Hi Felicia,

No problem – we’ve got a lot of different projects going at once. Attached is a revised draft with STC 14 (for MACT FFFF maintenance wastewater) removed. This should resolve our last issue, so please provide certification for today’s response as well as the earlier ones from November 3 and November 10.

You may certify using one of the following options:

1. Submit Form OP-CRO1. You can use the Time Period option – just select a date range that covers all dates. You may either:
 - a. Send me a scan of the signed form, with the wet ink original to follow in the mail, or
 - b. Upload the form in STEERS and have the RO or DAR sign/submit the update.

OR

2. Upload your emails, attachments, and other forms from all dates in STEERS and have the RO or DAR sign/submit the update.

If you can provide the certification by Monday, December 22, that would be great. That is my last day before I take vacation for the holidays. (But if it takes longer, that’s alright.)

Carolyn

There is no maintenance wastewater associated with the equipment subject to the MON in MDI. We recommend that you remove STC 14 so there is not confusion in the future. Sorry Carolyn I though I responded the same day.

Thanks!

Hi Felicia,

Oops – sorry about that! I must have missed Melissa’s comment on that page for STC 14, but I see it now. I’ve copied the term below.

For miscellaneous chemical process facilities subject to maintenance wastewater requirements as specified in 40 CFR § 63.2485, Table 7, the permit holder shall comply with the requirements of 40 CFR § 63.105 (relating to Maintenance Wastewater Requirements) (Title 30 TAC Chapter 113, Subchapter C, § 113.890 incorporated by reference).

The term includes the applicable citations for maintenance wastewater. If the application area includes maintenance wastewater, as defined in 63.2550, then Table 7 of MACT FFFF requires compliance with 63.105 (from MACT G). 63.2485(b) also has one relevant modification to those MACT G requirements. The maintenance wastewater definition from 63.2550 is:

Maintenance wastewater means wastewater generated by the draining of process fluid from components in the MCPU into an individual drain system in preparation for or during maintenance activities. Maintenance wastewater can be generated during planned and unplanned shutdowns and during periods not associated with a shutdown. Examples of activities that can generate maintenance wastewater include descaling of heat exchanger tubing bundles, cleaning of distillation column traps, draining of pumps into an individual drain system, and draining of portions of the MCPU for repair. Wastewater from routine cleaning operations occurring as part of batch operations is not considered maintenance wastewater.

We do not have a specific OP-REQ1 question in section VIII.AA that asks about maintenance wastewater. Instead, we give the term to everyone who has answered questions VIII.AA.1-4 as “Yes”. In other words, everyone indicating they have units subject to MACT FFFF is going to pick up this term. This is for operational flexibility.

If the permit area does not include maintenance wastewater (see the definition in 63.2550 for reference), then there is nothing in this term that will apply to the permit area. Since there’s no OP-REQ1 question for maintenance wastewater, there’s nothing for you to change on the form to clarify that. However, I *can* remove the term from the permit. That is up to your preference. (The presence of the term doesn’t add requirements if you don’t have maintenance wastewater, but I understand wanting the permit to not have “extra” information.)

Please let me know if you’d like me to remove the term. You can include that in your reply on Friday, or at any other time. Your response on this item will need to be certified as well, so just be sure that your certification will cover it.

Sincerely,

Hi Carolyn,

Thank you for providing the revised Working Draft Permit dated November 20, 2025. We have reviewed the document and appreciate the changes made based on our previous comments.

However, we are still seeking clarification on our original question regarding Special Condition #14. In our previous correspondence, we asked why SC #14 was added to the permit, but we have not yet received an explanation for the rationale behind this condition's inclusion.

Could you please provide:

1. The specific text and requirements of Special Condition #14
2. The regulatory basis or justification for why this condition is necessary for our facility
- 3.

This information is critical for us to ensure proper compliance and to meet our December 5, 2025, deadline for final permit review comments.

We remain committed to resolving all outstanding items by the December 5th deadline and will provide the required certification covering our November 3rd and November 10th submittals once we have this clarification.

Thank you for your assistance.

Hi Felicia,

Thanks for all your responses. I have attached a revised WDP. Here are the changes made based on your replies from 11/3 and 11/10.

- 1) Corrected coordinates on permit face. (Melissa asked about why these coordinates had been changing in several permits when not requested. This is due to an internal change. Our permit “macro” used to pull coordinates from our Title V database, which we permit reviewers always ensure matches Form OP-1. However, at a certain point, it was changed to pull from Central Registry. Central Registry is supposed to automatically update itself from the program area databases periodically, but there has been a lag in that happening. Therefore, we are having to get Central Registry manually updated little by little. Please bear with us and continue to comment on the permit face if you see any coordinates that look incorrect.)
- 2) Updated term 17 to refer to latest OP-PBRSUP.
- 3) Updated requirements for FLTKTRMCB. You are correct that periodic monitoring will not be needed since the unit meets an exemption from control now.
- 4) Removed extra row of requirements for FT08507200 and FV07500300 for MACT G. (I kept the row that includes 63.151(a)(6) since that matches our current flowchart. We don’t have a unit attribute question that asks if the extension option in 63.151(a)(6) is used, so we just include that citation for all tanks for operational flexibility. While listing the citation does not impose additional requirements if not used, we can remove upon request. Just let me know if you want me to take it out.)
- 5) Updated issuance date for NSR permit 2005 to 08/22/2025.
- 6) Removed PBR registrations 116084, 162020, 167177, 167754, and 168448.
- 7) Added 106.264/09/04/2000 to FT09016210.

Please confirm all items are resolved by **Friday, December 5, 2025**. Please also provide certification by that date. Certification needs to cover November 3, 2025 and November 10, 2025, based on my records of submittals over this project. If you have additional comments on December 5, it should cover that date also. You may certify using one of the following options:

- 1) Submit Form OP-CRO1. You can use the Time Period option – just select a date range that covers all dates. You may either:

- a. Send me a scan of the signed form, with the wet ink original to follow in the mail, or
- b. Upload the form in STEERS and have the RO or DAR sign/submit the update.

OR

- 2) Upload your emails, attachments, and other forms from all dates in STEERS and have the RO or DAR sign/submit the update.

Dear Carolyn,

Following up on our November 12th extension for Unit FLTKTRMCB monitoring requirements, after further review of FLTKTRMCB, Covestro has determined that the true vapor pressure of the material loaded will be below 0.5 psia. An updated OP-2 Table 2 and OP-UA4 Table 1 are attached to document this change in attributes. As the loading activity no longer requires controls, periodic monitoring should not be required for the permit.

Hi Felicia,

Thanks for your response. I will go through these items and your comments so I can prepare a revised WDP to send back to you. Regarding the extension request for the FLTKTRMCB monitoring requirements, yes, that is fine to send me that information on November 12. I'll make a note in my file.

Sincerely,

Carolyn,

Thank you for providing the Working Draft Permit (WDP) for Covestro's Polyurethanes I - MDI area renewal application. Please find attached Covestro's comprehensive response to the unresolved items and our comments on the initial draft permit.

Response to Unresolved Items:

Item 1 - Form OP-REQ1 Updates:  COMPLETED

- **1a.** Updated question XII.B.1 to "No" and removed all references to voided standard permit registration 168456 from sections XII.B and XII.H
- **1b.** Updated NSR permit 2005 effective date in section XII.H from 06/10/2024 to **08/22/2025** to reflect the most recent permit revision

Item 2 - PBR Information Updates:  COMPLETED

- **2a.** Added missing PBRs (106.263/11/01/2001, 106.264/09/04/2000, and 106.373/09/04/2000) to the OP-PBR SUP form
- **2b.** Submitted complete updated OP-PBR SUP table set (all four tables) with consistent revision date of 10/31/2025

Item 3 - Unit FLTKTRMCB Monitoring:  EXTENSION REQUEST

- **Request for Extension:** Covestro respectfully requests an extension beyond November 5, 2025 for our response to the Unit FLTKTRMCB monitoring requirements under 30 TAC Chapter 115 (Loading and Unloading of VOC)
- **Reason:** The technical personnel with specific knowledge of this unit's operations and monitoring capabilities remain unavailable to provide the detailed analysis required for proper monitoring selection
- **Proposed Timeline:** We request an extension to **November 12, 2025** to ensure a comprehensive and accurate response
- This additional time will allow us to properly evaluate the pre-approved monitoring options versus case-by-case alternatives and submit a complete OP-MON response

Additional Submission: We have also included a revised OP-SUMR form that removes several Permits by Rule that were recently consolidated into NSR 2005 during the permit renewal process. These consolidated PBRs are shown in strikethrough format to document their removal from the Title V permit's NSR Authorization References table.

Next Steps:

- Await confirmation of extension approval for Unit FLTKTRMCB monitoring response
- Submit Unit FLTKTRMCB monitoring response by **November 12, 2025** (pending approval)
- Provide required documentation to EPA Region 6 (R6AirPermitsTX@epa.gov) and TCEQ regional office per Form OP-1 requirements

- Prepare for potential OP-CRO1 certification requirements as needed

We appreciate your understanding regarding this extension request and apologize for any inconvenience this may cause to the review timeline.

Please let me know if you need any clarification on our responses or have additional questions regarding the WDP review.

Thank you for your continued cooperation throughout this renewal process.

Best regards,
Felicia Powell

**This column may include Permit by Rule (PBR) numbers and version dates, PBR Registration numbers in brackets, Standard Permit Registration numbers, Minor NSR permit numbers, and Major NSR permit numbers.

Unresolved Items:

1. Form OP-REQ1:

- a. Standard permit registration 168456 was voided in July. That was the only standard permit registration used in the permit area. Please update question XII.B.1 to No and remove all other answers from section XII.B. Please remove 168456 from section XII.H. Provide the corrected pages.

The OP-REQ1 has been updated to remove the reference to standard permit 168456.

- b. For NSR permit 2005, section XII.H listed 06/10/2024 as the issuance date. That date was just when the renewal application was submitted (that row in the database starts with us sending the renewal notice and ends with renewal submittal). Therefore, this date needs to be updated. It will either be 05/02/2024, or, if you would like to incorporate the renewal/amendment that was just issued, then it will be 07/31/2025. Incorporating the newer action would be our preference since we try to have everything as up-to-date as possible during the Title V renewal. Please update section XII.H.

Covestro has updated the effective date of NSR 2005 to 8/22/2025, as this was the latest revision to the permit.

2. PBR Information, Forms OP-REQ1 and OP-PBR SUP:

- a. The OP-REQ1, section XII.I, included 106.263/11/01/2001, 106.264/09/04/2000, and 106.373/09/04/2000, but those three PBRs were not included on the OP-PBR SUP. Please add if in use. (Even if units are not in the permit, if a PBR authorizes them, they must be included on the OP-PBR SUP. There can be units/sources that are *only* on the OP-PBR SUP, if the PBR is their only requirement or potentially applicable requirement.) Or, if these PBRs are not used, please remove from the OP-REQ1.

The OP-PBR SUP form has been updated to include the units authorized by these PBRs.

- b. When you correct the OP-PBR SUP, please re-submit all four tables as a set and re-date them, even if a particular table is not changing. There is a permit term that will reference that submittal date so it needs to be the same for all pages.

The complete table is attached.

3. Unit FLT KTR MCB will need periodic monitoring for 30 TAC Chapter 115, Loading and Unloading of VOC. While 115.216 does have monitoring/recordkeeping language that would satisfy PM for certain control device types, it does not have adequate language for what this unit is using. 115.216(1)(C) only specifies that records of appropriate operating parameters shall be kept, but it does not specify a frequency. Please provide an OP-MON with your chosen monitoring. You may select from our pre-approved options or may propose case-by-case monitoring.

Covestro will provide a response to this question by November 5, as the unit personnel needed to finalize the response are currently out of the office.

In addition to the responses above, Covestro is submitting a revised OP-SUMR form. Several Permit by Rules were consolidated into NSR 2005 with the recently issued renewal. Those PBRs no longer need to be listed in the NSR Authorization References by Emissions Unit table of the Title V permit. The revised OP-SUMR form shows these PBRs in strikethrough to document the removal.

Attachments: Unresolved Items - O2101 Project 38111.docx; WDP O2101_Project 38111.docx

Hi Felicia,

I have conducted a technical review of the renewal application for Covestro LLC, Covestro, Polyurethanes I - MDI area. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **Monday, November 3, 2025**. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP. In addition, please address the items on the attached Unresolved Items list with that response.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This

submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Subject: Technical Review -- FOP O2101/Project 38111, Covestro LLC/Covestro Industrial Park Baytown Plant

Good morning,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O2101 for Covestro LLC, Covestro Industrial Park Baytown Plant. This application has been assigned Project No. 38111. Please address all correspondence pertaining to this permit application, including any updates, to me at the address in my email signature, and use both the Permit and Project reference numbers above to facilitate tracking. I have begun technical review and will inform you if I have further questions or need any updated forms.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Dear Senator Creighton:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-94.905,29.746944&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Brandon Creighton
