Hi, Princess. Apologies for the delays in getting the certification. Please find the documents that will be transmitted and certified through STEERS. Please let me know if you have any questions. Thank you for your patience. In short, a PBR number was missing and three Unit ID numbers were updated on the NSR reference summary table, necessitating a new version of PBR SUP. Please find both the required Title V forms as well as a tracked changes version of the SOP that includes all changes.

Good afternoon, Princess, and Happy New Year!

Nucor Vulcraft applied for a minor NSR permit amendment for 21171. The permit was issued today.

Issuance of the minor NSR permit triggers a minor permit revision. I am developing the application now. In this particular instance, no applicable requirements are changing, and the only change to the Title V permit is the NSR and PSD issuance dates.

I have an off the wall question for your consideration. The PN letter for the renewal of O2763 has not been issued. Could I submit the change as an application update to the pending renewal? If I submit the change as an application update to you, it will eliminate the need to create a separate minor revision project in the IMS and eliminate the need for APD to conduct a separate public announcement. I thought I would reach out to see if that would be agreeable. If the renewal project is too far down the pipeline, I can easily submit the change as a new project through STEERS in any case. Let me know what you think. Thank you!

Good morning! The NSR permit update was submitted through STEERS. The OP-REQ1 Form and STEERS summary page are attached. The only change to the WDP is the issue date of NSR Permit No. 21171. There are no changes to the applicable requirements codified in the permit. Please let me know if I can provide anything further, and thank you very much for helping streamline this update. Subject: Working Draft Permit -- FOP O2763/Project 38257, Nucor Corporation/Nucor Vulcraft Group - Grapeland Division

Good afternoon,

I have conducted a technical review of *renewal* application for *Nucor Corporation, Nucor Vulcraft Group - Grapeland Division*. An electronic copy of the Working Draft Permit (WDP) is attached for your review. This WDP contains the TCEQ determination of applicable requirements based on the information submitted in your application, and any updates provided.

Please review the WDP and submit to me any comments you have on the working draft permit by **October 24, 2025**.

Please review the second portion of the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. This guidance contains important information regarding WDP review and comment procedures.

Note that a Certification by Responsible Official (Form OP-CRO1) for any uncertified application information, including application updates supporting the WDP comments, is required. After final review of the WDP, additional changes supported by application updates may require certification. I will advise you of these changes at a later date. Prior to transmittal of the Public Notice/Announcement Authorization Package, a duly signed OP-CRO1 form may be required which includes the specific dates or time-period of all submitted application documentation that was not previously certified. I will advise you of this requirement prior to sending the Public Notice/Announcement Authorization.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Contact me if you have any questions regarding the guidelines, the project schedule, or any other details regarding your application or permit.

Thank you for your cooperation.

Sincerely,

Subject: Technical Review -- FOP O2763/Project 38257, Nucor Corporation/Nucor Vulcraft Group - Grapeland Division

Good afternoon,

I have been assigned to the Federal Operating Permit (FOP) renewal application of Permit No. O2763 for Company Name, Site Name, Area Name. This application has been assigned Project No. 38257. Please address all correspondence pertaining to this permit application, including any updates, to me at the address below, and use both the Permit and Project reference numbers above to facilitate tracking.

In addition, I wanted to let you know that EPA has, on occasion, objected to Title V permits based on the following:

- a. NSR permit and PBR monitoring sufficiency –please refer to our periodic monitoring guidance for reference of monitoring that EPA has, so far, considered sufficient.
- b. Reference to confidential business information (CBI) in NSR permits and PBR submittals.
- c. High level terms in the SOP Applicable Requirement Summary Table. The high level terms are sometimes used in SOPs when unit attribute forms have not yet been updated due to regulatory amendments.
- d. Accuracy of PBR information provided on the supplemental table and in the permit – please refer to Forms OP-PBRSUP and OP-REQ1 Instructions.

If you have any questions or concerns on any of these items or think you need to do any additional updates, let me know and we can discuss further.

Application updates may now be submitted through Title V STEERS. Any application updates that are submitted by the RO/DAR through STEERS are certified and do not require the submittal of an original signature OP-CRO1. Application updates that are provided through email or physical mail require certification using an original signature OP-CRO1.

Please notify me when these updates have been submitted.

As required on Form OP-1, question IV.D, please remember the FOP application and all application updates must be submitted to EPA Region 6 at R6AirPermitsTX@epa.gov and to the TCEQ regional office having jurisdiction. This submittal information can be found on our website at [Where to Submit FOP Applications and Permit-Related Documents](#).

Please review the “SOP Technical Review Fact Sheet” located at http://www.tceq.texas.gov/assets/public/permitting/air/Guidance/Title_V/sop_wdp_factsheet.pdf. Dear Senator Nichols:

This letter notifies you that the Texas Commission on Environmental Quality has received a federal operating permit (FOP) renewal application for a site located in your district. As part of this permitting process, the applicant is required to publish a formal newspaper public notice. The notice will inform the public of their right to make comments or request a public hearing. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-95.48,31.503333&level=13>.

The FOP program regulates both new and existing major sources of emissions. The goal of the program is to improve air quality in Texas through increased compliance by codifying existing applicable regulatory requirements into the FOP. The FOP provides the applicant authorization to operate the equipment at the site. The FOP identifies and codifies air emission requirements (known as applicable requirements) that apply to the emission units at the site. The FOP does not authorize construction of emission units or emissions from those units. The New Source Review (NSR) permit is the mechanism for these authorizations.

The Honorable Robert Nichols
