Ulises,

Thanks for meeting with us to discuss the needed updates. The updated forms are attached, and the updates are summarized below:

OP-UA6 for Group IDs: GRPBOILER1 and GRPBOILER3:

- GRPBOILER1 contains four 72 MMBtu/hr natural gas-fired boilers that burn diesel during emergencies and testing. Pursuant to 30 TAC 117.410(d)(1)(B), emission credits were used to increase the NOx emission limit from 0.030 lb/MMBtu to 0.036 lb/MMBtu and allow for 30 hrs/yr per unit of testing on diesel fuel. Additionally, diesel is used on an emergency basis due to natural gas curtailment or other emergencies as allowed per 117.403(c).
- GRPBOILER3 contains five 25 MMBtu/hr natural gas-fired boilers that burn diesel during emergencies and testing. Pursuant to 30 TAC 117.410(d)(1)(B), emission credits were used to allow for 30 hrs/yr per unit of testing on diesel fuel. Additionally, diesel is used on an emergency basis due to natural gas curtailment or other emergencies as allowed per 117.403(c).

It appears that OP-UA6 does not address the above use of emission credits.

OP-MONs for Group IDs: GRPBOILER1 and GRPBOILER3 - Per our call, we have added OP-MONs for CO and NOx emissions from GRPBOILER1. The requested sample calculations are attached.

Form OP-2 - Table 2 - Updates

- The use of emission credits was added to the "Description of Change and Provisional Terms and Conditions" for revision 3.
- Revision 4 update - Upon additional review, Unit (Boiler) 41200 instead of 202991 has been decommissioned and removed. Unit (Boiler) 202991 is still part of GRPBOILER4.

Form OP-SUMR - Table 1 - Updates

- Revision 4 update - Upon additional review, Unit (Boiler) 41200 instead of 202991 has been decommissioned and removed. Unit (Boiler) 202991 is still part of GRPBOILER4.

The above non-OP-MON updates are highlighted in yellow.

Feel free to let us know if you have any questions.

Thanks

Texas Instruments, Inc – Texas Instruments North Campus
TCEQ Customer Reference Number: (CN) CN600261416
TCEQ Regulated Entity Reference Number: (RN) RN102505195*

Dear Mr. Ulises Luna:

On behalf of Texas Instruments, Inc. (TI), please find below responses to the questions emailed on October 6, 2025.

- ▶ Units ID CWT & FAC-2 (Index Number: 60IIII): On the form OP-UA02:
 - In Table 5b: The "Generator Set" question is answered with YES. That question is only to be answered for non-emergency engines. The facility's engine is an emergency engine. Leave this question blank. Please update this section.
 - In Table 5c: The "AECD" question is blank. That question must be answered for emergency and non-emergency engines with either YES or NO. Please update this section.
 - In Table 5c: The "PM Compliance" question is answered with PM15. That question is only to be answered non-emergency engine greater than 30 lpc. The facility's engine is an emergency engine less than 10 lpc. Leave this question blank. Please update this section.

Response – The updated form OP-UA02 Tables 5a-5c are attached.

- ▶ Units ID CWT & FAC-2 (Index Number: R7400): On the form OP-UA02:
 - In Table 1a, The "Horsepower Rating" question is answered with 300+. That code is only to be used for sites located in Beaumont, Port Arthur. The site is in Dallas County. Please update this section.
 - In Table 1a, The "RACT Date Placed in Service" question is answered with FCD+. That code is only to be used for sites located in Beaumont, Port Arthur. The site is in Dallas County. Please update this section.
 - In Table 1a, The "Functionally Identical Replacement" question is answered with NO. That question is only for sites located in BPA. The site is in Dallas County. Please update this section.

Response – The new SOP index for ID No. FAC-2 and CWT-1 for Regulation 30 TAC 117 Subchapter B is "R7ICI-0002", as shown on OP-UA2 Table 1a. SOP Index "R7400" does not apply to FAC-2 and CWT-1.

- ▶ Units ID CWT & FAC-2 (Index Number: R7ICI-0002): On the form OP-UA02:
 - The "Type of Service" question is answered with D2007+. However, the other Ch. 117 index# has the same question answered with D2007-. So, was the engine placed into service before or after 06/01/2007?
 - There cannot be (2) different index #s with vastly different UA2 codes for just (1) engine. One of these index #s needs to be removed. Please update this section.

Response – As mentioned in the previous response, the correct information for these units is in line with the Index Number R7ICI-0002. SOP Index "R7400" does not apply to FAC-2 and CWT-1.

- ▶ Units ID CWT & FAC-2 (Index Number: 63ZZZZ): On the form OP-UA02:
 - The "Brake HP" question is answered with 300-500. However, the "Kilowatts" question in NSPS IIII is answered with E75-130 (100-174 HP).
 - It's not possible for an engine to have horsepower (HP) data listed as being 300-500 HP in one rule and at the same time having 100-174 HP listed for another rule. Please update this section.

Response – The updated form OP-UA02 Table 2a is attached. SOP Index "63ZZZZ" does not apply to FAC-2 and CWT-1

- ▶ We wanted to let the facility know that we remove the OP-REQ2 for Chapter 117 (30 TAC 117.203(1)). Group IDs: GRPBOILER3 (Unit IDs 190311, 190312, 190313, & 190314), – Index Number: R7ICI-6A needs additional monitoring requirements for 30 TAC 117, Subchapter B (30 TAC 117.410(c)(1)), Pollutant: CO. Please provide an OP-MON form.

Response: The requested OP-MON is attached.

Group IDs: GRPBOILER3 (Unit IDs 190311, 190312, 190313, & 190314), – Index Number: R7ICI-6A needs additional monitoring requirements for 30 TAC 117, Subchapter B (30 TAC 117.410(a)(1)(C)), Pollutant: NOX. Please provide an OP-MON form.

Response – The requested OP-MON is attached.

Additionally, regarding the provided draft permit, in the renewal application, it was requested that the Chapter 117 NO_x and CO limits should be included in the SOP for ID GRPBOILER1 (SOP ID "R7ICI-4A" in the submitted OP-UA6). In the 2020 SOP they were emitted, but it was included in the previous SOP. Please include the limit in this renewal.

Ulises,

Thanks for meeting with us to discuss the needed updates. The updated forms are attached, and the updates are summarized below:

OP-UA6 for Group IDs: **GRPBOILER1** and **GRPBOILER3**:

- GRPBOILER1 contains four 72 MMBtu/hr natural gas-fired boilers that burn diesel during emergencies and testing. Pursuant to 30 TAC 117.410(d)(1)(B), emission credits were used to increase the NOx emission limit from 0.030 lb/MMBtu to 0.036 lb/MMBtu and allow for 30 hrs/yr per unit of testing on diesel fuel. Additionally, diesel is used on an emergency basis due to natural gas curtailment or other emergencies as allowed per 117.403(c).
- GRPBOILER3 contains five 25 MMBtu/hr natural gas-fired boilers that burn diesel during emergencies and testing. Pursuant to 30 TAC 117.410(d)(1)(B), emission credits were used to allow for 30 hrs/yr per unit of testing on diesel fuel. Additionally, diesel is used on an emergency basis due to natural gas curtailment or other emergencies as allowed per 117.403(c).

It appears that OP-UA6 does not address the above use of emission credits.

OP-MONs for Group IDs: GRPBOILER1 and GRPBOILER3 - Per our call, we have added OP-MONs for CO and NOx emissions from GRPBOILER1. The requested sample calculations are attached.

Form OP-2 - Table 2 - Updates

- The use of emission credits was added to the "Description of Change and Provisional Terms and Conditions" for revision 3.
- Revision 4 update - Upon additional review, Unit (Boiler) 41200 instead of 202991 has been decommissioned and removed. Unit (Boiler) 202991 is still part of GRPBOILER4.

Form OP-SUMR - Table 1 - Updates

- Revision 4 update - Upon additional review, Unit (Boiler) 41200 instead of 202991 has been decommissioned and removed. Unit (Boiler) 202991 is still part of GRPBOILER4.

The above non-OP-MON updates are highlighted in yellow.

Feel free to let us know if you have any questions.

Mr. Luna,

We have some questions on the purpose of the Chapter 117 OP-MON for GRPBOILER3 (Item 1). Can we set up a Team meeting to discuss? I can meet between 10 am and noon on this coming Wednesday, Thursday, or Friday.

For item 2 - For GRPBOILER1 the primary fuel is natural gas and fuel oil is only burned on an emergency basis due to natural gas curtailment or other emergency. Emissions when burning fuel oil are exempt from Chapter 117 per 30 TAC 117.403(c). Based on this are separate index numbers still needed. If so, are a total of 3 SOP indexes are needed? For example:

- R7ICI-4A for NG and LQD,
- R7ICI-4A_G for NG, and
- R7ICI-4A_L for LQD.

Let us know and we can make the required updates to OP-UA Table 5a.

Thanks

Good afternoon,

I have some questions regarding the comments that we received:

- For the OP-MONs for Group ID: GRPBOILER3 – Please provide justification/calculations.

- Unit ID: GRPBOILER1 – SOP Index Number: R7ICI-4A - It looks like NG and LQD are still both listed there under a SOP Index #. The fuel types need to be entered as different operating scenarios with separate index numbers since they get different requirements. If the facility is combusting gas and liquid fuels, the facility will need to identify the group's primary fuel (based on the greatest percentage of their heat input overall operating scenarios).

Please provide the information by **October 27, 2025.**

Subject: [EXTERNAL] Working Draft Permit/ Technical Review - FOP O1311/Project 37984, Texas Instruments Incorporated/ North Campus Site

Good morning,

I have conducted a technical review of the **renewal** application for **Texas Instruments Incorporated/ North Campus Site**. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **October 15, 2025**.

Additionally, the following deficiencies have been identified:

- **Units ID CWT & FAC-2 (Index Number: 601111): On the form OP-UA02:**
 - In Table 5b: The **“Generator Set”** question is answered with YES. That question is only to be answered for non-emergency engines. The facility’s engine is an emergency engine. Leave this question blank. Please update this section.
 - In Table 5c: The **“AECD”** question is blank. That question must be answered for emergency and non-emergency engines with either YES or

NO. Please update this section.

- In Table 5c: The “PM Compliance” question is answered with PM15. That question is only to be answered non-emergency engine greater than 30 lpc. The facility’s engine is an emergency engine less than 10 lpc. Leave this question blank. Please update this section.
- **Units ID CWT & FAC-2 (Index Number: R7400): On the form OP-UA02:**
 - In Table 1a, The “Horsepower Rating” question is answered with 300+. That code is only to be used for sites located in Beaumont, Port Arthur. The site is in Dallas County. Please update this section.
 - In Table 1a, The “RACT Date Placed in Service” question is answered with FCD+. That code is only to be used for sites located in Beaumont, Port Arthur. The site is in Dallas County. Please update this section.
 - In Table 1a, The “Functionally Identical Replacement” question is answered with NO. That question is only for sites located in BPA. The site is in Dallas County. Please update this section.
- **Units ID CWT & FAC-2 (Index Number: R71CI-0002): On the form OP-UA02:**
 - The “Type of Service” question is answered with D2007+. However, the other Ch.117 index# has the same question answered with D2007-. So, was the engine placed into service before or after 06/01/2007?
 - There cannot be (2) different index #s with vastly different UA2 codes for just (1) engine. One of these index #s needs to be removed. Please update this section.
- **Units ID CWT & FAC-2 (Index Number: 63ZZZZ): On the form OP-UA02:**
 - The “Brake HP” question is answered with 300-500. However, the “Kilowatts” question in NSPS IIII is answered with E75-130 (100-174 HP).
 - It’s not possible for an engine to have horsepower (HP) data listed as being 300-500 HP in one rule and at the same time having 100-174 HP listed for another rule. Please update this section.
- **We wanted to let the facility know that we remove the OP-REQ2 for Chapter 117 (30 TAC 117.203(1)). Group IDs: GRPBOILER3 (Unit IDs 190311, 190312, 190313, & 190314), – Index Number: R71CI-6A needs additional monitoring requirements for 30 TAC 117, Subchapter B (30 TAC 117.410(c)(1)), Pollutant: CO. Please provide an OP-MON form.**
- **Group IDs: GRPBOILER3 (Unit IDs 190311, 190312, 190313, & 190314), – Index Number: R71CI-6A needs additional monitoring requirements for 30 TAC 117, Subchapter B (30 TAC 117.410(a)(1)(C)), Pollutant: NOX. Please provide an OP-MON form.**

Note: Some units/modifications/requested items were not included in the Working Draft Permit due to deficiencies being found in the application/permit.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Subject: RE: Technical Review - FOP O1311/Project 37984, Texas Instruments Incorporated/ North Campus Site

Thank you Ulises for the comprehensive and constructive information. I especially appreciate you sharing the guidance documents and reminders regarding the application update process.

We are currently in the process of taking ownership of two emergency generators on our site previously owned by another company, and decommissioning a separate unit. These units are currently planned to be permitted/accounted for under Permit by Rule 106.511, and we intend to submit OP-NOTIFY for these PBRs.

At this time, I am reviewing whether the generators will need to be incorporated into the FOP renewal application update. I'd appreciate your input on whether these new sources should be included in the current project scope or if they may be addressed separately through the OP-NOTIFY submittal.

Best,

Judah Foster

Subject: [EXTERNAL] Technical Review - FOP O1311/Project 37984, Texas Instruments Incorporated/ North Campus Site

Good afternoon,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit

No. O1311 for Texas Instruments Incorporated/ North Campus Site. This application has been assigned Project No. 37984. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBR SUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Dear Mr. Ulises Luna:

On behalf of Texas Instruments, Inc. (TI), please find below responses to the questions emailed on October 6, 2025.

- ▶ Units ID CWT & FAC-2 (Index Number: 60IIII): On the form OP-UA02:
 - In Table 5b: The "Generator Set" question is answered with YES. That question is only to be answered for non-emergency engines. The facility's engine is an emergency engine. Leave this question blank. Please update this section.
 - In Table 5c: The "AECD" question is blank. That question must be answered for emergency and non-emergency engines with either YES or NO. Please update this section.
 - In Table 5c: The "PM Compliance" question is answered with PM15. That question is only to be answered non-emergency engine greater than 30 lpc. The facility's engine is an emergency engine less than 10 lpc. Leave this question blank. Please update this section.

Response – The updated form OP-UA02 Tables 5a-5c are attached.

- ▶ Units ID CWT & FAC-2 (Index Number: R7400): On the form OP-UA02:
 - In Table 1a, The "Horsepower Rating" question is answered with 300+. That code is only to be used for sites located in Beaumont, Port Arthur. The site is in Dallas County. Please update this section.
 - In Table 1a, The "RACT Date Placed in Service" question is answered with FCD+. That code is only to be used for sites located in Beaumont, Port Arthur. The site is in Dallas County. Please update this section.
 - In Table 1a, The "Functionally Identical Replacement" question is answered with NO. That question is only for sites located in BPA. The site is in Dallas County. Please update this section.

Response – The new SOP index for ID No. FAC-2 and CWT-1 for Regulation 30 TAC 117 Subchapter B is "R7ICI-0002", as shown on OP-UA2 Table 1a. SOP Index "R7400" does not apply to FAC-2 and CWT-1.

- ▶ Units ID CWT & FAC-2 (Index Number: R7ICI-0002): On the form OP-UA02:
 - The "Type of Service" question is answered with D2007+. However, the other Ch. 117 index# has the same question answered with D2007-. So, was the engine placed into service before or after 06/01/2007?
 - There cannot be (2) different index #s with vastly different UA2 codes for just (1) engine. One of these index #s needs to be removed. Please update this section.

Response – As mentioned in the previous response, the correct information for these units is in line with the Index Number R7ICI-0002. SOP Index "R7400" does not apply to FAC-2 and CWT-1.

- ▶ Units ID CWT & FAC-2 (Index Number: 63ZZZZ): On the form OP-UA02:
 - The "Brake HP" question is answered with 300-500. However, the "Kilowatts" question in NSPS IIII is answered with E75-130 (100-174 HP).
 - It's not possible for an engine to have horsepower (HP) data listed as being 300-500 HP in one rule and at the same time having 100-174 HP listed for another rule. Please update this section.

1. EXECUTIVE SUMMARY

Texas Instruments Incorporated (TI) owns and operates a semiconductor manufacturing plant (North Campus) in Dallas, Texas (Dallas County). North Campus operates under Texas Commission on Environmental Quality (TCEQ) Air Quality Account Number DB-0820-B. TI has been assigned TCEQ Customer Reference Number (CN) 600261416, and North Campus has been assigned Regulated Entity Reference Number (RN) 102505195.

Dallas County is currently classified as a severe nonattainment area for the 2008 eight-hour ozone standard, serious for the 2015 eight-hour ozone standard, and unclassified/attainment for all other criteria pollutants.¹ North Campus is considered an existing major source under the Nonattainment New Source Review (NNSR) permitting program. Additionally, North Campus is a major source with respect to Title V permitting requirements and operates under Site Operating Permit (SOP) No. O-1311.

North Campus is subject to the Texas Federal Operating Permits (FOP) Program according to Title 30 of the Texas Administrative Code Section 122.120 (30 TAC §122.120). North Campus's SOP No. O-1311 was last renewed on October 10, 2020, and per §122.241, Title V operating permits are required to be renewed every five years. In accordance with 30 TAC §122.133, this renewal application is submitted 6 months prior to the expiration date of October 10, 2020.

1.1 Changes at Site

Since the last renewal of SOP No. O-1311, the following changes have occurred:

1. Boilers 182206 and 182207 were replaced with larger 1.06 MMBtu/hr boilers. The original units were only 0.75 MMBtu/hr. These boilers are included in GRPBOILER4. This change does not impact the applicable regulations for GRPBOILER4.
2. Boilers 156653 and 202991 have been decommissioned, and TI is requesting them removed from the SOP. These boilers were part of GRPBOILER4.

A review of the current SOP identified other required updates. The first update is that the Chapter 117 exemption for units (diesel engine emergency generators) FAC-2 and CWT-1 needs to be updated to §117.403(a)(9). The second update is that the Chapter 117 NO_x limit for GRPBOILER1 was left out of the last version of the permit. Therefore, the Chapter 117 NO_x limit for GRPBOILER1 is being added back in.

1.2 TCEQ Forms Requiring Submission at Renewal

Per TCEQ guidance, only the following items are required to be included in a renewal application.²

- ▶ TCEQ Forms OP-CRO1, OP-REQ1, OP-ACPS, OP-1, and OP-2;
- ▶ TCEQ Form OP-SUMR, if applicable;
- ▶ Applicable TCEQ unit attribute forms if there have been changes to the forms and if the changes affect units at the site;
- ▶ TCEQ Form OP-MON, if applicable;

¹ The United States Environmental Protection Agency (U.S. EPA) Green Book. Source: <https://www3.epa.gov/airquality/greenbook/ancl.html>, accessed in March 2025.

² TCEQ Air Permits Division, *Forms for Various Federal Operating Permit (FOP) Project Types*, [TCEQ - Forms for Various Federal Operating Permit \(FOP\) Project Types \(texas.gov\)](https://www3.epa.gov/airquality/greenbook/ancl.html), accessed March 2025.

- ▶ TCEQ Form OP-PBR SUP, if applicable;
- ▶ TCEQ Form OP-REQ2, if revisions are requested for the permit shield;
- ▶ TCEQ Form OP-REQ3, if applicable requirements have changed; and
- ▶ Information regarding additions or deletions of units and any changes at the site affecting the permit.

Unit attribute forms have previously been submitted for the site. The following subsections summarize changes for each form that require a unit attribute form to be submitted in this renewal application.

1.2.1 TCEQ Form OP-UA2

TCEQ Form OP-UA2 addresses potentially applicable requirements for stationary reciprocating internal combustion engines and was last updated in November 2022. North Campus has stationary reciprocating internal combustion engines that are subject to 30 TAC Chapter 117, Subchapter B (Tables 1), 40 CFR Part 60, Subpart IIII (Table 5), and 40 CFR Part 63, Subpart ZZZZ (Table 5).

Units (diesel engine emergency generators) FAC-2 and CWT-1 are defined as new stationary diesel engines placed into service after June 1, 2007. Therefore, the Chapter 177 exemption needs to be updated to §117.403(a)(9) in the SOP. OP-UA2 Table 1 is provided for units FAC-2 and CWT-1 to show the correct applicable requirements. There are no new or updated applicable requirements for the other units.

1.2.2 TCEQ Form OP-UA3

TCEQ Form OP-UA3 addresses potentially applicable requirements for storage tanks and was last updated in July 2023. North Campus has storage tanks that are subject to 30 TAC Chapter 115, Storage of VOCs (Tables 4a and 4b). There are no new applicable requirements for these units.

1.2.3 TCEQ Form OP-UA4

TCEQ Form OP-UA4 addresses potentially applicable requirements for loading and unloading operations and was last updated in July 2023. North Campus has loading and unloading operations that are subject to 30 TAC Chapter 115, Loading and Unloading of VOC (Table 1). There are no new applicable requirements for these units.

1.2.4 TCEQ Form OP-UA6

TCEQ Form OP-UA6 addresses potentially applicable requirements for boilers and was last updated in September 2024. North Campus has boilers that are subject to 40 CFR Part 60, Subpart Dc (Table 4), 30 TAC Chapter 117, Subchapter B (Table 5), and 30 TAC Chapter 112, Sulfur Compounds (Table 7). The current SOP omitted the Chapter 117 NO_x limit for GRPBOILER1, which was included in the previous SOP. OP-UA6, Table 5, has been included for GRPBOILER1. There are no new applicable requirements for the other units.

The requested updates to the units that make up GRPBOILER4 do not impact the applicable requirements for GRPBOILER4. Therefore, no OP-UA6 updates are required.

1.2.5 TCEQ Form OP-UA15

TCEQ Form OP-UA15 addresses potentially applicable requirements for emission points/stationary vents and was last updated in February 2025. North Campus has emission points/stationary vents that are subject to 30 TAC Chapter 111, Visible Emissions (Table 1) and 30 TAC Chapter 115, Vent Gas Controls (Table 2). There are no new applicable requirements for these units.

1.3 Monitoring

North Campus does not have any Compliance Assurance Monitoring (CAM) requirements. North Campus has several Periodic Monitoring requirements. TI is not requesting any updates to the current Periodic Monitoring requirements.

1.4 Application Contents

The application is being submitted and certified by the Responsible Official (RO) via the State of Texas Environmental Electronic Reporting System (STEERS). The enclosed Title V SOP renewal application for North Campus consists of the following forms and supplemental information:
