TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

April 14, 2025

THE HONORABLE KEVIN SPARKS TEXAS SENATE PO BOX 12068 AUSTIN TX 78711-2068

Re: Accepted Federal Operating Permit Significant Revision Application

Project Number: 38029 Permit Number: O4460 Rpc Power LLC Plains Texas Ii Facility Plains, Yoakum County

Regulated Entity Number: RN111718524 Customer Reference Number: CN606104370

Dear Senator Sparks:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) significant revision application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. https://gisweb.tceq.texas.gov/LocationMapper/?marker=102.892777,33.073611&level=13.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

Title V Permit No. O4460 Revision Application - BSI Project No. 1353966

Dear Samuel Short:

Please find enclosed an OP-2 form and supporting documents to revise Title V Permit No. O4460 for the electric generating units (EGUs) located at the RPC Toll, LLC (RPC) Plains Texas II Facility (the Facility).

The manufacturer of the EGUs updated the emissions information labels for the units onsite, which changed the applicability to maintenance planning and performance testing requirements of New Source Performance Standards (NSPS) Part 60 Subpart JJJJ – Standards of Performance for Stationary Spark Ignition Internal Combustion Engines.

Should there be any questions regarding the application, please contact Ryan Pickett at 512.202.9629 or at ryan.pickett@bsigroup.com.
