Dear Carolyn,

I am writing to request an extension for my certification, which had a deadline of yesterday.

Due to the current situation where, non-essential personnel have not been required in the office this week, I was unable to complete the certification by the original deadline. I am attending smoke school this morning as part of the certification process.

I am requesting an extension until noon on Friday to complete and submit my certification materials.

Thank you in advance for your consideration of this request. I appreciate your understanding given the current circumstances.

Best regards,

Felicia Powell

Hi Felicia,

Attached is a revised WDP with the following changes:

- 1) Updated Special Term & Condition 9 to have date from latest OP-PBRSUP.
- 2) Updated NSPS IIII requirements for FG11609400.
- 3) Added 106.264/09/04/2000 to NSR Authorization References.

This should resolve all items, so please provide certification for your response from January 6, 2026. That's the only update we had since the application that I see.

You may certify using one of the following options:

1. Submit Form OP-CRO1. You can use the Time Period option – just select a date range that includes January 6, 2026 – or you can use the Specific Date option. You may either:
  - a. Send me a scan of the signed form, with the wet ink original to follow in the mail, or
  - b. Upload the form in STEERS and have the RO or DAR sign/submit the update.

**OR**

2. Upload your email and attachments from January 6 in STEERS and have the RO or DAR sign/submit the update.

Please provide certification by **Tuesday, January 27, 2026.**

Thanks!

Hi Felicia,

I have conducted a technical review of the renewal application for Covestro LLC, Covestro, BC area. An electronic copy of the Working Draft Permit (WDP) is attached for your review.

## Unresolved Items

1. OP-REQ1: Please submit corrected pages to address the items below.
  - a. NSR permits 34017 and 33665 were listed in section XII.G (NSR Authorizations with FCAA § 112(g) Requirements). This means the permit contains case-by-case MACT requirements because no Part 63 subpart has been promulgated yet for the applicable source category. I do not think these permits contain that type of requirement. Please confirm. If they do not contain that type of requirement, then the permits should be listed in section XII.H instead, which includes all the other 30 TAC Chapter 116 permits.
  - b. Also, a revision was issued for NSR permit 34017 on 10/27/2022, so that should be listed for the issuance date instead of 06/12/2018.
  - c. Please add 106.264 to section XII.I. (This PBR is listed as part of registration number 175662 on Tables A and D of the OP-PBR SUP. If that is not accurate, please update the OP-PBR SUP instead.) Once confirmed, I will include in the permit.

**The above changes have been made to OP-REQ1. Please see attached revised pages 88 and 89 of the form.**

2. OP-PBR SUP: Tables B and D of the OP-PBR SUP have a typo in the row for 106.263 for MSS CHA. The version date is listed as 11/01/2000 instead of 11/01/2001. Please correct, re-date all four tables, and submit them as a set.

**Please find the revised OP-PBR SUP form attached.**

3. OP-UA02: We have added an additional question to Table 5c (NSPS IIII), the AECD question. Existing engine FG11609400 will need an answer for this question. For now I selected "No", but please provide an updated page so I can confirm.

**Please see the attached Table 5c for OP-UA2. Please note that the response to "Standard" has also been updated for FG11609400. Please update the applicability in the draft permit accordingly.**

Hi Felicia,

I have conducted a technical review of the renewal application for Covestro LLC, Covestro, BC area. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **Monday, December 22, 2025**. Please submit a written response by this deadline, even if you are not making any comments on the content of the WDP. In addition, please address the items on the attached Unresolved Items list with that response.

Please review the second portion of the "SOP Technical Review Fact Sheet" located at [http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title\\_V/sop\\_wdp\\_factsheet.pdf](http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf). This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

**As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at [R6AirPermitsTX@epa.gov](mailto:R6AirPermitsTX@epa.gov) and to the TCEQ regional office having jurisdiction. This**

submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

## Unresolved Items

1. OP-REQ1: Please submit corrected pages to address the items below.
  - a. NSR permits 34017 and 33665 were listed in section XII.G (NSR Authorizations with FCAA § 112(g) Requirements). This means the permit contains case-by-case MACT requirements because no Part 63 subpart has been promulgated yet for the applicable source category. I do not think these permits contain that type of requirement. Please confirm. If they do not contain that type of requirement, then the permits should be listed in section XII.H instead, which includes all the other 30 TAC Chapter 116 permits.
  - b. Also, a revision was issued for NSR permit 34017 on 10/27/2022, so that should be listed for the issuance date instead of 06/12/2018.
  - c. Please add 106.264 to section XII.I. (This PBR is listed as part of registration number 175662 on Tables A and D of the OP-PBRSUP. If that is not accurate, please update the OP-PBRSUP instead.) Once confirmed, I will include in the permit.
2. OP-PBRSUP: Tables B and D of the OP-PBRSUP have a typo in the row for 106.263 for MSS CHA. The version date is listed as 11/01/2000 instead of 11/01/2001. Please correct, re-date all four tables, and submit them as a set.
3. OP-UA02: We have added an additional question to Table 5c (NSPS IIII), the AECD question. Existing engine FG11609400 will need an answer for this question. For now I selected "No", but please provide an updated page so I can confirm.

**Subject:** Technical Review -- FOP O2103/Project 38179, Covestro LLC/Covestro Industrial Park Baytown Plant

Good morning,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O2103 for Covestro LLC, Covestro Industrial Park Baytown Plant. This application has been assigned Project No. 38148. Please address all correspondence pertaining to this permit application, including any updates, to me at the address in my email signature, and use both the Permit and Project reference numbers above to facilitate tracking. I have begun technical review and will inform you if I have further questions or need any updated forms.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1. This form will be requested at a later date.

If you choose to submit your application updates through STEERS, please notify me when these updates have been submitted.

TEXAS SENATE

Regulated Entity Number: RN100209931  
Customer Reference Number: CN601544042

Dear Senator Creighton:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-94.905,29.746944&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.
