 63.680(b)(1). <i>If the response to Question VIII.O.1 is "No" or "N/A," go to Section VIII.P</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A
2.	Materials specified in 40 CFR § 63.680(b)(2) are received at the application area.	<input type="checkbox"/> Yes <input type="checkbox"/> No
3.	The application area has a waste management operation receiving off-site material and is regulated under 40 CFR Part 264 or Part 265.	<input type="checkbox"/> Yes <input type="checkbox"/> No

11.	The application area includes a remediation material management unit or combination of units with a total annual quantity of HAP less than 1 Mg/yr that is being exempted from § 63.7886(b) per § 63.7886(d).	<input type="checkbox"/> Yes <input type="checkbox"/> No
12.	The application area includes a remediation material management unit that has an average total VOHAP concentration of remediation material less than 500 ppmw and is complying with § 63.7886(b)(2). <i>If the response to Question VIII.CC.12 is "No," go to Question VIII.CC.14.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
13.	The application area includes a remediation material management unit that concentrates all or part of the material such that the material's VOHAP concentration could increase.	<input type="checkbox"/> Yes <input type="checkbox"/> No
14.	The application area includes containers that manage site remediation materials subject to 40 CFR Part 63, Subpart GGGGG. <i>If the response to Question VIII.CC.14 is "No," go to Question VIII.CC.21.</i>	<input type="checkbox"/> Yes <input type="checkbox"/> No
15.	The application area includes containers that are also subject to and complying with another subpart under 40 CFR part 61 or part 63 per § 63.7886(b)(3).	<input type="checkbox"/> Yes <input type="checkbox"/> No
16.	The application area includes containers that are complying with alternative work practice standards that have been approved by the EPA per § 63.7900(e).	<input type="checkbox"/> Yes <input type="checkbox"/> No
17.	The application area includes containers using Container Level 1 controls as specified in 40 CFR § 63.922(b).	<input type="checkbox"/> Yes <input type="checkbox"/> No
18.	The application area includes containers with a capacity greater than 0.46 m <sup>3</sup> that meet the requirements of 40 CFR § 63.7900(b)(3)(i) and (ii).	<input type="checkbox"/> Yes <input type="checkbox"/> No
19.	The application area includes containers using Container Level 2 controls as specified in 40 CFR § 63.923(b).	<input type="checkbox"/> Yes <input type="checkbox"/> No
20.	The application area includes containers using Container Level 3 controls as specified in 40 CFR § 63.924(b).	<input type="checkbox"/> Yes <input type="checkbox"/> No
21.	The application area includes individual drain systems complying with the requirements of 40 CFR § 63.962.	<input type="checkbox"/> Yes <input type="checkbox"/> No
